## ***New CPI Series and Startup Fund***

The Ministry of Statistics and Programme Implementation (MoSPI) released the first Consumer Price Index (CPI) series with 2024 as its base year (2024=100) on 12 February 2026, replacing the series that used 2012 as its base. The revised basket has 358 weighted items, up from 299. Its weights are drawn from the Household Consumption Expenditure Survey 2023-24, and the number of major spending groups has risen from six to 12. Headline retail inflation for January 2026 was placed at 2.75 per cent on a provisional basis.

In February 2026, the Union Cabinet approved the Startup India Fund of Funds 2.0, with a corpus of Rs 10,000 crore to mobilise venture capital for startups in deep technology and innovation-led sectors. The government does not invest directly in startups. Instead, the scheme commits capital to SEBI-registered alternative investment funds (AIFs), which invest in recognised startups. The Small Industries Development Bank of India (SIDBI) is the first implementing agency, and the Department for Promotion of Industry and Internal Trade (DPIIT) oversees the scheme. DPIIT's operational guidelines sort eligible AIFs into categories that include deep-tech funds, micro venture capital funds, and funds backing innovation-led manufacturing.

### ***March 2026 science and space news***

In March 2026, Indian science and space agencies announced several research developments.

According to ISRO's official release dated 10 March 2026, the Indian Space Research Organisation and AIIMS New Delhi signed a framework memorandum of understanding for cooperation in space medicine and research. The agreement was signed and exchanged by Dinesh Kumar Singh, Director of ISRO's Human Spaceflight Centre, and Dr M Srinivas, Director of AIIMS New Delhi, in the presence of V

Narayanan, Chairman of ISRO and Secretary of the Department of Space.

The pact aims to promote joint research on human health, performance and safety during long-duration missions, such as the Bharatiya Antariksh Station and crewed missions to the Moon. The research areas named in the agreement include human physiology, cardiovascular and autonomic regulation, musculoskeletal health in microgravity, microbiome and immunology, genomics and biomarkers, and behavioural health.

In a separate development, the Zoological Survey of India described two new species of lichen moth from the eastern Himalaya, *Caulocera hollowayi* and *Asura buxa*, in the international taxonomic journal *Zootaxa*. The first was collected near Golitar in Sikkim and the second at Panijhora in West Bengal. The species were distinguished by features including body scales, bristle patterns and genital structures. Caterpillars of these moths feed almost exclusively on lichens, which are highly sensitive to air pollution, so officials said the moths can serve as indicators of air quality and of the health of mountain ecosystems. ZSI Director Dhriti Banerjee described it as a milestone in Indian taxonomy.

On 16 March 2026, the government approved quantum teaching facilities and laboratories at 23 academic institutions across the country. The decision was announced after a joint monthly meeting of secretaries of science ministries and departments, chaired by Dr Jitendra Singh and attended by Principal Scientific Adviser Prof. Ajay Kumar Sood. The approval is part of the National Quantum Mission. A further 100 quantum teaching laboratories and facilities are under consideration. The same meeting reviewed the India International Science Festival 2026, for which Pune has been proposed as the venue.
