

CLAT Express - April 2026: Practice Quizzes

MCQ: +1 for a correct answer, -0.25 for a wrong answer. TITA (type-in-the-answer): +1, no negative marking.

Multiple-choice passages

VP Visit: Ties and Schemes

Vice President C. P. Radhakrishnan made the first-ever bilateral visit to Sri Lanka and held talks with President Anura Kumara Dissanayake in Colombo. The visit highlighted several areas where India and Sri Lanka work together. India has been Sri Lanka's largest trade partner and largest source of tourists, and the two countries signed a free trade agreement in 2000. Cooperation also extends to development projects, including the construction of a solar power plant at Sampur in Sri Lanka. Defence ties are expressed through joint exercises between the armed forces, such as SLINEX, MITRA SHAKTI and MILAN. The visit also brought the Overseas Citizen of India scheme into focus. During this period Sri Lanka joined the International Big Cat Alliance. The two neighbours are separated by the Palk Strait, and the uninhabited island of Katchatheevu lies in that strait. Regional forums such as BIMSTEC and SAARC also feature in the India-Sri Lanka relationship. Sri Lanka's President is Anura Kumara Dissanayake, while its Prime Minister is Harini Amarasuriya. Together, trade, development, defence, diaspora and regional cooperation form the main dimensions of the bilateral relationship discussed during the visit.

Q1.

In which year was the Overseas Citizen of India (OCI) scheme introduced?

- (A) 1955
- (B) 1974
- (C) 2015
- (D) 2005

Q2.

Which two schemes were merged in 2015?

- (A) OCI and the Citizenship Act
- (B) OCI and the Indian Housing Project
- (C) NRI and PIO schemes
- (D) PIO and OCI schemes

Q3.

Match List I with List II:

List I	List II
I. SLINEX	A. Multi-lateral naval exercise
II. MITRA SHAKTI	B. Regional energy and industrial hub
III. MILAN	C. Army joint exercise
IV. Trincomalee	D. Naval exercise

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-D, III-C, IV-B
- (B) I-D, II-C, III-A, IV-B
- (C) I-A, II-B, III-C, IV-D
- (D) I-C, II-D, III-B, IV-A

Q4.

Consider the following statements about Katchatheevu Island:

- I. The island is an uninhabited island located in the Palk Strait.
- II. The Indo-Sri Lankan Maritime Agreement of 1974 was signed under Rajiv Gandhi as Prime Minister.
- III. The Additional Agreement of 1976 prevented both countries from fishing in each other's Exclusive Economic Zones.

Which of the above statements is/are correct?

- (A) I only
- (B) II and III only
- (C) I and II only
- (D) I and III only

Q5.

Consider the following statements about Overseas Citizen of India (OCI) status:

- I. Minor children of eligible persons are also eligible for OCI.
- II. Persons who had ever been citizens of Pakistan or Bangladesh are not eligible for OCI.
- III. OCI holders can acquire agricultural or plantation properties in India.
- IV. OCI holders are exempted from police reporting for any length of stay.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Q6.

Under which Indian Prime Minister did India agree to cede Katchatheevu Island to Sri Lanka?

- (A) Rajiv Gandhi
- (B) Jawaharlal Nehru
- (C) Lal Bahadur Shastri
- (D) Indira Gandhi

Q7.

Which city houses the Legislature of Sri Lanka?

- (A) Colombo
- (B) Kandy
- (C) Jaffna
- (D) Sri Jayawardenepura Kotte

Bill and Lok Sabha expansion: practice MCQs

In April 2026, the government proposed the Constitution (131st Amendment) Bill, 2026 along with a Delimitation Bill, 2026. Delimitation is the process of redrawing constituency boundaries so that each constituency has a roughly equal population and representation keeps pace with population change. For the Lok Sabha, the proposal is to change the number of seats and to decide which census should serve as the population base for allocating them. Because population growth has been uneven across regions, a fresh allocation could shift the share of seats held by different states. States that grew faster could gain seats, while states with slower population growth could see their share fall. The Bill is also linked to women's reservation, which an earlier law set out but tied to the completion of a census and a delimitation exercise. Supporters say the Bill would bring the House closer to a fair and representative structure. Critics argue that the choice of population data and the discretion given to Parliament could weaken federal balance and invite political influence over boundary-making. The debate therefore centres on how the House should grow, which data should count, and who should control the process.

Q1.

To how many seats does the Constitution (131st Amendment) Bill, 2026 propose to expand the Lok Sabha?

- (A) 850
- (B) 800
- (C) 750
- (D) 650

Q2.

Of the proposed Lok Sabha seats, how many are allocated to Union Territories?

- (A) 35
- (B) 25
- (C) 15
- (D) 50

Q3.

Which Census does the Bill propose to use for seat allocation and delimitation?

- (A) 1971 Census
- (B) 1981 Census
- (C) 2001 Census
- (D) 2011 Census

Q4.

Assertion (A): The Bill proposes to amend Article 82 to lift the freeze on redrawing constituency boundaries.

Reason (R): Article 82 mandates Parliament to pass a Delimitation Act after every Census.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Proposed Lok Sabha seats	A. 15
II. Current SC reserved Lok Sabha seats	B. 850
III. Current ST reserved Lok Sabha seats	C. 84
IV. Validity of women's reservation (years)	D. 47

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-C, III-D, IV-A
- (B) I-D, II-C, III-B, IV-A
- (C) I-A, II-D, III-B, IV-C
- (D) I-D, II-B, III-A, IV-C

Q6.

Consider the following statements about women's reservation under the Bill:

- I. The reservation is valid for 15 years and can be extended by Parliament.
- II. Reserved constituencies for women are rotated only once, at the first delimitation.
- III. Within SC/ST reserved seats, one-third are reserved for SC/ST women.

Which of the above statements is/are correct?

- (A) I only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q7.

How many of the following statements about the Delimitation Commission under the Delimitation Bill, 2026 are correct?

- I. It is chaired by a Supreme Court Judge.
 - II. It has civil court powers to summon witnesses and access public records.
 - III. Its orders can be challenged in courts.
- (A) Only one
 - (B) Only two
 - (C) Only three
 - (D) None

Q8.

Under Article 75(1A), Ministers are capped at what percentage of Lok Sabha strength?

- (A) 10%
- (B) 25%
- (C) 20%
- (D) 15%

Phase I digital census practice set

India has launched Phase I of Census 2027, which is described as the world's largest population count and the first fully digital enumeration exercise in the country. This first phase is a House Listing and Housing Census, and it is carried out in States and Union Territories that have been notified for the exercise. Digital technology runs through the process, and a self-enumeration option allows citizens to provide their own census details. Population counting has a long history in India. Ancient texts such as the Arthashastra, the Ain-e-Akbari and the Rig Veda mention population counts. The modern census is supported by law. The Census Act, 1948 provides the legal mandate and makes participation mandatory, and the Union has the power to conduct the census under the Constitution. The work is managed by the Registrar General and Census Commissioner of India. Since Independence, India has held several censuses. Unlike sample surveys, the census offers comprehensive population data, which is useful for planning healthcare, education and infrastructure. The data also helps track changes in population over time. The census also supports progress towards the Sustainable Development Goals with robust data on health, education and poverty indicators. Phase I therefore builds on a long record of counting while bringing new digital methods to the process.

Q1.

Which of the following is listed as a key focus area of the data collected in Census 2027 Phase I?

- (A) Housing conditions, household amenities, assets and infrastructure
- (B) Caste and religion of every household
- (C) Income levels of all earning members
- (D) Migration history of each family

Q2.

Assertion (A): Digital mapping tools make the creation of house-listing blocks more accurate.

Reason (R): Web mapping and GIS tools help in accurate house-listing block creation and efficient data collection.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q3.

Match List I with List II:

List I	List II
I. Self-enumeration begins	A. 16 languages
II. Field exercise starts	B. 15 May 2026
III. Field exercise ends	C. 1 April 2026
IV. Self-enumeration languages	D. 16 April 2026

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-B, III-C, IV-D
- (B) I-C, II-A, III-B, IV-D
- (C) I-C, II-D, III-B, IV-A
- (D) I-B, II-C, III-A, IV-D

Q4.

Consider these statements about Census 2027:

- I. Self-enumeration opened on 1 April 2026.
- II. Self-enumeration is available in 22 languages.
- III. Self-enumeration is open to residents currently abroad.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I, II and III
- (D) I only

Q5.

How many of the following statements about Census 2027 are correct?

- I. The field exercise runs from 16 April to 15 May 2026.
- II. The questionnaire contains 40 questions.
- III. Self-enumeration is available in 16 languages.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None of the above

Q6.

Which limitation on the coverage of Census 2027 is stated in the booklet?

- (A) Only residents currently present in India are covered
- (B) Only households in urban areas are covered
- (C) Only households with Aadhaar cards are covered
- (D) Only households in Assam are covered

Q7.

Through which channel can citizens fill in their own census details under Census 2027?

- (A) Postal forms sent to the Registrar General
- (B) Toll-free telephone interviews
- (C) Door-to-door interviews by teachers
- (D) A secure web portal

Q8.

How many questions does the Census 2027 questionnaire contain?

- (A) 33
- (B) 24
- (C) 28
- (D) 40

Origins and Causes Check

Left Wing Extremism, commonly known as Naxalism, is a movement that seeks social and political change through revolutionary methods. Its followers aim to overthrow the central government through armed revolution, relying on violence and guerrilla warfare. Their long-term goal is to establish a communist state based on Maoist principles. The movement's support has deep roots in the lives of tribal communities. Large numbers of tribal people have been displaced as development projects and mining operations expanded into their homelands. Many tribal families also resent laws that limit their access to forest resources. Poverty and a lack of sustainable means of earning a living push many people towards the movement, and a lack of effective governance is also identified as a contributing factor. Any government response therefore has to address the economic and administrative gaps that the movement draws on, alongside security operations. Development work in tribal areas, including basic housing, water and services, is part of this wider approach.

Q1.

The Naxalite movement derives its name from which place?

- (A) Naxalbari district, Odisha
- (B) Naxalbari town, Jharkhand
- (C) Naxalbari village, Bihar
- (D) Naxalbari village, West Bengal

Q2.

Assertion (A): Poverty and lack of sustainable means have pushed people to join the Naxalite movement.

Reason (R): Insufficient technical intelligence against Naxalism is listed among the factors responsible for the movement.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q3.

Match List I with List II:

List I	List II
I. Infrastructure integration	A. 9,000+ mobile (4G) towers
II. Information warfare	B. Surrender-cum-Rehabilitation Policy
III. Human capital strategy	C. NIA and Enforcement Directorate asset seizures
IV. Financial crackdown	D. 12,000 km of all-weather roads

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-B, III-A, IV-C
- (B) I-A, II-C, III-B, IV-D
- (C) I-A, II-B, III-C, IV-D
- (D) I-D, II-A, III-B, IV-C

Q4.

Consider the following statements about Left Wing Extremism:

- I. Its ideology seeks to establish a communist state based on Maoist principles.
- II. It originated from a 1967 uprising in Naxalbari, Bihar.
- III. The Forest (Conservation) Act 1980 allows tribes to harvest forest resources.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I only
- (C) I and III only
- (D) I, II and III

Q5.

Consider the following statements about government initiatives against LWE:

- I. Dharti Aaba Janjatiya Gram Utkarsh Abhiyan covers more than 63,000 tribal villages.
- II. PM-JANMAN targets 175 PVTGs.
- III. Van Dhan Vikas Kendra has more than 2,200 clusters promoting minor forest produce value addition.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q6.

Which state is the Greyhounds, an elite commando force, associated with?

- (A) Andhra Pradesh
- (B) Chhattisgarh
- (C) Jharkhand
- (D) Odisha

Q7.

Which ministry officially declared India Naxal-Free?

- (A) Ministry of Defence
- (B) Ministry of Tribal Affairs
- (C) Ministry of Rural Development
- (D) Ministry of Home Affairs

Q8.

Consider the following statements:

- I. Kerala is among the states named in the Red Corridor.
- II. Gujarat is among the states named in the Red Corridor.

Which of the above statements is/are correct?

- (A) I only
- (B) II only
- (C) Both I and II
- (D) Neither I nor II

Gujarat UCC Provisions Check

Gujarat has passed the Uniform Civil Code Bill 2026, and with this step it has become the second state to enact a Uniform Civil Code. The idea behind such a code is that the laws on marriage, divorce and inheritance should be the same for all citizens, irrespective of their religious affiliation, instead of being governed by separate religious personal laws. The Gujarat code creates one civil framework for these areas. It places strong emphasis on gender equality and aims to remove discriminatory practices against women. The code also brings in mandatory registration

requirements for both marriages and live-in relationships, and it lays down a formal process for separations. Personal laws have long been a sensitive matter in India because many civil laws are closely linked with religious beliefs. For this reason, the code makes room for certain exceptions. Communities whose customary practices and cultural identity need to be preserved are kept outside its scope. Goa has followed a form of common civil code for a long time, and it is often cited as an example of how such a code can work in practice. Uttarakhand, which came before Gujarat, was the first state to adopt such a code after pre-Independence Goa.

Q1.

Under the Gujarat UCC, within how many days must a live-in relationship be registered?

- (A) 15 days
- (B) 45 days
- (C) 30 days
- (D) 60 days

Q2.

Assertion (A): The Gujarat UCC sets different registration periods for marriages and live-in relationships.

Reason (R): Marriages must be registered within 60 days, while live-in relationships must be registered within 30 days.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q3.

Match List I with List II:

List I	List II
I. Marriage registration period	A. Scheduled Tribes
II. Live-in registration period	B. Civil Courts
III. Forum for processing separations	C. 30 days
IV. Group exempted to preserve customary practices	D. 60 days

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-A, III-B, IV-D
- (B) I-D, II-C, III-B, IV-A
- (C) I-C, II-B, III-A, IV-D
- (D) I-A, II-D, III-C, IV-B

Q4.

Consider the following statements about the Gujarat UCC:

- I. Marriage must be registered within 60 days.
- II. Live-in relationships must be registered within 60 days.
- III. Scheduled Tribes are excluded from the code.

Which of the above statements is/are correct?

- (A) I and II only
- (B) I, II and III
- (C) II and III only
- (D) I and III only

Q5.

How many of the following statements about the Gujarat UCC are correct?

- I. The code ensures equal inheritance rights for sons and daughters.
- II. All separations must be processed through Revenue Courts.
- III. The monogamy rule prohibits polygamy and bigamy.

- (A) Only two
- (B) Only one
- (C) All three
- (D) None

Q6.

Which of the following is NOT one of the four Hindu Code Bills?

- (A) Hindu Property Rights Act, 1956
- (B) Hindu Succession Act, 1956
- (C) Hindu Marriage Act, 1955
- (D) Hindu Adoptions and Maintenance Act, 1956

Q7.

Under the judicial exclusivity in divorce provision of the Gujarat UCC, where must all separations be processed?

- (A) Revenue Courts
- (B) District Family Counselling Centres
- (C) Religious Tribunals
- (D) Civil Courts

Q8.

Under which civil code does Goa practise its form of common civil code?

- (A) Portuguese Civil Code of 1867
- (B) British Civil Code of 1858
- (C) French Civil Code of 1804
- (D) Indian Civil Code of 1872

Dispute Background Check

The Mahanadi water dispute is a conflict between Odisha and Chhattisgarh over how the river's waters should be shared. Odisha, the downstream state, says that extensive upstream constructions in Chhattisgarh have reduced the water flowing into its territory. In Odisha's view, this decline threatens irrigation, drinking water supply, fisheries and the ecological sustainability of the state. Chhattisgarh, the upstream state, argues that it has a legitimate right to utilise river waters. It points out that it accounts for a larger share of the basin's catchment area. It also says its projects are necessary for regional development and water security. The conflict is most sharp during the non-monsoon season, when water availability downstream becomes critically important. A central obstacle is that the two states have no formal water-sharing agreement between them. The dispute grew more serious after upstream infrastructure work expanded, and Odisha took the matter forward by approaching the highest court of the country. Efforts at negotiation have so far not produced a shared formula. Both states continue to hold firmly to their positions, and the question of how the water should be divided remains open.

Q1.

Around which year did the Mahanadi water dispute between Odisha and Chhattisgarh significantly escalate?

- (A) 2008
- (B) 2012
- (C) 2016
- (D) 2019

Q2.

Under which Act was the Mahanadi Water Disputes Tribunal constituted?

- (A) Inter-State River Water Disputes Act, 1956
- (B) River Boards Act, 1956
- (C) Water (Prevention and Control of Pollution) Act, 1974
- (D) National Water Policy Act, 2002

Q3.

Match List I with List II:

List I	List II
I. Entry 17 (State List)	A. Boards for inter-state rivers and river valleys
II. River Boards Act, 1956	B. Regulate and develop inter-state rivers in public interest
III. Entry 56 (Union List)	C. Tribunal constituted if consultation between states fails
IV. Inter-State River Water Disputes Act, 1956	D. Water supplies, irrigation, canals, drainage, embankments

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-C, III-A, IV-B
- (B) I-B, II-A, III-C, IV-D
- (C) I-D, II-A, III-B, IV-C
- (D) I-D, II-B, III-C, IV-A

Q4.

- I. The Mahanadi Water Disputes Tribunal was constituted in 2016.
- II. The Mahanadi Water Disputes Tribunal was constituted in 2018 for Chhattisgarh and Odisha.
- III. The Krishna Water Disputes Tribunal II was constituted in 2004 for four states.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q5.

- I. The Tribunal has issued a final ultimatum asking the two states to present a settlement by May 2.
- II. The Supreme Court can question the award or formula given by the Tribunal.
- III. No River Board has been created so far under the River Boards Act, 1956.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q6.

What is the significance of the Hirakud Dam built on the Mahanadi River?

- (A) It is the tallest concrete dam in India
- (B) It is the first hydroelectric dam in India
- (C) It is the largest reservoir in Asia by surface area
- (D) It is the longest earthen dam in the world

73rd Amendment: framework and provisions

Grassroots democracy in India received a major constitutional boost when a bill to amend the Constitution was introduced in the Lok Sabha in 1991. The aim was to bring governance closer to

the people by giving local bodies a clear and permanent place in the Constitution. The amendment added a new part dealing with panchayats and laid down a common framework that States were expected to follow. Among its provisions are rules on how members and chairpersons are chosen, how seats are reserved for weaker sections and women, and how long a panchayat may function before fresh elections must be held. It also assigned the supervision of panchayat elections to a dedicated authority and required a body to review the finances of panchayats at regular intervals. Certain regions were kept outside this framework because of their special social and administrative character, and separate laws were made for some tribal areas. The rules were also extended to Union Territories, with the President empowered to specify exceptions. Local bodies were also expected to plan development for their own areas, which encouraged a bottom-up approach to planning. Regular elections became a central feature of local government under the new framework. The amendment was implemented in stages, and its adoption by individual States showed how a national framework could be translated into local practice across a federal country.

Q1.

On which date did the 73rd Constitutional Amendment Act come into force?

- (A) 26 January 1993
- (B) 24 April 1992
- (C) 2 October 1959
- (D) 24 April 1993

Q2.

What is the minimum age to contest an election to Panchayati Raj bodies?

- (A) 18 years
- (B) 25 years
- (C) 21 years
- (D) 30 years

Q3.

How many of the following statements about the 73rd Constitutional Amendment are correct?

1. A panchayat has a term of five years unless it is dissolved earlier.
 2. Not less than one-third of the seats in panchayats must be reserved for women.
 3. Reservation of seats for Scheduled Castes applies in Arunachal Pradesh.
- (A) Only one
 - (B) Only two
 - (C) Only three
 - (D) None

Q4.

Under Article 243-K, who appoints the State Election Commissioner?

- (A) Chief Minister of the State
- (B) Chief Justice of the High Court
- (C) President of India
- (D) Governor of the State

Q5.

Consider the following statements:

- I. Members of panchayats at the village, intermediate and district levels are elected directly by the people.
- II. A State having a population not exceeding 20 lakh may skip the intermediate-level panchayat.
- III. Part IX of the Constitution applies to Delhi as a Union Territory.

Which of the above statements is/are correct?

- (A) I only
- (B) II and III only
- (C) I and II only
- (D) I, II and III

Q6.

How many subjects are contained in the 11th Schedule added by the 73rd Constitutional Amendment Act?

- (A) 29 subjects
- (B) 18 subjects
- (C) 20 subjects
- (D) 25 subjects

Q7.

Match List I with List II:

List I	List II
I. Article 243-E	A. Extension of Part IX to Union Territories
II. Article 243-M	B. Finance Commission constituted every five years
III. Article 243-L	C. Five-year term of a panchayat
IV. Article 243-I	D. Exempted areas such as Nagaland and Mizoram

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-A, III-C, IV-D
- (B) I-C, II-D, III-A, IV-B
- (C) I-D, II-B, III-A, IV-C
- (D) I-C, II-A, III-D, IV-B

Monetary Policy Committee Check

The Monetary Policy Committee is the body that sets the benchmark policy rate of the Reserve Bank of India, known as the Repo Rate. Its central purpose is to keep inflation within a specified target level, so that prices remain stable while the economy grows. The committee was created as a statutory body, and the central government holds the power to set up its composition. Its meetings are not occasional events, since the committee comes together regularly through the year to review the economic situation. Recently, the committee faced a difficult environment. Rising geopolitical tensions in West Asia increased global uncertainty, with volatile energy prices and disrupted trade flows. India was also experiencing a supply-side shock that raised input costs without necessarily reflecting excess domestic demand. Retail inflation stayed within the mandated band, and core inflation remained stable, which reduced the urgency for tightening. Trade agreements with several major partners were expected to boost exports and investment over the medium term. After weighing these factors, the committee chose to keep the Repo Rate unchanged at 5.25 per cent. The chosen stance was cautious and steady, in line with the goal of price stability. Such decisions shape borrowing costs for banks, businesses and households across the country, and they are closely followed by investors and students of the economy alike.

Q1.

In case of a tie in an MPC vote, who has the casting vote?

- (A) RBI Governor
- (B) Central Government nominee
- (C) Deputy Governor in charge of monetary policy
- (D) Finance Secretary

Q2.

How many of the following statements about the Monetary Policy Committee are correct?

- a. Its decisions are binding on banks.
 - b. The Deputy Governor is its ex-officio chairperson.
 - c. Three of its members are appointed by the Central Government.
 - d. Its decisions require a two-thirds majority.
- (A) Only one
 - (B) Only two
 - (C) Only three
 - (D) None

Q3.

Who is the ex-officio Chairperson of the Monetary Policy Committee?

- (A) Deputy Governor in charge of monetary policy
- (B) Central Government nominee
- (C) RBI Governor
- (D) Finance Secretary

Q4.

Consider the following statements about the Monetary Policy Committee:

- I. It meets at least four times each year.
- II. Its quorum is at least four members.
- III. Its decisions require unanimous agreement of all members.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I only
- (D) I, II and III

Q5.

Match List I with List II:

List I	List II
I. Ex-officio chairperson of MPC	A. Four times a year
II. Members appointed by Central Government	B. RBI Governor
III. Minimum meetings each year	C. One RBI officer
IV. Member nominated by Central Board	D. Three

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-B, III-D, IV-A
- (B) I-C, II-D, III-B, IV-A
- (C) I-B, II-D, III-A, IV-C
- (D) I-D, II-C, III-B, IV-A

Q6.

How many members does the Monetary Policy Committee have?

- (A) Four
- (B) Five
- (C) Six
- (D) Eight

Q7.

Assertion (A): Decisions of the Monetary Policy Committee are binding on commercial banks.

Reason (R): MPC decisions are taken by a majority vote.

Which of the following is correct?

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q8.

Which MPC member is in charge of monetary policy?

- (A) Central Government nominee
- (B) RBI officer nominated by Central Board
- (C) Finance Secretary
- (D) Deputy Governor in charge of monetary policy

MC14 and WTO Basics Quiz

The fourteenth Ministerial Conference of the World Trade Organization, known as MC14, was held in Yaoundé, Cameroon. The meeting ended without consensus, leaving several contentious issues unresolved. Members were divided over the moratorium on customs duties on electronic transmissions, and over agriculture and transparency norms. Because no agreement was reached, the pending issues were passed on to the WTO General Council, which meets in Geneva. The WTO is an intergovernmental organisation that manages and encourages international trade. It succeeded the General Agreement on Tariffs and Trade and was built on the results of the Uruguay Round negotiations. Its member countries work through several bodies, which share the work of running the organisation and handling trade disputes. Trade ministers and senior officials attend its main gatherings, and the organisation maintains strong relations with the United Nations. Trade disputes form a major part of the WTO's work, and the system for resolving them has been under strain. Members have been debating how to restore a binding system with two tiers. They have also discussed a permanent solution for public stockholding for food security, a demand that India and African nations have repeatedly raised. Fisheries subsidies and support for countries losing Least Developed Country status were also on the agenda.

Q1.

How often does the WTO Ministerial Conference meet, at minimum?

- (A) Once every year
- (B) Once every three years
- (C) Once every two years
- (D) Once every five years

Q2.

Where was the last Ministerial Conference before MC14 held?

- (A) Abu Dhabi
- (B) Nairobi
- (C) Buenos Aires
- (D) Geneva

Q3.

Under which agreement was the WTO established?

- (A) Tokyo Round Agreement
- (B) Bali Package
- (C) Marrakesh Agreement
- (D) Doha Declaration

Q4.

- I. The e-Commerce Moratorium on customs duties on electronic transmissions has been in place since 1998 and expired at MC14.
- II. The Appellate Body has been non-functional since 2019.
- III. The Investment Facilitation for Development Agreement was launched at MC13 in Abu Dhabi.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and II only
- (C) I, II and III
- (D) I and III only

Q5.

- I. It is a plurilateral agreement binding only on its signatories.
- II. It is based on the Most-Favoured-Nation principle.
- III. It excludes investor-state dispute settlement.
- IV. It covers market access.

How many of the above statements about the IFD Agreement are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Q6.

The safeguard against which type of complaints lapsed alongside the e-Commerce Moratorium?

- (A) Non-violation complaints under TRIPS
- (B) Anti-dumping complaints under GATT
- (C) Currency manipulation complaints
- (D) Climate-related trade complaints

Global findings check

Air quality around the world is often measured by the concentration of fine particulate matter, known as PM2.5. Health agencies set a guideline for the annual average level of these particles, and a global assessment checks how many places meet it. The assessment discussed here is prepared by a technology company that measures air quality and reports the results. The findings are sobering. Only a small share of cities met the annual guideline in the latest year, and that share fell from the previous year. Most of the countries and territories assessed did not meet safe air quality standards. Only a handful of places met the guideline, and at least one city recorded very low particle levels, which shows that clean air is still possible.

Q1.

Assertion (A): Pakistan was the most polluted country in 2025.

Reason (R): Its PM2.5 level in 2025 was below the WHO annual guideline.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q2.

Consider the following statements about India in the World Air Quality Report 2025:

- I. India was ranked the 6th most polluted country in 2025.
- II. India's ranking improved from 5th in 2024.
- III. India accounted for 50 of the world's 100 most polluted cities in 2024.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q3.

Which city was recorded as the World's Cleanest City in the 2025 report?

- (A) Helsinki, Finland
- (B) Reykjavik, Iceland
- (C) Canberra, Australia
- (D) Nieuwoudtville, South Africa

Q4.

Match List I with List II:

List I	List II
I. World's cleanest city	A. Pakistan
II. Most polluted country	B. New Delhi
III. Most polluted city	C. Nieuwoudtville (South Africa)
IV. World's most polluted capital	D. Loni, Uttar Pradesh

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-B, III-C, IV-D
- (B) I-C, II-A, III-D, IV-B
- (C) I-D, II-C, III-A, IV-B
- (D) I-B, II-A, III-C, IV-D

Q5.

In which year was IQAir, the organisation behind the report, founded?

- (A) 1963
- (B) 1958
- (C) 1971
- (D) 1985

Q6.

Which edition of the World Air Quality Report was released in 2025?

- (A) 6th Edition
- (B) 7th Edition
- (C) 8th Edition
- (D) 9th Edition

Q7.

Consider the following statements about the World Air Quality Report 2025:

- I. 130 of 143 countries and territories failed to meet safe air quality standards.
- II. Central and South Asia remain the most polluted regions globally.
- III. Five of the world's ten most polluted cities are located in Pakistan.

Which of the above statements is/are correct?

- (A) I only
- (B) II and III only
- (C) I and II only
- (D) I, II and III

Q8.

Approximately how many times higher than WHO guidelines was PM_{2.5} in Loni, the most polluted city?

- (A) 22 times
- (B) 10 times
- (C) 15 times
- (D) 30 times

Criticality and reactor choices

A nuclear reactor produces useful power only when its chain reaction keeps going on its own. Whether this happens depends on the neutrons inside the core, because each fission releases neutrons that can trigger further fissions. Engineers track how many neutrons are produced in each round compared with the round before. If this ratio falls below the level needed, the reaction fades away. If it holds at that level, the power stays steady. If it climbs above, the output grows quickly and must be brought under control.

India's nuclear programme is designed to make the most of its resources over a long period. Early reactors use the fuel the country can readily supply, while later designs aim to create more fuel than they consume. The prototype reactor at Kalpakkam is a test of one such design, and its progress is being followed closely by scientists and policymakers.

Building a reactor that breeds fuel is demanding. Its core must be surrounded by material that captures neutrons and turns into new fuel. Its coolant must remove heat efficiently and be chosen with care, because the choice affects how the neutrons behave. These decisions shape the reactor's cost, its safety record and the amount of waste it leaves behind.

Regulation also matters. Nuclear and radiation facilities must follow national rules, and an expert body oversees their activities so that they run in a controlled way.

Q1.

Consider the following statements:

- I. The PFBR uses Mixed Oxide fuel derived from reprocessed spent fuel.
- II. Stage I reactors breed Plutonium-239.
- III. Kudankulam is the oldest nuclear power plant in India.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I only
- (D) I, II and III

Q2.

Assertion (A): Liquid sodium is used as the coolant in the PFBR because it slows neutrons effectively for fission.

Reason (R): Liquid sodium has high thermal conductivity and does not slow neutrons.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q3.

Which agency is responsible for building the Prototype Fast Breeder Reactor at Kalpakkam?

- (A) Atomic Energy Regulatory Board (AERB)
- (B) Indira Gandhi Centre for Atomic Research
- (C) Department of Atomic Energy
- (D) Bharatiya Nabhikiya Vidyut Nigam Limited (BHAVINI)

Q4.

Compared with traditional Pressurized Heavy Water Reactors (PHWRs), by roughly how many times does the PFBR extract more energy from natural uranium?

- (A) About 6 times
- (B) About 16 times
- (C) About 60 times
- (D) About 600 times

Q5.

Consider the following statements about India's nuclear power sector:

- I. Tarapur is India's first and oldest nuclear power plant.
- II. India presently has 24 nuclear power reactors operating in 6 states.
- III. The PFBR at Kalpakkam has an installed capacity of 8780 MWe.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q6.

What is the capacity of the Prototype Fast Breeder Reactor at Kalpakkam?

- (A) 500 MWe
- (B) 200 MWe
- (C) 700 MWe
- (D) 1000 MWe

Q7.

Which Indian law governs the establishment and use of nuclear facilities and radioactive sources?

- (A) Atomic Energy Act, 1962
- (B) Atomic Energy Act, 1982
- (C) Atomic Energy Act, 1992
- (D) Atomic Energy Act, 2002

Q8.

Match List I with List II:

List I	List II
I. Stage I	A. Uranium-233 from thorium
II. Stage II	B. Liquid sodium
III. Stage III	C. Mixed Oxide (MOX) fuel
IV. PFBR coolant	D. Natural uranium fuel

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-C, III-A, IV-D
- (B) I-D, II-B, III-C, IV-A
- (C) I-D, II-C, III-A, IV-B
- (D) I-C, II-D, III-B, IV-A

Aridaman Submarine Practice Set

India has commissioned a new submarine that adds to its strategic forces at sea. The vessel is a ballistic missile submarine, a category that is typically the largest and most complex type of nuclear-powered submarine. Such a vessel can carry missiles that may be nuclear armed, and its design focuses on stealth, which comes from low noise. Operators also value the ability to remain submerged for long periods and the improved survivability it offers. The submarine belongs to a family of Indian submarines that began with an earlier vessel and grew through later additions. Its construction was linked to a programme launched in the 1980s, which aimed to create an indigenous fleet of such submarines with Russian assistance. Several government bodies managed that programme, so the work drew on more than one organisation. The vessel also supports a sea-based leg of India's nuclear forces, alongside weapons delivered from land and from the air. Its role is tied to India's doctrine of not using nuclear weapons first and to the idea of a credible minimum deterrent. Readers preparing for examinations should note how these design goals, the programme history and the strategic role fit together. Taken as a whole, the vessel shows how India combines indigenous development with support from partners over several decades. Each of these points connects back to the submarine programme and the wider defence strategy.

Q1.

What type of reactor powers INS Aridaman?

- (A) 40 MW Heavy Water Reactor
- (B) 100 MW Fast Breeder Reactor
- (C) 83 MW Pressurised Compact Light-Water Reactor
- (D) 60 MW Boiling Water Reactor

Q2.

Where was INS Aridaman built?

- (A) Mazagon Dock, Mumbai
- (B) Cochin Shipyard, Kerala
- (C) Garden Reach Shipbuilders, Kolkata
- (D) Ship Building Centre, Visakhapatnam

Q3.

What does the acronym SSBN stand for?

- (A) Ship Submersible Ballistic Nuclear
- (B) Strategic Submarine Ballistic Network
- (C) Stealth Submarine Battle Navy
- (D) Sub-Surface Ballistic Nuclear

Q4.

Consider the following statements:

- I. The 30-year Submarine Building Plan was approved by the Cabinet Committee on Security after the Kargil War in 1999.
- II. Project 75I was the first project under the Strategic Partnership Model.
- III. Project 751 submarines can stay submerged for up to 48 hours.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q5.

How many of the following statements about INS Aridaman are correct?

- I. It is equipped with 8 vertical launch systems.
- II. It was built by Cochin Shipyard Limited.
- III. It can carry K-4 missiles with a range of 3,500 km.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q6.

Which organisations together manage the ATV Project?

- (A) ISRO, Indian Navy and Ministry of Defence
- (B) DRDO, Department of Atomic Energy and Indian Navy
- (C) DRDO, Ministry of Finance and Indian Navy
- (D) HAL, BARC and Indian Air Force

Artemis Programme and Accords

NASA's Artemis Programme takes its name from the Moon Goddess of Greek mythology. Its central goal is to send humans back to the Moon, including the first woman and the first person of colour to stand on its surface. The programme is carried out in stages. The first stage was an unmanned mission that launched the Orion spacecraft. A later mission carries a crew around the Moon on a flyby, after which the astronauts return to Earth. The crew will not land on the lunar surface during that flight. The crewed flight is expected to last about ten days and will end with a splashdown in the Pacific Ocean. Launches take place from the Kennedy Space Center in Florida. Plans also include a station near the Moon called the Lunar Gateway, which would serve as a docking point for astronauts and support scientific research. Several space agencies are partners in the programme, including the European Space Agency, the Japan Aerospace Exploration Agency and the Canadian Space Agency. Alongside this programme, the Artemis Accords set out shared principles for peaceful exploration of space, the Moon, Mars, comets and asteroids. Many countries have joined these principles, and they were built on an older international agreement on outer space. The Artemis Accords are a framework for cooperation, and they guide how countries behave when they explore space together.

Q1.

In which year is the Lunar Gateway Station planned to be established?

- (A) 2024
- (B) 2027
- (C) 2029
- (D) 2032

Q2.

Which was NASA's last mission to the Moon before Artemis II?

- (A) Apollo 17 (1972)
- (B) Apollo 15 (1971)
- (C) Apollo 16 (1972)
- (D) Apollo 18 (1973)

Q3.

Who is the Commander of the Artemis II crew?

- (A) Victor Glover
- (B) Christina Koch
- (C) Jeremy Hansen
- (D) Reid Wiseman

Q4.

Read the statements and choose the correct option.

Assertion (A): The Artemis Accords have 63 member countries.

Reason (R): India joined the Artemis Accords in 2023 as its 27th member.

- (A) Both A and R are true and R explains A
- (B) Both A and R are true but R does not explain A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Chandrayaan-1	A. Slated for launch in 2028
II. Chandrayaan-2	B. Launched in 2023
III. Chandrayaan-3	C. Launched in 2019
IV. Chandrayaan-4	D. Launched in 2008

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-D, III-B, IV-C
- (B) I-B, II-A, III-D, IV-C
- (C) I-D, II-C, III-B, IV-A
- (D) I-D, II-B, III-C, IV-A

Q6.

Consider the following statements about the Artemis Accords:

I. The Artemis Accords were announced by NASA in 2020.

II. India joined the Artemis Accords in 2023 as its 27th member.

III. Russia and China are members of the Artemis Accords.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and II only
- (C) I only
- (D) I, II and III

Q7.

How many of the following statements about the Gaganyaan Mission are correct?

- I. It is India's first human spaceflight programme.
 - II. It plans to launch a three-person crew on a three-day mission to a 400 km orbit.
 - III. All four astronaut designates will fly on the final mission.
- (A) Only one
 - (B) Only two
 - (C) Only three
 - (D) None

Q8.

Which nation became the first to soft-land on the lunar South Pole?

- (A) China
- (B) Japan
- (C) United States
- (D) India

Vaishali and the chess landscape

Indian Grandmaster R. Vaishali won the FIDE Women's Candidates Tournament 2026, held in Nicosia, Cyprus. She clinched the title by defeating Kateryna Lagno of Russia in the final round, finishing the event with 8.5 points out of 14. With this win she became the first Indian woman to claim the Candidates title. She will now challenge the reigning champion, Ju Wenjun of China, for the Women's World Chess Championship later in 2026. Her achievement comes in a strong period for Indian chess. Viswanathan Anand, often described as India's most successful chess player, has won the FIDE World Chess Championship several times. In 2024, Gukesh Dommaraju became the World Chess Champion, making him the second Indian to win the title after Anand. Koneru Humpy, India's highest-rated female chess player, has also won major honours in the sport. The sport itself is run globally by FIDE, the International Chess Federation. FIDE acts as the global governing authority for chess, oversees all major international competitions and sets the rules and rating standards that players follow. Its motto, Gens una Sumus, means 'We are One Family'. The World Chess Championship has a long history, with its first official champion crowned in the nineteenth century. Chess players from many countries take part in its events.

Q1.

How many times did Viswanathan Anand win the FIDE World Chess Championship?

- (A) 3
- (B) 4
- (C) 5
- (D) 6

Q2.

Who is the Deputy President of FIDE?

- (A) Viswanathan Anand
- (B) Arkady Dvorkovich
- (C) Kateryna Lagno
- (D) Ding Liren

Q3.

Assertion (A): Viswanathan Anand is the Deputy President of FIDE.

Reason (R): FIDE is headquartered in Paris.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Consider the following statements:

- I. Viswanathan Anand has won the FIDE World Chess Championship five times.
- II. Gukesh Dommaraju defeated Ding Liren to win the FIDE World Chess Championship in 2024.
- III. Chess originated in Northern India during the Mughal Empire as 'Chaturanga'.

Which of the above statements is/are correct?

- (A) I only
- (B) I and II only
- (C) II and III only
- (D) I, II and III

Q5.

Consider the following statements:

- I. Divya Deshmukh won the FIDE Women's World Cup 2025 in Batumi, Georgia.
- II. India hosted the Chess World Cup 2025 in Hyderabad.
- III. Koneru Humpy clinched the Women's World Rapid Chess Championship title in 2019.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q6.

Which Indian Grandmaster won the FIDE World Junior Chess Championship 2025 held in Montenegro?

- (A) Pranav Venkatesh
- (B) Pentala Harikrishna
- (C) Abhijeet Gupta
- (D) Viswanathan Anand

Q7.

Where was the FIDE World Chess Championship 2024 held, in which Gukesh Dommaraju won the title?

- (A) Dubai, UAE
- (B) Mumbai, India
- (C) Shanghai, China
- (D) Singapore

Digital Platforms Check

Digital platforms faced major legal and regulatory scrutiny in April 2026. A jury in the United States found Meta Platforms and YouTube liable for designing addictive products, such as endless scrolling and algorithm-driven feeds. The ruling treated the problem as one of platform design rather than the content users posted. The court did not apply the usual shield under Section 230 of the Communications Decency Act, and the platforms were treated as products. Liability was divided between the two companies.

In India, the government has notified rules for online gaming that take effect from 1 May 2026. These rules work alongside a law that prohibits online money gaming, meaning betting and wagering, while allowing e-sports and social or casual games. Games are assessed through a determination test, and registered platforms receive a digital certificate of registration. The framework also bans advertising of money gaming and requires banks and payment gateways to block transactions linked to prohibited platforms.

The Unified Payments Interface completed ten years in 2026 and shows how digital payments are growing. It allows instant bank-to-bank transfers through mobile phones and supports both peer-to-peer and peer-to-merchant payments. Its family of products extends to several other services designed for different users.

Q1.

Which body regulates online gaming under the new framework?

- (A) Online Gaming Authority of India
- (B) Reserve Bank of India
- (C) National Payments Corporation of India
- (D) Ministry of Corporate Affairs

Q2.

What is the maximum imprisonment under the online gaming penalty provisions?

- (A) Up to 1 year
- (B) Up to 2 years
- (C) Up to 3 years
- (D) Up to 5 years

Q3.

Assertion (A): Online money gaming is prohibited under the new framework.

Reason (R): Registered e-sports with pre-declared prize pools are exempt from the monetary ban.

Choose the correct option.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Match List I with List II:

List I	List II
I. Regulator of online gaming	A. UPI 123Pay
II. Operator of UPI	B. UPI Lite
III. Low-value offline payments without PIN	C. Online Gaming Authority of India
IV. UPI service for feature phones	D. National Payments Corporation of India

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-C, III-A, IV-B
- (B) I-C, II-A, III-B, IV-D
- (C) I-A, II-B, III-D, IV-C
- (D) I-C, II-D, III-B, IV-A

Q5.

Consider the following statements:

I. Online money gaming is prohibited under the Act.

II. An appeal lies first to the Online Gaming Authority of India and then to the Secretary of MeitY.

III. The digital certificate of registration is valid for up to 15 years.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and III only
- (C) I and II only
- (D) I, II and III

Q6.

Consider the following statements about the social media case:

- I. The verdict treated the issue as platform design rather than content.
- II. The court applied Section 230 to protect the platforms.
- III. Meta Platforms bore about 70 per cent of the liability.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q7.

What was the total compensation in the social media addiction case?

- (A) USD 1 million
- (B) USD 2 million
- (C) USD 3 million
- (D) USD 6 million

Q8.

In which year was UPI launched?

- (A) 2014
- (B) 2016
- (C) 2018
- (D) 2020

Energy and Freight Infrastructure MCQs

India's energy and freight networks drew attention in April 2026. The Ministry of New and Renewable Energy highlighted the country's progress in renewable energy capacity, policy reforms and the wider energy transition. Solar power forms the largest part of the national energy mix, and India has built up a large stock of non-fossil capacity. The country also reported strong additions to its non-fossil capacity during the last financial year, adding to a broader push towards cleaner power. The same review also covered policy reforms, which the ministry presented as part of the country's energy transition.

Hydropower is also being revived. The Jammu and Kashmir government has moved to restore the Mohra Power Project, a historic plant on the Jhelum River in Uri, Baramulla. The move is meant to boost hydropower capacity at a time when the Indus Waters Treaty faces uncertainty. The plant is a hydroelectric power plant in the Kashmir Valley, and its revival is being pursued by the state government.

Freight infrastructure also reached a milestone. The Ministry of Railways completed the Western Dedicated Freight Corridor, which links the Jawaharlal Nehru Port Terminal in Maharashtra with Dadri in Uttar Pradesh. The Eastern Dedicated Freight Corridor runs from Ludhiana in Punjab to Sonnagar in Bihar. Both corridors are being implemented by the Dedicated Freight Corridor Corporation of India Limited.

Q1.

In which year was the Mohra Power Project commissioned?

- (A) 1947
- (B) 1975
- (C) 1905
- (D) 2008

Q2.

What is the length of the Western Dedicated Freight Corridor?

- (A) 1337 km
- (B) 1506 km
- (C) 1256 km
- (D) 1605 km

Q3.

In which year was the Dedicated Freight Corridor project approved by the Cabinet?

- (A) 2005
- (B) 2018
- (C) 2021
- (D) 2008

Q4.

Match List I with List II:

List I	List II
I. Eastern Dedicated Freight Corridor	A. 1506 km
II. Western Dedicated Freight Corridor	B. 54.7 per cent
III. Mohra Power Project	C. 1337 km
IV. Solar share of India's energy mix	D. Commissioned in 1905

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-D, III-B, IV-C
- (B) I-D, II-A, III-C, IV-B
- (C) I-C, II-A, III-D, IV-B
- (D) I-B, II-D, III-C, IV-A

Q5.

Consider the following statements:

- I. The Mohra Power Project is also known as the Mahura Power Project.
- II. The Eastern Dedicated Freight Corridor is longer than the Western Dedicated Freight Corridor.
- III. Wind accounts for a larger share of India's energy mix than large hydro does.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q6.

Consider the following statements:

- I. India achieved its 50 per cent non-fossil power capacity target five years ahead of 2030.
- II. India ranks third globally in renewable energy capacity.
- III. Bioenergy is the largest contributor to India's energy mix.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) All three
- (D) None

Q7.

How much non-fossil capacity did India add in FY 2025-26? (in GW)

- (A) 54.7 GW
- (B) 274.68 GW
- (C) 283.46 GW
- (D) 55.29 GW

Type-in-the-answer passages

Katchatheevu: Claims and Agreements

Katchatheevu is a small island located in the Palk Strait between India and Sri Lanka. The island is uninhabited, yet its ownership remained a point of dispute between the two countries for a long time. Sri Lanka's claim rests on history, since the island was initially ruled by a kingdom of Sri Lanka in the early medieval period. Sri Lanka also argues that a European power which occupied the island for over a century exercised jurisdiction over the islet. India's claim, on the other hand, holds that control of the island later passed to a zamindari, which functioned under a ruling dynasty. Over the years, maritime agreements tried to settle the dispute and strengthen ties. One agreement allowed Indian fishermen continued access to the island, and a later additional agreement prevented both countries from fishing in each other's exclusive economic zones. After the civil war in Sri Lanka ended, tensions rose over Indian fishermen in Sri Lankan waters, leading to arrests, torture allegations and renewed demands over the island.

Q1.

What is the area of Katchatheevu Island, in acres?

Answer: _____

Q2.

In which year was the Indo-Sri Lankan Maritime Agreement signed that ceded Katchatheevu to Sri Lanka?

Answer: _____

Q3.

Which European power occupied the island during 1505-1658 CE?

Answer: _____

Q4.

Which dynasty of Madurai held the island under the Ramnad Zamindari in the 17th century?

Answer: _____

Q5.

Which kingdom initially ruled the island in the early medieval period?

Answer: _____

Q6.

Before the cession, which Indian presidency was Katchatheevu once part of?

Answer: _____

Q7.

What is the island's sole structure?

Answer: _____

Women's reservation: practice TITA

India has long had a small number of women in its elected bodies. Successive governments have debated reserving seats for women, and a women's reservation bill has been put before Parliament

several times since 1996. The law that was finally enacted reserves seats for women in the Lok Sabha and in State Legislative Assemblies, and it also covers the National Capital Territory of Delhi. The reservation is meant to take effect only after a delimitation exercise is carried out and a census is conducted, so its timing depends on those steps. Supporters argue that the measure advances gender equality and brings a wider range of perspectives into decision-making. Critics note that the law does not extend the same reservation to the Rajya Sabha or to State Legislative Councils. Committees on the status of women have examined these questions since the 1970s. The reserved seats are also expected to change over time, so that different constituencies are available to women after each redrawing of boundaries.

Q1.

What percentage of total seats in the Lok Sabha and State Assemblies is reserved for women under the law? (in per cent)

Answer: _____

Q2.

For how many years is the women's reservation valid before Parliament may extend it? (in years)

Answer: _____

Q3.

Which Article inserts reservation for women in the Lok Sabha?

Answer: _____

Q4.

Which Article provides reservation for women in the National Capital Territory of Delhi?

Answer: _____

Q5.

How many different years are listed in the booklet as years when a women's reservation bill was introduced? (number)

Answer: _____

Q6.

Under which leader's committee on women was a committee constituted in 1987? (surname)

Answer: _____

Q7.

In which year was the Committee on the Status of Women in India set up? (year)

Answer: _____

Caste and census history typed answers

Counting people has a long history in India, and ancient texts such as the Arthashastra refer to population counts. The modern census was shaped under colonial rule, when national counts were first taken across the country. Early colonial censuses did not all follow the same method. A later one was designed to be synchronous, meaning that it was taken at one time across the whole country. Caste was recorded in colonial counts, and one of them is remembered as the last caste-based census. After Independence, caste data collection was narrowed, and the census recorded information only on Scheduled Castes and Scheduled Tribes. Other backward classes were left out of this official count. In recent years, several states have carried out their own surveys of caste. Another census stands out for a different reason. It is the only one in the modern series to show a decline in population across a decade, which makes it a notable point in demographic history. Since Independence, the country has conducted repeated censuses, and each has added to the record of how the population has changed over time. The census remains a comprehensive source of population data for assessing policies and welfare programmes.

Q1.

In which year was the last caste-based census in India conducted? (year)

Answer: _____

Q2.

Who was the Census Commissioner in 1931? (surname)

Answer: _____

Q3.

Who was the Census Commissioner in 1951? (surname)

Answer: _____

Q4.

Under which Lord was the synchronous census of 1881 conducted? (surname)

Answer: _____

Q5.

Which state is listed first among those that undertook independent caste surveys? (state name)

Answer: _____

Q6.

How many censuses has India held since Independence? (number)

Answer: _____

Q7.

Which census year is the only one to record a decadal population decline? (year)

Answer: _____

Decline and Response Check

In recent years, the number of districts affected by Left Wing Extremism has fallen sharply, and violence has declined in step. Security forces have moved into areas that were once hard to reach. Specialised units operating from bases closer to remote zones have pressed the movement hard, while the state has also tried to close the gap between remote regions and the rest of the country. Connectivity has played a major role. Better road links have reduced the geographical isolation in which insurgents once moved, and expanded mobile networks have helped counter propaganda and bring tribal regions into the digital world. The state has also gone after the money that sustains the movement. Investigation agencies have carried out operations and seized assets, which has disrupted the networks that supply funds from urban areas. The movement also had a parallel system of governance of its own. Administrative efforts have aimed to replace that system with state institutions, including residential schools and programmes for aspirational districts. Coordination between states has been another factor, making it harder for armed cadres to escape across state borders. A surrender and rehabilitation policy has encouraged many members to give up violence and take up a new life, with cash benefits and skill training on offer.

Q1.

How many districts were affected by Left Wing Extremism in 2014? (give the number)

Answer: _____

Q2.

Under infrastructure integration, how many km of all-weather roads were constructed? (give the number in km)

Answer: _____

Q3.

What figure, as stated in the booklet, is given for mobile (4G) towers deployed under information warfare? (give the number)

Answer: _____

Q4.

Apart from COBRA, which elite force is named for tactical dominance against Naxals?

Answer: _____

Q5.

What is the name of the Maoist parallel governance system that administrative expansion replaced?

Answer: _____

Q6.

How many cadres have surrendered since 2014 under the Surrender-cum-Rehabilitation Policy? (give the number)

Answer: _____

Q7.

In which state are the residual hotspots Bijapur, Sukma and Narayanpur located?

Answer: _____

Courts and Views on UCC

Indian courts have often been asked to decide whether personal laws can override individual rights. In one landmark case, the Supreme Court held that a Muslim woman could continue to claim maintenance from her husband under the criminal procedure law even after the period of waiting that follows divorce had ended. In a later case, the Court declared a form of instant divorce practised among Muslims unconstitutional, holding that it violated the dignity and equality of Muslim women, and it suggested that Parliament should frame a law to regulate Muslim marriages and divorces. Another judgment held that personal and customary laws must be tested against the fundamental rights, and that no religious practice can claim supremacy over the Constitution. The Supreme Court has also praised a state where a common civil code is already in force as a shining example for the country.

The views of other institutions have differed as well. A Law Commission in 2018 found that a uniform code was neither necessary nor desirable at that stage, and it recommended reforming family laws across religions instead. The Central Government, by contrast, favours a uniform code. Later, a fresh Law Commission issued a notification inviting public views on the subject. The framers of the Constitution did not intend total uniformity, which is why personal laws were placed in a list under which both Parliament and state legislatures can make laws.

Q1.

In which year did the Supreme Court decide *Shah Bano Begum v Mohammad Ahmed Khan*? (year)

Answer: _____

Q2.

In which year did the Supreme Court declare triple talaq unconstitutional in *Shayara Bano v Union of India*? (year)

Answer: _____

Q3.

Which numbered Law Commission, in its 2018 report, deemed a UCC unnecessary and undesirable? (give the number)

Answer: _____

Q4.

Which Indian state did the Supreme Court hail as a 'shining example' of a UCC in the Jose Paulo Coutinho case (2019)?

Answer: _____

Q5.

Under which Article of the Constitution did the Supreme Court place personal and customary law in the Indian Young Lawyers Association case (2018)? (number)

Answer: _____

Q6.

Name the retired judge associated with the five-member committee formed to give recommendations for implementing a UCC in Uttarakhand.

Answer: _____

Q7.

Which numbered Law Commission issued a notification to elicit views on the UCC? (give the number)

Answer: _____

Tribunal Status Check

The Mahanadi Water Disputes Tribunal has now reached a stage where the two states must act or face a judgment. The Tribunal has granted both Odisha and Chhattisgarh a final opportunity to arrive at a mutually agreed water-sharing formula within a deadline set for this year. If the states fail, the Tribunal has made clear that it will proceed to adjudicate the dispute on the basis of available evidence and legal principles. The Tribunal has also expressed serious dissatisfaction with repeated adjournments and a lack of substantive progress. It observed that no concrete proposals or narrowing of contentious issues have been placed on record, despite assurances of settlement efforts. The deadlock is attributed mainly to two causes: the absence of information that both sides accept as reliable, and a persistent trust deficit between the two states. These problems have made meaningful negotiation and consensus building difficult. Disputes of this kind are handled by tribunals set up for particular rivers and particular groups of states. The Odisha and Chhattisgarh dispute is one such case, and India has several other tribunals that deal with water sharing between neighbouring states. Each tribunal works within its own dispute and its own set of states.

Q1.

In which year was the Mahanadi Water Disputes Tribunal formed?

Answer: _____

Q2.

By which date were the two states asked to present a water-sharing settlement? (Month Day)

Answer: _____

Q3.

Which tribunal in the booklet's table was formed earliest? (name)

Answer: _____

Q4.

Which tribunal covers Odisha and Andhra Pradesh? (name)

Answer: _____

Q5.

Absence of reliable and mutually accepted ____ data has contributed to the deadlock. (one word)

Answer: _____

Q6.

How many River Boards have been created under the River Boards Act, 1956 so far? (as a number)

Answer: _____

Q7.

Who is the Chairman of a River Board under the River Boards Act, 1956? (position)

Answer: _____

Panchayati Raj committees

Rural development in India was shaped in the early 1950s by two government efforts, the Community Development Programme and the National Extension Service. Their performance needed a closer look, so the government set up a committee to examine how they were working and to suggest measures for their better functioning. Its most important proposal was a scheme of democratic decentralisation. This scheme later came to be known as Panchayati Raj. The idea was first put into practice in one State before other States followed. Over the following decades, more committees reviewed how these institutions were functioning. Some studied the administrative arrangements behind rural programmes, while others examined whether panchayats should be recognised and protected in the Constitution. Each report reflected a continuing effort to make local governance more effective. Panchayati Raj thus became a subject of national discussion, not just of local administration. A later constitutional amendment gave panchayats a fixed place in the Constitution, turning them from an experiment into a permanent feature of Indian governance. The journey of Panchayati Raj therefore shows how policy ideas, early trials and expert reports together shaped a system of grassroots democracy.

Q1.

In which year was the Balwant Rai Mehta Committee constituted? (year)

Answer: _____

Q2.

Which state was the first to establish Panchayati Raj, at Nagaur on 2 October 1959? (one word)

Answer: _____

Q3.

How many tiers did the Ashok Mehta Committee (1977) recommend for Panchayati Raj? (in number)

Answer: _____

Q4.

Under which leader's government was the L.M. Singhvi Committee appointed in 1986? (name)

Answer: _____

Q5.

Which committee (1985) reviewed administrative arrangements for Rural Development and Poverty Alleviation Programmes? (name)

Answer: _____

Q6.

Which government appointed the Ashok Mehta Committee in 1977? (one word)

Answer: _____

Q7.

Who is known as the 'Father of Panchayati Raj'? (name)

Answer: _____

Tools of the Central Bank

Monetary policy works through a set of instruments that the central bank can adjust to influence borrowing, spending and investment. The most closely watched of these is the Repo Rate, which sets the cost at which banks borrow from the central bank when they face a short-term shortage of cash. The Reverse Repo Rate moves in the other direction, since it is the rate at which the central bank borrows from banks. Changes in these rates affect loan prices across the economy. When rates rise, businesses and households face costlier loans, and demand slows. When rates fall, borrowing becomes cheaper and spending tends to pick up. Central banks, however, do not rely on one tool alone. They also set rules on how much money banks must hold, buy and sell securities in the market, and provide special windows for banks that need overnight funds. Careful use of the instruments helps keep prices stable while supporting a healthy pace of economic expansion.

Q1.

Which liquidity requirement, a statutory minimum share of deposits held as cash, gold or other securities, does the RBI raise to tighten monetary policy? (abbreviation)

Answer: _____

Q2.

Which RBI lending rate is described as long-term, in contrast to the short-term Repo Rate? (two words)

Answer: _____

Q3.

Which window lets banks borrow overnight funds at a rate higher than the Repo Rate? (abbreviation)

Answer: _____

Q4.

What is the abbreviation of the operation in which the central bank buys or sells government securities to inject or absorb durable liquidity?

Answer: _____

Q5.

Which ratio requires banks to hold a proportion of their deposits as cash with the RBI? (abbreviation)

Answer: _____

Q6.

At what rate, in per cent, did the RBI's Monetary Policy Committee keep the Repo Rate unchanged in its latest review?

Answer: _____

Digital Trade Recall

Digital trade became one of the most debated areas at the recent WTO Ministerial Conference. For a long time, members had kept a standing commitment that stopped them from taxing electronic transmissions. That commitment ended at the conference because members could not agree to

renew it, so the question of taxing digital goods and services is now open. The outcome also reflected a deep North-South divide among members on several issues. Some members have chosen a different route. A group of members has advanced talks on a plurilateral agreement on electronic commerce. The proposed agreement focuses on areas such as data flows, digital transactions and consumer protection. These talks have moved forward even though the moratorium itself was not renewed. Digital goods and services cover a broad range of activities. Software, music, films and digital services all fall within the moratorium's coverage. The Appellate Body, which reviews decisions made by dispute panels, has also been part of the wider debate about how the WTO resolves disputes. Dispute settlement reform is one of the agenda items that members could not conclude at the conference.

Q1.

In which year was the standing moratorium on customs duties on electronic transmissions first put in place? (year)

Answer: _____

Q2.

How many WTO members were in the coalition advancing talks on the plurilateral e-Commerce agreement? (number)

Answer: _____

Q3.

Which agreement's safeguard against non-violation complaints lapsed at MC14? (one word, acronym)

Answer: _____

Q4.

By which Ministerial Conference does the WTO aim to finalise its pending outcomes? (answer as MC number, e.g. MC12)

Answer: _____

Q5.

In which year was the Investment Facilitation for Development Agreement finalised? (year)

Answer: _____

Q6.

In which year did the Appellate Body become non-functional? (year)

Answer: _____

India's framework check

India manages air pollution through several tools that work at different stages. The first is a public information tool, a national index that converts complex pollution readings into simple categories from good to severe, so that citizens can understand the air they breathe. The second is an emergency framework. Its measures are triggered only when air quality worsens from one stage to a more dangerous one, and their purpose is to prevent further deterioration. The Supreme Court approved this emergency framework in a case concerning the environment. The third is a long-term national programme. It asks cities identified as non-attainment to reduce average particulate levels within a fixed period, and an online portal supports the tracking of its progress. The fourth is a monitoring initiative run by a government ministry, which provides city-wide and localised air quality information for major metropolitan areas and also issues weather forecasts and research. Each tool serves a different purpose, and none of them works alone. Public categories help people judge how careful to be on bad days, while emergency steps are reserved for the most severe deterioration. Long-term programmes address pollution that persists over many months and years, and monitoring tells authorities where action is needed. Together, these tools link public

information, emergency response and long-term planning.

Q1.

Which central body launched the National Air Quality Index in 2014?

Answer: _____

Q2.

In which year did the Supreme Court approve the Graded Response Action Plan (GRAP)?

Answer: _____

Q3.

In which year was the National Clean Air Programme (NCAP) launched?

Answer: _____

Q4.

How many non-attainment cities does the National Clean Air Programme cover? (give a number)

Answer: _____

Q5.

What is the targeted reduction in average particulate matter concentrations under NCAP by 2026, in per cent?

Answer: _____

Q6.

Which ministry runs SAFAR, the city-wide air quality monitoring initiative?

Answer: _____

Q7.

Which portal was launched to track NCAP progress and regulate air pollution in non-attainment cities?

Answer: _____

India's energy programme

Energy security has become a central goal for any country that depends on imported fuel. Nuclear power is one tool for this goal, because a small amount of fuel can produce a large amount of electricity. Its expansion also raises questions about waste, safety and the long-term supply of raw material. Planners have therefore looked for ways to close the fuel cycle, so that used fuel is recycled rather than simply stored. Such a plan also aims to reduce dependence on imports, which is why it attracts so much attention.

Such a plan works best when the programme is carefully staged. Each stage is meant to make better use of the country's resources than the one before it. Every stage brings its own engineering challenges, from choosing the moderator and coolant to designing the reactor core. Staging also gives engineers time to build skills and test new technology before the next step.

Nuclear facilities in the country must follow national rules and are checked by a regulator that oversees nuclear and radiation activities. The programme is described as supporting a clean, low-carbon energy transition. Progress is therefore measured not only in megawatts but also in less waste, more domestic fuel and the building of skills that place the country among the world's advanced nuclear nations.

Q1.

Which country was the first to operate a commercial-scale Fast Breeder Reactor, before India? (name of the country)

Answer: _____

Q2.

What is the mass number of the uranium isotope that surrounds the PFBR core as a breeder blanket? (number only)

Answer: _____

Q3.

How many nuclear power reactors is India presently operating? (number)

Answer: _____

Q4.

Which plant is India's newest and largest nuclear power plant? (name of the plant)

Answer: _____

Q5.

Which Indian state hosts Tarapur, India's first and oldest nuclear power plant? (name of the state)

Answer: _____

Q6.

Which material serves as the coolant in Stage I (PHWR) reactors of India's programme? (two words)

Answer: _____

Q7.

Who formulated India's three-stage nuclear power programme? (full name)

Answer: _____

Arihant-Class Short Answer Set

Nuclear-powered submarines come in several types, and each type is built for a different role. One type carries conventional weapons, another carries guided missiles with conventional warheads, and a third carries ballistic missiles that may be nuclear armed. The third type is typically the largest and most complex of the group. Submarines of this kind are valued for stealth, which comes from low noise, along with extended submerged operations and improved survivability. India's Arihant-class submarines form part of this picture. The specifications of these submarines are classified, so any sketch of them is only an approximation, and readers should treat such drawings with caution. The programme behind these vessels aimed to create an indigenous submarine fleet with outside help. Taken together, these points show how the class fits into India's wider strategic planning. Readers studying this area often connect design features with the role each submarine plays in a country's defence. The booklet describes stealth as a benefit of these vessels, and it lists extended submerged operations and improved survivability alongside it. The class has been described in terms of its power, its launch capacity and its displacement, though some figures are not publicly confirmed. This is why sketches should be read as approximations rather than exact engineering drawings. Students should keep these categories distinct when answering questions on submarines.

Q1.

In which year was INS Arighaat commissioned? (year)

Answer: _____

Q2.

How many submarines does the booklet's Arihant-class comparison cover? (number)

Answer: _____

Q3.

Which submarine did India commission as its 3rd nuclear-powered ballistic missile submarine? (name)

Answer: _____

Q4.

What does SSGN stand for? (full expansion)

Answer: _____

Q5.

What does SSN stand for? (full expansion)

Answer: _____

Q6.

Which Arihant-class submarine is described as much more technologically advanced than INS Arihant? (name)

Answer: _____

Human spaceflight and Gaganyaan

Human spaceflight has a history that began in the early 1960s, when a cosmonaut from the Soviet Union became the first person to travel into space. Soon after, Alan Shepard became the first American in space as part of Project Mercury, and a woman later joined the list of people who have flown. Several other countries have since carried out their own human spaceflight efforts. India is preparing its own human spaceflight programme, called Gaganyaan, which will be India's first such programme and a new stage for the country's space work. The programme aims to send a crew into orbit for a short stay and bring them back safely. Its crew will be selected from a group of astronaut designates, and only some of them will fly on the final mission. Training for the crew takes place at a dedicated centre in an Indian city. An application named SAKHI will help the crew by monitoring their health, reminding them of their dietary schedules and keeping them connected with the ground.

Q1.

Who was the first human to travel into space? (name)

Answer: _____

Q2.

In which year did Valentina Tereshkova become the first woman to enter space? (year)

Answer: _____

Q3.

Which Indian astronaut flew to space aboard Soyuz T-11 in 1984? (name)

Answer: _____

Q4.

How many of the four Gaganyaan astronaut designates will be selected for the final mission? (number)

Answer: _____

Q5.

What is the name of the half-humanoid woman robot astronaut that will fly ahead of Gaganyaan? (name)

Answer: _____

Q6.

Which ISRO centre developed the SAKHI app? (full name of the centre)

Answer: _____

Q7.

In which city is the Human Space Flight Centre that trains Gaganyaan crew located? (city)

Answer: _____

India's recent chess results

Indian chess has produced a run of strong results in recent years. In 2024, the Indian men's and women's teams made history at the 45th Chess Olympiad by winning a gold medal, the first such gold for the country. The same year, Gukesh Dommaraju became the World Chess Champion after defeating Ding Liren of China. Later, he beat Magnus Carlsen in a classical game at Norway Chess 2025. Women's chess has also produced important results. Divya Deshmukh won the FIDE Women's World Cup 2025 by defeating Koneru Humpy in the final, and she became the third winner of the title. Humpy, India's highest-rated female chess player, has had a long career that includes a Women's World Rapid Chess Championship title. The junior ranks have also delivered results. GM Pranav Venkatesh won the FIDE World Junior Chess Championship 2025 in Montenegro, adding his name to the list of Indian champions in that event. Such wins show that Indian players are winning titles at several levels of the game. In 2025, Indian players also took part in top events such as Norway Chess. India also hosted the Chess World Cup 2025, a major event on the global calendar.

Q1.

In which city in Georgia was the FIDE Women's World Cup 2025 held? (city)

Answer: _____

Q2.

Pranav Venkatesh was which numbered Indian to win the FIDE World Junior Chess Championship? (give the number)

Answer: _____

Q3.

In which city was the 45th Chess Olympiad held in 2024? (city)

Answer: _____

Q4.

In which year did Koneru Humpy win the Women's World Rapid Chess Championship title? (year)

Answer: _____

Q5.

Who was the first Indian to defeat Magnus Carlsen in classical chess? (name)

Answer: _____

Q6.

Anish Sarkar, the youngest chess player ever ranked by FIDE, is from which city? (city)

Answer: _____

Diplomacy Check

Diplomacy in April 2026 focused on two very different relationships. The United States and Iran agreed to a temporary ceasefire after a prolonged conflict, which paused the escalation of tensions in the region. Formal peace talks were planned to follow, and they were to be led by the United States Vice President. The arrangement remained fragile. The United States kept its military forces ready for combat, and Iran warned that it could close the Strait of Hormuz again if hostilities continued. The nuclear issue also stayed unresolved, with Washington demanding the complete dismantling of key nuclear sites.

India and South Korea, meanwhile, moved their ties forward during a visit by South Korean President Lee Jae-myung. The two countries elevated their relationship to a Futuristic Partnership under a Joint Strategic Vision. Several agreements were signed, including cooperation on maritime skills and training. The partners also agreed to work together on artificial intelligence, next-generation information technology and joint research and development. Trade between the two countries is large, and South Korea has become a major investor in India. Defence cooperation includes the co-production of the K9 Vajra-T gun system, and the two sides plan to mark a shared friendship year in the future.

Q1.

On what day of April 2026 were formal US-Iran peace talks to begin?

Answer: _____

Q2.

For how many weeks did the United States and Iran agree to a ceasefire? (in weeks)

Answer: _____

Q3.

What was the approximate India-South Korea trade volume in FY 2024-25? (in USD billion)

Answer: _____

Q4.

How many MoUs did India and South Korea sign during President Lee Jae-myung's visit?

Answer: _____

Q5.

Which international solar grouping did South Korea join?

Answer: _____

Q6.

From which year does the India-ROK Year of Friendship period begin?

Answer: _____

Q7.

Which country was excluded from the US-Iran ceasefire?

Answer: _____

International Groupings TITA

International cooperation in April 2026 covered energy, peacekeeping and economic governance. India's External Affairs Minister took part in a meeting of a regional platform that works on clean energy transition and energy security in Asia, where energy market disruptions were discussed. The platform was proposed by Japan and seeks to promote decarbonisation and sustainable energy systems across the region.

India also condemned the killing of Indonesian peacekeepers serving with a United Nations force in Lebanon. That force monitors the ceasefire between Israel and Lebanon, patrols the boundary

between them, supports humanitarian access for civilians and assists the Lebanese Armed Forces. Its purpose includes verifying the withdrawal of Israeli forces from southern Lebanon.

At the United Nations, India was elected unopposed to four subsidiary bodies of the Economic and Social Council for the period 2026 to 2028. The Council is one of the principal organs of the United Nations and acts as a central platform for global economic, social and environmental issues.

The Group of Seven is an informal forum that works without a treaty and has no permanent secretariat. It brings together advanced economies along with the European Union, and its decisions are taken by consensus. India's External Affairs Minister was invited to the G7 Foreign Ministers' Meeting in France as a partner.

Q1.

In which year was the Asia Zero Emission Community (AZEC) launched? (year)

Answer: _____

Q2.

In which city is the headquarters of the UN Economic and Social Council located?

Answer: _____

Q3.

In which year did the G7 begin as the G6 forum? (year)

Answer: _____

Q4.

Which country joined the G6 in 1976, turning it into the G7? (country)

Answer: _____

Q5.

How many member States does the UN Economic and Social Council have? (number)

Answer: _____

Q6.

In which year did the UN Security Council create the UN Interim Force in Lebanon (UNIFIL)? (year)

Answer: _____
