

CLAT Express - June 2026: Practice Quizzes

MCQ: +1 for a correct answer, -0.25 for a wrong answer. TITA (type-in-the-answer): +1, no negative marking.

Multiple-choice passages

Islamabad MoU: practice set

In June 2026, the United States and Iran put their signatures to a memorandum known as the Islamabad MoU. The document is designed to halt open hostilities first, with an immediate ceasefire, and then to open a structured period of talks. Those talks are meant to cover three linked areas: nuclear questions, security in the wider region and relief from sanctions. Movement of commercial vessels through a key maritime route would be restored during this negotiation period, reassuring energy-importing countries. The background to the arrangement is a long dispute. An earlier agreement under which Iran accepted curbs on uranium enrichment and tighter inspections, in return for easing of international economic sanctions, was later abandoned by the United States. Iran responded by gradually reducing its compliance with the terms it had accepted. An international nuclear body, whose work includes promoting peaceful nuclear energy and blocking its military use, plays a central role in verifying any nuclear commitments. The accord also envisions a further comprehensive deal, backed by the United Nations Security Council, once negotiations are complete. Many observers remain cautious about whether the timelines can be met.

Q1.

What is the status of the Islamabad MoU compared with a permanent peace treaty?

- (A) It is an interim diplomatic framework rather than a permanent peace treaty
- (B) It is a permanent peace treaty ratified by the UN Security Council
- (C) It is a bilateral trade pact with a fixed tariff schedule
- (D) It is a permanent treaty limited to nuclear inspections only

Q2.

What is the duration of the negotiation process on nuclear issues, regional security and sanctions relief?

- (A) 30 days
- (B) 45 days
- (C) 90 days
- (D) 60 days

Q3.

Assertion (A): The IAEA is headquartered in Vienna and works to promote the peaceful use of nuclear energy.

Reason (R): The IAEA was founded in 1953 when the Atoms for Peace speech was delivered to the UN General Assembly.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Match List I with List II:

List I	List II
I. Year the IAEA was founded	A. 2005
II. IAEA headquarters	B. Rafael Grossi
III. Year of the IAEA's Nobel Peace Prize	C. Vienna
IV. Current IAEA head	D. 1957

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-D, III-B, IV-A
- (B) I-D, II-C, III-A, IV-B
- (C) I-A, II-B, III-C, IV-D
- (D) I-A, II-D, III-C, IV-B

Q5.

Consider the following statements:

- I. The IAEA was founded in 1957 and is headquartered in Vienna, Austria.
- II. The JCPOA was concluded between Iran and the P5+1 countries in 2018.
- III. The United States withdrew from the nuclear agreement in 2018.

Which of the above statements is/are correct?

- (A) II only
- (B) I and II only
- (C) II and III only
- (D) I and III only

Q6.

How many of the following statements about the Islamabad MoU are correct?

- I. The MoU was signed in June 2026.
- II. Iran is to downblend highly enriched uranium under IAEA supervision.
- III. The MoU was signed in Geneva.

- (A) Only two
- (B) Only one
- (C) Only three
- (D) None of the above

Q7.

In which year did the United States withdraw from the 2015 nuclear agreement with Iran?

- (A) 2017
- (B) 2020
- (C) 2019
- (D) 2018

Q8.

Which international organisation, founded in 1957 and headquartered in Vienna, promotes the peaceful use of nuclear energy?

- (A) United Nations Security Council
- (B) P5+1 group
- (C) Joint Comprehensive Plan of Action (JCPOA)
- (D) International Atomic Energy Agency

Visit Outcomes MCQ

Myanmar's President, Min Aung Hlaing, recently completed a five-day official visit to India. It was his first visit since the political transition in Myanmar. The visit came at a time when Myanmar remains central to India's Neighbourhood First Policy, Act East Policy and the wider Indo-Pacific

Vision. During the talks, Myanmar gave an assurance on a sensitive security concern. Its territory, it said, would not be used by anti-India insurgent groups operating near the border. Both sides also agreed to promote wider use of the Rupee-Kyat settlement framework, which is already in operation. The two countries reaffirmed their commitment to complete the Kaladan Multi-Modal Transit Transport Project at the earliest. Efforts were also announced to expedite the India-Myanmar-Thailand Trilateral Highway. In education, India increased the number of ICCR scholarships available to Myanmar students. The outcomes cover security, trade settlement, connectivity and people-to-people ties. The talks also reflected the long history between the two neighbours, whose modern boundary was fixed after the Anglo-Burmese War.

Q1.

Assertion (A): India seeks to enhance its cooperation with Myanmar in line with its Act East Policy.

Reason (R): Myanmar is a member of the Mekong-Ganga Cooperation.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q2.

How many of the following statements about Myanmar's regional memberships are correct?

- Myanmar is a member of BIMSTEC.
- Myanmar is a full member of SAARC.
- Myanmar is part of the Mekong-Ganga Cooperation.
- Bilateral trade with India is conducted under AITIGA.

- (A) Only two
- (B) Only three
- (C) All four
- (D) None

Q3.

Consider the following statements about Myanmar's relations with India:

- I. Myanmar is India's only ASEAN neighbour connected through both land and maritime boundaries.
- II. Myanmar is a full member of SAARC.
- III. The India-Myanmar-Thailand Trilateral Highway passes through Myanmar before reaching Mae Sot in Thailand.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and II only
- (C) I and III only
- (D) I, II and III

Q4.

The Treaty of Yandaboo was signed on behalf of the British by whom?

- (A) Lord Wellesley
- (B) Lord Cornwallis
- (C) Lord Dalhousie
- (D) General Sir Archibald Campbell

Q5.

Match List I with List II:

List I	List II
I. Treaty of Yandaboo	A. 2021
II. Treaty of Friendship	B. 1826
III. Rupee-Kyat settlement framework operational	C. 1951
IV. Military seizure of power in Myanmar	D. 2024

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-C, III-B, IV-A
- (B) I-B, II-C, III-D, IV-A
- (C) I-D, II-B, III-A, IV-C
- (D) I-A, II-D, III-B, IV-C

Q6.

What is the total length of the India-Myanmar-Thailand Trilateral Highway?

- (A) 980 km
- (B) 1,200 km
- (C) 1,643 km
- (D) 1,360 km

Q7.

Which Indian states share a boundary with Myanmar?

- (A) Arunachal Pradesh, Nagaland, Manipur and Mizoram
- (B) Assam, Meghalaya, Tripura and Nagaland
- (C) Sikkim, Assam, Manipur and Mizoram
- (D) Arunachal Pradesh, Assam, Nagaland and Tripura

Q8.

Which seaport in Myanmar does the Kaladan project link with Kolkata?

- (A) Yangon Seaport
- (B) Patheingyi Seaport
- (C) Dawei Seaport
- (D) Sittwe Seaport (Rakhine)

Modi's Milestone and the PM's Office

Narendra Modi has become India's longest continuously serving elected Prime Minister. This milestone was reached after he completed a long run of consecutive days in office, counted from the day he took office in 2014. The record he surpassed was an uninterrupted tenure record held by an earlier Prime Minister. The Prime Minister is the head of the Union Government and the leader of the Council of Ministers. He is normally the leader of the majority party in the Lok Sabha, and the President usually invites that leader to form the government. The Prime Minister is also the chief coordinator of government policy and administration, and he chairs the Union Cabinet. The Prime Minister's salary and allowances are decided by Parliament from time to time. Many Prime Ministers of India have held the office for very different lengths of time, and their careers are often compared through such records. Students preparing for examinations should understand both the constitutional rules that govern the office and the historical milestones attached to individual leaders. A clear grasp of appointment, tenure and the Council of Ministers helps in answering questions on the Prime Minister's position in the Union Government. Modi's record is a reminder that the office rests on the confidence of the Lok Sabha, not just on the length of a term.

Q1.

Morarji Desai's birthday was celebrated only once every four years. On which date was he born?

- (A) 29 February
- (B) 28 February
- (C) 1 March
- (D) 15 August

Q2.

Read the statements.

Assertion (A): The Prime Minister holds office during the pleasure of the President.

Reason (R): The President can dismiss the Prime Minister at any time.

Which one of the following is correct?

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q3.

Whose uninterrupted tenure record did Modi surpass to become the longest continuously serving elected Prime Minister?

- (A) Jawaharlal Nehru
- (B) Atal Bihari Vajpayee
- (C) Indira Gandhi
- (D) Manmohan Singh

Q4.

Which Article of the Constitution provides for a Council of Ministers headed by the Prime Minister to aid and advise the President?

- (A) Article 72
- (B) Article 73
- (C) Article 76
- (D) Article 74

Q5.

After completing how many consecutive days in office did PM Narendra Modi become India's longest continuously serving elected Prime Minister?

- (A) 4,199 days
- (B) 4,299 days
- (C) 4,499 days
- (D) 4,399 days

Q6.

Match List I with List II:

List I	List II
I. Morarji Desai	A. PM with the shortest tenure
II. Rajiv Gandhi	B. India's oldest Prime Minister
III. V.P. Singh	C. India's youngest Prime Minister
IV. Atal Bihari Vajpayee	D. First PM to leave office after a no-confidence vote

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-B, III-D, IV-C
- (B) I-B, II-C, III-D, IV-A
- (C) I-C, II-B, III-D, IV-A
- (D) I-C, II-A, III-B, IV-D

Q7.

How many of the following statements about Narendra Modi are correct?

- I. He is the first Indian Prime Minister born after 15 August 1947.
 - II. He is the first Non-Congress Prime Minister of India.
 - III. He is among the few Indian PMs to secure three consecutive electoral mandates at the Union level.
- (A) Only one
(B) Only two
(C) Only three
(D) None

Passport and Proof of Citizenship

On Passport Seva Divas, observed on June 24, the Ministry of External Affairs set out what an Indian passport does and does not establish. Officials stressed that the document is primarily a travel document. The clarification came at a time when the Special Intensive Revision of electoral rolls was drawing attention and questions about who counts as a citizen were being raised. Courts have also been asked to examine how much weight a passport carries in legal disputes. The document is taken seriously as evidence of nationality, and the question of citizenship is decided against the criteria that the Constitution and the law provide. The law also lets the government act beyond citizens. A specific statutory provision authorises the Central Government to issue passports to non-citizens in the public interest. Stateless persons and certain refugees have been helped through this route when they needed to travel abroad, which shows that a passport can serve a practical purpose without proving citizenship. Ordinary documents follow the same logic. Many people carry identity cards, voter cards and ration cards in daily life, and each serves a particular purpose. Officials and courts look at what each document establishes and do not treat any one of them as a complete answer to the question of citizenship.

Q1.

Match List I with List II:

List I	List II
I. Maneka Gandhi vs Union of India (1978)	A. Burden of proof lies on the person claiming citizenship
II. State of Andhra Pradesh vs Abdul Khader (1962)	B. Electoral roll inclusion creates presumption of citizenship
III. Lal Babu Hussein vs Electoral Registration Officer (1995)	C. Passport as supporting evidence
IV. Sarbananda Sonowal vs Union of India (2005)	D. Passport as travel document subject to constitutional protections

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-B, III-A, IV-D
(B) I-C, II-A, III-B, IV-D
(C) I-D, II-C, III-B, IV-A
(D) I-A, II-D, III-C, IV-B

Q2.

Which clause of the Assam Accord mandates constitutional, legislative and administrative safeguards for the cultural, social, linguistic identity and heritage of the Assamese people?

- (A) Clause 6
(B) Clause 2
(C) Clause 9
(D) Clause 4

Q3.

Consider the following statements:

- I. India does not permit dual citizenship.
- II. The Citizenship Act, 1955 has been amended six times since 1986.
- III. Persons acquiring citizenship by birth or descent receive a Citizenship Certificate.

Which of the above statements is/are correct?

- (A) I and II only
- (B) I only
- (C) II and III only
- (D) I, II and III

Q4.

Assertion (A): An Indian passport is conclusive proof of Indian citizenship in legal disputes.

Reason (R): A passport is primarily a travel document and is strong evidence of nationality.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Consider the following statements:

- I. Aadhaar proves identity and residence, not citizenship.
- II. A Voter ID establishes electoral eligibility, not citizenship.
- III. A Ration Card proves citizenship.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None of the above

Q6.

Under which Article of the Constitution was the constitutional validity of the Special Intensive Revision (SIR) upheld in *Association for Democratic Reforms vs Election Commission of India* (2026)?

- (A) Article 326
- (B) Article 300A
- (C) Article 368
- (D) Article 324

Q7.

Which section of the Passports Act, 1967 allows the Central Government to issue passports to non-citizens in the public interest?

- (A) Section 20
- (B) Section 15
- (C) Section 10
- (D) Section 25

VB-G RAM G Practice Set

The Union Government has released Draft Rules for the Viksit Bharat — Guarantee for Rozgar and Ajeevika Mission (Gramin) Act 2025, known as VB-G RAM G. The Act is set to replace the Mahatma Gandhi National Rural Employment Guarantee Act from July 2026. It is a Rural Employment and Livelihood Programme that combines wage employment with the creation of durable rural assets. Its objectives include enhancing livelihood security in rural areas, generating productive employment and improving climate resilience.

Employment generation is tied to building rural infrastructure, such as water conservation assets, rural connectivity and climate-resilient community assets. A national infrastructure programme carries this linkage forward. Rural planning is also decentralised and technology-based, and preparing Viksit Gram Panchayat Plans is mandatory.

The Act also allows a seasonal pause in work. States may declare a no-work period, which is meant to address labour shortages in agriculture during peak times. Guaranteed wage employment is to be paid promptly once the work is complete, and the rules fix a clear timeline for this payment.

Funding is changing too. The Draft Rules move away from the open-ended, demand-driven financing model of the earlier scheme. Central allocations will instead follow a normative formula based on devolution criteria, which is meant to bring predictability. Poorer states are to receive a larger share, and any spending beyond the approved allocation must be financed fully by the state.

Q1.

Under the Agricultural Season Pause, how many cumulative days of no-work period may a State declare during peak sowing and harvesting seasons?

- (A) 30 days
- (B) 45 days
- (C) 90 days
- (D) 60 days

Q2.

Under VB-G RAM G, guaranteed wage employment per rural household annually is raised from 100 days to how many days?

- (A) 125 days
- (B) 110 days
- (C) 120 days
- (D) 150 days

Q3.

Within how many days of completion of work must wages be paid under the new Act?

- (A) 7 days
- (B) 30 days
- (C) 10 days
- (D) 15 days

Q4.

Match List I with List II:

List I	List II
I. Agricultural Season Pause	A. Begins from the 2nd year
II. Normative Allocation Formula	B. Fully financed by the concerned State
III. Expenditure beyond approved allocation	C. Cumulative 60-day no-work period
IV. Performance-linked funding	D. Based on 16th Finance Commission devolution criteria

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-D, III-B, IV-A
- (B) I-B, II-A, III-C, IV-D
- (C) I-A, II-B, III-D, IV-C
- (D) I-C, II-D, III-A, IV-B

Q5.

Consider the following statements about the VB-G RAM G Act 2025 and its Draft Rules:

- I. The Act is set to replace MGNREGA from July 2026.
- II. The National Level Steering Committee is chaired by the Union Minister for Rural Development.
- III. Performance-linked funding begins from the 2nd year.

Which of the above statements is/are correct?

- (A) I only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q6.

How many of the following statements about the Draft Rules are correct?

- I. Central allocations follow a normative allocation formula.
- II. The Centre's share for General States is 90 per cent.
- III. The National Level Steering Committee has 16 members.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None of the above

Q7.

Which portal is to be used for technology integration in decentralised planning under VB-G RAM G?

- (A) UMANG Portal
- (B) DigiLocker Portal
- (C) GeM Portal
- (D) Yuktdhara Portal

Party System and Symbols Practice

India's party system is built on groups of like-minded people who come together to gain political power through constitutional means. These groups organise voluntarily and their aim is to promote the national interest. Not every party enjoys the same status. Some are recognised as national parties and others as state parties, and recognition affects the symbols a party can use. A recognised party may be allotted a symbol for its own exclusive use within its area. Recognition depends on how a party performs at general elections, measured through vote shares and seats won in the Lok Sabha and state legislative assemblies. Registered but unrecognised parties and independent candidates draw their symbols from a different pool. Problems arise when a recognised party splits. Each rival group may claim the party, and the question of who keeps its name and symbol becomes a formal dispute. Such disputes must be settled by a single authority. The framework covers how parties are registered and classified, how symbols are reserved and allotted, and how disputes are handled. Recent public debate about an unusual symbol brought fresh attention to these rules. Understanding this framework helps explain how elections are contested in India and why symbols matter to voters and parties alike.

Q1.

Which term is used for the symbols exclusively allotted to recognised national or state parties?

- (A) Reserved symbols
- (B) Free symbols
- (C) Notified symbols
- (D) Independent symbols

Q2.

Which body is the sole authority empowered to adjudicate disputes arising from splits within recognised political parties?

- (A) Supreme Court of India
- (B) Parliament of India
- (C) Election Commission of India
- (D) Ministry of Law and Justice

Q3.

Which of the following is listed in the booklet as a national party?

- (A) Mizo National Front
- (B) Shiv Sena
- (C) DMK
- (D) Bahujan Samaj Party

Q4.

Assertion (A): A recognised party retains exclusive rights over its symbol.

Reason (R): Free symbols are available to registered unrecognised parties and independent candidates.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Sadiq Ali and Another v. ECI (1972)	A. Triggered when neither faction shows a clear majority
II. Kanhaiyalal Omar v. R.K. Trivedi (1986)	B. Allotted by ECI from a notified list
III. Symbol freeze	C. Legislative majority alone is not the sole criterion
IV. Free symbols	D. Symbols Order is a valid exercise of ECI's powers

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-D, III-B, IV-A
- (B) I-C, II-A, III-D, IV-B
- (C) I-C, II-D, III-A, IV-B
- (D) I-C, II-A, III-B, IV-D

Q6.

Consider the statements:

- I. Recognised national or state parties may be allotted a symbol for exclusive use in their jurisdiction.
- II. Free symbols are allotted by the ECI from a notified list.
- III. The Election Symbols (Reservation and Allotment) Order, 1968 was issued by the Supreme Court of India.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q7.

Consider the statements:

- I. India follows a multi-party system.
- II. The one-party system is the one followed in the USA.
- III. The ECI recognised both Congress (O) and Congress (R) after the split in the Indian National Congress.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None of the above

Q8.

Under what condition may the ECI freeze a party's original symbol?

- (A) When both factions agree to freeze it
- (B) When the Supreme Court orders a freeze
- (C) When neither faction demonstrates a clear majority
- (D) When the party fails to contest elections for two consecutive terms

Telegram ban: misuse and blocking context

Telegram, a messaging platform, has come under scrutiny in India after the Ministry of Electronics and Information Technology (MeitY) temporarily blocked it under Section 69A of the Information Technology Act, 2000. The action followed reports that criminal groups had used Telegram's message-editing feature to target and defraud candidates appearing in the NEET-UG 2026 Re-Examination. Fraudsters reportedly inserted fake exam papers into old messages after an exam had ended, creating a false appearance of a pre-exam leak and spreading misinformation. The platform's privacy features add to the concern. Hidden phone numbers and end-to-end encryption in secret chats make it nearly impossible for investigators to trace malicious actors. The platform also permits the sharing of massive files, which makes it easy to distribute high-resolution PDFs of leaked documents. Telegram hosts active marketplaces for renting bank accounts used in money laundering, extortion, and illegal gambling. Criminals use automated bots to distribute illegal content and coordinate large-scale activities with minimal manual effort. Government data shows a sharp increase in official cybercrime complaints linked to activities organised within Telegram groups. Section 69A empowers the Central Government, or an officer it specially authorises, to direct any government agency or intermediary to block public access to online information. The episode shows how platform features can be misused for organised fraud against candidates.

Q1.

Under the DPDP Act 2023, what is the term for the individual whose data is processed?

- (a) Data Fiduciary
 - (b) Data Processor
 - (c) Data Principal
 - (d) Data Custodian
- (A) Data Fiduciary
 - (B) Data Processor
 - (C) Data Principal
 - (D) Data Custodian

Q2.

Match List I with List II:

List I	List II
I. Section 69A	A. Direct takedown or blocking orders by certain ministries
II. Section 79(3)(b)	B. Up to 250 crore
III. Tanul Thakur case	C. Introduced in 2008
IV. DPDP Act 2023 maximum penalty	D. Disclosure of original blocking orders

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-C, III-B, IV-D
- (B) I-D, II-A, III-C, IV-B
- (C) I-C, II-A, III-D, IV-B
- (D) I-C, II-A, III-B, IV-D

Q3.

In Tanul Thakur vs Union of India (2022), the Delhi High Court challenged the blanket confidentiality of which Rule?

- (a) Rule 4
- (b) Rule 7
- (c) Rule 12
- (d) Rule 16
- (A) Rule 4
- (B) Rule 7
- (C) Rule 12
- (D) Rule 16

Q4.

Consider the following statements:

- I. The Designated Committee evaluates necessity and legality of a proposed blocking action before implementation.
- II. The IT (Blocking Rules), 2009 provide for an Inter-Ministerial Review Mechanism for blocking requests.
- III. In Shreya Singhal vs Union of India (2015), the Supreme Court struck down Section 69A as vague.

Which of the above statements is/are correct?

- (a) I and II only
- (b) II and III only
- (c) I and III only
- (d) I, II and III
- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q5.

In which year was Section 69A of the IT Act introduced?

- (a) 2000
 - (b) 2005
 - (c) 2008
 - (d) 2012
- (A) 2000
 - (B) 2005
 - (C) 2008
 - (D) 2012

Q6.

Consider the following statements:

- I. Interim Blocking Directions may be issued in urgent situations before a Full Review.
- II. Safe harbour under Section 79 is granted even to intermediaries that do not act upon notified violations.

Which of the above statements is/are correct?

- (a) II only
 - (b) I only
 - (c) Both I and II
 - (d) Neither I nor II
- (A) II only
 - (B) I only
 - (C) Both I and II
 - (D) Neither I nor II

Revision and PPI: MCQ Practice

Price indices are widely used to track inflation, and the Wholesale Price Index (WPI) is a key measure among them. The Government of India has now approved a revision of the WPI base year, moving the reference point of the index to a more recent period. A base year is the reference period against which later price movements are measured, so changing it allows the index to reflect the structure of the modern economy more accurately. Economic activity has changed considerably since the earlier base year was fixed. The revision therefore aims to capture these shifts in the composition of goods, in the way they are classified and in the way their relative importance is measured. Accurate measurement matters because the WPI sits early in the supply chain, and its movements often signal pressures that may later reach consumers. Alongside the revised WPI, the Government has decided to introduce new Producer Price Indices. These indices are meant to give a wider picture of the prices that producers receive and pay, and of the costs they face in production. Together, the revised series is expected to provide a more complete view of inflation at the producer level, helping policymakers, businesses and analysts read cost and price dynamics with greater confidence.

Q1.

The 2011-12 WPI series covered 697 items. By how many items did the item count rise in the revised series with 2022-23 as base year?

- (A) 160
- (B) 220
- (C) 260
- (D) 300

Q2.

Which index measures changes in prices received by producers for the goods and services they sell?

- (A) Output Producer Price Index
- (B) Input Producer Price Index
- (C) Wholesale Price Index
- (D) Service Producer Price Index

Q3.

In the revised WPI series, Crude Petroleum and Natural Gas were moved between categories. Which move describes this change?

- (A) From Manufactured Products to Primary Articles
- (B) From Fuel and Power to Manufactured Products
- (C) From Primary Articles to Manufactured Products
- (D) From Primary Articles to Fuel and Power

Q4.

Assertion (A): The revised WPI series uses weights based on Gross Value of Output rather than Net Traded Value.

Reason (R): The earlier WPI method calculated weights as Gross Value of Output plus imports minus exports.

Choose the correct option.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Input Producer Price Index	A. Missing prices replaced by the last available price
II. Output Producer Price Index	B. Prices received by service providers for services rendered
III. Service Producer Price Index	C. Prices paid by producers for inputs used in production
IV. Carry-Forward Method	D. Prices received by producers for goods and services they sell

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-A, III-C, IV-D
- (B) I-D, II-C, III-A, IV-B
- (C) I-D, II-A, III-C, IV-B
- (D) I-C, II-D, III-B, IV-A

Q6.

I. The revised WPI series has 957 items, up from 697 in the 2011-12 series.

II. Crude Petroleum and Natural Gas are classified under Primary Articles in the revised series.

III. The revised series uses Targeted Mean Imputation to treat missing data.

Which of the above statements is/are correct?

- (A) I and III only
- (B) II and III only
- (C) I, II and III
- (D) I and II only

Q7.

- I. Solar Power is one of the components newly added in the revised WPI series.
- II. The new missing-data approach is the Carry-Forward Method.
- III. The Output PPI measures prices before taxes, trade margins and transportation costs.
- IV. Pension Fund Management is among the services covered by the Service PPI.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All four

Q8.

Which method, previously used for missing prices, was replaced in the revised WPI series by Targeted Mean Imputation?

- (A) Carry-Forward Method
- (B) Linear interpolation
- (C) Moving average method
- (D) Seasonal adjustment

G7 Evolution Check

The Group of Seven, commonly called the G7, did not begin as a fixed club of advanced economies. It was set up as a response to a period of unsettled global economics and a major energy shock, when leading industrialised nations felt the need to consult closely with one another. The original group was a small circle of Western and Asian economies, and it later added a new member that turned the forum into a larger body for some years. Afterwards, the membership changed again when one participant's involvement was halted. The forum then returned to its earlier arrangement, which remains in place today. Each phase reshaped the membership, but the group's consultative purpose stayed the same over the decades. Throughout these changes, the grouping has kept its informal character, meeting to discuss pressing economic, political and strategic questions rather than operating as a formal treaty organisation. The history of the G7 therefore shows how a forum can grow, shrink and reorganise in response to global events while keeping its core purpose of consultation. The forum brings together some of the world's most advanced industrialised economies. The chronology also helps explain the forum's present-day role as a platform for consultation among major economies.

Q1.

In which year was the G7 established in response to global economic turbulence and an oil crisis?

- (A) 1973
- (B) 1976
- (C) 1980
- (D) 1975

Q2.

Which country joined the grouping in 1976, creating the G7?

- (A) Russia
- (B) Canada
- (C) Japan
- (D) Mexico

Q3.

Russia's participation in the grouping was suspended in 2014 for which reason?

- (A) Violation of trade agreements
- (B) Economic sanctions over nuclear testing
- (C) Annexation of Crimea
- (D) Interference in elections

Q4.

Given the assertion and reason below, choose the correct option.

Assertion (A): Russia's participation in the G7 was suspended in 2014.

Reason (R): Russia's participation was suspended following the annexation of Crimea.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Establishment of the grouping	A. 2014
II. Canada joins the grouping	B. 1998
III. Russia joins the grouping	C. 1976
IV. Russia's participation suspended	D. 1975

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-A, III-D, IV-B
- (B) I-D, II-C, III-B, IV-A
- (C) I-A, II-D, III-B, IV-C
- (D) I-A, II-C, III-B, IV-D

Q6.

Consider the following statements about the G7:

- I. The grouping was established in 1975 in response to global economic turbulence and an oil crisis.
- II. The European Union is counted as a formal member of the G7.
- III. Leadership of the G7 rotates annually among member states.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q7.

How many of the following statements about the G7 are correct?

- I. Canada was among the founding members of the grouping in 1975.
 - II. Russia's joining in 1998 led to the formation of the G8.
 - III. The G7 format was restored after Russia's participation was suspended in 2014.
 - IV. The 52nd G7 Summit was held in Paris, France.
- (A) Only two
 - (B) Only one
 - (C) Only three
 - (D) None of the above

Q8.

Consider the following statements:

- I. Italy was among the founding members of the grouping.
- II. Canada was among the founding members of the grouping.

Which of the above statements is/are correct?

- (A) Neither I nor II
- (B) II only
- (C) I only
- (D) Both I and II

Quad at a glance: MCQ set

The Quad is a grouping of India, the United States, Japan and Australia that has grown from a set of humanitarian contacts into a diplomatic grouping. Its roots lie in cooperation that followed a devastating disaster in the Indian Ocean region. A Japanese leader later gave the idea a sharper political shape, and the grouping was revitalised in response to growing unease about the expanding military and economic presence of a large regional power in the Indo-Pacific.

Today the Quad works as an informal strategic partnership rather than a formal alliance. Its stated aim is a region that is free, open, inclusive, secure and prosperous, anchored in the rule of law, freedom of navigation, territorial integrity and the peaceful resolution of disputes. These principles are applied in practice through specific initiatives, each with its own focus areas and objectives.

The eleventh foreign ministers' meeting of the group turned these ideas into concrete outcomes across several areas. Maritime cooperation is one strand, with shared surveillance tools and data arrangements focused initially on the Indian Ocean. Other outcomes cover critical minerals, energy, undersea connectivity, digital identity systems and agriculture. Many of these efforts aim to reduce dependence on a few suppliers and to build resilient supply chains and infrastructure across the region.

Q1.

Assertion (A): The Quad is an informal strategic partnership.

Reason (R): Quad stands for Quadrilateral Security Dialogue.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q2.

How many of the following statements about the Quad are correct?

- I. The Quad stands for Quadrilateral Security Dialogue.
- II. South Korea is a full member of the Quad.
- III. India will host the next edition of the Quad-at-Sea Ship Observer Mission.
- IV. The Quad Counterterrorism Tabletop Exercise is to be hosted by Japan in 2026.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None of the above

Q3.

Which threats are among the focus areas of the Quad Counterterrorism Tabletop Exercise?

- (A) Unmanned Aerial Vehicle threats
- (B) Cyber espionage
- (C) Maritime piracy
- (D) Oil spills

Q4.

Match List I with List II:

List I	List II
I. Malabar Exercise	A. Agricultural productivity and food security
II. AI-ENGAGE Initiative	B. Collaboration with Fiji
III. Quad Counterterrorism Tabletop Exercise	C. Annual multilateral naval exercise of Quad members
IV. Pacific Island Infrastructure Outreach	D. Hosted by Australia in 2026

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-C, III-A, IV-B
- (B) I-B, II-A, III-C, IV-D
- (C) I-A, II-B, III-C, IV-D
- (D) I-C, II-A, III-D, IV-B

Q5.

By which year is the Pacific Island Infrastructure Outreach targeted for completion?

- (A) 2026
- (B) 2028
- (C) 2030
- (D) 2024

Q6.

Where was the 11th Quad Foreign Ministers' Meeting held?

- (A) Tokyo
- (B) Washington D.C.
- (C) New Delhi
- (D) Canberra

Q7.

Consider the following statements about Quad initiatives:

- I. The Quad-at-Sea Ship Observer Mission was launched under the Wilmington Declaration.
- II. The Indo-Pacific Energy Security Initiative includes a Joint Regional Energy Roadmap with a commitment of over USD 25 million.
- III. The Quad Counterterrorism Tabletop Exercise in 2026 is to be hosted by India.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and III only
- (C) I and II only
- (D) I, II and III

Q8.

Who championed the Quad concept in 2007?

- (A) Joe Biden
- (B) Shinzo Abe
- (C) Narendra Modi
- (D) Scott Morrison

E85 Basics Check

India is considering a policy framework to make the adoption of E85 fuel affordable. Ethanol is a highly purified alcohol that can be blended with petrol and used as a transport fuel. Ethanol blending means mixing ethanol with petrol to create fuel that can run internal combustion engines. The idea is to lower the country's reliance on imported crude oil while giving farmers a steady market for their produce. Ethanol is derived from plant-based sources, and the wider family of biofuels also includes fuels made from animal waste. The Ethanol Blending Programme began as a pilot and was later widened under a national policy on biofuels. The programme set a target of blending twenty per cent ethanol, written as E20. Officials also stress environmental gains, since ethanol replaces fossil fuels and lowers greenhouse gas emissions. E85 is a fuel blend that carries much more ethanol than ordinary petrol, and the policy discussion is about making it affordable. Read together, these points show how energy security, farm incomes and cleaner air are linked in the rollout of ethanol fuels. The discussion also considers rural livelihoods, since farmers supply the raw material that makes the fuel possible. Supporters argue that ethanol stocks can help manage prices when crude oil costs rise sharply. Critics, however, raise questions about how crops diverted to fuel affect food supply and whether ordinary vehicle owners will see lower running costs. Any framework that aims for affordable adoption must balance these competing concerns while keeping the programme's environmental goals in view.

Q1.

Which ministry is the nodal ministry for the Ethanol Blending Programme?

- (A) Ministry of Petroleum and Natural Gas
- (B) Ministry of New and Renewable Energy
- (C) Ministry of Agriculture and Farmers' Welfare
- (D) Ministry of Environment, Forest and Climate Change

Q2.

What is the composition of E85 fuel?

- (A) 85% petrol and 15% ethanol
- (B) 80% ethanol and 20% petrol
- (C) 85% ethanol and 15% petrol
- (D) 75% ethanol and 25% petrol

Q3.

In which year was the E20 blending target achieved?

- (A) 2024
- (B) 2025
- (C) 2027
- (D) 2029

Q4.

What is the approximate purity of the ethanol used for blending?

- (A) About 75%
- (B) About 90%
- (C) About 99.9%
- (D) About 50%

Q5.

Assertion (A): E85 fuel can be used in standard petrol-engine vehicles without any modification.

Reason (R): E85 can be used only in Flex-Fuel Vehicles designed to operate on varying ethanol-petrol blends.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q6.

Match List I with List II:

List I	List II
I. Ethanol Blending Programme pilot launch	A. 2023
II. Target year for E20 blending	B. 2018
III. Global Biofuels Alliance launch	C. 2030
IV. National Policy on Biofuels	D. 2003

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-B, III-C, IV-A
- (B) I-D, II-C, III-A, IV-B
- (C) I-B, II-C, III-A, IV-D
- (D) I-C, II-D, III-B, IV-A

Q7.

Consider the following statements:

- I. Major feedstocks for ethanol include sugarcane, maize and wheat.
- II. E85 fuel can be used in all petrol-engine vehicles without any change.
- III. Flex-fuel vehicles are designed to operate on different ethanol-petrol blends.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q8.

Consider the following statements:

- I. Ethanol and biodiesel are the most common biofuels.
- II. GOBAR-DHAN focuses on converting cattle dung and solid waste into compost, biogas and bio-CNG.
- III. The Repurpose Used Cooking Oil initiative was launched by the Ministry of Petroleum and Natural Gas.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Forests, Wetlands and Wildlife Drives

India's efforts to protect its green cover combine large national missions with focused local drives. The National Mission for Green India concentrates on expanding forest and tree cover while also improving the quality of the cover that already exists. Funds for compensatory afforestation are managed by a dedicated authority, which supports regeneration on degraded land. India also protects its wetlands, and several of these are recognised as Ramsar Sites. Two major programmes were started to protect large wild animals, one focused on tigers and another on elephants. Along the coastline, mangroves are being promoted through a national initiative that seeks to support both habitats and local livelihoods. The Aravalli Green Wall is a planned green belt along a mountain range. Public participation is also encouraged, and campaigns invite ordinary people to plant trees as part of the effort. India further publishes a periodic national report on the condition of its forests. Taken together, these measures show how planning, public funds, wildlife protection and citizen action work side by side to protect the natural environment.

Q1.

In which year was Project Tiger launched by India?

- (A) 1972
- (B) 1973
- (C) 1992
- (D) 2014

Q2.

As of now, how many Ramsar Sites has India expanded its count to?

- (A) 75
- (B) 82
- (C) 95
- (D) 100

Q3.

In which Union Budget was the MISHTI mangrove initiative announced?

- (A) 2014-15
- (B) 2016-17
- (C) 2023-24
- (D) 2024-25

Q4.

Match List I with List II:

List I	List II
I. Ek Ped Maa Ke Naam	A. Launched in 1992
II. MISHTI	B. Plant trees in memory of one's mother
III. CAMPA Funds	C. Promote and conserve mangroves
IV. Project Elephant	D. Afforestation on waste, vacant and barren lands

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-A, III-B, IV-C
- (B) I-D, II-C, III-B, IV-A
- (C) I-B, II-C, III-D, IV-A
- (D) I-B, II-C, III-A, IV-D

Q5.

Consider the following statements:

- I. The National Mission for Green India is one of the missions under the National Action Plan on Climate Change.
- II. The Aravalli Green Wall is planned as a green belt 5 km wide.
- III. Project Elephant was launched before Project Tiger.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and II only
- (C) I and III only
- (D) I, II and III

Q6.

How many of the following statements are correct?

- I. The Green India Mission targets increasing forest and tree cover on 5 million hectares.
- II. The 16th COP to the UNCCD was held in Riyadh, Saudi Arabia, in 2024.
- III. India ranks first globally in net forest area gain over the past 15 years.

- (A) Only two
- (B) Only one
- (C) Only three
- (D) None

Q7.

Consider the following statements:

- I. The Ek Ped Maa Ke Naam campaign links tree planting with an emotional appeal.
- II. The Aravalli Green Wall is 1,000 km long and runs from Jaisalmer to Delhi.

Which of the above statements is/are correct?

- (A) I only
- (B) II only
- (C) Both I and II
- (D) Neither I nor II

Defence and Nuclear Developments

Defence and nuclear developments featured prominently this month. The annual SIPRI Yearbook 2026, published by the Stockholm International Peace Research Institute, highlights rising global militarisation, nuclear modernisation and India's evolving nuclear posture. It reports that India's defence expenditure rose to USD 92.1 billion in 2025, placing India among the world's largest military spenders.

India's nuclear decision-making rests on its Nuclear Command Authority, which has two bodies. The Political Council is the sole body authorised to release nuclear weapons, while the Executive Council provides inputs to it and executes its directives.

On air defence, India has received the fourth squadron of the S-400 Triumf system from Russia, which is designated Sudarshan in Indian service. India has also signed a deal to supply BrahMos supersonic cruise missiles to Vietnam, as announced during the Shangri-La Dialogue. BrahMos was used in combat for the first time during Operation Sindoor.

Globally, military spending reached USD 2.9 trillion in 2025, marking the 11th consecutive year of growth. The world retained 12,187 nuclear warheads, and nuclear-armed states continue to rely on nuclear deterrence as a strategic tool. The Yearbook also notes that Ukraine recorded the highest military burden in the world, with its military spending equivalent to 40% of its GDP.

Q1.

Which authority chairs the Executive Council of India's Nuclear Command Authority?

- (A) Prime Minister
- (B) National Security Advisor
- (C) Defence Minister
- (D) President of India

Q2.

Assertion (A): India signed a USD 5.43 billion agreement with Russia in 2018 for five S-400 regimental systems.

Reason (R): The S-400 system is designed and manufactured by Almaz-Antey.

- (A) Both A and R are true and R explains A
- (B) Both A and R are true but R does not explain A
- (C) A is true but R is false
- (D) A is false but R is true

Q3.

Match List I with List II:

List I	List II
I. Iron Dome	A. China
II. S-500 Prometey	B. USA
III. HQ-9	C. Russia
IV. THAAD	D. Israel

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-A, III-B, IV-D
- (B) I-D, II-A, III-B, IV-C
- (C) I-D, II-B, III-C, IV-A
- (D) I-D, II-C, III-A, IV-B

Q4.

Consider the following statements about the BrahMos missile:

- I. It is a supersonic cruise missile operating at Mach 2.8.
- II. It is capable of carrying a nuclear warhead.
- III. It is jointly developed by India's DRDO and Russia's NPOM.

Which of the above statements is/are correct?

- (A) I and III only
- (B) I and II only
- (C) II and III only
- (D) I, II and III

Q5.

How many of the following statements about India's nuclear milestones are correct?

- I. 1974: first nuclear test at Pokhran, known as Smiling Buddha.
- II. 1998: Operation Shakti established India as a nuclear weapons state.
- III. 2008: India secured an NSG waiver.
- IV. 1998: India formally adopted its nuclear doctrine.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q6.

Approximately what share of all nuclear warheads in the world is held collectively by the USA and Russia?

- (A) About 40%
- (B) About 50%
- (C) About 65%
- (D) About 86%

Q7.

Which country was the first state ever to withdraw from the Convention on Cluster Munitions, in 2025?

- (A) Estonia
- (B) Lithuania
- (C) Poland
- (D) Latvia

Q8.

At which centre is the BrahMos Integration and Testing Facility located?

- (A) Lucknow
- (B) Ooty
- (C) Pune
- (D) Hyderabad

Type-in-the-answer passages

Strategic benefits: short answers

Supporters of the June 2026 understanding argue that its benefits would reach well beyond the two signatories. A safer environment in the region could lower the likelihood of direct military clashes and of confrontations fought through allied groups. Calmer conditions would also make oil supplies more dependable, and lower crude prices could ease the financial strain on countries that import most of their energy. Shipping costs could fall as insurers judge a critical route to be less risky, and investment could flow back into areas hit by conflict, helping to rebuild them. New trade links could also connect the markets of West and Central Asia, and the reintegration of the country could give a north-south transport corridor a fresh boost. Yet the outlook is not uniform. Some analysts doubt that the parties can settle every disputed issue in the time allowed. Meanwhile, tensions involving regional proxies remain. Balancing these hopes against those risks will shape whether the accord delivers lasting dividends for the wider region.

Q1.

Under which strategic pillar is 'energy market benefits', including reduced oil price volatility, listed? Give the pillar number.

Answer: _____

Q2.

Which strategic pillar covers stimulated trade and investment? Give the pillar number.

Answer: _____

Q3.

Which waterway's reopening reduces freight and insurance costs for shipping?

Answer: _____

Q4.

The reintegration of which port is linked to a boost for the International North-South Transport Corridor (INSTC)?

Answer: _____

Q5.

Experts doubt a comprehensive settlement can be concluded within what timeframe, in months?

Answer: _____

Q6.

Persistent regional tensions with Israel are linked to which group, named in the booklet?

Answer: _____

Q7.

Lower crude oil prices would lower the inflationary pressures and current account deficit of which country?

Answer: _____

Strategic Ties TITA

Myanmar holds a special place in India's foreign policy. It is the only ASEAN nation with which India shares a boundary, and the two countries are linked by both land and sea. The land frontier runs through several northeastern states, where cross-border issues such as insurgency, narcotics trafficking and illegal arms smuggling have long been concerns. Cooperation with Myanmar is therefore seen as critical for tackling these problems. Myanmar also lies near India's island territories, which makes maritime cooperation important for regional stability and security. Beyond security, Myanmar acts as a bridge between South Asia and South-East Asia, a role that matters for India's connectivity with the wider region. India seeks to enhance its ties with Myanmar in line with its Act East and Neighbourhood First policies. Myanmar's membership of several regional forums adds to its importance for India. Trade is an important part of this relationship, and the Kaladan project and the trilateral highway are central to plans for better physical links. The relationship has deep roots in history, as the modern boundary was shaped by a treaty that ended an early nineteenth-century war.

Q1.

In which year did India and Myanmar sign their Treaty of Friendship? (year)

Answer: _____

Q2.

What is the length of the India-Myanmar land border? (in km)

Answer: _____

Q3.

Which trade agreement governs bilateral trade between India and Myanmar? (acronym)

Answer: _____

Q4.

Myanmar is an observer in which South Asian grouping? (acronym)

Answer: _____

Q5.

From which Indian town in Manipur does the India-Myanmar-Thailand Trilateral Highway start?

Answer: _____

Q6.

Along which sea does the India-Myanmar maritime boundary lie? (name)

Answer: _____

Council of Ministers and Key Rules

The Prime Minister is the head of the Union Government and leads the Council of Ministers. The Council is the body through which the government functions, and the Prime Minister acts as its chief coordinator for government policy and administration. Ministers are placed at different levels. Cabinet ministers are the senior members, and they often oversee key ministries such as Home Affairs, Finance and Defence. Ministers of State assist Cabinet ministers with specific functions, and some of them are given independent charge of a ministry. Deputy Ministers help Cabinet ministers or Ministers of State with administrative, political and parliamentary duties. This structure allows policy decisions to pass through senior leaders before they reach individual

departments. The Constitution sets out the office of the Prime Minister, the Council of Ministers and the relationship between them and the President. At the state level, a similar arrangement exists, with a Chief Minister heading the council and advising the Governor. Students should learn which constitutional provisions govern these arrangements, and how the rules connect to the everyday working of the government.

Q1.

Which Article of the Constitution deals with the appointment, tenure and responsibilities of the Prime Minister and the Council of Ministers? (give the article number)

Answer: _____

Q2.

Under which Article can ministers take part in the proceedings of both Houses of Parliament without a guaranteed right to vote? (give the article number)

Answer: _____

Q3.

Under the 91st Amendment (2003), what is the maximum size of the Council of Ministers as a share of the total strength of the Lok Sabha? (in per cent)

Answer: _____

Q4.

After how many months out of Parliament does a minister lose their position? (in months)

Answer: _____

Q5.

Which Article provides for State Councils of Ministers led by the Chief Minister to assist and advise the Governor? (give the article number)

Answer: _____

Q6.

Which Prime Minister of India is described in the booklet as the first PM of South Indian origin, from Andhra Pradesh? (give full name)

Answer: _____

Q7.

Which Prime Minister is described in the booklet as India's first Sikh PM? (give full name)

Answer: _____

Citizenship Law Framework

Indian citizenship is governed by a set of constitutional and statutory rules rather than by any single certificate. The Constitution, through a group of early articles, settled who became a citizen when the Republic began. Those articles were not meant to be read alone, because the detailed rules on how citizenship is gained and lost are set out in a separate law passed by Parliament. That law has changed over the decades. It has been amended several times since the 1980s, reflecting shifts in policy on illegal migration and on the status of migrants from neighbouring countries. Earlier changes altered the basis of citizenship, moving the regime toward a principle linked to parentage. Later changes eased the path for certain religious communities who had entered India from neighbouring countries before a fixed date. Some features of the system are firm. India does not allow a person to hold citizenship of another country alongside Indian citizenship. The law also sets out the circumstances in which citizenship can be lost. Officials and students alike should note that the rules fix who is a citizen, while documents only record or support that status. Keeping this distinction clear helps explain why a passport, a voter card or an identity number cannot by itself settle a citizenship question.

Q1.

How many times has the Citizenship Act, 1955 been amended since 1986? (in number)

Answer: _____

Q2.

In which year did the Citizenship (Amendment) Act shift India's citizenship regime towards Jus Sanguinis?

Answer: _____

Q3.

How many communities are granted citizenship under the Citizenship (Amendment) Act 2019? (in number)

Answer: _____

Q4.

On or before which date must migrants have entered India to be covered by the Citizenship (Amendment) Act 2019?

Answer: _____

Q5.

On which date (day and month, 1950) did the citizenship provisions in Articles 5 to 11 take effect?

Answer: _____

Q6.

What is the first of the three conditions listed for losing citizenship under the Citizenship Act, 1955? (one word)

Answer: _____

Q7.

Apart from birth, descent, registration and naturalisation, what is the fifth way of acquiring citizenship under the Citizenship Act, 1955? (a short phrase)

Answer: _____

Allocation and Cost-Sharing Check

The Draft Rules for the VB-G RAM G Act 2025 change how central money reaches states for rural employment. Under the earlier scheme, funding followed an open-ended, demand-driven model. Under the new approach, central allocations are set by a normative allocation formula. This formula is based on devolution criteria recommended by a finance commission and uses several weighted factors. One factor measures how far a state's per capita income lags behind that of the wealthiest states. Another reflects population and the employment demand that comes with it. The aim is to give economically weaker states a larger share and to promote equitable distribution.

Cost sharing is also revised. General States share costs with the Centre in one ratio, while Northeastern and Himalayan States receive a higher central share. Any expenditure beyond the approved normative allocation must be fully financed by the concerned state government. Central assistance is also linked to performance. From a later year of implementation, a portion of funds depends on timely wage payments, compliance with social audit requirements, completion of public works and overall implementation efficiency.

A National Level Steering Committee oversees these matters. It recommends state-wise allocations, formulates operational standards and monitors implementation and compliance.

Q1.

Within how many days of completing work must wage payment be made under the VB-G RAM G Act? (Give the number of days.)

Answer: _____

Q2.

What weightage (in per cent) is given to GSDP distance in the Normative Allocation Formula?

Answer: _____

Q3.

What weightage (in per cent) is given to population in the Normative Allocation Formula?

Answer: _____

Q4.

What share of cost (in per cent) does the Centre bear for General States?

Answer: _____

Q5.

What share of cost (in per cent) does the Centre bear for Northeastern and Himalayan States?

Answer: _____

Q6.

Which Union official chairs the National Level Steering Committee?

Answer: _____

Party Splits Recall

Political parties are not always stable. A party may split when its members disagree, and each resulting group may claim to be the real party. When this happens, the question of who keeps the party's name and symbol becomes a dispute. Only one authority is empowered to decide such disputes, and it does not rely on a single measure of support. It looks at the backing a faction has among the party's office holders and executive members, and also at the support it has among the party's elected legislators. Majority support in both areas is treated as important. Historically, one such case involved a major national party that split, after which two new groups were recognised. The outcome of a dispute can take several forms. One faction may keep the name and symbol, while the other must register separately under a new name and a different symbol. Where neither faction can show that it commands a majority, the original symbol may be put on hold, and both groups are directed to contest under new names and symbols. Disputes arising from mergers of parties fall within the same authority's role. Courts have also been drawn into these matters, and their decisions have shaped how the tests are applied. The range of possible outcomes shows how much depends on the result of a dispute.

Q1.

In which year did the Election Commission of India issue the Election Symbols (Reservation and Allotment) Order? (year)

Answer: _____

Q2.

In which year did the split in the Indian National Congress occur that led ECI to recognise Congress (O) and Congress (R)? (year)

Answer: _____

Q3.

Which wing of a party includes its president, office bearers and national and state executive members? (two words)

Answer: _____

Q4.

Which 1972 Supreme Court case held that majority support must be determined in both the organisational and legislative wings? (name of the first-named party)

Answer: _____

Q5.

Which 1986 case held that the Symbols Order is a valid exercise of ECI's constitutional and statutory powers? (name of the first-named party)

Answer: _____

Q6.

Under the state party criteria, what percentage of valid votes polled in the state must a party secure, along with winning 2 seats in the state legislative assembly? (in per cent)

Answer: _____

Q7.

If split factions reunite later, what may they approach the ECI for? (a short phrase)

Answer: _____

Section 69A: powers and safeguards

Section 69A of the Information Technology Act, 2000 is the main legal mechanism the government uses to restrict access to digital content and online platforms in India. It empowers the Central Government, or an officer it specially authorises, to direct any government agency or intermediary to block public access to online information. Requests for blocking are examined under the Information Technology (Blocking Rules) through a structured review process. Before a proposed action is put into effect, it is checked for its necessity and legality. In urgent situations, however, the government may act before a full review is completed, provided the action is examined later. Blocking decisions must fall within specific grounds that concern the nation, its security, and public peace. These grounds include the sovereignty and integrity of India, the defence of India, and public order. The power is meant to deal with organised crime and harmful content online, but it must also respect constitutional freedoms and judicial scrutiny. Such a framework helps the state balance security concerns with the rights of individuals and platforms. Many disputes over blocking have reached the courts, which have examined both the powers and the safeguards. Officials who use the power and platforms that receive such directions are both expected to follow the prescribed procedure carefully.

Q1.

In which year was Section 69A introduced? (year)

Answer: _____

Q2.

In which year is the set of IT (Blocking Rules) that governs blocking requests dated? (year)

Answer: _____

Q3.

Name the review mechanism through which blocking requests are examined under the IT (Blocking Rules).

Answer: _____

Q4.

Which committee evaluates the necessity and legality of a proposed blocking action before it is implemented?

Answer: _____

Q5.

How many grounds for blocking under Section 69A are listed in the booklet? (in number)

Answer: _____

Q6.

Under which Article of the Constitution is digital free speech protected? (article number with sub-clause)

Answer: _____

Q7.

Which Supreme Court case upheld Section 69A as a narrowly drawn provision? (case name)

Answer: _____

Producer Indices: Typed Answer Practice

Most discussion of inflation focuses on the prices that households pay, yet the prices that producers receive and pay also shape the economy. Policymakers therefore need measures that show price movements from the producer's side of the chain. Economic activity today is also not limited to physical goods. The service sector is also part of economic activity, and a separate Service Producer Price Index tracks its prices. A measure that covers only goods can leave important producer-side changes out of view. To address such gaps, the Government has decided to introduce a new family of producer indices alongside the revised wholesale index. The indices are intended to capture price changes at different stages of production and across services as well. They are also expected to help analysts understand cost conditions and supply-side pressures faced by businesses. Because producers operate in many sectors, a broader set of indices allows a more detailed reading of how cost and revenue pressures move through the economy. Such information can help central planners, investors and industry bodies anticipate changes in inflation before they fully appear in consumer prices.

Q1.

For the first time, dedicated Producer Price Indices will be released with which base year? (give the year range)

Answer: _____

Q2.

How many distinct types of Producer Price Index are described in the booklet? (in number)

Answer: _____

Q3.

Which Producer Price Index measures changes in prices paid by producers for inputs used in production? (one word)

Answer: _____

Q4.

How many services are listed in the booklet as covered by the Service PPI? (in number)

Answer: _____

Q5.

In the WPI vs PPI comparison, which index has a scope covering both goods and services? (one word)

Answer: _____

Q6.

In the WPI vs PPI comparison, which index has the stated purpose of inflation monitoring? (one word)

Answer: _____

Membership and Structure Check

The Group of Seven is an informal forum that brings together some of the world's most advanced industrialised economies. Its purpose is to serve as a platform for consultations on major economic, political and strategic issues facing the world today. Because it is informal, it does not function like a treaty-based international organisation with binding rules. Instead, its members meet to share views, compare national positions and look for common ground. Several other actors take part in the group's deliberations, including international bodies that are closely involved in its discussions, although they do not share the same status as the core members. The forum is led in turn by its members, so that each country takes its turn at hosting and guiding the agenda for a set period before handing over responsibility to the next. This system of rotation ensures that leadership is shared and that different national priorities are represented over time. Successive leaders have shaped the forum's agenda since it was formed. Each feature of the forum, including its composition, its rotating leadership and its informal nature, helps explain how the grouping works in practice. Its ability to bring together major economies also gives its discussions weight across many policy areas.

Q1.

How many countries are listed as formal member countries of the G7? (in number)

Answer: _____

Q2.

What share of the world's population do G7 countries account for, approximately? (in per cent)

Answer: _____

Q3.

What share of global GDP do G7 countries account for, approximately? (in per cent)

Answer: _____

Q4.

Which regional bloc takes part in G7 deliberations without being counted as a formal member?

Answer: _____

Q5.

Which country will take over the G7 rotating presidency in 2027?

Answer: _____

Q6.

How often does leadership of the G7 rotate among member states? (one word)

Answer: _____

Q7.

Which member country holds the G7 presidency for 2026? (one word)

Answer: _____

Economy and technology: typed answers

Economic security has become a central part of the Quad's agenda. Members have recognised that depending on a small number of suppliers for essential raw materials can create supply vulnerabilities, so they are working to spread sources more widely. Cooperation now spans the full life cycle of key minerals, from mining and processing to recycling, with the aim of making supply less exposed to shocks.

Energy is another priority. The group has agreed to a joint regional approach that links energy technology, supply chain strength and the assessment of market risks. This work is meant to help countries across the Indo-Pacific manage market risks.

The Pacific islands are also part of the agenda. A planned outreach effort aims to link island nations of the Pacific Islands Forum through a more robust network and to modernise ports, with completion targeted for the near term.

On technology, the Quad is developing practical tools for digital systems. Officials are preparing a reference document that will help public and private platforms work with one another across borders. A separate initiative uses artificial intelligence, robotics and remote sensing to support farming and food security. Together these efforts seek to make growth in the region both secure and resilient.

Q1.

Which Quad initiative aims to enhance agricultural productivity and food security across the Indo-Pacific? (Give the initiative's name.)

Answer: _____

Q2.

What is the name of the technical tool being developed for Digital Identity Systems to improve cross-border interoperability?

Answer: _____

Q3.

Which Quad energy initiative launched a Joint Regional Energy Roadmap? (Give the initiative's name.)

Answer: _____

Q4.

What type of network is the Pacific Island Infrastructure Outreach planned to use to connect all Pacific Island Forum countries?

Answer: _____

Q5.

Along with the Supply Chain Resilience Initiative, which network is credited with helping India attract foreign investment?

Answer: _____

Q6.

Which Quad framework coordinates investments and policies on mining, processing and recycling of critical minerals? (Give the framework's name.)

Answer: _____

Policies and Schemes Check

India's biofuel effort rests on several policy instruments. The National Policy on Biofuels aims to reduce import dependence by promoting blends of bioethanol, biodiesel and bio-CNG. One scheme

provides financial assistance for second-generation ethanol made from surplus biomass and agricultural waste. Another scheme focuses on managing cattle dung and solid waste on farms and turning them into useful products. A separate policy aims to create bio-foundries that would produce biotechnology-developed feedstock and catalysts, and planned enzyme production would support existing and proposed ethanol plants in several states. India also joined partners to launch an alliance focused on sustainable biofuels and cooperation between countries. Another initiative aims to build an ecosystem that collects used cooking oil and converts it into biodiesel. The Cabinet has approved a hydrogen mission with targets for green hydrogen capacity, renewable energy capacity addition and jobs. Taken together, these measures show how biofuel policy spans agriculture, energy, waste management and international cooperation. Policy design in this area also looks at farm residue, since stubble and dung can be turned into fuel and compost.

Q1.

In which year did the Cabinet approve the Hydrogen Mission?

Answer: _____

Q2.

What was the outlay of the Hydrogen Mission, in crore rupees?

Answer: _____

Q3.

In which Haryana town is the first BioE3 enzyme plant expected to come up?

Answer: _____

Q4.

In which year was the PM JI-VAN Yojana launched?

Answer: _____

Q5.

Under which mission was the GOBAR-DHAN Scheme launched?

Answer: _____

Q6.

Which authority launched the Repurpose Used Cooking Oil initiative?

Answer: _____

Q7.

The Global Biofuels Alliance was launched on the sidelines of which summit?

Answer: _____

Plastics, Cleanliness and Mission LiFE

Plastic pollution is a pressing environmental problem, and governments are negotiating a legally binding agreement to end it worldwide. A dedicated negotiating committee has been meeting for this purpose, holding its sessions in different countries as the talks progress. India has added its own domestic efforts. A cleanliness campaign that began as a national drive has grown into a mass movement with the aim of building a clean and green India. Business and conservation groups have also joined hands in a plastics pact that seeks to transform the packaging value chain across all formats and products. A project called REPLAN works on the same problem from another direction, collecting waste plastic and processing it so that it can be turned into something useful. Mission LiFE, described as an India-led global mass movement, encourages individuals and communities to take small, sustainable actions that protect the environment. The mission also sets targets for villages and urban local bodies to become environment-friendly, showing that ambition is set at the local level as well as the national level. Together, these initiatives show that solving plastic pollution requires government negotiations, industry commitment, local innovation and changes in

everyday habits.

Q1.

Which city in Uruguay hosted the first session (INC-1) of the plastic pollution negotiating committee in 2022?

Answer: _____

Q2.

In which year was Mission LiFE first introduced by PM Modi at COP26?

Answer: _____

Q3.

How many billion Indians and other global citizens is Mission LiFE aiming to mobilise for 2022-2027? (in billion)

Answer: _____

Q4.

Which country was the first in the world to ban thin plastic bags?

Answer: _____

Q5.

Which body launched Project REPLAN? (give the abbreviation)

Answer: _____

Q6.

In which country was the third session (INC-3) on plastic pollution held in 2023?

Answer: _____

Industry, Ports and Infrastructure

India's industrial and infrastructure indicators drew attention this month. The Index of Industrial Production (IIP) recorded a growth of 4.9 per cent in April 2026, lower than the 5.8 per cent growth registered in April 2025. Manufacturing, which carries a large share of the index, expanded by 6.2 per cent, while mining and quarrying contracted. Alongside this, the government released a revised IIP series with 2022-23 as the new base year, replacing the earlier 2011-12 base.

On the logistics front, India released its Logistics Port Performance Index for FY 2024-25 along with four new digital governance initiatives. The index evaluates ports across dry bulk, liquid bulk and container cargo. Its key performance indicators include vessel turnaround time, berth idle time and container dwell time. The framework was developed by the Ministry of Ports, Shipping and Waterways.

Road connectivity also advanced, as the Zojila Tunnel crossed a 13 km excavation milestone. The tunnel is part of an all-weather road link between Kashmir and Ladakh. The revised IIP series retains mining and quarrying, manufacturing and electricity as traditional sectors, while adding new activities such as gas supply, water supply and waste management. Electricity generation is now classified separately into renewable and non-renewable sources, which sharpens the picture of industrial output.

Q1.

What is the total length of the Zojila Tunnel (in km)?

Answer: _____

Q2.

In which year is the Zojila Tunnel expected to become operational?

Answer: _____

Q3.

How many item groups are covered in the revised IIP series?

Answer: _____

Q4.

How many products are covered in the revised IIP series?

Answer: _____

Q5.

Which port topped the liquid bulk category of the Logistics Port Performance Index FY 2024-25?

Answer: _____

Q6.

India's rank in the international shipments category of the World Bank Logistics Performance Index improved from which rank?

Answer: _____

Q7.

How many Indian ports featured among the world's top 100 in the Container Port Performance Index 2024?

Answer: _____
