

CLAT Express - July 2026: Practice Quizzes

MCQ: +1 for a correct answer, -0.25 for a wrong answer. TITA (type-in-the-answer): +1, no negative marking.

Multiple-choice passages

The 123 deal: MCQ check

Saudi Arabia and the United States have signed a civil nuclear cooperation agreement commonly called the 123 Agreement. The name comes from a section of a US law, the Atomic Energy Act of 1954. Under such an agreement, the United States can transfer nuclear reactors, nuclear materials, components, equipment, technology and technical expertise to a partner country. Because this framework is a legal precondition for significant nuclear cooperation, the deal therefore has significance beyond ordinary trade. Reports also link it to a regional political question, namely whether Riyadh will move toward ties with Israel. Saudi Arabia is a long-standing party to the Nuclear Non-Proliferation Treaty and has pursued a national atomic energy programme. Nuclear power is part of the Kingdom's wider energy planning. The new arrangement includes a bilateral safeguards system meant to ensure that civilian materials are not diverted to weapons. It also opens a possibility that Saudi Arabia could enrich uranium in facilities developed with US support, subject to agreed verification. The agreement is subject to a review period by the US Congress. Earlier, Washington had set a stricter standard for such cooperation, and the new deal relaxes parts of it. India's 2008 agreement with the United States is often cited as an earlier precedent in this field.

Q1.

For how many years has the US-Saudi 123 Agreement been signed?

- (A) 10 years
- (B) 20 years
- (C) 50 years
- (D) 30 years

Q2.

Who signed the US-Saudi 123 Agreement on behalf of the United States?

- (A) US Secretary of Defense
- (B) Secretary of State Antony Blinken
- (C) US National Security Advisor
- (D) US Energy Secretary Chris Wright

Q3.

Assertion (A): The US-Saudi agreement does not require Saudi Arabia to adopt the IAEA Additional Protocol.

Reason (R): The IAEA Additional Protocol gives the IAEA expanded inspection and verification powers.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Match List I with List II:

List I	List II
I. Energy diversification	A. Steady power supply for air-conditioning and cooling systems
II. Large-scale desalination	B. Access to advanced technology and regional energy power status
III. Meeting cooling demand	C. Provides the massive energy input for water desalination
IV. Strategic technology development	D. Reduces dependence on crude oil and natural gas for electricity

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-D, III-B, IV-A
- (B) I-A, II-B, III-C, IV-D
- (C) I-A, II-D, III-C, IV-B
- (D) I-D, II-C, III-A, IV-B

Q5.

Consider the following statements about the US-Saudi nuclear agreement:

- I. Saudi Arabia signed the Nuclear Non-Proliferation Treaty in 1988.
- II. The New Deal insists on the Gold Standard, including a ban on domestic uranium enrichment.
- III. The agreement is subject to a review period of 90 legislative days by the US Congress.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q6.

Consider the following statements about the US-Saudi agreement:

- I. It creates a framework for US companies to potentially provide Saudi Arabia with civilian nuclear reactors.
- II. It mandates that Saudi Arabia adopt the IAEA Additional Protocol.
- III. Saudi Arabia launched its National Atomic Energy Project in 2010.
- IV. Any uranium enrichment by Saudi Arabia would remain subject to agreed verification and safeguards.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Q7.

Under the new US-Saudi deal, which condition that the US had earlier insisted upon has been dropped?

- (A) Adopting the IAEA Additional Protocol
- (B) Joining the Non-Proliferation Treaty
- (C) Hosting permanent US military bases
- (D) Normalising relations with Israel

Q8.

Which Middle Eastern nation is described in the booklet as the only nation in the region with nuclear weapons?

- (A) Egypt
- (B) Iran
- (C) Saudi Arabia
- (D) Israel

PM's Indonesia Visit: MCQ Set

India's Prime Minister recently concluded a State Visit to Indonesia, an engagement that reinforced the India-Indonesia Comprehensive Strategic Partnership. During the visit, the Prime Minister was conferred Indonesia's highest civilian honour, a recognition that marks a notable moment in bilateral ties.

The two countries share a history of cooperation on the world stage. Both played leading roles in the Bandung Conference of 1955, and both later became founding members of a group of states that are not formally aligned with any major power bloc. Their cooperation today spans several sectors. In defence, Indonesia agreed to procure an Indian supersonic cruise missile system. In maritime matters, the two countries agreed to develop a port near one of the world's busiest sea routes. Steel cooperation is also in place, with an Indian company agreeing to set up a manufacturing facility in Indonesia.

Cooperation extends to public health and disaster management as well. Regulators of the two countries agreed to strengthen cooperation on medical products, and the two countries' national agencies signed a memorandum on preparedness and response. In agriculture, India announced a supply of high-quality wheat seeds to Indonesia. Taken together, these steps show how a bilateral partnership can combine defence, industry, health and food security.

Q1.

What is the name of Indonesia's highest civilian honour conferred on India's Prime Minister during the State Visit?

- (A) Bintang Republik Indonesia Adipurna (Star of Republic of Indonesia)
- (B) Star of ASEAN Excellence
- (C) Padma Vibhushan of Indonesia
- (D) Order of the Golden Kris

Q2.

The Prime Minister became which numbered recipient of Indonesia's highest civilian honour?

- (A) 30th
- (B) 40th
- (C) 25th
- (D) 35th

Q3.

How many of the following statements are correct?

Statement I: Both countries declared 2026-27 the Tagore-Dewantara Year of Cultural and Educational Diplomacy.

Statement II: The Prime Minister became the first Indian Prime Minister to receive Indonesia's highest civilian honour.

Statement III: India will provide technical support for conservation of the Prambanan Temple Complex.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q4.

Which Indonesian counterpart signed a disaster preparedness MoU with India's National Disaster Management Authority?

- (A) Disaster Management Agency
- (B) Indonesian Ministry of Defence
- (C) National Search and Rescue Agency
- (D) Indonesian National Police

Q5.

Which of the above statements is/are correct?

I. Indonesia is India's second largest trading partner within ASEAN.

II. The Prambanan Temple Complex is the largest Hindu temple complex in Southeast Asia.

III. Indonesia will post a Liaison Officer at the Information Fusion Centre - Indian Ocean Region.

- (A) II and III only
- (B) I and II only
- (C) I and III only
- (D) I, II and III

Q6.

Match List I with List II:

List I	List II
I. BrahMos procurement contract	A. Near the entrance to the Strait of Malacca
II. Wheat seed supply (DWR-162)	B. Around USD 200 million
III. Stainless steel slab facility	C. 100 tonnes of wheat seeds
IV. Sabang Port	D. Steel Authority of India Limited

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-C, III-B, IV-A
- (B) I-B, II-C, III-D, IV-A
- (C) I-D, II-B, III-A, IV-C
- (D) I-A, II-D, III-B, IV-C

Q7.

Indonesian President Prabowo Subianto was invited as Chief Guest for India's Republic Day in which year?

- (A) 2023
- (B) 2024
- (C) 2026
- (D) 2025

Removal Conditions Check

The 130th Constitution Amendment Bill, 2025, is one of three Bills tabled by the Home Minister, and a Joint Parliamentary Committee is currently examining it. The Bill responds to a situation in which a political office-holder continues in office while facing serious criminal charges. It proposes that a minister who is held in custody on such charges can be removed from office. The proposal reaches several categories of leaders. These include Union Ministers, State Ministers and Chief Ministers, and also the Chief Minister and Ministers of Delhi, Ministers of Union Territories and Ministers of Jammu & Kashmir. Each category is governed by its own legal basis, so the same principle is applied through different constitutional and statutory provisions. The Bill specifies who holds the removal power in each case, and, for Union Ministers, it also sets out what follows if the Prime Minister gives no advice. Some details of the removal process are linked to the length of custody and to the seriousness of the offence. The Bill has drawn criticism from those who fear that it could be misused against opposition-led governments. Supporters argue that it keeps leaders from retaining power while facing serious charges, which is a question of constitutional morality. Together, these rules make the Bill a detailed scheme for ministers facing criminal proceedings.

Q1.

Under the 130th Amendment Bill, a Union Minister who is arrested and detained for how many consecutive days may be removed?

- (A) 15 days
- (B) 21 days
- (C) 45 days
- (D) 30 days

Q2.

If the Prime Minister gives no advice on removing a Union Minister detained for 30 consecutive days, what happens?

- (A) The Minister automatically ceases to hold office on the 31st day
- (B) The matter is referred to the Supreme Court
- (C) The President takes independent action
- (D) Parliament votes on the removal

Q3.

Under which legislation are the Bill's provisions extended to Jammu & Kashmir ministers?

- (A) J&K Special Status Act, 2020
- (B) Government of J&K Act, 2018
- (C) J&K Reorganisation Act, 2021
- (D) J&K Reorganisation Act, 2019

Q4.

Assertion (A): A Union Minister removed under the Bill can be reappointed after release from custody.

Reason (R): If the Prime Minister gives no advice, the Minister automatically ceases to hold office on the 31st day.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Article 75	A. Union Territory Ministers
II. Article 164	B. Delhi Chief Minister and Ministers
III. Article 239AA	C. Union Ministers
IV. Government of Union Territories Act, 1963	D. State Ministers and Chief Ministers

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-B, III-C, IV-D
- (B) I-B, II-C, III-A, IV-D
- (C) I-C, II-D, III-B, IV-A
- (D) I-C, II-A, III-B, IV-D

Q6.

Which of the following statements about the Bill's removal rules are correct?

- I. The Bill covers Union Ministers, State Ministers, Chief Ministers, Delhi Ministers, Union Territory Ministers and Jammu & Kashmir Ministers.
- II. The President is the removal authority for Chief Ministers.
- III. Jammu & Kashmir Ministers are covered under the J&K Reorganisation Act, 2019.

Which of the above statements is/are correct?

- (A) I and III only
- (B) I and II only
- (C) II and III only
- (D) I, II and III

Q7.

How many of the following statements about the Bill are correct?

- I. The President removes a Union Minister on the advice of the Prime Minister.
- II. The Governor is the removal authority for Chief Ministers.
- III. The Election Commission of India is the removal authority for State Ministers.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None of the above

Q8.

For Delhi Ministers, who is the removal authority under the provisions of the 130th Amendment Bill?

- (A) President of India
- (B) Chief Minister of Delhi
- (C) Union Home Minister
- (D) Lieutenant Governor

Ladakh and the AHDC expansion

Ladakh became a Union Territory without a Legislative Assembly in 2019, so decentralised local institutions have become central to governance. The Ladakh Administration has now approved the setting up of Autonomous Hill Development Councils across the region. Councils in each district will be set up through an official notification issued by the Government. This decision followed an in-principle agreement with the Ministry of Home Affairs, which aims to extend constitutional safeguards under Article 371 to the Union Territory. Until now, elected councils had existed in only a few parts of Ladakh, and the expansion will extend them to all districts. The people of Ladakh have raised several demands, including inclusion under the Sixth Schedule for constitutional

protection, restrictions on land ownership to prevent an outside influx, and a Legislative Assembly for representative governance. Article 371 and the articles up to 371J give special constitutional safeguards to certain States and regions, with the aim of protecting indigenous culture, customary laws and local employment. Separately, the Centre has changed the rules for jobs and educational admissions in Ladakh through a new reservation regulation, which came into force shortly after it was approved. The regulation also modifies the reservation law of Jammu and Kashmir as applied to the region. The councils function under a separate Act and their powers are mainly administrative and developmental.

Q1.

How many districts of Ladakh will now have Autonomous Hill Development Councils (AHDCs)?

- (A) 3
- (B) 5
- (C) 9
- (D) 7

Q2.

Ladakh has been administered by the Government of India as a Union Territory since which date?

- (A) 31 October 2019
- (B) 5 August 2019
- (C) 26 October 2019
- (D) 26 January 2020

Q3.

Before the expansion, elected Autonomous Hill Development Councils existed only in which two districts of Ladakh?

- (A) Leh and Kargil
- (B) Nubra and Zaskar
- (C) Sham and Drass
- (D) Leh and Changthang

Q4.

Assertion (A): Each AHDC can set up its own courts to decide disputes.

Reason (R): AHDCs have no judicial authority.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Ladakh's traditional name, meaning Land of High Passes	A. 85 per cent
II. Total reservation cap set by the 2025 regulation	B. Section 3(1)
III. Provision empowering the Government to establish a Council in every district	C. Part XXI
IV. Articles 371 to 371J of the Constitution fall under this Part	D. Maryul

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-B, III-A, IV-C
- (B) I-D, II-A, III-B, IV-C
- (C) I-A, II-B, III-C, IV-D
- (D) I-A, II-C, III-B, IV-D

Q6.

Consider the following statements about Autonomous Hill Development Councils:

- I. Each AHDC can levy taxes, fees and other lawful charges.
- II. AHDCs can establish Village Courts under customary tribal laws.
- III. AHDCs can exercise authority over land allotment.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and II only
- (C) I and III only
- (D) I, II and III

Q7.

Consider the following statements:

- I. Ladakh shares a border with Gilgit-Baltistan (Pakistan).
- II. Before the expansion, elected councils existed in Changthang and Nubra.
- III. Kargil is the winter capital of Ladakh.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None of the above

Q8.

Under which Articles of the Constitution do 6th Schedule Autonomous District Councils derive their constitutional status?

- (A) Articles 244(2) and 275(1)
- (B) Articles 243 and 244
- (C) Articles 245 and 246
- (D) Articles 371 and 371A

Delhi EV Policy 2.0 Overview Quiz

The Government of the National Capital Territory of Delhi has notified the Delhi Electric Vehicle Policy 2.0, which is scheduled to come into force from 1 July 2026. The policy will remain effective until 31 March 2030. It builds upon the achievements of the Delhi EV Policy 2020 and provides a comprehensive roadmap for transforming Delhi into a leading electric mobility hub. A central aim is to reduce vehicular emissions by encouraging the electrification of high-usage and high-emission transport segments. The policy sets an electrification target of at least 30 per cent of Delhi's total vehicle fleet by 31 March 2030. Several segments have been identified as priorities, including two-wheelers, three-wheelers, commercial goods carriers, school buses, app-based aggregator fleets and government-owned transport fleets. The policy also seeks to promote the widespread adoption of zero-emission vehicles, reduce urban air pollution and greenhouse gas emissions, and encourage sustainable public and commercial transport. It is linked to India's clean energy and climate commitments. The idea of electric mobility is not new in India. The National Electric Mobility Mission Plan, launched in 2013, set out an earlier national plan to expand the number of electric vehicles on the roads. Delhi's policy therefore sits within a longer national effort to shift transport away from petrol and diesel vehicles.

Q1.

Which department is responsible for financial support and investment under Delhi EV Policy 2.0?

- (A) Delhi Transport Department
- (B) Delhi Pollution Control Committee
- (C) Delhi Transco Limited
- (D) Ministry of Road Transport and Highways

Q2.

Assertion (A): The policy sets an electrification target of at least 30 per cent of Delhi's total vehicle fleet by 31 March 2030.

Reason (R): Government financial support under the policy is restricted to battery electric vehicles only.

- (A) Both A and R are true and R explains A
- (B) Both A and R are true but R does not explain A
- (C) A is true but R is false
- (D) A is false but R is true

Q3.

Match List I with List II:

List I	List II
I. Registration restricted to electric 3-wheelers and N1 trucks	A. 30% by 2030
II. Electric-only registration of new 2-wheelers	B. 10% of school bus fleet within 2 years
III. School bus conversion target within 2 years	C. 1 April 2028
IV. Long-term school bus electrification target	D. 1 January 2027

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-B, III-A, IV-D
- (B) I-C, II-A, III-B, IV-D
- (C) I-A, II-D, III-C, IV-B
- (D) I-D, II-C, III-B, IV-A

Q4.

Consider the following statements about Delhi EV Policy 2.0:

- I. Delhi Transco Limited is responsible for infrastructure development under the policy.
- II. Government financial support under the policy extends to hybrid vehicles.
- III. The total planned investment under the policy is approximately 15,000 crore.

Which of the above statements is/are correct?

- (A) I and III only
- (B) I and II only
- (C) II and III only
- (D) I, II and III

Q5.

Within how many years of the policy's implementation must schools convert at least 10 per cent of their bus fleet into electric buses?

- (A) 1 year
- (B) 3 years
- (C) 4 years
- (D) 2 years

Q6.

Consider the following statements about Delhi EV Policy 2.0:

1. The policy plans installation of over 30,000 public charging stations across Delhi.
2. Government financial support is available to hybrid vehicles under the policy.
3. Existing petrol and diesel vehicles registered in Delhi may operate until the end of their prescribed service life.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) All three
- (D) None

Q7.

Which of the following is listed as a key objective of PM E-DRIVE?

- (A) Reduce upfront EV cost
- (B) Ban all private cars from Delhi roads
- (C) Increase petrol and diesel vehicle registrations
- (D) Promote hydrogen fuel cell buses

Q8.

Which ministry is the nodal ministry for PM E-DRIVE (2024-2026)?

- (A) Ministry of Heavy Industries
- (B) Ministry of New and Renewable Energy
- (C) Ministry of Road Transport and Highways
- (D) Ministry of Power

ISA quick check

The International Solar Alliance is an international body set up to promote solar energy across the world. It is aimed at solar-rich countries that lie between the Tropic of Cancer and the Tropic of Capricorn, and it is described as a treaty-based intergovernmental organisation. The alliance states its aim as ensuring clean, reliable and affordable access to solar energy, which it links to sustainable growth and an improved quality of life. Its vision is a short phrase that asks members to work together to make the sun brighter. Membership rules have also widened over time. Countries from outside the tropics are allowed to join, although they are excluded from voting rights. Recognition from the wider United Nations system has also followed over the years. This makes the alliance a platform for solar-rich nations to coordinate their efforts. The alliance's mission goes beyond membership. It aims to provide clean energy access to a very large population and to mitigate solar-related emissions across the globe. It also seeks to promote low-cost, sustainable and equitable solar systems in the least developed countries and small island developing states. Together, these features give the alliance a clear geographic base, an inclusive membership and a practical focus on people who need energy access.

Q1.

Where is the headquarters of the International Solar Alliance located?

- (A) New Delhi
- (B) Mumbai
- (C) Ahmedabad
- (D) Gurugram

Q2.

Which body granted observer status to the ISA in 2021?

- (A) UN General Assembly
- (B) World Bank
- (C) UN Security Council
- (D) IRENA

Q3.

Assertion (A): The ISA's membership is open only to solar-rich countries lying between the tropics.

Reason (R): After the 2020 Amendment, all UN Member States are eligible to join.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Match List I with List II:

List I	List II
I. Launch year of the ISA	A. USD 1 trillion
II. Solar investment mission by 2030	B. 2021
III. UN General Assembly observer status	C. 1,000 GW
IV. Solar capacity to be installed	D. 2015

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-A, III-C, IV-D
- (B) I-D, II-A, III-B, IV-C
- (C) I-D, II-B, III-C, IV-A
- (D) I-D, II-C, III-A, IV-B

Q5.

Which of the above statements is/are correct?

- I. The ISA was launched in 2015 by India and France during COP21.
 - II. Non-tropical countries are barred from becoming ISA members.
 - III. After the 2020 Amendment, all UN Member States are eligible to join.
- (A) I and III only
 - (B) I and II only
 - (C) II and III only
 - (D) I, II and III

Q6.

How many of the following statements about the ISA are correct?

- I. The ISA aims to mobilise USD 1 trillion in solar investments by 2030.
 - II. The ISA has 112 members and 15 signatory countries.
 - III. The ISA's headquarters is in Ahmedabad.
- (A) Only one
 - (B) Only two
 - (C) Only three
 - (D) None of the above

Q7.

Launched jointly by India and which country in 2015 during COP21?

- (A) Germany
- (B) United Kingdom
- (C) France
- (D) United States

Q8.

In which year did India first propose the OSOWOG concept during the ISA's Inaugural Assembly?

- (A) 2015
- (B) 2016
- (C) 2017
- (D) 2018

AAY Amendment Recall

The Union Government has proposed an amendment to the National Food Security Act, 2013, that would change how foodgrains are allocated to households under the Antyodaya Anna Yojana. At present, each AAY household receives a fixed quantity of foodgrain each month, no matter how many members it has. The government argues that this household-based system creates inequities within the AAY category, because small households end up receiving more foodgrain per person than larger households. Under the proposal, the entitlement would be worked out for each individual in the household, with an overall ceiling for each household. The government expects this to make distribution more proportional to household size and to align allocation more closely with nutritional requirements. The change would also reduce disparities between AAY households and Priority Households. The amendment, however, does not deal with inclusion errors. The National Food Security Act was enacted to ensure food and nutritional security through subsidised foodgrains delivered by a targeted system. The households concerned belong to the poorest group within the Act. The proposal is still under consideration and is discussed here as a change in the making, so its final shape may differ from what is described above.

Q1.

Which Section of the National Food Security Act 2013 does the proposed amendment seek to modify?

- (A) Section 2(1)
- (B) Section 5(1)
- (C) Section 3(1)
- (D) Section 7(2)

Q2.

Under the proposed amendment, how much foodgrain does each individual in an AAY household receive per month?

- (A) 7 kg
- (B) 5 kg
- (C) 10 kg
- (D) 35 kg

Q3.

What is the maximum foodgrain entitlement cap per AAY household per month under the proposed amendment?

- (A) 25 kg
- (B) 30 kg
- (C) 50 kg
- (D) 35 kg

Q4.

Match List I with List II:

List I	List II
I. Individual entitlement under the proposal (AAY)	A. 5 kg per person per month
II. Household ceiling under the proposal	B. 2020
III. PHH entitlement under NFSA 2013	C. 7 kg per individual per month
IV. Year PMGKAY was launched	D. 35 kg per household per month

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-A, III-D, IV-B
- (B) I-B, II-A, III-C, IV-D
- (C) I-C, II-D, III-A, IV-B
- (D) I-D, II-B, III-A, IV-C

Q5.

How many of the following statements about the proposed NFSA amendment are correct?

- I. It seeks to modify Section 3(1) of the NFSA 2013.
 - II. The proposed AAY ceiling is 50 kg per household per month.
 - III. Per capita inequality is cited as a reason for the change.
 - IV. Priority Household beneficiaries currently receive 5 kg per person per month.
- (A) Only one
 - (B) All four
 - (C) Only two
 - (D) Only three

Q6.

Under the current NFSA 2013 arrangement, how much foodgrain does every AAY household receive per month, irrespective of family size?

- (A) 35 kg
- (B) 7 kg
- (C) 5 kg
- (D) 50 kg

Tariffs, market access and trade deal terms

The India-UK Comprehensive Economic and Trade Agreement, known as CETA, is described as a next-generation free trade agreement. It goes beyond conventional tariff reduction and addresses market access, regulatory transparency and economic partnership. The scope of the deal is wide, covering trade in goods and services along with digital trade and investment. The framework also reaches government procurement, labour, environment, innovation, small and medium enterprises and regulatory cooperation. In this sense the agreement is broader than a simple list of duty cuts, since these areas show it addresses far more than goods moving across borders.

Tariff policy in the deal aims to balance two goals. Domestic industry is protected, while foreign goods gain access to the market in phases rather than all at once. Passenger vehicles show this balance clearly, since imports of these vehicles are handled through a quota arrangement.

The deal is also tied to predictability in trade. Countries are looking for stable and predictable trade relations amid geopolitical tensions and tariff disputes. A bilateral agreement offers a framework that reduces this uncertainty and supports long-term growth for both partners.

Taken together, these features show that the agreement combines tariff reduction with wider economic cooperation between the two countries.

Q1.

Under the India-UK FTA, India plans to cut duties on what percentage of its tariff lines?

- (A) 75%
- (B) 85%
- (C) 90%
- (D) 95%

Q2.

What percentage of Indian exports will receive zero-duty access to the UK market under the FTA?

- (A) 99%
- (B) 90%
- (C) 95%
- (D) 100%

Q3.

Match List I with List II:

List I	List II
I. Auto import tariff under the quota system	A. 100 additional annual visas
II. Whisky and gin tariff in the 10th year	B. 10%
III. Annual visas for Indian professionals	C. USD 56.8 billion
IV. Bilateral trade value	D. 40%

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-B, III-D, IV-A
- (B) I-B, II-D, III-A, IV-C
- (C) I-D, II-C, III-B, IV-A
- (D) I-C, II-D, III-B, IV-A

Q4.

Consider the following statements about the India-UK FTA:

- I. India will cut duties on 90% of tariff lines under the FTA.
- II. Auto import tariffs will be cut to 25% under the quota system.
- III. India rejected data exclusivity in its 2024 FTA with EFTA.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q5.

Consider the following statements about the India-UK FTA:

- I. Zero-duty access is granted for 99% of Indian exports to the UK.
- II. Bilateral trade is currently USD 44.2 billion.
- III. Whisky and gin tariffs fall from 150% to 75% at the start.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None of the above

Q6.

India-UK bilateral trade is expected to double by which year?

- (A) 2027
- (B) 2028
- (C) 2035
- (D) 2030

Q7.

The UK ranks as which largest export destination for India?

- (A) 4th
- (B) 2nd
- (C) 3rd
- (D) 1st

Polymer Notes: Concept and History

Currency notes in India are usually printed on cotton-based banknote paper, but the Reserve Bank of India is now looking at a different material. The RBI has revived a proposal to introduce durable polymer-based banknotes, which are made from a specialised plastic material instead of paper. The Bharatiya Reserve Bank Note Mudran Private Limited, a printing subsidiary wholly owned by the RBI, has invited global bids for a polymer substrate suitable for making such notes. Australia has already gone further, having introduced a complete series of polymer banknotes. Supporters of the idea point to the durability of plastic notes, which can withstand frequent use in circulation. The challenges, however, include cost, the need for new machines and the handling of plastic waste. The proposal therefore combines an old policy idea with a fresh push from the central bank. Polymer notes are therefore a topic of both economic and policy interest, since they involve printing, cost and environmental questions. The discussion covers the material, the printing arrangements and the financial trade-offs involved. Understanding how polymer notes are made, who prints them and what trade-offs they involve is useful for economic and current affairs preparation.

Q1.

In which year did Australia introduce a complete series of polymer banknotes?

- (A) 1980
- (B) 1984
- (C) 1988
- (D) 1992

Q2.

Consider the following statements about polymer banknotes:

- I. Polymer notes are made from BOPP, which replaces cotton-based banknote paper.
- II. Polymer notes cost less to produce than conventional paper currency.
- III. Polymer substrates allow advanced anti-counterfeiting features that are harder to replicate than on paper.

Which of the above statements is/are correct?

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

Q3.

Whose signature appears on the One Rupee Note in India?

- (A) Finance Secretary
- (B) Governor of RBI
- (C) President of India
- (D) Finance Minister

Q4.

Which of the following is NOT listed as a key characteristic of polymer banknotes?

- (A) More resistant to tearing
- (B) Less vulnerable to water and moisture
- (C) Biodegradable within five years
- (D) Capable of incorporating advanced anti-counterfeiting features

Q5.

Match List I with List II:

List I	List II
I. Reserve Bank of India Act	A. Design, minting and circulation of coins
II. Coinage Act, 2011	B. Domestic manufacture of banknote paper
III. Bank Note Paper Mill India Pvt. Ltd.	C. Acceptable quality of notes and coins for the public
IV. Clean Note Policy	D. Principal legal framework for issuing banknotes

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-D, III-C, IV-A
- (B) I-B, II-A, III-C, IV-D
- (C) I-D, II-A, III-C, IV-B
- (D) I-D, II-A, III-B, IV-C

Q6.

In which year was the Bharatiya Reserve Bank Note Mudran Private Limited established?

- (A) 1985
- (B) 2000
- (C) 1990
- (D) 1995

Summit Outcomes Test

In July 2026, India and Japan held their 16th Annual Summit in New Delhi. The meeting came during the first official visit to India by Japan's Prime Minister, Sanae Takaichi, and it gave both governments a chance to review several areas of partnership at once. On defence, the two sides advanced a project connected with radio antenna technology and reached an agreement in principle on its remaining technical aspects. Leaders also decided to hold another high-level security dialogue later in the year, one that brings together senior ministers from both countries. On the economic front, the summit focused on secure and resilient supply chains. The two governments adopted a joint declaration covering strategic sectors, and they launched a cooperative programme linked to biogas and organic fertiliser, which fits India's wider energy goals. Trade and investment were also central to the talks. The two countries agreed to speed up the review of an existing trade pact, and they signed a memorandum that supports a major investment package. Finally, Japan offered support for India's plans to host a major United Nations conference on disaster risk reduction. This support carries forward the spirit of the Sendai Framework for Disaster Risk Reduction. Taken together, these outcomes show how the partnership now covers several sectors at once.

Q1.

What investment target for Japan in India was mentioned in the summit outcomes?

- (A) ¥10 Trillion
- (B) ¥5 Trillion
- (C) ¥15 Trillion
- (D) ¥20 Trillion

Q2.

The India-Japan Cooperative Biogas for Growth Initiative supports India's objective of establishing how many Biogas and Organic Fertiliser Plants?

- (A) 500
- (B) 750
- (C) 2,000
- (D) 1,000

Q3.

In which year is India to host the 4th UN World Conference on Disaster Risk Reduction, for which Japan extended support?

- (A) 2025
- (B) 2027
- (C) 2030
- (D) 2035

Q4.

Assertion (A): The India-Japan 2+2 Ministerial Meeting will be held at the level of foreign ministers alone.

Reason (R): The India-Japan 2+2 Dialogue is conducted at the level of defence and foreign ministers.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Joint Declaration on Economic Security Cooperation	A. Defence and Security Cooperation
II. Cooperative Biogas for Growth Initiative	B. Artificial Intelligence and Emerging Technologies
III. Joint Statement on Artificial Intelligence Cooperation	C. Energy Security and Clean Energy Partnership
IV. UNICORN project	D. Economic Security and Resilient Supply Chains

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-A, III-D, IV-B
- (B) I-D, II-C, III-B, IV-A
- (C) I-A, II-D, III-B, IV-C
- (D) I-A, II-C, III-B, IV-D

Q6.

How many of the following statements about the summit outcomes are correct?

- I. The Cooperative Biogas for Growth Initiative targets 2,000 plants.
- II. India and Japan adopted a Joint Statement on Artificial Intelligence Cooperation.
- III. The target for Japanese investment in India is ¥5 Trillion.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q7.

Consider the following statements about the Joint Declaration on Economic Security Cooperation:

- I. Pharmaceuticals is one of its priority areas.
- II. Defence manufacturing is one of its priority areas.
- III. Clean energy technologies is one of its priority areas.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

SDG evolution check

Sustainable development began as a defined concept before it became a set of global targets. A commission first defined the idea, and global meetings then built on that definition over the following decades. Early efforts focused on a small group of development goals. Later conferences followed up on these efforts, and they pushed the world to think beyond the original list. The eventual result was a broader framework covering poverty, health, education, gender equality, climate and peace. This framework was built as one agenda, with goals that were meant to be integrated with one another. Each annual review uses a score on a common scale, so that countries can be compared and their results can be read by policymakers and the public. Reviews of this kind are published every year, and they show how far each nation has moved toward the goals. Some regions have improved faster than others, while some targets have moved backwards, which shows that progress has been uneven. Looking back, the path from a concept to a framework took several decades and many meetings. Such a wide agenda made it possible to track progress across many different areas, even though it also made measurement more demanding.

Q1.

In which year was the 2030 Agenda for Sustainable Development adopted?

- (A) 2000
- (B) 2012
- (C) 2015
- (D) 2002

Q2.

How many Specific Targets support the 17 Sustainable Development Goals?

- (A) 169
- (B) 17
- (C) 193
- (D) 18

Q3.

Which 2002 summit is also known as Rio+10?

- (A) Copenhagen Summit
- (B) Paris Conference
- (C) Johannesburg World Summit
- (D) Nairobi Conference

Q4.

Assertion (A): The 2030 Agenda was adopted at the 1992 Earth Summit in Rio de Janeiro.

Reason (R): The UN Conference on Environment and Development was held in Rio de Janeiro, Brazil.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Brundtland Commission	A. Known as Rio+10
II. Johannesburg World Summit	B. 17 SDGs and 169 targets
III. Rio+20 Conference	C. Defined the concept of sustainable development
IV. 2030 Agenda	D. Laid foundation for the SDGs

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-A, III-D, IV-B
- (B) I-D, II-C, III-A, IV-B
- (C) I-B, II-A, III-C, IV-D
- (D) I-A, II-B, III-C, IV-D

Q6.

Consider the statements:

- I. The Millennium Development Goals were adopted in 2000 with eight goals.
- II. The Johannesburg Summit was held in 1987.
- III. Rio+20 laid the foundation for the SDGs.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and II only
- (C) I and III only
- (D) I, II and III

Q7.

How many of the following statements are correct?

- I. The Brundtland Commission defined sustainable development in 1987.
- II. The Rio+20 Conference was held in 2002.
- III. The Millennium Development Goals were adopted in 2000.
- IV. The 2030 Agenda was adopted in 2012.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q8.

How many UN Member States adopted the 2030 Agenda for Sustainable Development?

- (A) 167
- (B) 169
- (C) 191
- (D) 193

Vikram-1 Mission Check

Skyroot Aerospace, a company based in Hyderabad, has launched Vikram-1, India's first privately built orbital launch vehicle. The rocket flew its maiden mission, called Mission Aagaman, from the Satish Dhawan Space Centre at Sriharikota. The flight placed payloads into Low Earth Orbit and made India the third country to demonstrate private orbital launch capability. Vikram-1 carries a combination of scientific, technological, commercial and symbolic payloads. Vikram-1 was developed by Skyroot Aerospace, a company whose developers include Pawan Kumar Chandana and Naga Bharath Daka. Rockets of two broad kinds help explain the achievement. A sub-orbital rocket travels into space but does not place a satellite into orbit. An orbital rocket places a satellite into orbit around the Earth. The difference matters because it separates rockets that only reach space from rockets that carry satellites into orbit. The mission was authorised and facilitated by IN-SPACe, which works as a single-window regulator for private space activities. The rocket is named after Dr Vikram Sarabhai, who is regarded as the father of India's space programme. Mission Aagaman was the maiden flight of this four-stage orbital launch vehicle. Low Earth Orbit is the region close to the Earth's surface. Skyroot Aerospace is also recognised as India's first unicorn in the space sector.

Q1.

Which engine powers the upper stage of Vikram-1 for precise orbital insertion and manoeuvres?

- (A) Kalam solid engine
- (B) Agnilet engine
- (C) 3D-printed liquid-fuelled Raman Engine
- (D) Advanced solid propellant motor

Q2.

What structural material does Vikram-1 extensively use?

- (A) All-carbon composite structures
- (B) Titanium alloy structures
- (C) Aluminium-lithium alloy structures
- (D) Steel-reinforced composite structures

Q3.

Assertion (A): Vikram-1 is a sub-orbital rocket that never reaches orbit.

Reason (R): Sub-orbital rockets go to space but do not place a satellite into orbit.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Match List I with List II:

List I	List II
I. Vikram-S	A. India's first privately developed launch pad
II. Agnilet	B. India's first privately developed sub-orbital rocket
III. Dhanush	C. India's first lab-grown diamond jewellery sent into space
IV. Cosmic Bloom	D. World's first single-piece 3D-printed semi-cryogenic engine

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-B, III-C, IV-A
- (B) I-B, II-D, III-A, IV-C
- (C) I-B, II-A, III-D, IV-C
- (D) I-A, II-D, III-C, IV-B

Q5.

Consider the following statements:

- I. The first three stages of Vikram-1, called Kalam Engines, use advanced solid propellants.
- II. The upper stage uses a 3D-printed liquid-fuelled Raman Engine for orbital insertion and manoeuvres.
- III. Vikram-1 is named after A.P.J. Abdul Kalam.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q6.

How many of the following statements are correct?

- I. Falcon-9 is the world's first reusable two-stage rocket, designed and manufactured by SpaceX.
- II. The Indian Space Policy 2023 kept the complete space value chain closed to non-government entities.
- III. The IN-SPACe Seed Fund Scheme provides grants up to Rs 1 crore to startups and MSMEs.

- (A) Only two
- (B) Only one
- (C) Only three
- (D) None

Q7.

Low Earth Orbit, the region where Vikram-1 placed its payloads, lies between which altitudes above Earth's surface?

- (A) Between 100 km and 1,000 km
- (B) Between 200 km and 3,000 km
- (C) Between 500 km and 5,000 km
- (D) Between 160 km and 2,000 km

Q8.

The 18K gold rocket model carried as a payload on Vikram-1 contains micro-sculptures of which three persons?

- (A) Dr Homi J. Bhabha, Dr Vikram Sarabhai and Dr A.P.J. Abdul Kalam
- (B) Dr Vikram Sarabhai, Dr Homi J. Bhabha and Sir C.V. Raman
- (C) Sir C.V. Raman, Dr Homi J. Bhabha and Dr Satish Dhawan
- (D) Sir C.V. Raman, Dr Vikram Sarabhai and Dr A.P.J. Abdul Kalam

How the hydrogen train works

India has inaugurated its first indigenously built hydrogen-powered train, which will run on a route connecting Jind and Sonipat in Haryana. The train is configured as a trainset of several coaches, and its power comes from a fuel cell propulsion system. Inside the train, fuel cells generate electricity through a reaction between hydrogen and oxygen. This electricity is not always used at once, so the surplus is stored in batteries for later use. The hydrogen itself is carried in cylinders that keep the gas compressed until the propulsion system needs it. Electric traction motors then convert electrical energy into mechanical energy, and this mechanical energy drives the train forward. The train's approved operating speed is set below its design speed, so it is allowed to run more slowly than it is built to run. Hydrogen is the lightest chemical element and is the most abundant element in the normal matter of the universe. Indian Railways has also introduced other technologies in recent years, including the KAVACH safety system and the Namo Bharat Rapid Rail. In short, the fuel cells are the source of power, the batteries store surplus power, the cylinders store the fuel, and the motors drive the train.

Q1.

What is the approved operational speed of India's first indigenous Hydrogen-powered Train (in km/h)?

- (A) 75 km/h
- (B) 110 km/h
- (C) 90 km/h
- (D) 100 km/h

Q2.

What is the rating of the Hydrogen Fuel Cell Propulsion System that powers the train (in kW)?

- (A) 800 kW
- (B) 1,000 kW
- (C) 1,200 kW
- (D) 1,500 kW

Q3.

Which organisation developed India's first indigenous Hydrogen-powered Train?

- (A) Research Design and Standards Organisation
- (B) National Capital Regional Transport Corporation
- (C) Indian Railways Finance Corporation
- (D) Integral Coach Factory, Chennai

Q4.

Assertion (A): KAVACH can apply brakes automatically to stop a train from over-speeding.

Reason (R): KAVACH was developed by the Research Design and Standards Organisation.

Select the correct option.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Length of the Jind-Sonipat route	A. 1,200 kW
II. Number of coaches in the trainset	B. 110 km/h
III. Power of the propulsion system	C. 10 coaches
IV. Design speed of the train	D. 89 km

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-B, III-C, IV-A
- (B) I-D, II-C, III-A, IV-B
- (C) I-B, II-A, III-D, IV-C
- (D) I-B, II-D, III-C, IV-A

Q6.

Consider the following statements about India's first indigenous Hydrogen-powered Train:

- I. It is configured as a 10-coach Hydrogen Fuel Cell Trainset.
- II. Its hydrogen is stored as liquid in cryogenic tanks.
- III. Hydrogen is the lightest chemical element, with atomic number 1.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q7.

How many of the following statements about the Hydrogen-powered Train are correct?

- I. The train was developed by Integral Coach Factory, Chennai.
- II. The approved operational speed of the train is 110 km/h.
- III. The train runs on the Jind-Sonipat route in Haryana.

- (A) Only two
- (B) Only one
- (C) Only three
- (D) None of the above

Q8.

Habibganj, near which city, will become India's first private railway station?

- (A) Bhopal
- (B) Indore
- (C) Jabalpur
- (D) Gwalior

2026 Edition Check

The FIFA World Cup is held every four years, and the 2026 edition was the 23rd men's tournament in the competition's history. It was staged from 11 June to 19 July across three nations: the United States, Canada and Mexico. This made it only the second World Cup to be jointly hosted by several countries, following the 2002 edition in South Korea and Japan. The tournament was therefore a major event for all three host countries. The first tournament was held in 1930 with thirteen teams, and the 2026 field expanded to 48 teams. These teams were divided into twelve groups of four. Spain went on to win the final against Argentina by a single goal, and the match was played in New Jersey. Argentina, the defending champion, lost the final. Over the decades, the competition has grown in size and reach, and each edition has brought its own storylines. The 2026 tournament drew wide attention for its scale and for the number of cities that staged matches. The knockout

rounds that followed the group stage decided the eventual champion, and the records, awards and trophy history of the event continue to be followed by fans around the world. Many fans discussed the tournament's size and its historic firsts in the months that followed.

Q1.

Match List I with List II:

List I	List II
I. Maple the Moose	A. Shakira and Burna Boy
II. Zayu the Jaguar	B. Canada
III. Clutch the Bald Eagle	C. Mexico
IV. Official 2026 song 'Dai Dai'	D. United States

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-A, III-B, IV-C
- (B) I-B, II-C, III-D, IV-A
- (C) I-D, II-C, III-B, IV-A
- (D) I-B, II-C, III-A, IV-D

Q2.

Assertion (A): Canada hosted a World Cup for the first time in 2026.

Reason (R): Canada had two host cities, Toronto and Vancouver.

Choose the correct option.

- (A) A is true but R is false
- (B) Both A and R are true and R explains A
- (C) Both A and R are true but R does not explain A
- (D) A is false but R is true

Q3.

Who was the oldest player at the 2026 FIFA World Cup?

- (A) Craig Gordon
- (B) Gilberto Mora
- (C) Vozinha
- (D) Unai Simón

Q4.

Consider the following statements:

I. Iran moved its base camp to Mexico for the 2026 tournament.

II. Pau Cubarsi won the Golden Glove.

III. Brazil is the only team to have played in every World Cup tournament.

How many of the above statements are correct?

- (A) Only two
- (B) Only one
- (C) Only three
- (D) None

Q5.

Consider the following statements about the 2026 FIFA World Cup:

- I. The tournament had 104 matches in total.
- II. Mexico had three host cities.
- III. Canada had three host cities.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and III only
- (C) I and II only
- (D) I, II and III

Q6.

Which country was the first African nation to host the FIFA World Cup?

- (A) Egypt
- (B) Nigeria
- (C) Cameroon
- (D) South Africa

Q7.

Which team is nicknamed the 'Blue Sharks'?

- (A) Jordan
- (B) Uzbekistan
- (C) Curaçao
- (D) Cape Verde

Q8.

Which city hosted the opening match of the 2026 FIFA World Cup?

- (A) Toronto
- (B) Monterrey
- (C) Mexico City
- (D) Vancouver

Polity, law and minorities: MCQ practice

India's proposed higher education law would create a single apex body called Viksit Bharat Shiksha Adhishtan. It is designed to take over functions now spread across several existing bodies that oversee colleges and universities. A commission would sit at the top and be headed by a chairperson appointed by the Central Government. Beneath it, three specialised councils would each handle a separate function. A Joint Parliamentary Committee has flagged concerns that the model concentrates too much power in one authority. Critics note that appeals would be handled by the government itself rather than by an independent body, and that the grounds for removing members are vague. The Delhi High Court has laid down a structured framework for the Right to be Forgotten, in a case titled Laksh Vir Singh Yadav vs Union of India in 2026. Under it, individuals may seek removal, masking or de-indexing of personal information when its continued availability becomes unnecessary, disproportionate or harmful. The framework seeks to protect privacy and dignity while ensuring that legitimate public interest is not compromised. Another statutory body, the National Commission for Minorities, safeguards the interests and rights of notified minority communities. The Central Government nominates its members, and the Constitution itself protects the cultural and educational rights of minorities through several articles.

Q1.

Which council of the proposed Viksit Bharat Shiksha Adhishthan prescribes minimum standards for establishing higher education institutions?

- (A) Regulatory Council
- (B) Standards Council
- (C) Accreditation Council
- (D) Commission

Q2.

How many members does each council of the proposed Viksit Bharat Shiksha Adhishthan have?

- (A) 10
- (B) 12
- (C) 14
- (D) 16

Q3.

To whom does the Special Officer for Linguistic Minorities, under Article 350B, report directly?

- (A) President
- (B) Prime Minister
- (C) Chief Justice of India
- (D) Speaker of the Lok Sabha

Q4.

Assertion (A): Medical and legal education would fall under the regulatory reach of the proposed apex regulator.

Reason (R): Professional disciplines such as Medicine and Law remain outside its jurisdiction.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Consider the following statements about the proposed higher education regulator and the Right to be Forgotten:

- I. The Standards Council frames learning outcomes for higher education programmes.
- II. Degrees may be awarded by any university set up by a private trust.
- III. The Right to Erasure under Article 17 of the GDPR was codified after the Google Spain judgment.

Which of the above statements is/are correct?

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

Q6.

How many of the following statements about the National Commission for Minorities are correct?

- I. It was constituted on 17 May 1993.
- II. Its members are nominated by the Central Government.
- III. Jains were notified as a minority community in 1993.
- IV. Its members serve a tenure of five years.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None of the above

Q7.

In which year did the Supreme Court recognise the Right to Privacy as a Fundamental Right under Article 21 in the Puttaswamy case?

- (A) 2009
- (B) 2014
- (C) 2016
- (D) 2017

Monsoon Mechanism Check

The monsoon is a seasonal reversal of winds that brings significant changes in rainfall, and the word itself comes from an Arabic term meaning season. For India it is a major source of rain, because it supports agriculture, fills rivers, reservoirs, lakes and groundwater, and drives the national economy. A good monsoon usually means high crop yields and rising rural incomes, while a weak one can bring water shortages and crop failure. The southwest monsoon advances gradually across the country after its arrival in the south. It has two branches, which travel over different seas and reach different parts of the country. Mountains shape where rain falls: when moist air meets a barrier, it rises, cools and condenses. Ocean conditions far away can also change how strong the rains are. Monsoon behaviour is therefore not fixed, and in recent years experts have observed growing variability in its patterns, which makes planning for floods and droughts more important.

Q1.

During which months does the Northeast Monsoon occur?

- (A) June to September
- (B) March to May
- (C) October to December
- (D) January to February

Q2.

Which mountain barrier blocks cold Central Asian winds and forces monsoon winds to shed moisture over India?

- (A) Himalayas
- (B) Western Ghats
- (C) Aravalli Range
- (D) Vindhya Range

Q3.

Which phenomenon, marked by warming of Pacific Ocean waters, can weaken the Indian monsoon?

- (A) Jet streams
- (B) Monsoon trough
- (C) Retreating monsoon
- (D) El Nino

Q4.

According to the booklet, India receives about what share of its annual rainfall during the monsoon?

- (A) 25 per cent
- (B) 50 per cent
- (C) 75 per cent
- (D) 90 per cent

Q5.

Assertion (A): The Arabian Sea branch of the southwest monsoon brings heavy rainfall to the west coast of India.

Reason (R): The Arabian Sea branch strikes the Western Ghats.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q6.

Match List I with List II:

List I	List II
I. Monsoon Trough	A. Rain caused when moist winds rise over mountains
II. Retreating Monsoon	B. Low rainfall due to mountain barriers
III. Rain Shadow Region	C. Withdrawal of monsoon winds in October-November
IV. Orographic Rainfall	D. Low-pressure zone across northern India

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-A, III-D, IV-C
- (B) I-D, II-B, III-C, IV-A
- (C) I-D, II-C, III-B, IV-A
- (D) I-A, II-D, III-B, IV-C

Q7.

Consider the following statements about the Indian monsoon:

- I. The Himalayas block cold Central Asian winds and force monsoon winds to shed moisture over India.
- II. El Nino is a cooling of Pacific Ocean waters that strengthens the monsoon.
- III. Jet streams influence the onset, strength and withdrawal of the monsoon.

Which of the above statements is/are correct?

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

Saudi Arabia's Nuclear Vision: MCQ Practice

Saudi Arabia's nuclear vision is built on a set of four drivers that shape the direction of its programme. The Kingdom signed the Nuclear Non-Proliferation Treaty in 1988, and it launched its National Atomic Energy Project in 2017. Nuclear power is part of a wider plan for energy and industry, and each driver addresses a different practical need. The programme is also tied to the Kingdom's standing in the Middle East. The new civil nuclear arrangement with the United States forms the latest stage of this effort. It sets the terms for cooperation on reactors, materials, components and technical expertise. Such cooperation falls under a legally binding framework that is linked to a specific section of American law. Within this structure, the agreement includes a bilateral safeguards arrangement, which is meant to ensure that civilian nuclear materials are not diverted to weapons. The agreement is also subject to a review period by the US Congress. Taken together, these elements show how the Kingdom's ambitions link energy planning with international commitments and regional influence. The arrangement is designed to support long-term cooperation in the civil nuclear field, and its structure reflects the importance of verification. Such a structure allows the parties to keep civilian activities within agreed limits.

Q1.

Nuclear power is expected to reduce Saudi Arabia's heavy internal dependence on which two sources for electricity generation?

- (A) Coal and wind power
- (B) Uranium and thorium
- (C) Solar and hydro power
- (D) Crude oil and natural gas

Q2.

According to the booklet, the nuclear programme provides the massive energy input required for which activity?

- (A) Large-scale water desalination
- (B) Deep-sea oil drilling
- (C) Cement manufacturing
- (D) Rail freight

Q3.

A nuclear programme grants Saudi Arabia access to which of the following?

- (A) A permanent seat on the UN Security Council
- (B) Free access to Gulf port facilities
- (C) Advanced technology
- (D) Exemption from international inspections

Q4.

Assertion (A): Nuclear-generated electricity can provide a steady supply for air-conditioning and cooling systems.

Reason (R): Strategic technology development is one of the four drivers of the Kingdom's nuclear programme.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Energy Diversification	A. Steady supply for air-conditioning and cooling
II. Large-Scale Desalination	B. Access to advanced technology
III. Meeting Cooling Demand	C. Massive energy input for water desalination
IV. Strategic Technology Development	D. Reduced dependence on crude oil and natural gas

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-C, III-A, IV-D
- (B) I-B, II-C, III-D, IV-A
- (C) I-A, II-B, III-C, IV-D
- (D) I-D, II-C, III-A, IV-B

Q6.

Consider the following statements about Saudi Arabia's nuclear programme and the agreement:

- I. The earlier condition required that Saudi Arabia have no domestic uranium enrichment or reprocessing.
- II. The new deal allows flexibility for US-supported domestic uranium enrichment.
- III. The new deal requires Saudi Arabia to reinstate the Gold Standard ban on domestic enrichment.

Which of the above statements is/are correct?

- (A) I only
- (B) III only
- (C) I and II only
- (D) II and III only

Q7.

Consider the following statements about Saudi Arabia's nuclear programme:

- I. Nuclear power is meant to increase the Kingdom's dependence on crude oil for electricity generation.
- II. Nuclear-generated electricity provides a steady supply for air-conditioning and cooling systems.
- III. Nuclear power can supply the energy needed for large-scale water desalination.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

India's Atomic Energy Journey: MCQ Practice

India's atomic energy programme grew through a set of institutions, each created for a particular purpose. The Atomic Energy Commission was one of the early bodies, and it was later joined by a separate department that brought the programme's administration under one roof. Scientific work was carried out at several research centres, supported by reactors built for that purpose. Power generation followed when a commercial plant was set up under the Atoms for Peace effort. The country also carried out nuclear tests in the 1970s and again in the late 1990s, and these tests changed India's standing in the world. Its nuclear doctrine, adopted in 2003, set out the principles that would guide the use of its arsenal. Legal foundations for nuclear energy were also put in place through a statute passed in the twentieth century. Research reactors, power plants and legal instruments each contributed to this progress. In 2008, an agreement with the United States allowed civilian nuclear trade with India, which had been excluded from such trade for a long period. The sequence of these developments, from the early institutions to the 2008 agreement, spans several decades. The agreement remains an important reference point in discussions about how India fits into the global nuclear order.

Q1.

Which plant, commissioned in 1969 under the Atoms for Peace effort, was India's first commercial nuclear plant?

- (A) Tarapur Atomic Power Station
- (B) Dhruva reactor
- (C) Pokhran test range
- (D) Trombay research centre

Q2.

Assertion (A): India's Nuclear Doctrine, adopted in 2003, follows the principle of No First Use.

Reason (R): India is a Non-NPT nuclear weapons state, which makes the 2008 agreement a landmark precedent.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q3.

Match List I with List II:

List I	List II
I. Atomic Energy Commission	A. Research reactor commissioned at BARC in 1985
II. Dhruva	B. No First Use and Credible Minimum Deterrence
III. Pokhran-II	C. Headed by Dr Homi J. Bhabha as its first chairman
IV. Nuclear Doctrine	D. Operation Shakti, the 1998 tests

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-A, III-C, IV-D
- (B) I-D, II-C, III-A, IV-B
- (C) I-A, II-D, III-B, IV-C
- (D) I-C, II-A, III-D, IV-B

Q4.

Consider the following statements about India's atomic energy programme:

- I. The Atomic Energy Commission was set up in 1948.
- II. The Atomic Energy Act, 1962 is India's primary law for nuclear energy.
- III. Pokhran-II in 1998 was India's first peaceful nuclear explosion.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I only

Q5.

The 1974 Pokhran test, India's first peaceful nuclear explosion, was known by which codename?

- (A) Operation Shakti
- (B) Chagai
- (C) Pokhran-II
- (D) Smiling Buddha

Q6.

Under which authority was the Department of Atomic Energy created in 1954?

- (A) Ministry of Defence
- (B) Cabinet Secretariat
- (C) Prime Minister's Office
- (D) Ministry of Science and Technology

Prambanan Temple and Shared Heritage: MCQ

Prambanan is a Hindu temple complex in Indonesia, a country that is the largest archipelagic nation in the world. Indonesia's capital is Jakarta, although the administrative transition towards Nusantara is underway, and its currency is the Indonesian Rupiah. The country's President is Prabowo Subianto, and Indonesia is also the largest economy in ASEAN. India and Indonesia share a close partnership. The Prime Minister of India recently concluded a State Visit to Indonesia, a

visit that reinforced the India-Indonesia Comprehensive Strategic Partnership. Several outcomes were announced during the visit. Indonesia signed a contract worth around USD 200 million for BrahMos supersonic cruise missile systems, and India announced the supply of high-quality wheat seeds to support food security. The two countries also agreed to strengthen cooperation in the regulation of medical products, and they agreed to work on critical minerals and steel manufacturing. Indonesia launched a digital commerce network inspired by an Indian model, and the visit also included cultural and educational diplomacy. Indonesia occupies a pivotal position in India's Act East Policy and Indo-Pacific Strategy, and the country is central to India's engagement with ASEAN. Indonesia will post a Liaison Officer at an Indian facility to improve Maritime Domain Awareness in the region. Such outcomes were announced together, and the list covers defence, health, agriculture and critical minerals.

Q1.

How many of the statements given below are correct?

- I. The Prambanan Temple Complex was built during the 9th and 10th centuries CE.
 - II. The Prambanan Temple Complex is located in Yogyakarta.
 - III. The ruins of the Prambanan Temple Complex were formally rediscovered in 1911.
- (A) Only one
 - (B) Only two
 - (C) Only three
 - (D) All of the above

Q2.

Prambanan Temple Complex is dedicated to which Hindu Trinity?

- (A) Shiva, Vishnu and Brahma
- (B) Rama, Lakshmana and Hanuman
- (C) Ganesha, Durga and Saraswati
- (D) Krishna, Balarama and Surya

Q3.

Match List I with List II:

List I	List II
I. Locally known name of Prambanan Temple	A. Singhasari Special Economic Zone, East Java
II. Surveyor who formally rediscovered the ruins	B. Sanjaya Dynasty (Mataram Kingdom)
III. Location of the IIM Bangalore branch campus	C. Roro Jonggrang
IV. Dynasty under which Prambanan was built	D. Colin Mackenzie

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-D, III-B, IV-C
- (B) I-D, II-B, III-A, IV-C
- (C) I-C, II-D, III-A, IV-B
- (D) I-C, II-A, III-D, IV-B

Q4.

Prambanan is the second largest Hindu temple complex in Southeast Asia, after which temple complex?

- (A) Borobudur in Indonesia
- (B) Bagan in Myanmar
- (C) Sukhothai in Thailand
- (D) Angkor Wat in Cambodia

Q5.

The Tagore-Dewantara Year of India-Indonesia cultural and educational diplomacy has been declared for which period?

- (A) 2025-26
- (B) 2027-28
- (C) 2026-27
- (D) 2028-29

Q6.

Consider the following statements:

- I. The Tagore-Dewantara Year commemorates the centenary of Rabindranath Tagore's visit to Indonesia.
- II. The Prambanan Temple Complex is located in Bali.
- III. India presented a replica of the historic Nalanda Copper Plate to strengthen shared civilisational links.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I, II and III
- (D) I and III only

The Three Bills: Who Tabled and What They Cover

The 130th Constitution Amendment Bill is part of a package of Bills that deal with removing leaders from office. Together, the Bills propose the removal of the Prime Minister, Chief Ministers and Ministers under certain conditions. The package reaches several levels of government, including the Union, the states and Delhi, so its rules are not limited to one office. The Bills set out the conditions for removal and name the authority that would act for each office. They also address whether a removed minister may later return to office after release. The Bills were presented as a set, and each one covers a different part of the framework. Each Bill has its own formal name, which the booklet lists in full. A committee is currently examining the main Bill, so the Bills remain under consideration. The rules differ between offices, so the scope of each one depends on the office involved. The booklet presents the conditions in a table that lists the offence threshold, the removal authority for each office and any additional provision. Comparing the rows of that table shows how the rules differ between the Union and the states. These details form the core of the proposal that the booklet describes.

Q1.

Which of the three Bills is the Government of Union Territories (Amendment) Bill, 2025?

- (A) Bill 1
- (B) Bill 3
- (C) None of the three
- (D) Bill 2

Q2.

Who tabled the three Bills?

- (A) Home Minister
- (B) Prime Minister
- (C) Law Minister
- (D) Speaker of Lok Sabha

Q3.

- I. The Government of Union Territories (Amendment) Bill, 2025 is the second of the three Bills.
 II. The Constitution (One Hundred and Thirtieth Amendment) Bill, 2025 is the third of the three Bills.
 III. The Jammu and Kashmir Reorganisation (Amendment) Bill, 2025 is the third of the three Bills.

Which of the above statements is/are correct?

- (A) I only
 (B) II and III only
 (C) I and III only
 (D) I, II and III

Q4.

Assertion (A): The 130th Constitution Amendment Bill was introduced in 2025.

Reason (R): The Bill is one of three Bills tabled together.

- (A) Both A and R are true and R is the correct explanation of A
 (B) Both A and R are true but R is not the correct explanation of A
 (C) A is true but R is false
 (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Article 75	A. State Ministers and Chief Ministers
II. Article 164	B. Ministers of Union Territories
III. Article 239AA	C. Union Ministers
IV. Government of Union Territories Act, 1963	D. Chief Minister and Ministers of Delhi

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-B, III-A, IV-D
 (B) I-C, II-D, III-A, IV-B
 (C) I-C, II-A, III-D, IV-B
 (D) I-D, II-A, III-C, IV-B

Q6.

Which body is examining the 130th Constitution Amendment Bill?

- (A) Law Commission of India
 (B) Standing Committee on Law and Justice
 (C) Joint Parliamentary Committee (JPC)
 (D) Constitutional Review Commission

Q7.

- I. The JPC is expected to finalise and adopt its report.
 II. The Home Minister tabled the three Bills.
 III. The Prime Minister tabled the three Bills.

How many of the above statements are correct?

- (A) Only two
 (B) Only one
 (C) Only three
 (D) All of the above

Governance Gains and Critics' Concerns

The Bill is presented as a step toward ethical governance in public life. Supporters say it stops leaders from keeping power while facing serious charges, and that this protects public trust in institutions. It is also described as filling a gap in the law on legislators. The debate also brings in

the Representation of the People Act, 1951, which sets out disqualification grounds for legislators. Supporters also point to the aim of closing constitutional gaps, which they say improves accountability in the executive. The booklet records these arguments under one heading and the concerns under another. Critics, however, have raised several concerns about how the provisions could work in practice. Their arguments focus on the position of elected state governments, on the rights of people who have been detained but not yet tried, and on the role of investigating agencies. Some critics also raise questions about the basic rights of an accused person. The concerns listed by critics are equally specific, and one of them is framed as a threat to federalism. These concerns mean the same provisions are seen in two ways, as a safeguard by some and as a risk by others. The booklet keeps both views in view, so the reader sees the reasons on each side.

Q1.

Which two agencies does the booklet say could be exploited to arrest leaders on weak charges?

- (A) Election Commission and CAG
- (B) NIA and RBI
- (C) ED and CBI
- (D) RBI and SEBI

Q2.

Under the Representation of the People Act, legislators are disqualified only after which stage of a case?

- (A) Conviction
- (B) Arrest
- (C) Filing of charge sheet
- (D) Grant of bail

Q3.

What term does the booklet use for the anomaly that the Bill removes?

- (A) Governance by ordinance
- (B) Ministry without portfolio
- (C) Governance from jail
- (D) Caretaker governance

Q4.

Match List I with List II:

List I	List II
I. Public Interest Foundation PIL (2018)	A. Disqualification on mere conviction for promoting enmity between groups
II. Law Commission 170th Report	B. Struck down Section 8(4) as invalid
III. Section 8(1), Representation of the People Act	C. Recommended disqualification at the framing of charges
IV. Lily Thomas case (2013)	D. Only Parliament can legislate on disqualification

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-B, III-A, IV-D
- (B) I-A, II-B, III-C, IV-D
- (C) I-A, II-C, III-B, IV-D
- (D) I-D, II-C, III-A, IV-B

Q5.

- I. The Bill is said to uphold constitutional morality.
- II. Critics say the Bill upholds the presumption of innocence.
- III. Critics say the Bill could let the Centre destabilise opposition-led states through targeted arrests.

Which of the above statements is/are correct?

- (A) I only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

Q6.

- I. The Bill is said to uphold constitutional morality.
- II. The Bill is said to protect public trust by acting against criminalisation of politics.
- III. The Bill is said to make removal depend on conviction.

How many of the above statements are correct?

- (A) Only one
- (B) Only three
- (C) All of the above
- (D) Only two

How a Constitution Amendment Bill Passes

Amending the Constitution follows a formal path that the booklet traces as a flow chart. A proposal is first drafted as a Bill and then introduced in Parliament. The Bill is then put to a vote, and the voting rules are more demanding than those for ordinary legislation. The booklet explains how the votes are counted and what happens when the count is level. The booklet sets out the vote thresholds for each House in its diagram. A Bill's stages are shown in order, and each stage has its own requirement, which differs for each House. After the chambers complete their votes, the Bill moves to the next stage in the process. The sequence ends with a formal step that follows the completion of the House stages. The booklet also connects this process with other parts of the Constitution and with case law on legislators. The chart includes a box listing the provisions and legal cases that relate to the process. The booklet presents the process with simple labels, so each step can be read on its own. A reader can compare the stages with the list of provisions in the box to see how the process connects to the wider law.

Q1.

Which Houses must pass a Constitution amendment Bill?

- (A) Both Lok Sabha and Rajya Sabha
- (B) Lok Sabha alone
- (C) Rajya Sabha alone
- (D) A joint sitting only

Q2.

What happens when the votes in a House are tied?

- (A) The Bill automatically fails
- (B) The President decides the outcome
- (C) The Presiding Officer of the house can cast his or her vote
- (D) The Bill is sent to a committee

Q3.

To whom is the passed Constitution amendment Bill presented?

- (A) Prime Minister
- (B) Chief Justice of India
- (C) Election Commission
- (D) President

Q4.

Assertion (A): The Anti-Defection Law is among the related provisions listed for this process.

Reason (R): Articles 102 and 191 are also among the related provisions listed for this process.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

I. A Constitution amendment Bill can be introduced in either Lok Sabha or Rajya Sabha.

II. The President can refuse consent to a passed amendment Bill.

III. The President's consent is required before the Bill becomes law.

Which of the above statements is/are correct?

- (A) I only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q6.

I. The Lily Thomas case is listed among the related matters for this process.

II. The passed Bill is presented to the Speaker of Lok Sabha before assent.

III. Articles 102 and 191 are listed among the related provisions.

How many of the above statements are correct?

- (A) Only one
- (B) Only three
- (C) Only two
- (D) All of the above

Q7.

After the President gives assent, the Bill becomes what?

- (A) Ordinance
- (B) Resolution
- (C) Rule
- (D) Act

Ladakh Profile, Demands and the 2025 Regulation

Ladakh is administered by the Government of India as a Union Territory, a status it has held since 31 October 2019. Leh serves as the capital, and Kargil serves as the winter capital. The region shares its borders with Himachal Pradesh and Jammu and Kashmir, among other neighbours. Ladakh has been in the news because of two recent developments in its governance and public life.

The Centre has introduced a new reservation regulation for the Union Territory. The regulation amends an existing framework as it applies to Ladakh, and it has taken effect after being approved. The rules it sets out apply to the Union Territory alone, which makes the change specific to this region.

The Ladakh Administration has approved the establishment of Autonomous Hill Development Councils in all of its districts. The step follows an in-principle agreement with the Ministry of Home

Affairs to extend constitutional safeguards under Article 371 to the Union Territory. Each council will exercise authority over land allotment, district cadre recruitment and promotions, district development planning, and sectors such as health, education, tourism, infrastructure and social welfare.

Decentralised local institutions have become central to governance in Ladakh since it became a Union Territory. Both developments concern how the region is governed, and both are part of the same current affairs story.

Q1.

Which authority approved the Reservation (Amendment) Regulation, 2025 for Ladakh?

- (A) Supreme Court of India
- (B) Parliament of India
- (C) President of India
- (D) Ministry of Home Affairs

Q2.

Which areas does the Reservation (Amendment) Regulation, 2025 affect?

- (A) Government employment and educational admissions
- (B) Land ownership and property transfers
- (C) Panchayat elections
- (D) Tourism permits

Q3.

Which demand of the people of Ladakh is linked to representative governance?

- (A) Inclusion under the 6th Schedule
- (B) Merger with Himachal Pradesh
- (C) Separate High Court for Ladakh
- (D) Legislative Assembly

Q4.

Assertion (A): The people of Ladakh demand inclusion under the 6th Schedule.

Reason (R): The demand seeks constitutional protection for the region.

- (A) Both A and R are true, and R is the correct explanation of A
- (B) A is true but R is false
- (C) Both A and R are true, but R is not the correct explanation of A
- (D) A is false but R is true

Q5.

Consider the following statements about Ladakh:

- I. Ladakh is bordered by Tibet and Xinjiang, which lie in China.
- II. India claims Aksai Chin as part of Ladakh, and the region remains under Indian control.
- III. Inclusion under the 6th Schedule is one of the demands of the people of Ladakh.

Which of the above statements is/are correct?

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

Q6.

How many of the following statements are correct?

- I. Gilgit-Baltistan (Pakistan) borders Ladakh.
 - II. The Reservation (Amendment) Regulation, 2025 was approved by the Supreme Court.
 - III. The Reservation (Amendment) Regulation, 2025 came into force on 2 June 2025.
- (A) Only one
 - (B) Only two
 - (C) Only three
 - (D) All of the above

Investment, Support and Charging: MCQ

The Government of the National Capital Territory of Delhi has notified the Delhi Electric Vehicle Policy 2.0. The policy is scheduled to come into force from 1 July 2026 and to remain effective until 31 March 2030. It builds upon the achievements of the Delhi EV Policy 2020 and provides a comprehensive roadmap for transforming Delhi into a leading electric mobility hub. A central focus is reducing vehicular emissions by encouraging the electrification of high-usage and high-emission transport segments. The policy names several priority vehicle segments, including two-wheelers, three-wheelers, school buses, app-based aggregator fleets and government-owned transport fleets. The booklet presents the policy's major provisions under a dedicated heading, and these include timelines for vehicle registration. The booklet also outlines the expected benefits of electric vehicles. These include a likely fall in demand for petrol and diesel, the creation of new jobs in the automobile sector, and a reduction in pollution-induced health problems. The policy's provisions cover financial support and investment as well as infrastructure development, and each area is assigned to a separate implementing body.

Q1.

Government financial support under Delhi EV Policy 2.0 is restricted to which category of vehicles?

- (A) Hybrid vehicles only
- (B) Battery electric vehicles only, not hybrid vehicles
- (C) Compressed natural gas vehicles
- (D) Both battery electric and hybrid vehicles

Q2.

How many public charging stations are planned to be installed across Delhi under the policy?

- (A) Over 10,000
- (B) Over 20,000
- (C) Over 30,000
- (D) Over 50,000

Q3.

Which of the following is listed as a key objective of Delhi EV Policy 2.0?

- (A) Strengthening charging and battery-swapping infrastructure
- (B) Phasing out all public transport within 5 years
- (C) Promoting hydrogen fuel cell vehicles
- (D) Restricting private vehicle ownership in Delhi

Q4.

Assertion (A): Hybrid vehicles are eligible for government financial support under Delhi EV Policy 2.0.

Reason (R): Government support under the policy is restricted exclusively to battery electric vehicles.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Which key objective of Delhi EV Policy 2.0 concerns public and commercial transport?

- (A) Promoting hydrogen fuel cell vehicles
- (B) Phasing out all public transport within 5 years
- (C) Restricting private vehicle ownership in Delhi
- (D) Encouraging sustainable public and commercial transport

Q6.

Consider the following statements about Delhi EV Policy 2.0:

- I. The policy plans installation of over 30,000 public charging stations across Delhi.
- II. Reducing urban air pollution and greenhouse gas emissions is listed as a key objective.
- III. Hybrid vehicles are eligible for government financial support.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and III only
- (C) I and II only
- (D) I, II and III

India's Solar Position and Records

India's solar sector is tracked in the IRENA Renewable Energy Statistics 2026. According to this report, India emerged as the world's second largest solar growth market in 2025, while China remained the largest. Global solar power capacity also rose sharply over the same year, showing how quickly the sector has expanded. India further moved up in power production, overtaking a major economy to become the world's third largest solar power producer in 2025. In total renewable energy installed capacity, India was placed third globally. The report also records India's installed solar capacity for 2025.

India's projects include several large and notable installations. Bhadla Solar Park in Rajasthan is among the major solar parks in the country. Omkareshwar in Madhya Pradesh is a floating solar plant, and it is India's largest of its kind. Rajarhat was India's first floating solar power plant. Naukh, India's first commercial solar thermal power plant, is developed by Godawari Green Energy. Indian Railways' first solar power plant is at Bina, Madhya Pradesh. Dharnai in Bihar is India's first solar village. Guwahati Railway Station is India's first fully solar-powered railway station. The top solar states include Rajasthan, Gujarat, Tamil Nadu, Karnataka and Maharashtra. Within the Extra Shots section, the booklet lists further solar projects in India.

Q1.

According to the IRENA Renewable Energy Statistics 2026, what was India's installed solar capacity in 2025?

- (A) 37 GW
- (B) 250.52 GW
- (C) 150.26 GW
- (D) 315 GW

Q2.

What is the installed capacity of the Omkareshwar floating solar plant?

- (A) 600 MW
- (B) 2245 MW
- (C) 750 MW
- (D) 1000 MW

Q3.

In which state is Modhera, India's first 24x7 solar-powered village?

- (A) Bihar
- (B) Madhya Pradesh
- (C) Gujarat
- (D) Rajasthan

Q4.

Match List I with List II:

List I	List II
I. Bhadla Solar Park	A. Khandwa
II. Omkareshwar	B. Kolkata
III. Rajarhat	C. Jaisalmer
IV. Naukh	D. Jodhpur

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-D, III-C, IV-A
- (B) I-C, II-A, III-D, IV-B
- (C) I-D, II-A, III-B, IV-C
- (D) I-A, II-B, III-C, IV-D

Q5.

Consider the following statements:

- I. China remained the largest solar market in 2025, adding 315 GW.
- II. Global solar power capacity rose from 1880 GW in 2024 to 2392 GW in 2025.
- III. Bhadla Solar Park has a capacity of 600 MW.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and III only
- (C) I, II and III
- (D) I and II only

Q6.

How many of the following statements are correct?

- I. Sanchi in Madhya Pradesh is India's first solar city.
- II. Rajarhat was India's first floating solar power plant, set up in 2015.
- III. Modhera in Gujarat is India's first solar village.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Climate Commitments and Global Initiatives

India's climate commitments are known collectively as Panchamrita. The package includes a net zero target, and the country aims to meet 50 percent of its energy requirements from renewable energy by 2030. India also aims to reduce its total projected carbon emissions by one billion tonnes from now till 2030. Each target in the Panchamrita list is given a time frame in the booklet, either a specific year or the period up to 2030. Under the heading of major collaborative initiatives, the booklet lists several efforts. The Global Solar Facility is listed first among them, and it is one initiative that supports solar investment. STAR-C stands for Solar Technology Application and Resource Centres, and it works on solar technologies. The OSOWOG concept seeks to integrate regional grids across Asia, the Middle East, Africa and Europe for 24-hour renewable power. India first proposed the concept at the Inaugural Assembly of the International Solar Alliance. The

booklet names that assembly as the setting for the proposal, and it presents each initiative with a short description of its aim. Taken together, these entries form the booklet's list of major collaborative initiatives.

Q1.

Under Panchamrita, India's net zero target is to be achieved by which year?

- (A) 2070
- (B) 2050
- (C) 2060
- (D) 2080

Q2.

At which COP summit was the Global Solar Facility launched?

- (A) COP21
- (B) COP26
- (C) COP27
- (D) COP28

Q3.

What is the target for non-fossil energy capacity under Panchamrita by 2030?

- (A) 500 GW
- (B) 250 GW
- (C) 1000 GW
- (D) 750 GW

Q4.

Assertion (A): The Global Solar Facility was launched at COP26 in Glasgow.

Reason (R): The Global Solar Facility provides payment guarantees to de-risk solar investments.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Global Solar Facility	A. India's climate commitments at COP26 in Glasgow
II. STAR-C	B. Trans-national solar power connectivity
III. One Sun, One World, One Grid	C. Payment guarantees to de-risk solar investments
IV. Panchamrita	D. Training of engineers, entrepreneurs and policymakers

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-A, III-D, IV-B
- (B) I-C, II-D, III-B, IV-A
- (C) I-B, II-C, III-A, IV-D
- (D) I-A, II-C, III-D, IV-B

Q6.

Consider the following statements:

- I. The Global Solar Facility was launched at COP27.
- II. India first proposed the OSOWOG concept during the ISA's Inaugural Assembly.
- III. The net zero target under Panchamrita is 2050.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and III only
- (C) I, II and III
- (D) I and II only

Q7.

How many of the following statements are correct?

- I. The Panchamrita commitments were announced at COP26 in Glasgow.
- II. The Global Solar Facility provides payment guarantees to de-risk solar investments.
- III. STAR-C trains only engineers in solar technologies.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Beneficiary Categories under NFSA 2013

The National Food Security Act, 2013 is the central law that governs foodgrain entitlements for two beneficiary categories, namely Antyodaya Anna Yojana (AAY) households and Priority Households (PHH). Both categories receive foodgrains at subsidised rates, yet the Act does not set the same monthly quantity or the same basis of calculation for each. Under the current design, the AAY entitlement is a single figure for each household, whereas the PHH entitlement is worked out for every member of the household. The Union Government has recently proposed an amendment that revises the foodgrain entitlement of AAY households. The amendment seeks to modify one provision of the Act, relating to AAY foodgrain entitlement. The government's stated concern is that the present rule creates inequities within the AAY category, because small households receive more foodgrain per person than larger households. The government says the change would reduce disparities between AAY and PHH beneficiaries, and it describes the change as a rationalisation that aligns allocation more closely with nutritional requirements. The amendment does not address inclusion errors, in which ineligible beneficiaries continue to receive benefits under the Act. Discussion of the amendment therefore centres on how entitlements are measured and on who is counted within each category.

Q1.

What is the main objective of the National Food Security Act, 2013?

- (A) To regulate minimum support prices for agricultural produce
- (B) To provide free housing to Below Poverty Line households
- (C) To establish food processing zones across India
- (D) To ensure food and nutritional security through subsidised foodgrains

Q2.

Foodgrain access under the NFSA 2013 was made a legal right for approximately what share of the population?

- (A) Two-thirds
- (B) One-third
- (C) One-half
- (D) Three-fourths

Q3.

Through which system are subsidised foodgrains provided under the NFSA 2013?

- (A) Revamped Public Distribution System (RPDS)
- (B) Pradhan Mantri Garib Kalyan Anna Yojana
- (C) Targeted Public Distribution System
- (D) Rural Employment Guarantee Scheme

Q4.

Assertion (A): Antyodaya Anna Yojana is meant for the poorest of the poor households.

Reason (R): The NFSA 2013 has two beneficiary categories, AAY and PHH.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Priority Households (PHH)	A. Enacted to ensure food and nutritional security
II. Antyodaya Anna Yojana (AAY)	B. Other eligible households
III. Targeted Public Distribution System	C. Poorest of the poor households
IV. National Food Security Act 2013	D. Delivery channel for subsidised foodgrains

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-A, III-B, IV-D
- (B) I-C, II-A, III-D, IV-B
- (C) I-B, II-C, III-D, IV-A
- (D) I-A, II-B, III-C, IV-D

Q6.

Consider the following statements:

- I. Antyodaya Anna Yojana is meant for the poorest of the poor households.
- II. Priority Households are described as other eligible households.
- III. Foodgrains under the NFSA are provided free of cost to all beneficiaries.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q7.

Consider the following statements:

- I. The NFSA 2013 was enacted to ensure food and nutritional security.
- II. Foodgrain access is a legal right for about one-third of the population.
- III. Subsidised foodgrains are delivered through the Targeted Public Distribution System.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

PDS History and PMGKAY

Public distribution of foodgrains in India is older than the current food law, and the system has been reshaped several times since it was first set up. Its coverage has changed as different groups

of people were brought within its scope, and its design has been adjusted in response to conditions in different parts of the country. Governance involves both the central and state governments, and a central ministry is responsible for overseeing the system at the national level. Some states built their own distribution arrangements well before the wider expansion, while others followed later. A special scheme was also introduced during a difficult period to add extra free grain to the regular entitlements of certain beneficiaries. Such additions are meant to supplement, rather than replace, the regular entitlements. The scheme's extra grain was given on top of the usual monthly quantities, which continued to form the base of the system. The basic design covers several essential goods, which are supplied through state agencies. The system continues to be governed by the central ministry and the state agencies that handle its distribution. The history of the system is therefore best understood through its gradual expansion, its administration by the central ministry, and the schemes layered on top of its basic design over time.

Q1.

By which power was the Public Distribution System in India introduced?

- (A) The Mughal administration
- (B) The Portuguese administration
- (C) The British administration
- (D) The Dutch East India Company

Q2.

After which famine was the PDS introduced to control food prices and ration foodgrains?

- (A) Orissa famine of 1866
- (B) Bihar famine of 1967
- (C) 1942-43 Bengal famine
- (D) Maharashtra famine of 1972

Q3.

Which beneficiaries received the extra free foodgrains under PMGKAY?

- (A) Only Below Poverty Line families
- (B) Only urban households
- (C) Only tribal households
- (D) AAY and PHH beneficiaries

Q4.

Assertion (A): The PDS in India was introduced after World War II ended.

Reason (R): The PDS was introduced to control food prices and ration foodgrains.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Consider the following statements:

- I. The PDS in India was introduced by the British during World War II.
- II. The PDS was initially focused on rural food security.
- III. Wheat, sugar, rice and kerosene are among the essential goods distributed.

Which of the above statements is/are correct?

- (A) I and III only
- (B) I and II only
- (C) II and III only
- (D) I, II and III

Q6.

Consider the following statements:

- I. The PDS is administered by the Ministry of Finance.
- II. The RPDS was introduced in 1992.
- III. Kerala set up one of India's earliest PDS in 1962.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

CETA Scope and Entry into Force: Context

The India-UK agreement was pursued in a changing trade environment. After Brexit, the UK lost its access to the EU market and began seeking new trade partnerships for growth and global market access. India's growing economy positions it as a key trade partner for the UK after Brexit. Many Western nations have also moved to diversify their trade away from China, citing supply chain and geopolitical concerns. Under this approach, India is treated as a China-plus-one alternative, and a free trade agreement is central to the diversification strategy. India is also seeking to diversify its trade partners and reduce its dependence on China. Its bilateral free trade agreements, including the one with the UK, are presented as a way to safeguard its interests. Global uncertainty adds to the case. US tariffs and geopolitical tensions are pushing nations towards stable and predictable trade relations. The agreement is described as offering a stable trade framework that ensures economic predictability and long-term growth amid that uncertainty. The agreement itself is described as a next-generation free trade agreement. It goes beyond conventional tariff reduction, and the booklet presents it as a framework for wider economic partnership. Its coverage is wide, and it is presented as a step in India's broader trade realignment.

Q1.

How did India safeguard its generic pharmaceutical sector in the FTA with the UK?

- (A) By imposing higher import duties on branded medicines
- (B) By restricting UK pharma companies from patenting in India
- (C) By mandating technology transfer from UK pharma companies
- (D) By excluding Data Exclusivity provisions from the FTA

Q2.

What does the quota-based approach to imported passenger vehicles achieve?

- (A) It completely removes all tariffs on imported passenger vehicles
- (B) It bans imports of passenger vehicles for five years
- (C) It allows unrestricted import of electric vehicles only
- (D) It protects domestic industry while allowing phased market access

Q3.

Assertion (A): Most of India's tariff lines are expected to become tariff-free within 10 years under the FTA.

Reason (R): 85% of tariff lines become tariff-free in 10 years.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Match List I with List II:

List I	List II
I. Imported passenger vehicles	A. 100 additional annual visas
II. Auto import tariff	B. Cut from 150% to 75% initially
III. Whisky and gin	C. Cut to 10% under the quota system
IV. Visas for Indian professionals	D. Concession through tariff rate quotas

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-D, III-B, IV-C
- (B) I-A, II-B, III-D, IV-C
- (C) I-D, II-C, III-B, IV-A
- (D) I-B, II-A, III-C, IV-D

Q5.

Consider the following statements about the India-UK CETA:

- I. It covers digital trade and investment.
- II. It is limited to tariff reduction on goods.
- III. It covers labour, environment and SMEs.

Which of the above statements is/are correct?

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

Q6.

Consider the following statements about the India-UK CETA:

- I. It covers government procurement.
- II. It covers regulatory cooperation.
- III. It excludes investment.

How many of the statements are correct?

- (A) Only three
- (B) Only one
- (C) All of the above
- (D) Only two

Q7.

Beyond conventional tariff reduction, the CETA addresses which of the following?

- (A) Regulatory transparency
- (B) Mining licence allocation
- (C) Currency exchange rates
- (D) Shipping subsidies

Double Contribution Convention: Context

A trade pact between two countries has been described as a next-generation free trade agreement. It goes beyond conventional tariff reduction and deals with market access, regulatory transparency and economic partnership. Its scope covers trade in goods and services, digital trade, investment, government procurement, labour, environment, innovation, SMEs and regulatory cooperation. Alongside the trade pact, the two countries signed a Double Contribution Convention Agreement. The Convention sits alongside the pact as a separate instrument. The booklet discusses it in a separate box alongside the trade pact. Wider context in the booklet relates to these trade arrangements. After leaving the EU, the UK lost its access to the EU market and sought new trade partnerships for growth and global market access. Western nations have also moved to diversify

trade away from China because of supply chain and geopolitical concerns. US tariffs and geopolitical tensions have pushed nations towards stable and predictable trade relations. The booklet presents such pacts as offering economic predictability and long-term growth amid global uncertainty, and it describes the wider Brexit background as the UK leaving the European Union, an economic and political union of 28 European countries. It allows free trade among member countries without any checks or extra charges. Britain has faced many more challenges while sacrificing the smooth and frictionless flow of goods across its borders.

Q1.

On which date did the Double Contribution Convention Agreement come into force?

- (A) 1 April 2026
- (B) 1 June 2026
- (C) 15 July 2026
- (D) 1 August 2026

Q2.

What is the main purpose of the Double Contribution Convention?

- (A) To ensure professionals avoid paying social security contributions in both India and the UK
- (B) To give Indian employers duty-free access to UK markets
- (C) To grant 100 additional visas to Indian professionals
- (D) To set up a common currency between India and the UK

Q3.

For up to how many years does the exemption from UK National Insurance contributions apply?

- (A) 2 years
- (B) 5 years
- (C) 3 years
- (D) 7 years

Q4.

Assertion (A): Eligible Indian employers can be exempted from UK National Insurance contributions.

Reason (R): The Convention's exemption covers eligible Indian professionals and employers.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Eligible beneficiaries	A. Up to 5 years
II. Contributions exempted	B. Contributions continue in India
III. Maximum exemption period	C. Professionals and employers
IV. Condition for exemption	D. UK National Insurance

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-A, III-B, IV-C
- (B) I-C, II-D, III-B, IV-A
- (C) I-C, II-A, III-B, IV-D
- (D) I-C, II-D, III-A, IV-B

Q6.

Consider the following statements about the Double Contribution Convention:

- I. The exemption from UK National Insurance contributions can last up to 5 years.
- II. The exemption continues even if contributions stop being paid in India.
- III. The exemption is available only to professionals, not employers.

Which of the above statements is/are correct?

- (A) I and II only
- (B) I only
- (C) II and III only
- (D) I, II and III

Q7.

Consider the following statements about the Double Contribution Convention:

- I. Eligible Indian professionals are exempted from UK National Insurance contributions.
- II. The exemption can run for 10 years.
- III. Social security contributions must continue in India for the exemption.

How many of the statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Advantages of Polymer Notes (MCQ)

The Reserve Bank of India has revived a proposal to introduce polymer-based banknotes in India. Polymer currency notes are manufactured using a specialised plastic substrate, primarily Biaxially Oriented Polypropylene, instead of conventional cotton-based banknote paper. The idea is not new, as an initial proposal was made in 2009. Bharatiya Reserve Bank Note Mudran Private Limited, a wholly owned subsidiary of the RBI, has invited global bids for a BOPP-based polymer substrate to manufacture polymer banknotes. Banknotes in India are printed at four currency printing presses, and together they print all the banknotes of India in different denominations. Under the Reserve Bank of India Act, 1934, the RBI issues banknotes, estimates the country's currency requirements and maintains an adequate supply of banknotes. The Government of India, on the other hand, approves the design and material of banknotes based on recommendations of the RBI's Central Board. Coins are minted under the Coinage Act, 2011, and are then supplied to the RBI, which distributes them to banks and the public. The RBI has also introduced a Clean Note Policy so that the public receives currency notes and coins of acceptable quality. Currency, coinage, legal tender and foreign exchange fall within the legislative domain of the Union Government under the Union List.

Q1.

Polymer banknotes are described as more resistant to which of the following?

- (A) Printing errors
- (B) Tearing
- (C) Ink fading
- (D) Electrostatic charge

Q2.

Polymer substrates allow the integration of which kind of feature that is much harder for counterfeiters to replicate?

- (A) Sophisticated security features
- (B) Colour-changing ink only
- (C) Hand-painted designs
- (D) Embossed signatures

Q3.

Because individual polymer notes last longer, what happens to the number of new notes that must be made?

- (A) More new notes must be printed each year
- (B) New notes must be imported from abroad
- (C) Fewer new notes need to be manufactured and issued
- (D) Printing presses must be shut down

Q4.

Assertion (A): Polymer banknotes need less frequent replacement cycles.

Reason (R): Polymer banknotes remain usable for significantly longer periods.

- (A) A is false but R is true
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) Both A and R are true and R is the correct explanation of A

Q5.

Match List I with List II:

List I	List II
I. Sophisticated features integrated into the substrate	A. More resistant to tearing
II. Longer usable life of each note	B. Less vulnerable to water and moisture
III. Exposure to humidity	C. Much harder to replicate than on paper
IV. Stress of being pulled apart	D. Fewer new notes need to be manufactured

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-D, III-B, IV-C
- (B) I-C, II-D, III-B, IV-A
- (C) I-D, II-B, III-C, IV-A
- (D) I-A, II-C, III-B, IV-D

Q6.

Consider the following statements about polymer banknotes:

- I. They are more resistant to tearing.
- II. They are made from cotton-based banknote paper.
- III. They remain usable for significantly longer periods.

Which of the above statements is/are correct?

- (A) I and III only
- (B) I and II only
- (C) II and III only
- (D) I, II and III

Q7.

Consider the following statements about polymer banknotes:

Statement 1: They are less vulnerable to water and moisture.

Statement 2: They are made from cotton-based banknote paper.

Statement 3: They can incorporate advanced anti-counterfeiting features.

How many of the above statements are correct?

- (A) Only one
- (B) All of the above
- (C) Only two
- (D) Only three

Green Hydrogen Mission: MCQ

Hydrogen exists only in combination with other elements, so it has to be extracted from naturally occurring compounds before it can be used. Its colour labels, such as grey, blue and green, are linked to how it is produced. Green hydrogen is the category made by a process that uses electricity to split hydrogen from a compound, with the electricity supplied by a particular type of source.

India has built a national mission around green hydrogen. The mission aims to bring change to several sectors, including energy, industry and mobility, and it also seeks to develop manufacturing capacity within the country. Its goals include opportunities for selling the fuel and its derivatives abroad. The mission has components that support a transition programme and a partnership between government and private players for innovation. Its expected results include a reduction in fossil fuel imports, which is measured in money terms.

Taken together, these elements show that the mission covers production, domestic manufacturing and trade rather than a single activity. Its scope therefore reaches from the process used to make the fuel to the markets in which it could be sold. This wide scope means the mission is not limited to a single step in the supply chain.

Q1.

Which statement about the commercial status of green hydrogen is correct?

- (A) It is fully commercially viable across India
- (B) It is not commercially viable at present
- (C) It is viable only for export
- (D) It is viable only in rural areas

Q2.

Consider the following statements about the mission:

- I. Green hydrogen is commercially viable at present.
- II. The Ministry of New and Renewable Energy is the nodal ministry for the mission.
- III. The expected fossil fuel import savings by 2030 are measured in rupees.

Which of the above statements is/are correct?

- (A) I and III only
- (B) I and II only
- (C) I, II and III
- (D) II and III only

Q3.

The electrolyser used to produce green hydrogen is powered by which kind of energy?

- (A) Nuclear energy
- (B) Coal-fired power
- (C) Renewable energy
- (D) Diesel generators

Q4.

By 2030, the national green hydrogen mission is expected to bring fossil fuel import savings of how much?

- (A) Rs 10 lakh crore
- (B) Rs 50,000 crore
- (C) Rs 1 lakh crore
- (D) Rs 5 lakh crore

Q5.

Assertion (A): The Strategic Hydrogen Innovation Partnership is a public-private partnership.

Reason (R): Its purpose is research and development.

- (A) Both A and R are true but R is not the correct explanation of A
- (B) Both A and R are true and R is the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q6.

Consider the following statements:

I. SHIP is a public-private partnership for research and development.

II. The mission's nodal ministry is the Ministry of New and Renewable Energy.

III. SIGHT is a public-private partnership for research and development.

How many of the statements are correct?

- (A) Only two
- (B) Only one
- (C) Only three
- (D) All of the above

Q7.

Match List I with List II:

List I	List II
I. SIGHT	A. Strategic Hydrogen Innovation Partnership
II. SHIP	B. Rs 1 lakh crore
III. Nodal ministry for the mission	C. Strategic Interventions for Green Hydrogen Transition Programme
IV. Expected fossil fuel import savings by 2030	D. Ministry of New and Renewable Energy

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-C, III-A, IV-D
- (B) I-C, II-A, III-D, IV-B
- (C) I-A, II-B, III-D, IV-C
- (D) I-C, II-B, III-D, IV-A

SDR 2026 Findings and India's Position

The Sustainable Development Report is an annual assessment of how countries are progressing towards the Sustainable Development Goals. It gives each country a score on a scale of 0 to 100, which allows countries to be compared with one another. The report covers all UN Member States, and it is linked to the 2030 Agenda, the framework under which the goals were adopted. The goals cover a wide range of areas, including poverty, health, education and climate action.

The latest findings suggest that progress is uneven. A large share of targets is moving forward only slowly, while a smaller group of targets has slipped backwards compared with the position recorded in 2015. Some regions have improved more quickly than others, and the report draws attention to structural problems that affect particular goals.

India is one of the countries covered by the assessment. The report notes that its position has improved over time and that its overall performance has moved upward compared with earlier editions. Even so, only part of India's targets is expected to be achieved by 2030. Many of its targets are advancing at a pace that is insufficient to meet the deadline, and the report describes India's performance in terms of the goals where its progress is weakest.

Q1.

Which body released the 11th Sustainable Development Report 2026?

- (A) UNDP
- (B) World Bank
- (C) UN Sustainable Development Solutions Network
- (D) UNEP

Q2.

What is India's overall SDG Index score in the 2026 report?

- (A) 68.3
- (B) 62.5
- (C) 65.8
- (D) 71.2

Q3.

What percentage of India's SDG targets is expected to be achieved by 2030?

- (A) 28.7%
- (B) 33.3%
- (C) 20.5%
- (D) 42.7%

Q4.

Assertion (A): The report identifies Zero Hunger as India's most critical development challenge.

Reason (R): Around 15% of targets have experienced setbacks compared to their 2015 baseline.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Overall SDG Index score of India	A. 15%
II. India's targets expected to be achieved by 2030	B. 16.5%
III. Global targets with setbacks against the 2015 baseline	C. 33.3%
IV. Global targets progressing as planned	D. 68.3

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-B, III-C, IV-D
- (B) I-D, II-A, III-C, IV-B
- (C) I-D, II-B, III-A, IV-C
- (D) I-D, II-C, III-A, IV-B

Q6.

Examine the following:

I. The 2026 report is the eleventh edition in the series.

II. The report was released by the United Nations Development Programme.

III. Barbados was the lowest-ranked country on supporting UN-centred multilateral cooperation.

Which option gives the number of correct statements?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Climate Finance: Sources and Funds

Climate finance refers to money that supports action against climate change, and it can come from local, national or transnational sources. Such action has two broad aims: reducing emissions, and helping communities adapt to the effects of climate change. Several multilateral funds have been set up to channel resources to these aims, and each fund has its own role and procedures. Their approaches differ, and some are designed around the needs of particular groups of countries. The arrangements include a number of different funds, each with its own structure, which is why the subject can seem complex.

Climate finance also rests on a set of principles that guide how responsibility is shared among countries. These principles reflect the fact that countries do not all contribute to the problem in the same way. Climate finance is discussed as part of the global response to climate change, and it is closely linked with the commitments that countries make in their national climate plans.

The system is not without difficulties. The funding that countries need for their climate plans does not always match what is available to them. The arrangements are still developing, and new funds continue to be considered as the global response evolves.

Q1.

In which year did the Global Environment Facility become the operating entity of the financial mechanism?

- (A) 1992
- (B) 1994
- (C) 1997
- (D) 2002

Q2.

Which fund gives developing countries full ownership of adaptation projects?

- (A) Clean Development Mechanism
- (B) Global Environment Facility
- (C) Adaptation Fund
- (D) Loss and Damage Fund

Q3.

Along with CBDR-RC, which principle forms part of the principles of climate finance?

- (A) Polluter Pays
- (B) Precautionary Approach
- (C) Sustainable Consumption
- (D) Common Heritage

Q4.

Assertion (A): Multilateral climate funds are coordinated by the UNFCCC.

Reason (R): The Green Climate Fund was established in 2010 at COP 16.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Global Environment Facility	A. Emission-reduction projects in developing nations
II. Clean Development Mechanism	B. Operating entity of the financial mechanism
III. Green Climate Fund	C. Financial assistance to nations most affected by climate change
IV. Loss and Damage Fund	D. Houses the LDCF and SCCF funds

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-C, III-A, IV-B
- (B) I-C, II-A, III-B, IV-D
- (C) I-B, II-A, III-C, IV-D
- (D) I-B, II-A, III-D, IV-C

Q6.

Read the statements below:

- I. Climate finance can be drawn from public, private or alternative sources.
- II. The Adaptation Fund is coordinated by the Clean Development Mechanism.
- III. Least Developed Countries receive much less approved funding per capita from multilateral climate funds.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q7.

Examine the following:

- I. The Loss and Damage Fund was set up in 2023.
- II. The Green Climate Fund was established in 2015.
- III. A slow rate of approvals is listed as a challenge to climate finance.

Which option gives the number of correct statements?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Panchayat Advancement Index 2.0

Gram Panchayats and other traditional local bodies form the base of rural governance, and a nationwide framework now assesses how these bodies perform. Each local body is evaluated and placed in a grade that reflects its standing against the framework's benchmarks. The framework relies on indicators that can be checked, so that the results rest on evidence rather than impressions.

The framework is also aligned with the global development agenda. It takes the broad global goals and turns them into a smaller set of goals that suit village-level planning. Thematic areas are part of the assessment as well, and these cover subjects such as livelihoods and health in rural communities. Results so far show that Tripura has the largest share of local bodies in the upper grades.

The grades form an ordered scale. They run from the highest tier, which is reserved for the

strongest performance, down to the lowest tier. Each tier gives local bodies a clear reference point. The approach is nationwide, and it applies to Gram Panchayats across the country, which means that the same framework is used for bodies in every part of the country.

Q1.

Which grade is awarded for a composite score of 60 to 74?

- (A) Achiever (A+)
- (B) Front Runner (A)
- (C) Performer (B)
- (D) Aspirant (C)

Q2.

Into how many localised SDGs does the index translate the 17 SDGs?

- (A) 5
- (B) 9
- (C) 12
- (D) 17

Q3.

Which ministry localises the SDGs through the Panchayat Advancement Index?

- (A) Ministry of Panchayati Raj
- (B) Ministry of Rural Development
- (C) NITI Aayog
- (D) Ministry of Statistics and Programme Implementation

Q4.

Assertion (A): The Panchayat Advancement Index 2.0 uses objective and verifiable indicators.

Reason (R): The index grades local bodies on a composite score from 0 to 100.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Achiever (A+)	A. Score below 40
II. Front Runner (A)	B. Score of 60 to 74
III. Performer (B)	C. Score above 90
IV. Beginner (D)	D. Score of 75 to 89

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-D, III-A, IV-C
- (B) I-A, II-B, III-C, IV-D
- (C) I-B, II-C, III-D, IV-A
- (D) I-C, II-D, III-B, IV-A

Q6.

Read the statements below:

- I. The index is recognised as the first comprehensive index globally to evaluate rural local governance.
- II. No Gram Panchayat reached the Achiever category.
- III. The index translates the 17 SDGs into 17 localised goals.

Which of the above statements is/are correct?

- (A) I and III only
- (B) II and III only
- (C) I and II only
- (D) I, II and III

Q7.

Examine the following:

- I. Grades are assigned on the basis of a composite score.
- II. The Achiever grade applies to scores above 90.
- III. The index is called Panchayat Advancement Index 3.0.

Which option gives the number of correct statements?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Engines, Stages and Materials

Vikram-1 is India's first privately built orbital launch vehicle. Skyroot Aerospace, a Hyderabad-based company, developed it, and the rocket flew its maiden mission, named Mission Aagaman, from the Satish Dhawan Centre at Sriharikota. The flight placed payloads into Low Earth Orbit. With it, India became the third country, after the United States and China, to demonstrate private orbital launch capability. The booklet gives close attention to the rocket's propulsion and structure, covering its stages, engines and materials. The rocket also carries a mix of payloads. The booklet describes them as scientific, technological, commercial and symbolic, and lists them together on one manifest. Among the technology items is SCOPE, which validates onboard spacecraft systems during the flight. Authorisation and facilitation for the launch came from IN-SPACe, which functions as a single-window regulator for private space activities. The Indian Space Policy 2023 opened the complete space value chain to non-government entities, which the booklet calls a fundamental transformation of India's space ecosystem. The mission follows Vikram-S, India's first privately developed sub-orbital rocket. A sub-orbital rocket goes to space but does not place a satellite into orbit, which is the key difference from an orbital rocket. The booklet is a July 2026 current affairs publication on defence, space and science and technology.

Q1.

What does SORTeD stand for in the name Agnibaan SORTeD?

- (A) SubOrbital Technology Demonstrator
- (B) Space Orbital Test Device
- (C) Solid Orbital Transfer Demonstrator
- (D) Sub-Surface Technology Deployment

Q2.

Which company developed Agnibaan SORTeD?

- (A) Skyroot Aerospace
- (B) Cosmoserve Space
- (C) Agnikul Cosmos
- (D) Space Zone India

Q3.

Vikram-1 is a how-many-stage orbital launch vehicle?

- (A) Two
- (B) Three
- (C) Four
- (D) Five

Q4.

Assertion (A): Vikram-1's first three stages use advanced solid propellants.

Reason (R): The first three stages of Vikram-1 are called Kalam Engines.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Agnilet	A. Stages 1 to 3 of Vikram-1, using advanced solid propellants
II. Agnibaan SOrTeD	B. India's first privately developed launch pad
III. Kalam Engines	C. World's first single-piece 3D-printed semi-cryogenic engine
IV. Dhanush	D. World's first rocket with a fully 3D-printed engine

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-C, III-B, IV-A
- (B) I-A, II-C, III-B, IV-D
- (C) I-B, II-C, III-D, IV-A
- (D) I-C, II-D, III-A, IV-B

Q6.

Consider the following statements:

- I. Stages 1 to 3 of Vikram-1 are called Kalam Engines.
- II. Agnibaan SOrTeD was developed by Skyroot Aerospace.
- III. Agnilet is a single-piece 3D-printed engine.

Which of the above statements is/are correct?

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

Q7.

How many of the following statements are correct?

- I. Vikram-1 is a three-stage orbital launch vehicle.
- II. The Kalam Engines use liquid propellants.
- III. Agnilet is the world's first single-piece 3D-printed semi-cryogenic engine.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Payloads on Vikram-1

Vikram-1 is India's first privately built orbital launch vehicle. Its maiden flight, named Mission Aagaman, launched from the Satish Dhawan Centre at Sriharikota and placed payloads into Low Earth Orbit. With it, India became the third country, after the United States and China, to demonstrate private orbital launch capability. The booklet presents the rocket's payloads as a multi-purpose manifest. The payloads are classed as scientific, technological, commercial and symbolic, and they fly together on the same mission. Vikram-1 follows Vikram-S, India's first privately developed sub-orbital rocket. A sub-orbital rocket goes to space but does not place a satellite into orbit. Authorisation and facilitation for the launch came from IN-SPACe, which functions as a single-window regulator for private space activities. The Indian Space Policy 2023 opened the complete space value chain to non-government entities, a change the booklet calls fundamental. The rocket is named after Dr Vikram Sarabhai, whom the booklet calls the father of India's space programme. The booklet also describes the propulsion and structure of the rocket, covering its stages, engines and materials, in a separate section. The booklet's payload list is part of its Vikram-1 section. The booklet is a July 2026 current affairs publication on defence, space and science and technology.

Q1.

Assertion (A): The technology validated by the Embrace robotic arm is linked to in-orbit servicing.

Reason (R): The Embrace robotic arm stays attached to the payload deck during its demonstration.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q2.

How many of the following statements are correct?

- I. Cosmic Bloom was developed by Cosmos Diamonds.
 - II. The technology validated by Embrace is linked to in-orbit servicing.
 - III. The 18K gold rocket model is made of silver.
- (A) Only one
 - (B) Only three
 - (C) Only two
 - (D) All of the above

Q3.

Match List I with List II:

List I	List II
I. SCOPE	A. Robotic arm linked to space debris removal and in-orbit servicing
II. Embrace robotic arm	B. Lab-grown diamond jewellery sent into space
III. SOLARAS	C. Validates onboard spacecraft systems during flight
IV. Cosmic Bloom	D. Indigenous CubeSat demonstrating satellite technology in orbit

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-A, III-D, IV-B
- (B) I-C, II-A, III-B, IV-D
- (C) I-A, II-C, III-B, IV-D
- (D) I-B, II-D, III-A, IV-C

Q4.

The Cosmic Bloom payload is described as India's first what?

- (A) Robotic arm for in-orbit servicing
- (B) Indigenous CubeSat in orbit
- (C) Gold rocket model with micro-sculptures
- (D) Lab-grown diamond jewellery sent into space

Q5.

Which company developed SCOPE, the payload that validates onboard spacecraft systems during flight?

- (A) Cosmoserve Space
- (B) Skyroot Aerospace
- (C) Cosmos Diamonds
- (D) Agnikul Cosmos

Q6.

Consider the following statements:

- I. SCOPE was developed by Skyroot Aerospace.
- II. The Embrace robotic arm was created by Cosmos Diamonds.
- III. SOLARAS is an indigenous CubeSat.

Which of the above statements is/are correct?

- (A) I and III only
- (B) I and II only
- (C) II and III only
- (D) I, II and III

Q7.

The 18K gold rocket model carried on Vikram-1 was credited to which artist?

- (A) Pawan Kumar Chandana
- (B) Naga Bharath Daka
- (C) Ajay Kumar Mattewada
- (D) Srinath Ravichandran

Hydrogen Train: Specifications

India has flagged off its first indigenous hydrogen-powered train, which PM Modi inaugurated. The train is configured as a Hydrogen Fuel Cell Trainset, so hydrogen is the fuel at the centre of its design. The train operates on the Jind–Sonipat route, and its propulsion comes from a Hydrogen Fuel Cell Propulsion System. The launch is covered in the July 2026 current affairs section on Defence, Space and Science and Technology. The booklet presents the train under the heading Why in News, followed by a list of key highlights. These highlights describe the train's approved operational speed and its design speed, and they name the organisation that developed it. The booklet also lists the major components of the train, including fuel cells, batteries, a hydrogen storage system and motors. Each of these components has its own role in the working of the train. Hydrogen is written as H in the booklet, and it is described as a chemical element. The Practice Questions section that follows checks readers on the route, the design and the components of the train. The page carries the footer of a Jaipur-based current affairs publication, and the same section of the booklet also covers other developments in railways, which are discussed separately.

Q1.

In which state is the Jind-Sonipat route, on which India's first indigenous Hydrogen-powered Train was inaugurated?

- (A) Punjab
- (B) Haryana
- (C) Rajasthan
- (D) Uttar Pradesh

Q2.

What is the atomic number of Hydrogen?

- (A) 1
- (B) 2
- (C) 4
- (D) 6

Q3.

Assertion (A): Hydrogen is the most abundant element in the Universe's normal matter.

Reason (R): Hydrogen is the lightest chemical element.

Choose the correct option.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Match List I with List II:

List I	List II
I. Proton Exchange Membrane Fuel Cells	A. Store surplus electricity generated by fuel cells
II. Lithium Iron Phosphate Batteries	B. Generate electricity through an electrochemical reaction between hydrogen and oxygen
III. Hydrogen Storage System	C. Convert electrical energy into mechanical energy
IV. Electric Traction Motors	D. Store compressed hydrogen in High-Pressure Cylinders

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-B, III-C, IV-D
- (B) I-A, II-C, III-D, IV-B
- (C) I-C, II-B, III-A, IV-D
- (D) I-B, II-A, III-D, IV-C

Q5.

Consider the following statements:

- I. The Jind-Sonipat route on which the train runs is 89 km long.
- II. Lithium Iron Phosphate Batteries generate electricity through an electrochemical reaction.
- III. The design speed of the train is 110 km/h.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and II only
- (C) I and III only
- (D) I, II and III

Q6.

What percentage of the Universe's normal matter does Hydrogen constitute?

- (A) 50%
- (B) 60%
- (C) 70%
- (D) 75%

Q7.

How many of the following statements are correct?

- I. The train is configured as a 10-coach Hydrogen Fuel Cell Trainset.
 - II. Electric Traction Motors store surplus electricity generated by the fuel cells.
 - III. Hydrogen is the heaviest chemical element.
- (A) Only one
 - (B) Only two
 - (C) Only three
 - (D) All of the above

Railway and S&T Developments

The July 2026 current affairs section covers several new developments in railways and science and technology. KAVACH is an indigenous safety system, and its features include centralised live monitoring of train movements and the relaying of SOS messages. The Vande Metro Train, which was India's first, has been given a new name. Namo Bharat/RapidX runs on the Delhi-Ghaziabad-Meerut corridor. Mission Raftaar is included among these developments, and its work relates to transportation. Mission 41K focuses on energy-efficient solutions that help to have a smaller carbon footprint, and it is set out as a ten-year plan. The Konkan Railway is a 760 km rail route that connects Roha in Maharashtra to Mangalore in Karnataka, and it covers Goa too. The Kolkata Metro Extension is also part of the section, and its line includes a tunnel. The Indian Railways Finance Corporation is another body covered in this section, and it is linked to Indian Railways. The booklet also describes a plan to redevelop major railway stations by working with private companies. These developments are listed under the heading New Development in Indian Railways. The Practice Questions that follow test readers on several of these items, and each item is presented as a separate development in the railway sector.

Q1.

What is the objective of Mission Raftaar?

- (A) To increase speed of transportation
- (B) To redevelop 400 major stations
- (C) To build the first underwater metro
- (D) To set up a private railway station

Q2.

Which corporation operates Namo Bharat/RapidX on the Delhi-Ghaziabad-Meerut corridor?

- (A) Indian Railways Finance Corporation
- (B) National Capital Regional Transport Corporation
- (C) Research Design and Standards Organisation
- (D) Konkan Railway Corporation

Q3.

Assertion (A): Indian Railways Finance Corporation is the financial arm of Indian Railways.

Reason (R): It was established in 1986.

Choose the correct option.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Match List I with List II:

List I	List II
I. KAVACH	A. India's first Rapid Rail
II. Namo Bharat/RapidX	B. India's first underwater metro line
III. Kolkata Metro Extension	C. Redevelopment of major railway stations with private companies
IV. Amrit Bharat Station Scheme	D. Automatic Train Protection System

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-D, III-A, IV-B
- (B) I-A, II-C, III-B, IV-D
- (C) I-D, II-A, III-B, IV-C
- (D) I-D, II-B, III-A, IV-C

Q5.

Consider the following statements:

- I. KAVACH was developed by the Research Design and Standards Organisation.
- II. The tunnel of India's first underwater metro line lies beneath the Hooghly River.
- III. Mission Raftaar aims to reduce the speed of transportation.

Which of the above statements is/are correct?

- (A) I and III only
- (B) I and II only
- (C) II and III only
- (D) I, II and III

Q6.

In which year was the Konkan Railway constructed?

- (A) 1986
- (B) 2008
- (C) 2004
- (D) 1998

Q7.

How many of the following statements are correct?

- I. Namo Bharat Rapid Rail was earlier known as India's first Vande Metro Train.
- II. Indian Railways Finance Corporation was established in 1990.
- III. Mission 41K aims to save Rs 41000 crore in 10 years through energy-efficient solutions.

- (A) All of the above
- (B) Only one
- (C) Only two
- (D) Only three

Trophies, FIFA and Title Winners: MCQ

FIFA is the global governing body for football, and it has member national associations. The World Cup has used two trophies in its history. The first was the Jules Rimet Trophy, which was in use from 1930 to 1970. It was made of gold-plated sterling silver and stood on a lapis lazuli base. The original trophy was stolen in England before the 1966 tournament and was later found in a rubbish heap. It was stolen a second time and is believed to have been melted down.

Since 1974 the tournament has used a different trophy. It depicts two human figures holding up the Earth. Winners do not keep it permanently, because it remains in the possession of FIFA and can no longer be won outright. Winners receive a replica instead.

Individual honours also accompany the tournament. The Golden Ball goes to the best player, the Golden Glove to the best goalkeeper, and the Young Player Award to the best young player. The Golden Boot goes to the player who scores the most goals, and the FIFA Fair Play Trophy is presented to one team. Separately, a Women's World Cup began in 1991, and its 2023 edition was hosted by Australia and New Zealand.

Q1.

Who designed the current FIFA World Cup trophy?

- (A) Abel LaFleur
- (B) Silvio Gazzaniga
- (C) Ottorino Barassi
- (D) Jules Rimet

Q2.

What was the name of the dog that found the stolen Jules Rimet Trophy?

- (A) Rex
- (B) Bruno
- (C) Pickles
- (D) Toby

Q3.

Assertion (A): Brazil was allowed to keep the Jules Rimet Trophy after its 1970 win.

Reason (R): Brazil won the Jules Rimet Trophy outright in 1970.

Choose the correct option.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Match List I with List II:

List I	List II
I. Ottorino Barassi	A. Won the Jules Rimet Trophy outright in 1970
II. West Germany	B. Inaugural recipient of the FIFA Peace Prize
III. Brazil	C. Hid the original trophy under a bed during World War II
IV. Donald Trump	D. First team to lift the current trophy

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-C, III-B, IV-A
- (B) I-D, II-B, III-A, IV-C
- (C) I-B, II-A, III-D, IV-C
- (D) I-C, II-D, III-A, IV-B

Q5.

- I. The current trophy was chosen from 53 submitted proposals.
- II. The current trophy was first lifted by Brazil in 1974.
- III. The current trophy is made of 18-carat solid gold.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q6.

- I. FIFA's headquarters is located in Zurich, Switzerland.
- II. The FIFA Peace Prize was established in 2024.
- III. The Jules Rimet Trophy was created by an Italian sculptor.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Q7.

Which two countries are the only ones to have retained the World Cup title?

- (A) Germany and Argentina
- (B) Brazil and Argentina
- (C) Italy and France
- (D) Brazil and Italy

Records and Firsts: MCQ

The 2026 FIFA World Cup was the 23rd men's edition, and it was staged across three countries: the United States, Canada and Mexico. It was the first time three nations jointly hosted the event. The competition featured 48 teams, divided into 12 groups of four, and a total of 104 matches were played. The official match ball was the Adidas Trionda.

The first edition was held in 1930. The World Cup has been held every four years, apart from 1942 and 1946. Four nations made their World Cup debut in 2026: Cape Verde, Curaçao, Jordan and Uzbekistan. Cape Verde is a tiny archipelago off the west coast of Africa, and its population is about half a million people.

Several milestones were recorded during the tournament, and several of them are described as firsts in the history of the competition. Cape Verde's 40-year-old veteran goalkeeper, Vozinha, emerged as one of the breakout stars of the tournament.

The tournament had controversies. Iran moved its base camp to Mexico, which meant long travel to the United States for its group-stage games. A United States player was sent off, and FIFA later suspended the ban that had been expected. UEFA and other football bodies criticised that decision.

Q1.

In which city was the Argentina–Algeria match played, the game in which Lionel Messi made World Cup history?

- (A) Dallas
- (B) Houston
- (C) Kansas City
- (D) Atlanta

Q2.

Who scored the winning goal when Spain won its first World Cup, in the 2010 final?

- (A) David Villa
- (B) Andrés Iniesta
- (C) Fernando Torres
- (D) Xavi

Q3.

Assertion (A): Spain was the first team to win the World Cup while conceding only one goal in the tournament.

Reason (R): Spain was the first nation to be reigning champion of both the men's and women's World Cups.

Choose the correct option.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Match List I with List II:

List I	List II
I. Lionel Messi	A. Selected for a sixth consecutive World Cup squad
II. Cristiano Ronaldo	B. Failed to qualify for a third consecutive World Cup
III. Guillermo Ochoa	C. Scored in six consecutive World Cups
IV. Italy	D. Played at six World Cups

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-B, III-C, IV-D
- (B) I-B, II-D, III-A, IV-C
- (C) I-D, II-A, III-B, IV-C
- (D) I-D, II-C, III-A, IV-B

Q5.

I. For the first time, the top four teams in the FIFA Men's World Ranking at the time of the contest advanced to the semi-finals.

II. Lionel Messi is the only player to have won the Golden Ball twice.

III. Spain won its first World Cup title in 1998.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q6.

I. The All India Football Federation has been affiliated with FIFA since 1948.

II. Spain's first World Cup title came in 1934.

III. Cristiano Ronaldo was the first player to score in five consecutive World Cups.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Q7.

In which year did India have its only World Cup qualification?

- (A) 1934
- (B) 1948
- (C) 1950
- (D) 1966

India-Australia Summit and Seychelles Visit

India and Australia held the 3rd India-Australia Annual Leaders' Summit in 2026, during a visit by the Prime Minister of India to Australia. The two countries are guided by the India-Australia Economic Cooperation and Trade Agreement of 2022, and talks on a Comprehensive Economic Cooperation Agreement are still continuing. At the summit, the leaders adopted a renewed Joint Declaration on Defence and Security Cooperation and launched a Maritime Security Collaboration Roadmap. Energy was another focus, and the leaders issued a joint statement on energy security. The leaders also reaffirmed their commitment to secure energy supply chains and to greater energy resilience amid global geopolitical uncertainties. They also operationalised an administrative arrangement under the 2014 Civil Nuclear Agreement. A Rooftop Solar Training Academy was inaugurated in Gandhinagar, and a new partnership on cyber security and critical technologies was launched. Sports cooperation moved ahead through a roadmap focused on high-performance sport and Para-sports, and Australia extended support to India's Gaganyaan Mission. IP Australia obtained access to India's Traditional Knowledge Digital Library to help prevent wrongful patent claims. In a separate State Visit, India's Prime Minister travelled to Seychelles for its 50th National Day, where agreements on digital payments, healthcare and legal cooperation were signed, and India announced a special economic package for the island nation.

Q1.

The administrative arrangement under the 2014 India-Australia Civil Nuclear Agreement enables the regular supply of which material to India's civilian nuclear energy programme?

- (A) Thorium
- (B) Australian uranium
- (C) Heavy water
- (D) Enriched plutonium

Q2.

What additional investment did AustralianSuper, Australia's largest pension fund, announce for India's National Investment and Infrastructure Fund?

- (A) AUD 50 million
- (B) AUD 5 billion
- (C) USD 500 million
- (D) AUD 500 million

Q3.

Australia approved a campus of which university in Bengaluru?

- (A) Victoria University
- (B) Monash University
- (C) Flinders University
- (D) University of Melbourne

Q4.

Consider the following statements:

- I. Bilateral trade between India and Australia reached about USD 50.2 billion in 2025.
- II. The India-Australia Economic Cooperation and Trade Agreement was signed in 2014.
- III. India announced a special economic package for Seychelles worth US\$175 million.

Which of the above statements is/are correct?

- (A) I only
- (B) II and III only
- (C) I and III only
- (D) I and II only

Q5.

How many of the following statements are correct?

- I. The Temporary Space-tracking Facility supporting the Gaganyaan Mission is located on the Cocos (Keeling) Islands.
- II. The ACITI framework involves a trilateral agreement among India, Australia and Canada.
- III. The PACTS partnership was launched between India and Japan.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Q6.

Match List I with List II:

List I	List II
I. NPCI International Payments Limited	A. Strengthening legal cooperation with Seychelles
II. HLL Lifecare Limited	B. Facilitating introduction of UPI in Seychelles
III. Sushma Swaraj Institute of Foreign Service	C. Enabling affordable medicines in Seychelles
IV. Extradition Treaty with Seychelles	D. Institutional cooperation with Seychelles' Ministry of Foreign Affairs and Diaspora

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-D, III-C, IV-A
- (B) I-C, II-B, III-A, IV-D
- (C) I-C, II-B, III-D, IV-A
- (D) I-B, II-C, III-D, IV-A

Cyber Bodies and Kudankulam Leak

India's response to cyber threats is spread across several bodies, each with a separate role. In 2026, an alleged data leak from the Kudankulam Nuclear Power Plant appeared on the dark web, which renewed concern about the cyber security of critical infrastructure. The Indian Computer Emergency Response Team acts as the national nodal agency for responding to cybersecurity incidents. A separate body was set up to protect critical information infrastructure from cyber threats. The National Cyber Forensic Laboratory provides early-stage forensic assistance to investigating officers of state and union territory police. The Indian Cyber Crime Coordination Centre provides a framework for law enforcement agencies to deal with cyber crimes in a coordinated manner. Globally, the United Nations has adopted a convention against cybercrime that aims to strengthen international cooperation. The convention's secretariat is based in Vienna. Meanwhile, the Budapest Convention is a Council of Europe treaty that addresses crimes committed through computer networks. The Cyber Commandos programme trains special wings in the states. A portal called CyTrain offers massive open online courses for capacity building. The incident drew fresh attention to how critical infrastructure is protected.

Q1.

Consider the following statements:

- I. The National Cyber Forensic Laboratory is located in Chennai.
- II. India is a signatory to the Budapest Convention on Cybercrime.
- III. The National Critical Information Infrastructure Protection Centre was set up in 2014 in New Delhi.

Which of the above statements is/are correct?

- (A) I and II only
- (B) III only
- (C) II and III only
- (D) I and III only

Q2.

Match List I with List II:

List I	List II
I. Indian Computer Emergency Response Team (CERT-In)	A. Established in 2014
II. National Critical Information Infrastructure Protection Centre	B. Established in 2018
III. Indian Cyber Crime Coordination Centre	C. Located in Hyderabad
IV. National Cyber Forensic Laboratory	D. Established in 2004

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-D, III-B, IV-A
- (B) I-C, II-D, III-A, IV-B
- (C) I-D, II-A, III-B, IV-C
- (D) I-B, II-C, III-D, IV-A

Q3.

In which year did the Budapest Convention on Cybercrime become effective?

- (A) 2001
- (B) 2004
- (C) 2014
- (D) 2018

Q4.

Which ransomware group claimed the alleged data leak from the Kudankulam Nuclear Power Plant?

- (A) Yotta Data Services
- (B) Reliance Infrastructure
- (C) World Leaks
- (D) NPCIL

Q5.

How many of the following statements are correct?

- I. Kudankulam's reactors were developed by NPCIL of India and Rosatom of Russia.
 - II. The Samanvay platform is a one-stop portal for cybercrime data, analytics and law enforcement coordination.
 - III. The UN Convention Against Cybercrime was adopted by the UN Security Council.
- (A) Only one
 - (B) Only three
 - (C) Only two
 - (D) All of the above

Q6.

Under which Union ministry was the Indian Cyber Crime Coordination Centre (I4C) established?

- (A) Ministry of Home Affairs
- (B) Ministry of Defence
- (C) Ministry of Electronics and Information Technology
- (D) Department of Telecommunications

Q7.

Consider the following:

Assertion (A): The UN Convention Against Cybercrime entered into force as soon as the UN General Assembly adopted it.

Reason (R): The convention is the first universal legal instrument on cybercrime.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Revolution, Games and Awards Check

The American Revolution began as political unrest and grew into open armed conflict. Tensions rose in the 1760s and 1770s as Britain imposed taxes on the colonists, and protests against taxation without representation spread through the colonies. The colonists' resistance became more organised, and boycotts and protests became common. Colonial militias showed that local forces could stand their ground against a professional army. In 1776 the colonies adopted a declaration that announced their separation from Great Britain and grounded the new nation in Enlightenment principles. The purpose of the war then shifted from seeking the rights of Englishmen to a struggle for the natural rights of all mankind. The conflict lasted several years before a peace was eventually agreed. The Revolution is remembered as the foundation of the United States, which marked the 250th anniversary of its independence on 4 July 2026. The Games are organised by the Commonwealth Games Federation and include sports such as athletics, swimming, track cycling and boxing. In Scotland, the Commonwealth Games were held in 2026, bringing together athletes from many nations and territories. Scotland has hosted the Games several times before, most recently in 2014. India's contingent for the Games included para-athletes. The mascot is inspired by Scotland's national animal.

Q1.

Which 1765 British tax, the first internal tax levied directly on American colonists, applied to every piece of printed paper?

- (A) Tea Act
- (B) Stamp Act
- (C) Townshend Duties
- (D) Intolerable Acts

Q2.

Who was the primary drafter of the Declaration of Independence, adopted on 4 July 1776?

- (A) Benjamin Franklin
- (B) John Adams
- (C) George Washington
- (D) Thomas Jefferson

Q3.

How many times has Scotland hosted the Commonwealth Games, counting the 2026 edition?

- (A) Second
- (B) Third
- (C) Fourth
- (D) Fifth

Q4.

Consider the following:

Assertion (A): The Treaty of Paris of 1783 formally ended the American Revolutionary War.

Reason (R): Great Britain formally recognised the United States as a sovereign and independent nation under that treaty.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Consider the following statements:

I. The 2026 Commonwealth Games in Glasgow were held from 23 July to 2 August.

II. The Jnanpith Award was instituted in 1961 by the Government of India.

III. R. Vairamuthu is the first Tamil poet to receive the 60th Jnanpith Award.

Which of the above statements is/are correct?

- (A) I only
- (B) I and III only
- (C) I and II only
- (D) II and III only

Q6.

How many of the following statements are correct?

I. Glasgow 2026 features 10 sports, nine fewer than the Birmingham 2022 edition.

II. India's Commonwealth Games contingent includes teams in 3x3 Basketball and Netball.

III. Chandigarh was the first State or Union Territory to enter Uttam-3 under PGI 2.0.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Q7.

Match List I with List II:

List I	List II
I. Battle of Saratoga	A. Trapped General Cornwallis on a Virginia peninsula
II. Battles of Lexington and Concord	B. Colonists dumped 342 chests of tea into Boston Harbor
III. Surrender at Yorktown	C. Helped Benjamin Franklin secure a French military alliance
IV. Boston Tea Party	D. Marked the beginning of the American Revolutionary War

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-B, III-C, IV-D
- (B) I-D, II-C, III-B, IV-A
- (C) I-D, II-A, III-C, IV-B
- (D) I-C, II-D, III-A, IV-B

Women's T20 World Cup 2026 - MCQ

The ICC Women's T20 World Cup 2026 was one of the major events in the international cricket calendar, bringing national women's teams together in the Twenty20 format. The tournament was held over several weeks and was staged across a number of venues. Understanding how the event was structured helps explain how the final was reached. Two groups formed the opening phase. Each group contained the same number of teams, and every side played the other teams in its

group in a round-robin format. The results of this phase determined which teams moved into the knockout rounds, where each match carried greater significance. The final was the last match of the competition. Individual players were also recognised with awards for their performances across the event. The tournament was organised by one national board, which worked with local venues to stage the matches. Several sides travelled to different grounds during the event, and supporters followed the progress of each team through the group stage and the knockout rounds. Players from many countries took part, giving the competition an international character. Results in the group phase were therefore central to the outcome of the event. Each stage of the event involved a defined set of fixtures.

Q1.

Which body hosted the ICC Women's T20 World Cup 2026?

- (A) International Cricket Council
- (B) England and Wales Cricket Board
- (C) Cricket Australia
- (D) Board of Control for Cricket in India

Q2.

How many teams played in each group of the tournament?

- (A) 4
- (B) 5
- (C) 6
- (D) 8

Q3.

Shree Charani, the leading wicket-taker of the tournament with 14 wickets, belonged to which country?

- (A) India
- (B) Australia
- (C) England
- (D) Scotland

Q4.

Assertion (A): Only the top two teams from each group reached the semi-finals.

Reason (R): The tournament is held once every two years.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Beth Mooney	A. Team that won the 2026 final
II. Lord's Cricket Ground	B. Record for most wickets by an Indian in a single edition
III. Australia	C. Venue of the 2026 final
IV. Shree Charani	D. Player of the Final and Tournament

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-A, III-D, IV-C
- (B) I-B, II-C, III-A, IV-D
- (C) I-C, II-A, III-D, IV-B
- (D) I-D, II-C, III-A, IV-B

Q6.

Consider the following statements:

The tournament was held from 12 June to 5 July 2026.

The tournament was hosted across seven venues.

Shree Charani took 20 wickets as the leading wicket-taker.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Sports and Youth Milestones - MCQ

July 2026 brought several developments across Indian sport, covering youth competition, tennis and cricket. A national youth sports event, the Khelo India Youth Games, has its next edition scheduled for a later date, and a new host state has been chosen for it. The previous edition was held in the year before, and one state was recognised as overall champion at that event.

Separately, a former doubles world number one was appointed as an ambassador of an Asian tennis body, with a role to promote grassroots tennis across the continent. The same player is the only Indian tennis player to win an Olympic medal, and he has received a major national sporting award. In cricket, a teenager made his senior international debut in the shortest format of the game. The news items in this section are drawn from the month's sporting updates. Youth events, grassroots programmes and senior debuts are all part of the wider picture described here. Each item is reported separately, and each covers a different level of the sporting pathway. Items on this page are reported in the same section of the booklet, and the month also included observances and policy news covered in other sections. Each item stands on its own.

Q1.

Which state will host the 8th Khelo India Youth Games?

- (A) Bihar
- (B) Telangana
- (C) Maharashtra
- (D) Haryana

Q2.

In which year did Leander Paes win the Olympic bronze medal in men's singles?

- (A) 1992
- (B) 2000
- (C) 1996
- (D) 2004

Q3.

In which city did Vaibhav Sooryavanshi make his senior T20I debut?

- (A) Manchester
- (B) London
- (C) Birmingham
- (D) Leeds

Q4.

Match List I with List II:

List I	List II
I. Leander Paes	A. Overall champion at the 7th Khelo India Youth Games
II. Vaibhav Sooryavanshi	B. Hosted the 7th Khelo India Youth Games
III. Bihar	C. India's youngest international cricket debutant
IV. Maharashtra	D. Player Ambassador of the Asian Tennis Federation

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-C, III-B, IV-D
- (B) I-C, II-D, III-A, IV-B
- (C) I-D, II-B, III-A, IV-C
- (D) I-D, II-C, III-B, IV-A

Q5.

Consider the following statements:

- I. The 8th Khelo India Youth Games are scheduled for November 2026.
- II. Vaibhav Sooryavanshi made his senior T20I debut against Pakistan.
- III. Leander Paes was honoured with the Rajiv Gandhi Khel Ratna Award.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I, II and III
- (D) I and III only

Q6.

Consider the following statements:

Vaibhav Sooryavanshi broke the record of Shafali Verma as India's youngest overall international debutant.

The 7th Khelo India Youth Games were hosted by Maharashtra.

Leander Paes won an Olympic bronze medal in men's singles.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Policy, Heritage and Observances - MCQ

Government policy on passenger vehicles has focused on reducing fuel use and emissions over time. Draft proposals for a new phase of the rules would tighten the standards that manufacturers must meet, with the aim of reducing average carbon dioxide output across a fleet. The rules cover a wide range of fuel types, including petrol, diesel, gas-based fuels and electric power. They apply to vehicles below a certain weight limit, so heavier vehicles fall outside their scope. Turning from transport to heritage, ancient India produced physicians whose work is recorded in classical texts. One such figure is remembered as an early pioneer of surgery, and his contribution has been honoured abroad. His writings belong to a group of foundational texts in the Ayurvedic tradition. The month's calendar also includes several international observances, each with a theme set for the year. These days honour cooperatives, national statistics and population. The items in this section cover policy, history and global days, and each is described briefly below. The booklet lists a theme for each observance covered in this section. Policy, heritage and observances are

presented together as part of the month's current affairs. The heritage item concerns a physician and surgeon of ancient India.

Q1.

Which body introduced CAFE norms in 2017?

- (A) Bureau of Energy Efficiency
- (B) Central Pollution Control Board
- (C) Ministry of Road Transport and Highways
- (D) NITI Aayog

Q2.

What does CAFE stand for?

- (A) Central Automotive Fuel Economy
- (B) Corporate Average Fuel Efficiency
- (C) Common Air Fuel Emission
- (D) Certified Automobile Fuel Efficiency

Q3.

Consider the following statements about Sushruta:

- I. He is known as the Father of Plastic Surgery.
- II. He was a disciple of Charaka.
- III. The Sushruta Samhita is part of Ayurveda's Great Trilogy.

Which of the above statements is/are correct?

- (A) I only
- (B) I and II only
- (C) II and III only
- (D) I and III only

Q4.

Assertion (A): The draft CAFE-III norms propose stricter fuel-efficiency and CO₂ standards from April 2027.

Reason (R): Sushruta's bronze statue was unveiled by Scotland's Royal College of Surgeons.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Sushruta Samhita	A. Observed on the first Saturday of July
II. International Day of Cooperatives	B. Text authored by Sushruta
III. National Statistics Day	C. Observed on 11 July
IV. World Population Day	D. Honours Prasanta Chandra Mahalanobis

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-A, III-D, IV-C
- (B) I-A, II-D, III-B, IV-C
- (C) I-A, II-D, III-C, IV-B
- (D) I-B, II-D, III-C, IV-A

Q6.

Consider the following statements:

A bronze statue of Sushruta was unveiled by Scotland's Royal College of Surgeons.

World Population Day was established in 1989 by the Governing Council of UNDP.

CAFE norms were introduced in 2019.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Q7.

Up to what vehicle weight do the CAFE norms apply?

- (A) 1,500 kg
- (B) 2,500 kg
- (C) 3,500 kg
- (D) 5,000 kg

Type-in-the-answer passages

Nuclear treaties and tests: TITA check

The nuclear age began during the Second World War, when a secret research effort led by the United States produced the first atomic bombs. The United Kingdom and Canada also took part in that effort. The first explosion took place in the New Mexico desert, and bombs were then dropped on two Japanese cities, after which Japan surrendered. Nuclear research in these years was kept highly secret. Other nuclear powers soon followed, and one later explosion set a record for size that still stands. Governments then responded with a set of agreements. One early treaty banned tests in the atmosphere, outer space and underwater, but not underground. Another treaty aimed to stop the spread of weapons, while a later UN treaty sought to ban all nuclear explosions, though it has not entered into force. In the late twentieth century, several countries outside the main treaties conducted tests. North Korea withdrew from one treaty and carried out its own tests. A treaty banning nuclear weapons completely became legally binding after a few years, though major nuclear powers have not joined it. A UN agency was also created to promote peaceful uses of atomic energy and to oversee safeguards. Today these agreements shape debates over which countries may acquire nuclear technology.

Q1.

In which year was the Partial Test Ban Treaty (PTBT) adopted?

Answer: _____

Q2.

In which year was the Nuclear Non-Proliferation Treaty (NPT) signed?

Answer: _____

Q3.

In which year did the UN adopt the Comprehensive Nuclear-Test-Ban Treaty (CTBT)?

Answer: _____

Q4.

In which year did the Treaty on the Prohibition of Nuclear Weapons (TPNW) enter into force?

Answer: _____

Q5.

Which country became the sixth nation to test a nuclear device, in 1974?

Answer: _____

Q6.

Which country detonated the Tsar Bomba, the largest nuclear explosion ever detonated?

Answer: _____

Q7.

Who was the scientific lead of the Manhattan Project?

Answer: _____

Strategic Partnership: Short Answer

India and Indonesia describe their relationship as a comprehensive strategic partnership, and their cooperation now reaches into defence, digital systems and maritime awareness. Indonesia occupies a pivotal position in India's wider engagement with the region. Its place in India's Act East Policy and Indo-Pacific strategy gives the partnership strategic weight, and Indonesia's location matters because one of the world's busiest maritime chokepoints lies close by.

On defence, the two countries take part in several joint military exercises, and a further security dialogue has been proposed to strengthen defence consultations. Indonesia's role also extends to maritime surveillance. It will place a liaison officer at a regional maritime information centre hosted by India to improve maritime domain awareness.

Digital cooperation is another area. Indonesia has launched a digital commerce network modelled on an Indian system. In space, a tracking facility in Indonesia is jointly run by an Indian space agency and an Indonesian research body to support satellite and launch vehicle missions.

Trade and economic ties are significant as well. Indonesia is among India's leading partners within ASEAN, and its large economy gives it weight in the grouping. Together, these areas show how a bilateral relationship can combine strategy, technology and commerce.

Q1.

What rank does Indonesia hold among India's trading partners within ASEAN? (answer as a number)

Answer: _____

Q2.

Which Indian agency jointly operates the Biak Telemetry, Tracking and Command Facility with Indonesia's BRIN? (abbreviation)

Answer: _____

Q3.

Indonesia Open Network was inspired by which Indian model? (abbreviation)

Answer: _____

Q4.

How many major military exercises between India and Indonesia are listed in the booklet? (in number)

Answer: _____

Q5.

Indonesia will post a Liaison Officer at which facility to improve Maritime Domain Awareness? (abbreviation)

Answer: _____

Q6.

Sabang Port, which India and Indonesia agreed to develop jointly, is situated near the entrance to which strait? (name the strait)

Answer: _____

Q7.

Indonesia's pivotal position in India's Act East Policy and Indo-Pacific Strategy is also linked to which Indian vision? (abbreviation)

Answer: _____

RPA and Court Rulings Check

Section 8 of the Representation of the People Act, 1951, sets out when a legislator is disqualified because of a criminal conviction. The provision does not treat all offences alike. For some offences, a conviction alone is enough for disqualification, while for others the sentence imposed decides the matter. The Act also protects sitting members who challenge a conviction. Such a member can continue in the House for a limited period if an appeal is filed quickly, until the appeal is decided or the term ends, whichever is earlier. The Supreme Court has examined this area several times. In one ruling, it held that no constitutional bar prevents the appointment of a minister with a criminal background. In another, it held that only Parliament can legislate new grounds of disqualification, and that courts cannot add them. A later case from 2025 involved a minister who was reappointed after getting bail and who was asked to choose between freedom and office. He stepped down while his bail continued. The Bill under discussion differs from these rules because it links removal to arrest and detention rather than to a conviction. This difference explains why the Bill is read alongside the existing disqualification scheme in the Act.

Q1.

Under Section 8(1) of the Representation of the People Act, 1951, a person convicted for promoting enmity between groups is disqualified on mere conviction for how many years? (in years)

Answer: _____

Q2.

Under Section 8(2), a conviction for hoarding or dowry offences leads to disqualification only if the sentence is at least how many months? (in months)

Answer: _____

Q3.

Under Section 8(3), disqualification for other offences requires a sentence of not less than how many years? (in years)

Answer: _____

Q4.

Under Section 8(4), a sitting MP or MLA who files an appeal within how many months can continue as a member? (in months)

Answer: _____

Q5.

In which year did the Supreme Court decide *Manoj Narula v. Union of India*, holding that no constitutional bar exists on appointing ministers with a criminal background?

Answer: _____

Q6.

In the 2025 V Senthil Balaji case, a minister had to choose between freedom and office after reappointment post-bail. Which state's minister was he? (name of the state)

Answer: _____

Powers and finances of AHDCs

The Autonomous Hill Development Councils are created through legislation and apply only in Ladakh. Their powers are mainly administrative and developmental. The Ladakh Autonomous Hill Development Council Act gives the government the power to create councils in every district. The Act is therefore the legal basis for the councils and their functions. Every district of Ladakh is to have one such council, and each council works within the powers described above. The councils can exercise authority over land allotment, and they also have authority over district cadre recruitment and promotions. They prepare district development plans for sectors such as health, education, tourism, infrastructure and social welfare. Each council also has financial powers, and it can levy taxes, fees and other lawful charges. The councils do not have judicial authority. This is an important difference from the Sixth Schedule Autonomous District Councils, which can establish village courts under customary tribal laws. The Sixth Schedule councils also have legislative, executive, financial and judicial powers. The Sixth Schedule councils apply to tribal areas in certain northeastern States, while the AHDCs apply only in Ladakh. Ladakh has been administered as a Union Territory since 2019, and it has no Legislative Assembly. Decentralised local institutions are therefore central to how the region is governed.

Q1.

Which fund does each AHDC maintain? (Give the name in two words.)

Answer: _____

Q2.

Which section of the Ladakh Autonomous Hill Development Council Act empowers the Government to establish a Council in every district? (Give the section number with sub-section.)

Answer: _____

Q3.

Besides Article 244(2), which other Article number gives 6th Schedule Autonomous District Councils their constitutional status? (Give the number with sub-clause.)

Answer: _____

Q4.

Which district of Ladakh is the largest? (Name the district.)

Answer: _____

Q5.

For what purpose may AHDCs levy taxes, fees and other lawful charges? (Two words.)

Answer: _____

Q6.

Articles 371 and 371A to 371J fall under which Part of the Indian Constitution? (Give the Roman numeral.)

Answer: _____

Q7.

Which town is the winter capital of Ladakh? (Name the town.)

Answer: _____

Registration Rules Recall

Delhi's electric vehicle policy changes which new vehicles can be registered in the city, and it does so in stages rather than all at once. The first categories affected are electric three-wheelers and light commercial trucks, while two-wheelers come later in the schedule. Schools are also covered by the transition. Their bus fleets must include a growing share of electric buses, and the policy sets a longer-term goal for the whole school bus fleet. School buses are one of several priority segments, which also include commercial goods carriers, app-based aggregator fleets and government-owned transport fleets. The policy's wider objective is to reduce urban air pollution and greenhouse gas emissions. It also aims to encourage sustainable public and commercial transport across the city. Together, the registration rules and school bus targets show how the policy moves Delhi towards electric mobility over the period up to 2030. The policy is notified by the Government of the National Capital Territory of Delhi and comes into force from 1 July 2026. Demand for petrol and diesel is expected to reduce, and new jobs are expected to be created in the automobile sector. Reduction in pollution-induced health problems is also listed as a benefit. The booklet lists these as expected benefits of the shift towards electric vehicles.

Q1.

From which year will only electric 3-wheelers and electric N1 category light commercial trucks be newly registered in Delhi?

Answer: _____

Q2.

From which year will new 2-wheeler registration in Delhi be restricted exclusively to electric models?

Answer: _____

Q3.

What minimum percentage (in per cent) of their bus fleet must schools convert to electric buses within 2 years of the policy's implementation?

Answer: _____

Q4.

What is the long-term target (in per cent) for electrification of school bus fleets by 2030?

Answer: _____

Q5.

Which body is responsible for infrastructure development under the policy?

Answer: _____

Q6.

Until the end of what is existing petrol and diesel vehicles registered in Delhi permitted to operate?

Answer: _____

Q7.

What is the total planned investment under the policy (in crore rupees)?

Answer: _____

Scheme numbers check

Many families spend a steady share of their income on electricity, and a rooftop solar programme offers one way to reduce that cost. The PM Surya Ghar: Muft Bijli Yojana is built around this idea. It encourages households to install solar panels on their rooftops so that the home can draw power from the sun. The scheme is described as the largest programme of its kind in the world, which reflects how many homes it is meant to reach. Because panels can be costly for ordinary families, the government offers financial support in the form of a subsidy that lowers the share of cost paid by each household. The basic goal is to give households free electricity up to a set number of units.

The programme has also drawn outside finance. An international development bank has approved funds to support India's rooftop solar programme, which shows that the effort has attracted attention beyond the country. Alongside the household scheme, the government promotes a model solar village idea. Under this idea, villages are encouraged to become self-reliant in energy. Eligibility depends on population size, and special category states follow a lower threshold. Taken together, these measures link clean energy with everyday household life and with village-level independence. Such schemes also show how energy policy can reach households directly.

Q1.

How many Model Solar Villages are to be established in each district? (number)

Answer: _____

Q2.

What is the maximum subsidy on rooftop solar panel installation under the scheme? (in per cent)

Answer: _____

Q3.

How many crore households are targeted for rooftop solar systems by 2027?

Answer: _____

Q4.

How many units of free electricity per household does the scheme aim to provide? (in units)

Answer: _____

Q5.

How much did the World Bank approve to support India's rooftop solar programme under this scheme? (in USD million)

Answer: _____

Q6.

Above what population is a village eligible for a Model Solar Village in general states? (in persons)

Answer: _____

Rationale and Limits Check

Foodgrain entitlements under the National Food Security Act are linked to categories of beneficiaries. Within the Antyodaya Anna Yojana, the present design gives a single fixed amount to each household, so the amount a person gets depends on how many people share the household. The Union Government has argued that this design produces inequities inside the category. A revised design would calculate the entitlement for each individual, while keeping a ceiling for each household so that large families do not receive unlimited grain. The government expects this to link allocation more closely with what people need to eat, and to make treatment across categories more uniform. The proposal does not, however, tackle one important concern in the system. Readers should remember that the amendment is still a proposal under discussion, and that its aims and limits are described in the booklet. The discussion covers the logic of the change and its effect on different households. The rules discussed here are a useful base for answering questions on this theme. Each part of the revised design is linked to a clear purpose, and the passage is meant to help a reader connect the purpose with the mechanism that the government has described for achieving it.

Q1.

What is the maximum foodgrain cap per AAY household per month under the proposed design? (in kg)

Answer: _____

Q2.

Under the current NFSA design, how many kg per person per month does a Priority Household receive? (in kg)

Answer: _____

Q3.

How many crore people were covered by the extra 5 kg of free foodgrains given to NFSA beneficiaries? (in crore)

Answer: _____

Q4.

What term describes small households receiving more foodgrain per person than larger households? (three words)

Answer: _____

Q5.

How many kg per month would each individual in an AAY household receive under the proposal? (in kg)

Answer: _____

Q6.

Which Section of the NFSA 2013 does the amendment modify? (in the form 3(x))

Answer: _____

Brexit and the UK's exit from the EU

The European Union is an economic and political union, and it allows free trade among member countries without checks or extra charges. Membership was not permanent, however. A national vote in the UK led to a decision to leave, and the process that followed involved long political debate.

Once the decision was made, the UK had to plan a different future. Leaving the bloc meant losing the market access that membership gave, so London began looking for new trade partnerships to support growth. The arrangement that governed the exit also allowed a phase in which Britain continued to follow EU laws and rules for a set period. The change marked a major shift in Britain's trade position.

Other countries were changing their trade choices too. Many western nations wanted to reduce their dependence on China, and several saw India as a China-plus-one alternative. At the same time, geopolitical tensions and tariff disputes encouraged governments to seek stable and predictable trade relations. This reflected a wider shift in how governments viewed their trade relationships.

India also reshaped its approach. Rather than remaining in larger regional groupings, it moved its focus toward bilateral agreements that protect its interests. Such agreements are seen as a way to reduce uncertainty for business and long-term trade.

Q1.

In which year did the UK join the European Economic Community, the body that later became the EU?

Answer: _____

Q2.

For how many years was the UK an EU member before it ceased membership? (in years)

Answer: _____

Q3.

Approximately how many million people opted for Brexit in the June 2016 referendum? (in million, one decimal place)

Answer: _____

Q4.

On which date did the UK formally leave the EU?

Answer: _____

Q5.

Until the end of which year did the transition period under the withdrawal agreement run?

Answer: _____

Q6.

In which month of 2016 was the Brexit referendum held?

Answer: _____

Q7.

For more than how many years did the UK face political turmoil before formally leaving the EU? (in years)

Answer: _____

Currency Management Basics

Currency management in India is shared between the government and the Reserve Bank of India. Currency and coinage fall within the legislative domain of the Union government, and the central bank handles much of the day-to-day work. The RBI issues banknotes, estimates how much currency the country requires and tries to maintain an adequate supply of notes. It also ensures that the notes in circulation are of good quality. Banknote designs and materials are approved by the government, based on recommendations from the RBI Central Board. Coins follow a different path. The government designs and mints them, and once minted they are supplied to the RBI. The RBI then distributes coins to banks and the public through its currency management network. Banknotes themselves are printed at facilities run by two different kinds of organisation, one a government enterprise and the other a company owned by the RBI. Together they print notes in many denominations for the whole country. Each body has a clearly defined role in the system. Banknote printing and coin production are handled through different channels, so the roles are easy to confuse. This division of work is a useful theme for economics and current affairs, because it shows how government and central bank responsibilities are separated.

Q1.

In which year did the RBI introduce the Clean Note Policy?

Answer: _____

Q2.

In which year was the Reserve Bank of India Act enacted as the principal legal framework for issuing banknotes?

Answer: _____

Q3.

How many currency printing presses does SPMCIL operate in India? (in number)

Answer: _____

Q4.

In which Indian city is the SPMCIL currency printing press in western India located?

Answer: _____

Q5.

In which Indian state is the BRBNMPL currency printing press at Mysuru located?

Answer: _____

Q6.

How many government-owned mints manufacture coins in India? (in number)

Answer: _____

Rail Corridor Facts

The Mumbai-Ahmedabad High-Speed Rail Corridor is a project between India and Japan. It links a city in Maharashtra with a city in Gujarat. The project draws on Shinkansen technology, and it forms part of India's National Rail Plan. The route passes through Gujarat, Maharashtra and Dadra and Nagar Haveli. Japan will supply train sets for the line, and one model, the E10, reflects a design partnership with a UK-based firm. Financing has come largely from Japan through a JICA loan that carries a very low interest rate. The implementing body is the National High-Speed Rail Corporation Limited. One stretch, between Surat and Bilimora, is scheduled to be completed before the rest of the corridor. India is expected to be the first country outside Japan to adopt one of the Shinkansen models that Japan will supply. The stations are located in both Gujarat and Maharashtra. The project is described as a flagship in the partnership between India and Japan. The completion of the entire corridor is scheduled for a later date than the Surat-Bilimora stretch. Taken together, the route, funding and train details show how the project combines Japanese technology with Indian infrastructure goals. The booklet gives several figures for distances, funding and timelines. Each of these points is drawn directly from the booklet's account of the project.

Q1.

What is the total length of the Mumbai-Ahmedabad High-Speed Rail Corridor? (in km)

Answer: _____

Q2.

How many stations does the corridor have in Gujarat? (number)

Answer: _____

Q3.

Which Japanese company designed the E10 Shinkansen train that India is to adopt? (name)

Answer: _____

Q4.

Japan's JICA loan finances more than what percentage of the project? (number, in per cent)

Answer: _____

Q5.

For how many years is the JICA loan repayable? (number)

Answer: _____

Q6.

How many Shinkansen train sets will Japan provide to India? (number)

Answer: _____

Q7.

By which year is the full Mumbai-Ahmedabad corridor to be completed? (year)

Answer: _____

Earth Summit recall

The United Nations Conference on Environment and Development was a major meeting held in Brazil, and it is widely remembered as the Earth Summit. Its central aim was to make the world see that environmental protection and sustainable development had to be pursued together. The conference adopted several documents. The first was a short statement of guiding principles, which stressed the precautionary approach, the polluter pays principle and common but differentiated responsibilities. The second was an action plan that was not legally binding, but it addressed poverty, sustainable consumption and the protection of fragile environments. This plan gave a stronger role to major groups such as women and indigenous people, and it offered a framework for action at local, national and global levels. The third document dealt with forests, and its principles were also not legally binding. These principles covered the conservation of forests and the sustainable management of all types of forests. Taken together, the outcomes of the conference laid part of the groundwork for later international agreements, including several that followed in the years after the summit. Many of these ideas were later revisited at summits held over the following decades, which kept the discussion active. Its outcomes were framed as guidance and action plans rather than as binding treaties.

Q1.

How many Guiding Principles does the Rio Declaration set out? (answer in number)

Answer: _____

Q2.

Which Brazilian city hosted the 1992 UN Conference on Environment and Development? (name the city)

Answer: _____

Q3.

Which non-binding action plan for sustainable development came out of the Earth Summit? (name it, two words)

Answer: _____

Q4.

In which year was the Rio+20 Conference held? (year)

Answer: _____

Q5.

Which city hosted the 2002 World Summit on Sustainable Development, also known as Rio+10? (one word)

Answer: _____

Q6.

Which agreement, whose foundation was partly laid by the Earth Summit, is listed with the year 2015? (name it in two words)

Answer: _____

Policy and Institutions Check

A government policy framed in recent years changed the rules for India's space sector. It allowed non-government entities to take part across the complete space value chain. Several institutions now shape the sector, each with a distinct role. NewSpace India Limited is one of these bodies. Antrix Corporation is another body in this group, and it promotes space products, services and technologies. IN-SPACe acts as a single-window regulator for private space activities. It also runs a seed fund scheme that supports startups and MSMEs with grants. Foreign investment is governed separately by the FDI Policy, and the limits differ across segments. Satellite manufacturing and operations, launch vehicles and spaceports, and satellite components and subsystems are listed as separate segments. The limits therefore depend on the segment in which a company works. The

segment rules guide foreign investment in each area. Private firms are now active in building launch vehicles and satellites. Recent examples of private work include Skyroot Aerospace, CosmoServe Space and Cosmos Diamonds. Both government and private entities now operate within the same framework. Each institution has its own objectives and an office location. The sector now has a regulator, a commercial body and a marketing body. Together with the policy, these bodies shape how private firms enter India's space sector.

Q1.

In which year was the space policy that opened the complete space value chain to non-government entities framed?

Answer: _____

Q2.

In which year was NewSpace India Limited established?

Answer: _____

Q3.

Up to how much grant, in crore rupees, does the IN-SPACe Seed Fund Scheme provide to startups and MSMEs?

Answer: _____

Q4.

What is the automatic-route FDI limit (in per cent) for launch vehicles and spaceports?

Answer: _____

Q5.

In which city is the headquarters of IN-SPACe located?

Answer: _____

Q6.

In which year was Antrix Corporation established?

Answer: _____

Q7.

NewSpace India Limited is the commercial arm of which organisation?

Answer: _____

Indian Railways: facts and figures

Railways came to India in the mid nineteenth century, when the first line was opened between two cities during the tenure of a Governor General. The network is now organised into administrative zones, and its tracks are of different widths. The country classifies these tracks into three groups based on the distance between the rails. Each zone manages a part of the national network. Some lines run through hilly terrain, and a few of them are known as mountain railways. In recent years, the government has focused on upgrading stations, raising speeds and adding safety systems. New high-speed trains have been introduced on several routes, including services with names such as Tejas and Humsafar. One long project links Maharashtra, Goa and Karnataka. A financial arm supports the investment that such projects need. Several new schemes also aim at redeveloping stations and cutting energy use, which shows that the network is being modernised in many areas at once. Track width is one of the ways the network's lines are described and compared. Several of these changes were announced in the same period, which shows the scale of the planned upgrades.

Q1.

In which year was the first railway line in India introduced, connecting Bombay to Thane?

Answer: _____

Q2.

Under which Governor General was the first railway line in India introduced? (name only)

Answer: _____

Q3.

How many Railway Zones does India have? (number)

Answer: _____

Q4.

What is the length of the Konkan Railway route, from Roha to Mangalore? (in km)

Answer: _____

Q5.

What is the width of the Broad Gauge track in India? (in metres)

Answer: _____

Q6.

Which station near Bhopal will become India's first private railway station? (name of station)

Answer: _____

Q7.

Which railway zone is the largest in India? (name of zone)

Answer: _____

Final and Awards Recall

The final of the 2026 FIFA World Cup was decided by a single goal, as Spain defeated Argentina in New Jersey. The result came at the end of a tournament that produced several record-setting performances. The tournament recognised outstanding individuals as well as teams, and several awards were presented at its close. The Golden Ball is given to the best player of the tournament, the Golden Boot goes to the leading goalscorer, and the Golden Glove honours the best goalkeeper. A separate award goes to the best young player, and a Fair Play Trophy was also presented. Each individual award carries its own title, so a player can win one without winning the others. Prize money for teams is performance-based, so the amount a team receives rises with the stage it reaches. The champion receives the largest share, followed by the runner-up, the third-place team and the fourth-place team. Teams eliminated in the group stage still receive a payment, and the total amount distributed among all 48 teams runs into hundreds of millions of dollars. Taken together, the individual awards and the performance-based payments show how the tournament rewards both excellence and progress through the competition. The difference between individual awards and team prize money is an important distinction to keep in mind.

Q1.

How many goals did the Golden Boot winner score in the 2026 tournament? (number)

Answer: _____

Q2.

Who won the Golden Glove as the tournament's best goalkeeper?

Answer: _____

Q3.

Who won the Golden Ball as the best player of the 2026 tournament?

Answer: _____

Q4.

In which minute of the final did Ferran Torres score the winning goal? (number)

Answer: _____

Q5.

What was the prize money paid to the champion team, in millions of dollars? (number)

Answer: _____

Q6.

What was the total performance-based prize money for all 48 teams, in millions of dollars? (number)

Answer: _____

Q7.

Which team secured third place at the 2026 FIFA World Cup?

Answer: _____

Economy and statistics: typed answer recall

The World Bank sorts economies into four income groups using Atlas gross national income per capita, and it revises the cut-off values every year to account for global inflation. Thresholds are stated in current US dollars, and classifications remain in force for the financial year that begins on July 1. Because of this annual cycle, a country can move between groups as its economy grows or its figures are revised. The Atlas method averages exchange rates over several years, which softens the impact of short-term currency swings. The statistics ministry has launched a new monthly index that measures the real output of the formal services sector against a base year. It is the services counterpart of the index of industrial production, and it uses a fixed-weight method based on gross value added to remove the effect of price changes. The index covers formal service sub-sectors that account for a large share of the services economy. Data for April 2026 showed that most of these sub-sectors grew at double-digit rates. Investment flows also moved sharply. A UN agency report said that India's foreign direct investment inflows rose markedly in 2025, lifting India up the global rankings, even as worldwide flows stayed uneven. Indian companies also increased their overseas investment during the same year.

Q1.

How many formal service sub-sectors does India's new monthly services index cover? (give a number)

Answer: _____

Q2.

In how many of the covered sub-sectors did growth reach double digits in April 2026? (give a number)

Answer: _____

Q3.

What is the base year of the new services production index? (give the financial year)

Answer: _____

Q4.

India's GNI per capita in 2025 was how many US dollars? (give the number, in US dollars)

Answer: _____

Q5.

By how many per cent did India's FDI inflows rise in 2025? (in per cent)

Answer: _____

Q6.

After the 2025 rise, what was India's rank among global FDI recipients? (give the ordinal number)

Answer: _____

Q7.

Since which year has India been classified as a Lower-Middle-Income economy by the World Bank? (give the year)

Answer: _____

Tibet River and Fault Check

Scientists have raised safety concerns about a large hydropower project planned on a major river in Tibet. The concern arises from the local geology. The project's reservoir area is crossed by an active tectonic fault, which lies in the eastern Himalayan region of south-eastern Tibet. Such a fault is part of a larger fault system, and in this region that system is created by an ongoing collision between large tectonic plates. The river itself is a major waterway that carries water from Tibet into South Asia. As it flows onward, it takes different names in different regions, passing through Indian states before it reaches the plains and crosses into the neighbouring country. Local residents and officials would need reliable information before any such decision is taken.

Q1.

After it enters India, what is the river called on its first Indian course? (one word)

Answer: _____

Q2.

Through which Indian state does the river flow as the Brahmaputra? (one word)

Answer: _____

Q3.

What is the name of the river when it enters Bangladesh? (one word)

Answer: _____

Q4.

Through which Indian state does the river first enter India? (two words)

Answer: _____

Q5.

What is the name of the hydropower project in Tibet that faces safety concerns? (one word)

Answer: _____

Q6.

Between which two tectonic plates is the ongoing collision that creates the fault system? (give both names)

Answer: _____

Q7.

What is the name of the active tectonic fault in south-eastern Tibet? (two words)

Answer: _____

Saudi Arabia's Nuclear Vision: TITA Practice

Saudi Arabia has set out a nuclear programme that rests on four drivers, and the Kingdom's ambitions reach well beyond electricity alone. The country signed the Nuclear Non-Proliferation Treaty in 1988 and launched its National Atomic Energy Project in 2017. The programme is linked to economic and industrial growth, and it is connected to the Kingdom's place in the Middle East. The United States and Saudi Arabia have now signed a civil nuclear cooperation agreement, which

forms the latest stage in this relationship. Such an agreement falls under a legal framework that is treated as a prerequisite for significant nuclear cooperation with other countries. The framework covers the transfer of reactors, components and technical expertise. Any nuclear activity carried out under it remains subject to verification, and the two parties have agreed on arrangements for this purpose. The agreement also reflects changes to earlier conditions that the United States had placed on cooperation with the Kingdom. The agreement is subject to a review period by the United States Congress. Each of the four drivers serves a different purpose, so the programme cannot be understood through any single goal alone. These developments show how Saudi Arabia's nuclear plans are linked to its energy goals, its industrial aims and its diplomatic relations.

Q1.

Nuclear power would reduce Saudi Arabia's heavy dependence on crude oil and which other fuel for electricity generation?

Answer: _____

Q2.

The nuclear programme provides the massive energy input needed for large-scale which activity?

Answer: _____

Q3.

Which of the four drivers is concerned with reinforcing Saudi Arabia's status as a regional energy power?

Answer: _____

Q4.

Nuclear-generated electricity provides a steady supply for which systems?

Answer: _____

Q5.

The earlier Gold Standard barred domestic uranium enrichment and which other activity?

Answer: _____

Q6.

Under the new deal, flexibility is allowed for US-supported domestic what?

Answer: _____

Q7.

Which arrangement ensures that civilian nuclear materials are not diverted towards weapons purposes?

Answer: _____

Prambanan Temple and Shared Heritage: Typed Answer

Indonesia is the largest archipelagic nation in the world, and its capital is Jakarta, although the administrative transition towards Nusantara is underway. Its currency is the Indonesian Rupiah, and its President is Prabowo Subianto. Indonesia is also the largest economy in ASEAN, which makes it a central partner in India's engagement with the region. Prambanan Temple Complex is a Hindu temple complex in Indonesia. Indonesia occupies a pivotal position in India's Act East Policy and Indo-Pacific Strategy. The Prime Minister of India recently concluded a State Visit to Indonesia, which reinforced the India-Indonesia Comprehensive Strategic Partnership. The visit covered defence and maritime cooperation, including a contract for missile systems, and a stainless-steel slab manufacturing facility was agreed for Indonesia. India also presented a replica of the historic Nalanda Copper Plate to strengthen shared civilisational links. India announced the supply of 100 tonnes of high-quality wheat seeds, while Indonesia launched a digital commerce network inspired by an Indian model. Indonesia will also post a Liaison Officer at an Indian facility

to improve Maritime Domain Awareness. Both countries also agreed to strengthen cooperation in medical product regulation.

Q1.

In which year did British surveyor Colin Mackenzie formally rediscover the Prambanan ruins? (year)

Answer: _____

Q2.

Prambanan is locally known by which name? (two words)

Answer: _____

Q3.

Under which dynasty was Prambanan built in the 9th and 10th centuries CE? (name of dynasty)

Answer: _____

Q4.

For which period has the Tagore-Dewantara Year been declared? (years)

Answer: _____

Q5.

In which East Java special economic zone has approval been announced for an IIM Bangalore branch campus? (name of zone)

Answer: _____

Q6.

Prambanan is the second largest Hindu temple complex in Southeast Asia, after which temple complex in Cambodia? (name)

Answer: _____

Q7.

In which Indonesian city is the Prambanan Temple Complex located? (name)

Answer: _____

The Three Bills: Facts and Articles

The 130th Constitution Amendment Bill is part of a package of Bills that deal with removing leaders from office. Together, the Bills propose the removal of the Prime Minister, Chief Ministers and Ministers under certain conditions. The package reaches several levels of government, including the Union, the states and Delhi, so its rules are not limited to one office. The Bills set out the conditions for removal and name the authority that would act for each office. They also address whether a removed minister may later return to office after release. The Bills were presented as a set, and each one covers a different part of the framework. Each Bill has its own formal name, which the booklet lists in full. A committee is currently examining the main Bill, so the Bills remain under consideration. The rules differ between offices, so the scope of each one depends on the office involved. The booklet presents the conditions in a table that lists the offence threshold, the removal authority for each office and any additional provision. Comparing the rows of that table shows how the rules differ between the Union and the states. These details form the core of the proposal that the booklet describes.

Q1.

In which year was the 130th Constitution Amendment Bill introduced?

Answer: _____

Q2.

Which body is examining the 130th Constitution Amendment Bill? (short form)

Answer: _____

Q3.

Which office holder tabled the three Bills? (office name)

Answer: _____

Q4.

Under which Article of the Constitution are Union Ministers covered? (number)

Answer: _____

Q5.

Under which Article are State Ministers and Chief Ministers covered? (number)

Answer: _____

Q6.

Under which Article are the Chief Minister and Ministers of Delhi covered? (number with letters)

Answer: _____

Q7.

Which legislation extends the Bill's rules to Ministers of Union Territories? (full name with year)

Answer: _____

Governance Gains and Critics' Concerns: Terms

The Bill is presented as a step toward ethical governance in public life. Supporters say it stops leaders from keeping power while facing serious charges, and that this protects public trust in institutions. It is also described as filling a gap in the law on legislators. The debate also brings in the Representation of the People Act, 1951, which sets out disqualification grounds for legislators. Supporters also point to the aim of closing constitutional gaps, which they say improves accountability in the executive. The booklet records these arguments under one heading and the concerns under another. Critics, however, have raised several concerns about how the provisions could work in practice. Their arguments focus on the position of elected state governments, on the rights of people who have been detained but not yet tried, and on the role of investigating agencies. Some critics also raise questions about the basic rights of an accused person. The concerns listed by critics are equally specific, and one of them is framed as a threat to federalism. These concerns mean the same provisions are seen in two ways, as a safeguard by some and as a risk by others. The booklet keeps both views in view, so the reader sees the reasons on each side.

Q1.

The RPA disqualifies legislators only after which stage of a criminal case? (one word)

Answer: _____

Q2.

What term does the booklet use for the anomaly the Bill removes? (three words)

Answer: _____

Q3.

Which two agencies could be exploited to arrest leaders on weak charges? (acronyms)

Answer: _____

Q4.

Which principle does the Bill allegedly contravene? (short phrase)

Answer: _____

Q5.

Under the Public Interest Foundation PIL (2018), which body alone can legislate on disqualification? (one word)

Answer: _____

Q6.

Which body's 170th report recommended disqualification at the framing of charges? (name of body)

Answer: _____

Q7.

What principle does the Bill say it upholds? (two words)

Answer: _____

How a Constitution Amendment Bill Passes: Facts

Amending the Constitution follows a formal path that the booklet traces as a flow chart. A proposal is first drafted as a Bill and then introduced in Parliament. The Bill is then put to a vote, and the voting rules are more demanding than those for ordinary legislation. The booklet explains how the votes are counted and what happens when the count is level. The booklet sets out the vote thresholds for each House in its diagram. A Bill's stages are shown in order, and each stage has its own requirement, which differs for each House. After the chambers complete their votes, the Bill moves to the next stage in the process. The sequence ends with a formal step that follows the completion of the House stages. The booklet also connects this process with other parts of the Constitution and with case law on legislators. The chart includes a box listing the provisions and legal cases that relate to the process. The booklet presents the process with simple labels, so each step can be read on its own. A reader can compare the stages with the list of provisions in the box to see how the process connects to the wider law.

Q1.

Which Articles are listed as related provisions for this process? (two numbers)

Answer: _____

Q2.

Who can cast the deciding vote in a tie? (office, one phrase)

Answer: _____

Q3.

To which office is the passed Bill presented? (one word)

Answer: _____

Q4.

Which case is listed among the related matters for this process? (surname)

Answer: _____

Q5.

How many Houses must pass the Bill? (number)

Answer: _____

Q6.

After assent, the Bill becomes what? (one word)

Answer: _____

Special Provisions Under Article 371 Series

Ladakh became a Union Territory without a Legislative Assembly in 2019, and this made decentralised local institutions central to its governance. The Ladakh Administration has approved the establishment of Autonomous Hill Development Councils in all seven districts. The step follows an in-principle agreement with the Ministry of Home Affairs to extend constitutional safeguards under Article 371 to the Union Territory.

The Autonomous Hill Development Councils can be compared with the Autonomous District Councils that the Sixth Schedule provides for. The comparison looks at how each body is created, where it applies and what powers it holds, and the two bodies differ on each of these points. Article 371 and Articles 371A to 371J are placed in Part XXI of the Constitution, and together they provide special constitutional safeguards to certain States and regions.

Each article in that group is linked with a particular State or area, so the safeguards do not apply in the same way across the country. The Sixth Schedule councils and the Hill Development Councils therefore rest on different legal foundations, and this difference is central to any comparison of the two. Ladakh has been administered by the Government of India as a Union Territory since 31 October 2019, its capital is Leh, and Kargil serves as the winter capital.

Q1.

Article 370 is linked with which State?

Answer: _____

Q2.

Which State is covered by Article 371D?

Answer: _____

Q3.

Which State is covered by Article 371F?

Answer: _____

Q4.

Which State is covered by Article 371H?

Answer: _____

Q5.

Which State is covered by Article 371J?

Answer: _____

Q6.

Which State is covered by Article 371G?

Answer: _____

Q7.

Which State is covered by Article 371B?

Answer: _____

Ladakh Demands and Reservation Details

Ladakh is administered by the Government of India as a Union Territory, a status it has held since 31 October 2019. Leh serves as the capital, and Kargil serves as the winter capital. The region shares its borders with Himachal Pradesh and Jammu and Kashmir, among other neighbours. Ladakh has been in the news because of two recent developments in its governance and public life.

The Centre has introduced a new reservation regulation for the Union Territory. The regulation amends an existing framework as it applies to Ladakh, and it has taken effect after being approved.

The rules it sets out apply to the Union Territory alone, which makes the change specific to this region.

The Ladakh Administration has approved the establishment of Autonomous Hill Development Councils in all of its districts. The step follows an in-principle agreement with the Ministry of Home Affairs to extend constitutional safeguards under Article 371 to the Union Territory. Each council will exercise authority over land allotment, district cadre recruitment and promotions, district development planning, and sectors such as health, education, tourism, infrastructure and social welfare.

Decentralised local institutions have become central to governance in Ladakh since it became a Union Territory. Both developments concern how the region is governed, and both are part of the same current affairs story.

Q1.

In which year was the Jammu and Kashmir Reservation Act, which the 2025 Regulation modifies, enacted?

Answer: _____

Q2.

What total reservation cap, with EWS quotas excluded, does the 2025 Regulation set? (Give the figure in per cent.)

Answer: _____

Q3.

From which date was the Reservation (Amendment) Regulation, 2025 effective? (Give day, month and year.)

Answer: _____

Q4.

On which date did the President of India approve the Reservation (Amendment) Regulation, 2025? (Give day, month and year.)

Answer: _____

Q5.

What is Ladakh's traditional name, meaning Land of High Passes?

Answer: _____

Q6.

Apart from Tibet, which Chinese region borders Ladakh?

Answer: _____

Q7.

Which region administered by Pakistan borders Ladakh?

Answer: _____

National Schemes: NEMMP, FAME and PM E-DRIVE: TITA

The booklet describes a set of national schemes that support electric vehicles, alongside its coverage of Delhi's own electric vehicle policy. Among these schemes is a broader national mission plan. FAME India is one of the schemes. Its purpose is to give a boost to the development of electric vehicles, and it works through three approaches: establishing charging stations, incentivising buyers and publicising the benefits of electric vehicles. The booklet lists the expected benefits of this push as a fall in the demand for petrol and diesel, the creation of new jobs in the automobile sector, and a reduction in pollution-induced health problems. Its support covers electric

buses, e-trucks, e-ambulances and other new emerging EV categories, and it is described as building on earlier efforts. Its objectives and nodal ministry are listed in a separate section of the booklet. Separately, the booklet notes that Delhi EV Policy 2.0 builds upon the achievements of Delhi EV Policy 2020 and is set to remain effective until 31 March 2030. The policy also describes electrification of high-usage and high-emission transport segments as a way to reduce vehicular emissions.

Q1.

In which year was the National Electric Mobility Mission Plan launched? (year)

Answer: _____

Q2.

Which ministry launched FAME India? (name the ministry)

Answer: _____

Q3.

In which year does the PM E-DRIVE scheme period end? (year)

Answer: _____

Q4.

Which mission plan is FAME India a part of? (name the plan)

Answer: _____

Q5.

Besides electric cars, which other type of car can claim FAME subsidies? (one word)

Answer: _____

Q6.

Name the three-wheeled category for which FAME subsidies can be claimed. (plural, one word)

Answer: _____

Solar Records and Key Projects

The IRENA Renewable Energy Statistics 2026 covers India's solar performance in 2025. In that year India became the world's second largest solar growth market, and China continued as the largest market. Global solar capacity rose sharply compared with the previous year. In solar power production, India moved up to third place in the world in 2025, after overtaking a major economy. The IRENA statistics also list India's installed solar capacity for 2025.

Several installations stand out in India. Omkareshwar in Madhya Pradesh is India's largest floating solar plant. Bhadla Solar Park is located in Rajasthan and is one of the country's major solar parks. Naukh, in Rajasthan, is India's first commercial solar thermal power plant, developed by Godawari Green Energy. Modhera in Gujarat is India's first 24x7 solar-powered village. Sanchi in Madhya Pradesh is recognised as India's first solar city. Rajarhat, in Kolkata, was India's first floating solar power plant. Guwahati Railway Station is India's first fully solar-powered railway station. The top solar states include Rajasthan, Gujarat, Tamil Nadu, Karnataka and Maharashtra. Global solar capacity increased from one year to the next, as shown by the IRENA statistics. The booklet lists these projects under a section titled Extra Shots. Naukh and Bhadla are both located in Rajasthan.

Q1.

How many GW of solar capacity did India add in 2025, according to the IRENA Renewable Energy Statistics 2026? (in GW)

Answer: _____

Q2.

Which country did India overtake to become the world's third largest solar power producer in 2025?

Answer: _____

Q3.

What is the capacity of Bhadla Solar Park in Jodhpur? (in MW)

Answer: _____

Q4.

In which year was Rajarhat, India's first floating solar power plant, set up?

Answer: _____

Q5.

Which Indian state has Dharnai village, recognised as India's first solar village?

Answer: _____

Q6.

What was global solar power capacity in 2025? (in GW)

Answer: _____

Q7.

Naukh, India's first commercial solar thermal power plant, is in which district of Rajasthan?

Answer: _____

Panchamrita Targets and Solar Initiatives

India's climate commitments, called Panchamrita, were announced at COP26 in Glasgow. The first of these commitments is to achieve net zero by the year 2070. Another is to increase non-fossil energy capacity to 500 GW by 2030, and a third is to meet a large share of energy needs from renewables. Each target in the Panchamrita list is given a time frame in the booklet, either a specific year or the period up to 2030. Several initiatives support solar energy. One initiative, launched at a major climate conference, offers payment guarantees to lower the risk of solar investments and help attract commercial financing. A programme of solar resource centres trains engineers, entrepreneurs and policymakers in solar technologies. A further concept advocates trans-national solar power connectivity, and it was presented at COP26 jointly with a partner country. The concept seeks to integrate regional grids across Asia, the Middle East, Africa and Europe for 24-hour renewable power. These efforts appear under the booklet's list of major collaborative initiatives, and each initiative has its own entry.

Q1.

What percentage of its energy requirements does India aim to meet from renewable energy by 2030? (in per cent)

Answer: _____

Q2.

By how many billion tonnes does India aim to reduce its total projected carbon emissions from now till 2030? (in billion tonnes)

Answer: _____

Q3.

In which year was the Global Solar Facility launched?

Answer: _____

Q4.

Which initiative provides payment guarantees to de-risk solar investments?

Answer: _____

Q5.

Which initiative trains engineers, entrepreneurs and policymakers in solar technologies? (acronym)

Answer: _____

Q6.

Which concept advocates trans-national solar power connectivity? (acronym)

Answer: _____

Q7.

Along with India, which country co-advocated the One Sun, One World, One Grid concept at COP26? (name the country)

Answer: _____

NFSA Entitlement Basics

Foodgrain entitlements in India are set under a central food law that provides foodgrains to beneficiary groups. The Union Government has proposed an amendment to revise the foodgrain entitlement of one such group. The government's argument is that the current design produces inequities within that group, because small households receive more foodgrain per person than larger households. Under the proposal, the entitlement would be calculated for each individual member, with a maximum set at the household level. The government says the change would reduce disparities between this group and the other beneficiary group covered by the law. The argument also points to uniformity between the two beneficiary groups. The amendment seeks to modify one provision of the law, and it does not deal with inclusion errors, in which ineligible people continue to receive benefits. The change is described as a rationalisation that aligns allocation more closely with nutritional requirements. Each beneficiary group is defined separately under the law, and the quantities for the two groups differ. The booklet describes the amendment as aimed at better equity, since distribution would become proportional to household size. The focus of the proposal is on how the entitlement is measured, and the design of each group determines how much grain a household can claim under the law.

Q1.

In which year was the National Food Security Act enacted? (year)

Answer: _____

Q2.

What share of the population did the NFSA make a legal right for foodgrain access? (in words)

Answer: _____

Q3.

Which beneficiary category covers other eligible households? (acronym)

Answer: _____

Q4.

Which beneficiary category is meant for the poorest of the poor households? (acronym)

Answer: _____

Q5.

At what kind of rates does the NFSA supply foodgrains to beneficiaries? (one word)

Answer: _____

Q6.

Which Act, enacted to ensure food and nutritional security, governs these entitlements? (acronym)

Answer: _____

PDS Background Facts

Public distribution of foodgrains in India has a history that predates the current food law. The system was created in a period of shortage, when governments needed to manage the supply and prices of basic food items. Its early coverage was limited, and it was later widened to reach more of the population, including people living in remote regions. Several states built their own distribution arrangements at different points in time, and some of these were among the first of their kind in the country. The system is run through a central ministry in coordination with the states. Over the decades, the central government added special schemes to the basic structure. One such scheme provided additional free grain to beneficiaries of the food law during a period of difficulty. These additions were layered on top of the regular entitlements, which remained the core of the system. The schemes added to the system were designed to supplement the basic structure rather than to replace it. Essential commodities are distributed through state agencies, which act as the channel between the central ministry and families. Understanding the public distribution system therefore involves tracing its origins, the way it expanded, and the schemes that were added to it over time.

Q1.

Which famine's aftermath led to the introduction of the PDS in India? (two words)

Answer: _____

Q2.

In which year was the Revamped Public Distribution System (RPDS) introduced? (year)

Answer: _____

Q3.

In which year did Kerala set up one of India's earliest Public Distribution Systems? (year)

Answer: _____

Q4.

Which state introduced universal free rice distribution through the PDS in 2011? (state)

Answer: _____

Q5.

How many goods are listed as essential goods distributed through the PDS? (number)

Answer: _____

Q6.

Which ministry administers the PDS? (full name)

Answer: _____

Q7.

In which year was the Pradhan Mantri Garib Kalyan Anna Yojana (PMGKAY) launched? (year)

Answer: _____

CETA Scope and Entry into Force: Recall

The India-UK agreement was pursued in a changing trade environment. After Brexit, the UK lost its access to the EU market and began seeking new trade partnerships for growth and global market access. India's growing economy positions it as a key trade partner for the UK after Brexit. Many Western nations have also moved to diversify their trade away from China, citing supply chain and geopolitical concerns. Under this approach, India is treated as a China-plus-one alternative, and a free trade agreement is central to the diversification strategy. India is also seeking to diversify its

trade partners and reduce its dependence on China. Its bilateral free trade agreements, including the one with the UK, are presented as a way to safeguard its interests. Global uncertainty adds to the case. US tariffs and geopolitical tensions are pushing nations towards stable and predictable trade relations. The agreement is described as offering a stable trade framework that ensures economic predictability and long-term growth amid that uncertainty. The agreement itself is described as a next-generation free trade agreement. It goes beyond conventional tariff reduction, and the booklet presents it as a framework for wider economic partnership. Its coverage is wide, and it is presented as a step in India's broader trade realignment.

Q1.

On which date did the India-UK CETA come into force? (give day, month and year)

Answer: _____

Q2.

Under the quota system, India's auto import tariff falls to what percentage from over 100%? (number only, in %)

Answer: _____

Q3.

Whisky and gin tariffs are initially cut from 150% to what percentage? (number only, in %)

Answer: _____

Q4.

By the 10th year, the tariff on whisky and gin is reduced to what percentage? (number only, in %)

Answer: _____

Q5.

What percentage of India's tariff lines become tariff-free within 10 years? (number only, in %)

Answer: _____

Q6.

How many additional annual visas does the FTA provide for Indian professionals? (number only)

Answer: _____

Q7.

Which provision did India exclude from the FTA with the UK to safeguard its generic pharma sector? (name it in two words)

Answer: _____

Double Contribution Convention: Recall

A trade pact between two countries has been described as a next-generation free trade agreement. It goes beyond conventional tariff reduction and deals with market access, regulatory transparency and economic partnership. Its scope covers trade in goods and services, digital trade, investment, government procurement, labour, environment, innovation, SMEs and regulatory cooperation. Alongside the trade pact, the two countries signed a Double Contribution Convention Agreement. The Convention sits alongside the pact as a separate instrument. The booklet discusses it in a separate box alongside the trade pact. Wider context in the booklet relates to these trade arrangements. After leaving the EU, the UK lost its access to the EU market and sought new trade partnerships for growth and global market access. Western nations have also moved to diversify trade away from China because of supply chain and geopolitical concerns. US tariffs and geopolitical tensions have pushed nations towards stable and predictable trade relations. The booklet presents such pacts as offering economic predictability and long-term growth amid global uncertainty, and it describes the wider Brexit background as the UK leaving the European Union, an economic and political union of 28 European countries. It allows free trade among member

countries without any checks or extra charges. Britain has faced many more challenges while sacrificing the smooth and frictionless flow of goods across its borders.

Q1.

On which date did the Double Contribution Convention Agreement come into force? (give day, month and year)

Answer: _____

Q2.

Eligible professionals and employers are exempted from which UK contributions? (name the scheme)

Answer: _____

Q3.

For up to how many years does the exemption apply? (number only)

Answer: _____

Q4.

Apart from professionals, which other eligible group is exempted? (one word)

Answer: _____

Q5.

What kind of contributions do professionals avoid paying in both countries? (two words)

Answer: _____

Q6.

Under the exemption, contributions must continue in which country? (one word)

Answer: _____

Q7.

Along with which agreement did the Double Contribution Convention come into force? (abbreviation)

Answer: _____

Green Hydrogen Mission: TITA

Hydrogen exists only in combination with other elements, so it has to be extracted from naturally occurring compounds before it can be used. Its colour labels, such as grey, blue and green, are linked to how it is produced. Green hydrogen is the category made by a process that uses electricity to split hydrogen from a compound, with the electricity supplied by a particular type of source.

India has built a national mission around green hydrogen. The mission aims to bring change to several sectors, including energy, industry and mobility, and it also seeks to develop manufacturing capacity within the country. Its goals include opportunities for selling the fuel and its derivatives abroad. The mission has components that support a transition programme and a partnership between government and private players for innovation. Its expected results include a reduction in fossil fuel imports, which is measured in money terms.

Taken together, these elements show that the mission covers production, domestic manufacturing and trade rather than a single activity. Its scope therefore reaches from the process used to make the fuel to the markets in which it could be sold. This wide scope means the mission is not limited to a single step in the supply chain.

Q1.

Which ministry is the nodal ministry for the national green hydrogen mission? (name)

Answer: _____

Q2.

What is the expected fossil fuel import saving by 2030, in lakh crore rupees? (number)

Answer: _____

Q3.

What term describes the process of splitting water with electricity to produce hydrogen? (one word)

Answer: _____

Q4.

What does the acronym SIGHT stand for? (phrase)

Answer: _____

Q5.

Is green hydrogen commercially viable at present? (yes or no)

Answer: _____

Q6.

For what purpose is the Strategic Hydrogen Innovation Partnership intended? (short phrase)

Answer: _____

Q7.

Green hydrogen is made using an electrolyser powered by which type of energy? (two words)

Answer: _____

Climate Finance Funds and Principles

Climate finance covers money that is spent on action against climate change, whether the funding comes from local, national or transnational sources. Such action has two main aims, namely reducing the emissions that cause warming and adapting to the changes that warming brings. A number of multilateral funds have been created to channel resources to these aims, and they operate under different arrangements. Some funds are linked to specific groups of countries. The arrangements are complex, and each fund works through its own rules for deciding which projects to support.

Climate finance is also guided by a set of principles about how responsibility should be shared between countries. These principles reflect the idea that countries have different levels of capability and different histories of contribution to the problem.

In practice, the system has faced difficulties. The funding that countries need under their own climate plans does not always match the money available to them. Projects can take a long time to be approved, and some groups of countries receive less approved funding in relation to their population than others. New funds continue to be set up to respond to particular needs, so the arrangements are still developing.

Q1.

Which fund, set up in 2023, provides financial assistance to nations most affected by climate change? (name the fund)

Answer: _____

Q2.

In which year did the Global Environment Facility become the operating entity of the financial mechanism? (year)

Answer: _____

Q3.

Which principle, along with CBDR-RC, is a principle of climate finance? (two words)

Answer: _____

Q4.

Which fund, established at COP 16 in 2010, houses the LDCF and SCCF? (name the fund)

Answer: _____

Q5.

Which body coordinates multilateral climate funds? (acronym)

Answer: _____

Q6.

What is the mechanism that carries out emission-reduction projects in developing nations? (acronym)

Answer: _____

Q7.

Which fund gives developing countries full ownership of adaptation projects? (name it, two words)

Answer: _____

Local Governance Grades and Goals

Gram Panchayats and other traditional local bodies are the foundation of rural governance in India, and their performance is now assessed through a nationwide framework. The framework checks how well each body is doing in the areas that matter for local development, and it places each body in one of several grades. The assessment uses indicators that can be verified, which means that the results can be checked against evidence. Each local body receives a composite result based on these indicators, and that result determines its grade.

The grades run from the highest level to the lowest, which gives every body a clear benchmark. The framework is also tied to the Sustainable Development Goals, since it turns the global goals into a smaller set of goals suited to villages. Thematic areas form part of the assessment, covering themes such as livelihoods and healthy communities.

The framework is intended for Gram Panchayats and Traditional Local Bodies alike. Because it is nationwide, it applies across the country, and its grading scale gives local bodies in every state the same set of levels to aim for. Its purpose is to show where each body stands on the indicators it measures.

Q1.

What is the maximum composite score on which the index is based? (number)

Answer: _____

Q2.

Into how many localised SDGs does the index translate the 17 SDGs? (number)

Answer: _____

Q3.

Which ministry localises the SDGs through this index? (name the ministry)

Answer: _____

Q4.

Above what score is the Achiever (A+) grade awarded? (number)

Answer: _____

Q5.

Which grade is awarded to scores of 60 to 74? (grade name)

Answer: _____

Q6.

Which index is described as the first comprehensive index globally to evaluate rural local governance? (name it, with version)

Answer: _____

Q7.

Which grade is given for a composite score of 75 to 89? (grade name)

Answer: _____

Stages, Engines and Makers

Skyroot Aerospace, a Hyderabad-based company, built Vikram-1, which the booklet describes as India's first privately built orbital launch vehicle. Its maiden flight, Mission Aagaman, took off from the Satish Dhawan Centre at Sriharikota. An orbital rocket places a satellite into orbit around Earth. A sub-orbital rocket, by contrast, goes to space but does not place a satellite into orbit. Vikram-1 is an orbital vehicle, while Vikram-S, which it follows, was India's first privately developed sub-orbital rocket. The launch placed payloads into Low Earth Orbit, and India became the third country, after the United States and China, to demonstrate private orbital launch capability. The booklet's coverage of the mission includes the rocket's propulsion and structure, discussed across its stages, engines and materials. The vehicle's payloads are classed as scientific, technological, commercial and symbolic, and they are listed together on a single manifest. IN-SPACe authorised and facilitated the launch, and the booklet describes it as a single-window regulator for private space activities. The Indian Space Policy 2023 opened the complete space value chain to non-government entities. The booklet is a July 2026 current affairs publication covering defence, space and science and technology, and this section forms part of its space coverage. The Vikram-1 section is headed Why in News.

Q1.

Agnilet is described as the world's first single-piece 3D-printed engine of which type?

Answer: _____

Q2.

Which company developed Agnibaan SOrTeD?

Answer: _____

Q3.

What is the name of India's first privately developed launch pad, used for the Agnibaan SOrTeD launch?

Answer: _____

Q4.

What name is given to Vikram-1's first three stages?

Answer: _____

Q5.

How many stages does Vikram-1 have?

Answer: _____

Q6.

What type of propellant do Vikram-1's first three stages use?

Answer: _____

Q7.

Agnibaan SORTeD is the world's first rocket with what kind of engine, in terms of how it is manufactured?

Answer: _____

Payload Makers and Missions

Vikram-1 is an orbital launch vehicle developed by Skyroot Aerospace, and the booklet describes it as India's first privately built orbital launch vehicle. Its maiden flight, named Mission Aagaman, lifted off from the Satish Dhawan Centre at Sriharikota, and the flight placed its payloads into Low Earth Orbit. The booklet presents the flight's payloads as a multi-purpose manifest. Those payloads are classed as scientific, technological, commercial and symbolic. Vikram-1 follows Vikram-S, India's first privately developed sub-orbital rocket. A sub-orbital rocket goes to space without placing a satellite into orbit, while an orbital rocket does place one into orbit. IN-SPACe authorised and facilitated the launch. The booklet describes IN-SPACe as a single-window regulator for private space activities, and the Indian Space Policy 2023 opened the complete space value chain to non-government entities. Dr Vikram Sarabhai is regarded as the father of India's space programme, and the rocket is named after him. The mission's propulsion and structure form a separate part of the booklet's coverage, which also looks at the flight's payloads and the policies that shape private space activity in India. The booklet's payload list is part of its Vikram-1 section. The booklet is a July 2026 current affairs publication on defence, space and science and technology.

Q1.

Which company created the Embrace robotic arm?

Answer: _____

Q2.

Which company developed Cosmic Bloom?

Answer: _____

Q3.

Which Telangana-based artist is credited with the 18K gold rocket model carried on Vikram-1?

Answer: _____

Q4.

What is the name of India's indigenous CubeSat that demonstrates satellite technology in orbit?

Answer: _____

Q5.

Which payload developed by Skyroot Aerospace validates onboard spacecraft systems during flight?

Answer: _____

Q6.

Besides in-orbit servicing, what application is the technology validated by Embrace linked to?

Answer: _____

Q7.

What type of jewellery did Cosmic Bloom send into space?

Answer: _____

Hydrogen Train: Key Facts

India has flagged off its first indigenous hydrogen-powered train, which PM Modi inaugurated. The train is configured as a Hydrogen Fuel Cell Trainset, so hydrogen is the fuel at the centre of its design. The train operates on the Jind-Sonipat route, and its propulsion comes from a Hydrogen Fuel Cell Propulsion System. The launch is covered in the July 2026 current affairs section on Defence, Space and Science and Technology. The booklet presents the train under the heading Why in News, followed by a list of key highlights. These highlights describe the train's approved operational speed and its design speed, and they name the organisation that developed it. The booklet also lists the major components of the train, including fuel cells, batteries, a hydrogen storage system and motors. Each of these components has its own role in the working of the train. Hydrogen is written as H in the booklet, and it is described as a chemical element. The Practice Questions section that follows checks readers on the route, the design and the components of the train. The page carries the footer of a Jaipur-based current affairs publication, and the same section of the booklet also covers other developments in railways, which are discussed separately.

Q1.

What is the length, in km, of the Jind-Sonipat route on which India's first indigenous Hydrogen-powered Train was inaugurated?

Answer: _____

Q2.

How many coaches does the Hydrogen Fuel Cell Trainset have?

Answer: _____

Q3.

What is the atomic number of Hydrogen?

Answer: _____

Q4.

What percentage of the Universe's normal matter does Hydrogen constitute? (in %)

Answer: _____

Q5.

What is the design speed of India's first indigenous Hydrogen-powered Train? (in km/h)

Answer: _____

Q6.

Which component generates electricity through an electrochemical reaction between Hydrogen and Oxygen?

Answer: _____

Q7.

Which component converts electrical energy into mechanical energy to drive the train?

Answer: _____

Trophies, FIFA and Title Winners: TITA

FIFA is the global governing body for football, and its membership consists of national associations from around the world. The men's World Cup has been played since 1930, and its trophy has changed over time. The Jules Rimet Trophy was the original prize and was in use for the early decades of the tournament. It was made of gold-plated sterling silver and sat on a lapis lazuli base.

The original trophy had an unusual history. During the Second World War, it was hidden in Italy by a FIFA official so that it survived. It was later stolen in England before a tournament, and it was eventually recovered. It was stolen a second time and is believed to have been melted down. The Brazil Football Association later had a replica made.

The current trophy has been used since 1974. It depicts two human figures holding up the Earth. Winners do not keep it, because it cannot be won outright; instead, they receive a gold-plated replica. The current trophy is the one that winners lift. Awards also accompany the tournament. The Golden Boot goes to the top scorer, and the Golden Glove goes to the best goalkeeper. A Women's World Cup began in 1991, and it has a separate history.

Q1.

In which city is FIFA's headquarters located? (city)

Answer: _____

Q2.

What was the name of the dog that found the stolen Jules Rimet Trophy? (name)

Answer: _____

Q3.

Which team was the first to lift the current World Cup trophy? (team)

Answer: _____

Q4.

From how many submitted proposals was the design of the current trophy chosen? (number)

Answer: _____

Q5.

How many carats is the gold of the current World Cup trophy? (number)

Answer: _____

Q6.

In which year was the FIFA Peace Prize established? (year)

Answer: _____

Q7.

What mineral forms the two layers decorating the current trophy? (one word)

Answer: _____

Records and Firsts: TITA

The 2026 FIFA World Cup was the 23rd men's edition of the tournament, and it was staged across three countries: the United States, Canada and Mexico. It was the first time three nations jointly hosted the event. The competition featured 48 teams, divided into 12 groups of four teams each. A total of 104 matches were played, and the official match ball was the Adidas Trionda.

The tournament has a long history. The first edition was held in 1930 and was hosted by Uruguay, and the event has been held every four years since then, apart from 1942 and 1946. The number of teams has grown from 13 in 1930 to 48 in 2026.

Four debutants took part in the 2026 tournament: Cape Verde, Curaçao, Jordan and Uzbekistan. Cape Verde is a tiny archipelago off the west coast of Africa.

Several milestones were recorded during the competition, and some of them were described as firsts in the history of the event. Cape Verde's 40-year-old veteran goalkeeper, Vozinha, emerged as one of the breakout stars of the tournament.

The tournament also had controversies. Iran moved its base camp to Mexico, which meant extensive travel to the United States for its group-stage games because of geopolitical tensions. A United States player was sent off and was expected to miss a knockout match, but FIFA later suspended that ban. UEFA and other football bodies criticised the decision.

Q1.

In which year did Spain win its first World Cup? (year)

Answer: _____

Q2.

In which US city was the Argentina-Algeria match played, the game in which Messi made World Cup history? (city)

Answer: _____

Q3.

How many World Cups did Lionel Messi play at, from 2006 to 2026? (number)

Answer: _____

Q4.

In which year did India qualify for the World Cup, its only qualification? (year)

Answer: _____

Q5.

In which year did the All India Football Federation become affiliated with FIFA? (year)

Answer: _____

Q6.

Which nation failed to qualify for a third consecutive World Cup despite being a four-time champion? (name)

Answer: _____

Q7.

Which team became the first to win the World Cup while conceding only one goal in the tournament? (team)

Answer: _____

Australia and Seychelles Agreements Recall

India's partnerships with Australia and Seychelles produced a series of agreements in 2026. The 3rd India-Australia Annual Leaders' Summit covered defence, nuclear supply, energy, cyber and sports cooperation, and the two countries adopted a renewed Joint Declaration on Defence and Security Cooperation. The summit also recorded a joint statement on energy security and a roadmap to strengthen maritime domain awareness in the Indo-Pacific. A new partnership on cyber security, critical technologies and supply chains was launched, and three countries signed a trilateral agreement on frontier technologies. Australia also approved two Australian university campuses to be set up in Indian cities. Australia extended support to the Gaganyaan Mission, including a temporary space-tracking facility on the Cocos Islands. Sports cooperation was also taken forward through a roadmap covering high-performance sport and Para-sports. On a separate State Visit, India's Prime Minister travelled to Seychelles for its 50th National Day. A digital payments agreement was signed to introduce India's Unified Payments Interface in Seychelles,

while a healthcare agreement with the Seychelles Ministry of Health aims to make medicines affordable. An institutional link was set up between an Indian foreign service institute and Seychelles' foreign ministry, and an extradition treaty was concluded. India also announced a special economic package for Seychelles and a rupee-based line of credit.

Q1.

In which Indian city did Australia approve a Flinders University campus? (give the city name)

Answer: _____

Q2.

What material does the administrative arrangement under the 2014 Civil Nuclear Agreement allow Australia to supply regularly to India? (one word)

Answer: _____

Q3.

How much additional investment, in AUD million, did AustralianSuper announce for India's National Investment and Infrastructure Fund? (give the number)

Answer: _____

Q4.

Which Indian institute set up institutional cooperation with Seychelles' Ministry of Foreign Affairs and Diaspora? (give the full name)

Answer: _____

Q5.

Which company signed the agreement with Seychelles' Central Bank to facilitate UPI? (give the full name)

Answer: _____

Q6.

Which Indian company's agreement with Seychelles' Ministry of Health will enable affordable medicines? (give the full name)

Answer: _____

Q7.

What is the acronym of the framework under which India, Australia and Canada signed a trilateral agreement on frontier technologies? (give the acronym)

Answer: _____

Cyber Institutions and Leak Recall

India's cyber security response is spread across several bodies. In 2026, an alleged data leak from the Kudankulam Nuclear Power Plant in Tamil Nadu appeared on the dark web, raising fresh concern about critical infrastructure. The Indian Computer Emergency Response Team was set up in 2004 as the national nodal agency for cybersecurity incidents. Another body, set up in 2014, protects critical information infrastructure from cyber threats. A national forensic laboratory provides early-stage forensic assistance to police officers in states and union territories. The Indian Cyber Crime Coordination Centre gives law enforcement agencies a framework for dealing with cyber crimes in a coordinated way. The Cyber Commandos programme trains special wings in the states. Globally, the United Nations has adopted a convention against cybercrime, which aims to strengthen international cooperation and to prevent, investigate and prosecute cybercrimes. Its secretariat is based in Vienna, and the treaty will take effect once a set number of member states ratify it. Portals for training and data analytics also support the effort, including an online platform for cybercrime data across India.

Q1.

In which Indian city was CERT-In established? (give the city name)

Answer: _____

Q2.

In which Indian city is the National Cyber Forensic Laboratory located? (give the city name)

Answer: _____

Q3.

In which year was the Indian Cyber Crime Coordination Centre (I4C) established? (give the year)

Answer: _____

Q4.

How many States must ratify the UN Convention Against Cybercrime for it to enter into force? (give a number)

Answer: _____

Q5.

Which ransomware group claimed the alleged data leak from the Kudankulam plant? (give the name)

Answer: _____

Q6.

What is the name of the one-stop portal for cybercrime data, analytics and law enforcement coordination? (give the name)

Answer: _____

Games, Jnanpith and Revolution Recall

The Commonwealth Games are organised by the Commonwealth Games Federation and are generally held once every four years. The 2026 edition takes place in Scotland, which has hosted the Games several times before. The first Games were held in 1930 under the name British Empire Games, and the idea of a Commonwealth-wide sporting competition is traced to an earlier 1911 event in London. The Games were officially renamed Commonwealth Games in 1978. India is participating in 2026 with a contingent of 125 members, including para-athletes. The Jnanpith Award, India's highest literary honour, was instituted by Bharatiya Jnanpith in 1961 and is presented annually to an Indian author for outstanding literary contribution. It covers the languages listed in the Eighth Schedule of the Constitution, and posthumous awards are not given. English was added to the award's language coverage in 2013. The award carries a cash prize, a citation and a bronze statuette of Vagdevi. The Declaration was adopted on 4 July 1776 and formally announced the separation of the thirteen colonies from Great Britain. The Boston Tea Party in 1773 was a major act of colonial resistance to British taxation. Meanwhile, the American Revolution, which began with protests against British taxes in the 1760s, was a long struggle for independence.

Q1.

In which city were the 2026 Commonwealth Games held? (give the city name)

Answer: _____

Q2.

What is the name of the mascot of the 2026 Commonwealth Games? (give the name)

Answer: _____

Q3.

In which year was the first Jnanpith Award presented? (give the year)

Answer: _____

Q4.

Who was the first recipient of the Jnanpith Award? (give the name)

Answer: _____

Q5.

Who was selected for the 60th Jnanpith Award and became the first Tamil poet to receive it? (give the name)

Answer: _____

Q6.

In which year did Britain impose the Stamp Act, its first internal tax on American colonists? (give the year)

Answer: _____

Q7.

Which 1777 battle in New York is regarded as the greatest turning point of the American Revolutionary War? (give the name)

Answer: _____

Women's T20 World Cup 2026 - Typed Answer

Women's cricket has a regular place on the international calendar, and one of its notable events is a short-format tournament for national teams. The competition uses the Twenty20 format and brings together teams from around the world. Teams were arranged into groups for the early stage of the event, and each side played the others in its group. The knockout phase followed, and its matches carried greater weight than the group matches. Organising an event of this size required a host, and one national cricket board took on that responsibility. Matches were played at several grounds across the host country, with fixtures planned around each stage. The event was organised over a period of several weeks, with matches spread across that time. The final was the last match of the competition. Individual players were recognised for their performances, with awards given to those who stood out during the event. Fans followed the progress of the teams through each round, and the results of the group stage shaped the path to the final. The tournament gave the women's game a visible stage in the international calendar. Teams from different parts of the world took part, and the group phase and knockout phase were played as separate stages of the event.

Q1.

Across how many venues was the tournament hosted? (number)

Answer: _____

Q2.

Which country's team won the 2026 final at Lord's? (one word)

Answer: _____

Q3.

Who was the leading wicket-taker of the tournament with 14 wickets? (full name)

Answer: _____

Q4.

Which edition of the biennial tournament was held in 2026? (give ordinal, e.g. 9th)

Answer: _____

Q5.

In which year did Beth Mooney earn an earlier Player of Tournament award? (year)

Answer: _____

Q6.

Which player was named Player of the Final and Player of the Tournament? (full name)

Answer: _____

Sports and Youth Milestones - Typed Answer

India's sporting structure includes ministries, national federations and state associations, each with a role in supporting athletes. A youth competition for young athletes forms one part of this framework, and it moves between host states from one edition to the next. Its recent editions have been held in different states, and each edition is run by its host. Former players have also been appointed to represent sporting bodies, and one such appointment this month involves promoting grassroots tennis across a continent. In cricket, a player made a senior international debut at a young age, and this debut was reported in the month's news. The news also covered a major national honour for a former tennis player. Coverage of the debut referred to a record set by a cricketer in an earlier era. These reports together show how youth events and senior sport are connected in the wider sporting landscape. Several of these developments were reported in the same month, and each involves a different sporting body or competition. The youth competition and the tennis appointment are both linked to grassroots sport and young players, as described in the reports. The cricket debut was reported as one of the notable milestones of the month.

Q1.

Which state hosted the 7th Khelo India Youth Games? (one word)

Answer: _____

Q2.

Which state was the overall champion at the 7th Khelo India Youth Games? (one word)

Answer: _____

Q3.

At what age in years was Vaibhav Sooryavanshi when he made his international cricket debut? (number)

Answer: _____

Q4.

Whose record did Vaibhav Sooryavanshi break as India's youngest overall international debutant? (full name)

Answer: _____

Q5.

Against which country did Vaibhav Sooryavanshi make his senior T20I debut? (one word)

Answer: _____

Q6.

Which ministry announced the 8th Khelo India Youth Games? (name of ministry)

Answer: _____

Policy, Heritage and Observances - Typed Answer

Fuel-efficiency rules for passenger vehicles are a continuing area of government attention. Under these rules, the standards apply to the average performance across a manufacturer's fleet. Ancient Indian medicine also has a prominent place in the country's history. One early physician is remembered for his surgical work, and tradition links him to a teacher in medicine. A bronze statue

honouring him has been unveiled by an institution based in another country. Several international days are observed in the same period, including days for cooperatives, statistics and population. Each of these days has a theme, which is announced for the year in question. The topics in this section range from vehicle regulation to ancient medicine and global observances, and they are unrelated to one another in subject. The fuel-efficiency item concerns the draft and the vehicles to which the norms apply, while the heritage item concerns a figure of ancient medicine. Observances in this section include the International Day of Cooperatives, National Statistics Day and World Population Day, each with its own theme for the year. The booklet presents these items separately. Each one is a short, self-contained item.

Q1.

In which month is the International Day of Cooperatives observed? (one word)

Answer: _____

Q2.

Whose birth anniversary does National Statistics Day commemorate? (surname)

Answer: _____

Q3.

Which country's Royal College of Surgeons unveiled Sushruta's bronze statue? (one word)

Answer: _____

Q4.

Name the teacher of Sushruta mentioned in the booklet. (one word)

Answer: _____

Q5.

Name the text authored by Sushruta. (two words)

Answer: _____

Q6.

In which year did the Governing Council of UNDP establish World Population Day? (year)

Answer: _____

Q7.

From which year do the draft CAFE-III norms propose stricter standards for passenger vehicles? (year)

Answer: _____
