

CLAT Express - July 2026: Practice Quizzes

MCQ: +1 for a correct answer, -0.25 for a wrong answer. TITA (type-in-the-answer): +1, no negative marking.

Multiple-choice passages

The 123 deal: MCQ check

Saudi Arabia and the United States have signed a civil nuclear cooperation agreement commonly called the 123 Agreement. The name comes from a section of a US law, the Atomic Energy Act of 1954. Under such an agreement, the United States can transfer nuclear reactors, nuclear materials, components, equipment, technology and technical expertise to a partner country. Because this framework is a legal precondition for significant nuclear cooperation, the deal therefore has significance beyond ordinary trade. Reports also link it to a regional political question, namely whether Riyadh will move toward ties with Israel. Saudi Arabia is a long-standing party to the Nuclear Non-Proliferation Treaty and has pursued a national atomic energy programme. Nuclear power is part of the Kingdom's wider energy planning. The new arrangement includes a bilateral safeguards system meant to ensure that civilian materials are not diverted to weapons. It also opens a possibility that Saudi Arabia could enrich uranium in facilities developed with US support, subject to agreed verification. The agreement is subject to a review period by the US Congress. Earlier, Washington had set a stricter standard for such cooperation, and the new deal relaxes parts of it. India's 2008 agreement with the United States is often cited as an earlier precedent in this field.

Q1.

For how many years has the US-Saudi 123 Agreement been signed?

- (A) 10 years
- (B) 20 years
- (C) 50 years
- (D) 30 years

Q2.

Who signed the US-Saudi 123 Agreement on behalf of the United States?

- (A) US Secretary of Defense
- (B) Secretary of State Antony Blinken
- (C) US National Security Advisor
- (D) US Energy Secretary Chris Wright

Q3.

Assertion (A): The US-Saudi agreement does not require Saudi Arabia to adopt the IAEA Additional Protocol.

Reason (R): The IAEA Additional Protocol gives the IAEA expanded inspection and verification powers.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Match List I with List II:

List I	List II
I. Energy diversification	A. Steady power supply for air-conditioning and cooling systems
II. Large-scale desalination	B. Access to advanced technology and regional energy power status
III. Meeting cooling demand	C. Provides the massive energy input for water desalination
IV. Strategic technology development	D. Reduces dependence on crude oil and natural gas for electricity

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-D, III-B, IV-A
- (B) I-A, II-B, III-C, IV-D
- (C) I-A, II-D, III-C, IV-B
- (D) I-D, II-C, III-A, IV-B

Q5.

Consider the following statements about the US-Saudi nuclear agreement:

- I. Saudi Arabia signed the Nuclear Non-Proliferation Treaty in 1988.
- II. The New Deal insists on the Gold Standard, including a ban on domestic uranium enrichment.
- III. The agreement is subject to a review period of 90 legislative days by the US Congress.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q6.

Consider the following statements about the US-Saudi agreement:

- I. It creates a framework for US companies to potentially provide Saudi Arabia with civilian nuclear reactors.
- II. It mandates that Saudi Arabia adopt the IAEA Additional Protocol.
- III. Saudi Arabia launched its National Atomic Energy Project in 2010.
- IV. Any uranium enrichment by Saudi Arabia would remain subject to agreed verification and safeguards.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) All of the above

Q7.

Under the new US-Saudi deal, which condition that the US had earlier insisted upon has been dropped?

- (A) Adopting the IAEA Additional Protocol
- (B) Joining the Non-Proliferation Treaty
- (C) Hosting permanent US military bases
- (D) Normalising relations with Israel

Q8.

Which Middle Eastern nation is described in the booklet as the only nation in the region with nuclear weapons?

- (A) Israel
- (B) Iran
- (C) Saudi Arabia
- (D) Egypt

PM's Indonesia Visit: MCQ Set

India's Prime Minister recently concluded a State Visit to Indonesia, an engagement that reinforced the India-Indonesia Comprehensive Strategic Partnership. During the visit, the Prime Minister was conferred Indonesia's highest civilian honour, a recognition that marks a notable moment in bilateral ties.

The two countries share a history of cooperation on the world stage. Both played leading roles in the Bandung Conference of 1955, and both later became founding members of a group of states that are not formally aligned with any major power bloc. Their cooperation today spans several sectors. In defence, Indonesia agreed to procure an Indian supersonic cruise missile system. In maritime matters, the two countries agreed to develop a port near one of the world's busiest sea routes. Steel cooperation is also in place, with an Indian company agreeing to set up a manufacturing facility in Indonesia.

Cooperation extends to public health and disaster management as well. Regulators of the two countries agreed to strengthen cooperation on medical products, and the two countries' national agencies signed a memorandum on preparedness and response. In agriculture, India announced a supply of high-quality wheat seeds to Indonesia. Taken together, these steps show how a bilateral partnership can combine defence, industry, health and food security.

Q1.

What is the name of Indonesia's highest civilian honour conferred on India's Prime Minister during the State Visit?

- (A) Bintang Republik Indonesia Adipurna (Star of Republic of Indonesia)
- (B) Star of ASEAN Excellence
- (C) Padma Vibhushan of Indonesia
- (D) Order of the Golden Kris

Q2.

The Prime Minister became which numbered recipient of Indonesia's highest civilian honour?

- (A) 30th
- (B) 40th
- (C) 25th
- (D) 35th

Q3.

How many of the following statements are correct?

Statement I: Both countries declared 2026-27 the Tagore-Dewantara Year of Cultural and Educational Diplomacy.

Statement II: The Prime Minister became the first Indian Prime Minister to receive Indonesia's highest civilian honour.

Statement III: India will provide technical support for conservation of the Prambanan Temple Complex.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q4.

Which Indonesian counterpart signed a disaster preparedness MoU with India's National Disaster Management Authority?

- (A) Disaster Management Agency
- (B) Indonesian Ministry of Defence
- (C) National Search and Rescue Agency
- (D) Indonesian National Police

Q5.

Which of the above statements is/are correct?

I. Indonesia is India's second largest trading partner within ASEAN.

II. The Prambanan Temple Complex is the largest Hindu temple complex in Southeast Asia.

III. Indonesia will post a Liaison Officer at the Information Fusion Centre - Indian Ocean Region.

- (A) II and III only
- (B) I and II only
- (C) I and III only
- (D) I, II and III

Q6.

Match List I with List II:

List I	List II
I. BrahMos procurement contract	A. Near the entrance to the Strait of Malacca
II. Wheat seed supply (DWR-162)	B. Around USD 200 million
III. Stainless steel slab facility	C. 100 tonnes of wheat seeds
IV. Sabang Port	D. Steel Authority of India Limited

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-C, III-B, IV-A
- (B) I-B, II-C, III-D, IV-A
- (C) I-D, II-B, III-A, IV-C
- (D) I-A, II-D, III-B, IV-C

Q7.

Indonesian President Prabowo Subianto was invited as Chief Guest for India's Republic Day in which year?

- (A) 2023
- (B) 2024
- (C) 2026
- (D) 2025

Removal Conditions Check

The 130th Constitution Amendment Bill, 2025, is one of three Bills tabled by the Home Minister, and a Joint Parliamentary Committee is currently examining it. The Bill responds to a situation in which a political office-holder continues in office while facing serious criminal charges. It proposes that a minister who is held in custody on such charges can be removed from office. The proposal reaches several categories of leaders. These include Union Ministers, State Ministers and Chief Ministers, and also the Chief Minister and Ministers of Delhi, Ministers of Union Territories and Ministers of Jammu & Kashmir. Each category is governed by its own legal basis, so the same principle is applied through different constitutional and statutory provisions. The Bill specifies who holds the removal power in each case, and, for Union Ministers, it also sets out what follows if the Prime Minister gives no advice. Some details of the removal process are linked to the length of custody and to the seriousness of the offence. The Bill has drawn criticism from those who fear that it could be misused against opposition-led governments. Supporters argue that it keeps leaders from retaining power while facing serious charges, which is a question of constitutional morality. Together, these rules make the Bill a detailed scheme for ministers facing criminal proceedings.

Q1.

Under the 130th Amendment Bill, a Union Minister who is arrested and detained for how many consecutive days may be removed?

- (A) 15 days
- (B) 21 days
- (C) 30 days
- (D) 45 days

Q2.

If the Prime Minister gives no advice on removing a Union Minister detained for 30 consecutive days, what happens?

- (A) The Minister automatically ceases to hold office on the 31st day
- (B) The matter is referred to the Supreme Court
- (C) The President takes independent action
- (D) Parliament votes on the removal

Q3.

Under which legislation are the Bill's provisions extended to Jammu & Kashmir ministers?

- (A) J&K Special Status Act, 2020
- (B) Government of J&K Act, 2018
- (C) J&K Reorganisation Act, 2021
- (D) J&K Reorganisation Act, 2019

Q4.

Assertion (A): A Union Minister removed under the Bill can be reappointed after release from custody.

Reason (R): If the Prime Minister gives no advice, the Minister automatically ceases to hold office on the 31st day.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Article 75	A. Union Territory Ministers
II. Article 164	B. Delhi Chief Minister and Ministers
III. Article 239AA	C. Union Ministers
IV. Government of Union Territories Act, 1963	D. State Ministers and Chief Ministers

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-A, II-B, III-C, IV-D
- (B) I-B, II-C, III-A, IV-D
- (C) I-C, II-D, III-B, IV-A
- (D) I-C, II-A, III-B, IV-D

Q6.

Which of the following statements about the Bill's removal rules are correct?

- I. The Bill covers Union Ministers, State Ministers, Chief Ministers, Delhi Ministers, Union Territory Ministers and Jammu & Kashmir Ministers.
- II. The President is the removal authority for Chief Ministers.
- III. Jammu & Kashmir Ministers are covered under the J&K Reorganisation Act, 2019.

Which of the above statements is/are correct?

- (A) I and III only
- (B) I and II only
- (C) II and III only
- (D) I, II and III

Q7.

How many of the following statements about the Bill are correct?

- I. The President removes a Union Minister on the advice of the Prime Minister.
- II. The Governor is the removal authority for Chief Ministers.
- III. The Election Commission of India is the removal authority for State Ministers.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None of the above

Q8.

For Delhi Ministers, who is the removal authority under the provisions of the 130th Amendment Bill?

- (A) President of India
- (B) Chief Minister of Delhi
- (C) Union Home Minister
- (D) Lieutenant Governor

Ladakh and the AHDC expansion

Ladakh became a Union Territory without a Legislative Assembly in 2019, so decentralised local institutions have become central to governance. The Ladakh Administration has now approved the setting up of Autonomous Hill Development Councils across the region. Councils in each district will be set up through an official notification issued by the Government. This decision followed an in-principle agreement with the Ministry of Home Affairs, which aims to extend constitutional safeguards under Article 371 to the Union Territory. Until now, elected councils had existed in only a few parts of Ladakh, and the expansion will extend them to all districts. The people of Ladakh have raised several demands, including inclusion under the Sixth Schedule for constitutional

protection, restrictions on land ownership to prevent an outside influx, and a Legislative Assembly for representative governance. Article 371 and the articles up to 371J give special constitutional safeguards to certain States and regions, with the aim of protecting indigenous culture, customary laws and local employment. Separately, the Centre has changed the rules for jobs and educational admissions in Ladakh through a new reservation regulation, which came into force shortly after it was approved. The regulation also modifies the reservation law of Jammu and Kashmir as applied to the region. The councils function under a separate Act and their powers are mainly administrative and developmental.

Q1.

How many districts of Ladakh will now have Autonomous Hill Development Councils (AHDCs)?

- (A) 3
- (B) 5
- (C) 7
- (D) 9

Q2.

Ladakh has been administered by the Government of India as a Union Territory since which date?

- (A) 31 October 2019
- (B) 5 August 2019
- (C) 26 October 2019
- (D) 26 January 2020

Q3.

Before the expansion, elected Autonomous Hill Development Councils existed only in which two districts of Ladakh?

- (A) Leh and Kargil
- (B) Nubra and Zaskar
- (C) Sham and Drass
- (D) Leh and Changthang

Q4.

Assertion (A): Each AHDC can set up its own courts to decide disputes.

Reason (R): AHDCs have no judicial authority.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Ladakh's traditional name, meaning Land of High Passes	A. 85 per cent
II. Total reservation cap set by the 2025 regulation	B. Section 3(1)
III. Provision empowering the Government to establish a Council in every district	C. Part XXI
IV. Articles 371 to 371J of the Constitution fall under this Part	D. Maryul

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-B, III-A, IV-C
- (B) I-D, II-A, III-B, IV-C
- (C) I-A, II-B, III-C, IV-D
- (D) I-A, II-C, III-B, IV-D

Q6.

Consider the following statements about Autonomous Hill Development Councils:

- I. Each AHDC can levy taxes, fees and other lawful charges.
- II. AHDCs can establish Village Courts under customary tribal laws.
- III. AHDCs can exercise authority over land allotment.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and II only
- (C) I and III only
- (D) I, II and III

Q7.

Consider the following statements:

- I. Ladakh shares a border with Gilgit-Baltistan (Pakistan).
- II. Before the expansion, elected councils existed in Changthang and Nubra.
- III. Kargil is the winter capital of Ladakh.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None of the above

Q8.

Under which Articles of the Constitution do 6th Schedule Autonomous District Councils derive their constitutional status?

- (A) Articles 244(2) and 275(1)
- (B) Articles 243 and 244
- (C) Articles 245 and 246
- (D) Articles 371 and 371A

Delhi EV Policy 2.0 Overview Quiz

The Government of the National Capital Territory of Delhi has notified the Delhi Electric Vehicle Policy 2.0, which is scheduled to come into force from 1 July 2026. The policy will remain effective until 31 March 2030. It builds upon the achievements of the Delhi EV Policy 2020 and provides a comprehensive roadmap for transforming Delhi into a leading electric mobility hub. A central aim is to reduce vehicular emissions by encouraging the electrification of high-usage and high-emission transport segments. The policy sets an electrification target of at least 30 per cent of Delhi's total vehicle fleet by 31 March 2030. Several segments have been identified as priorities, including two-wheelers, three-wheelers, commercial goods carriers, school buses, app-based aggregator fleets and government-owned transport fleets. The policy also seeks to promote the widespread adoption of zero-emission vehicles, reduce urban air pollution and greenhouse gas emissions, and encourage sustainable public and commercial transport. It is linked to India's clean energy and climate commitments. The idea of electric mobility is not new in India. The National Electric Mobility Mission Plan, launched in 2013, set out an earlier national plan to expand the number of electric vehicles on the roads. Delhi's policy therefore sits within a longer national effort to shift transport away from petrol and diesel vehicles.

Q1.

Which department is responsible for financial support and investment under Delhi EV Policy 2.0?

- (A) Delhi Transco Limited
- (B) Delhi Pollution Control Committee
- (C) Delhi Transport Department
- (D) Ministry of Road Transport and Highways

Q2.

Assertion (A): The policy sets an electrification target of at least 30 per cent of Delhi's total vehicle fleet by 31 March 2030.

Reason (R): Government financial support under the policy is restricted to battery electric vehicles only.

- (A) Both A and R are true and R explains A
- (B) Both A and R are true but R does not explain A
- (C) A is true but R is false
- (D) A is false but R is true

Q3.

Match List I with List II:

List I	List II
I. Registration restricted to electric 3-wheelers and N1 trucks	A. 30% by 2030
II. Electric-only registration of new 2-wheelers	B. 10% of school bus fleet within 2 years
III. School bus conversion target within 2 years	C. 1 April 2028
IV. Long-term school bus electrification target	D. 1 January 2027

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-B, III-A, IV-D
- (B) I-C, II-A, III-B, IV-D
- (C) I-A, II-D, III-C, IV-B
- (D) I-D, II-C, III-B, IV-A

Q4.

Consider the following statements about Delhi EV Policy 2.0:

- I. Delhi Transco Limited is responsible for infrastructure development under the policy.
- II. Government financial support under the policy extends to hybrid vehicles.
- III. The total planned investment under the policy is approximately 15,000 crore.

Which of the above statements is/are correct?

- (A) I and III only
- (B) I and II only
- (C) II and III only
- (D) I, II and III

Q5.

Within how many years of the policy's implementation must schools convert at least 10 per cent of their bus fleet into electric buses?

- (A) 1 year
- (B) 3 years
- (C) 4 years
- (D) 2 years

Q6.

Consider the following statements about Delhi EV Policy 2.0:

1. The policy plans installation of over 30,000 public charging stations across Delhi.
2. Government financial support is available to hybrid vehicles under the policy.
3. Existing petrol and diesel vehicles registered in Delhi may operate until the end of their prescribed service life.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) All three
- (D) None

Q7.

Which of the following is listed as a key objective of PM E-DRIVE?

- (A) Reduce upfront EV cost
- (B) Ban all private cars from Delhi roads
- (C) Increase petrol and diesel vehicle registrations
- (D) Promote hydrogen fuel cell buses

Q8.

Which ministry is the nodal ministry for PM E-DRIVE (2024-2026)?

- (A) Ministry of Road Transport and Highways
- (B) Ministry of New and Renewable Energy
- (C) Ministry of Heavy Industries
- (D) Ministry of Power

ISA quick check

The International Solar Alliance is an international body set up to promote solar energy across the world. It is aimed at solar-rich countries that lie between the Tropic of Cancer and the Tropic of Capricorn, and it is described as a treaty-based intergovernmental organisation. The alliance states its aim as ensuring clean, reliable and affordable access to solar energy, which it links to sustainable growth and an improved quality of life. Its vision is a short phrase that asks members to work together to make the sun brighter. Membership rules have also widened over time. Countries from outside the tropics are allowed to join, although they are excluded from voting rights. Recognition from the wider United Nations system has also followed over the years. This makes the alliance a platform for solar-rich nations to coordinate their efforts. The alliance's mission goes beyond membership. It aims to provide clean energy access to a very large population and to mitigate solar-related emissions across the globe. It also seeks to promote low-cost, sustainable and equitable solar systems in the least developed countries and small island developing states. Together, these features give the alliance a clear geographic base, an inclusive membership and a practical focus on people who need energy access.

Q1.

Where is the headquarters of the International Solar Alliance located?

- (A) New Delhi
- (B) Mumbai
- (C) Gurugram
- (D) Ahmedabad

Q2.

Which body granted observer status to the ISA in 2021?

- (A) UN Security Council
- (B) World Bank
- (C) UN General Assembly
- (D) IRENA

Q3.

Assertion (A): The ISA's membership is open only to solar-rich countries lying between the tropics.
Reason (R): After the 2020 Amendment, all UN Member States are eligible to join.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Match List I with List II:

List I	List II
I. Launch year of the ISA	A. USD 1 trillion
II. Solar investment mission by 2030	B. 2021
III. UN General Assembly observer status	C. 1,000 GW
IV. Solar capacity to be installed	D. 2015

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-A, III-C, IV-D
- (B) I-D, II-A, III-B, IV-C
- (C) I-D, II-B, III-C, IV-A
- (D) I-D, II-C, III-A, IV-B

Q5.

Which of the above statements is/are correct?

- I. The ISA was launched in 2015 by India and France during COP21.
 - II. Non-tropical countries are barred from becoming ISA members.
 - III. After the 2020 Amendment, all UN Member States are eligible to join.
- (A) I and III only
 - (B) I and II only
 - (C) II and III only
 - (D) I, II and III

Q6.

How many of the following statements about the ISA are correct?

- I. The ISA aims to mobilise USD 1 trillion in solar investments by 2030.
 - II. The ISA has 112 members and 15 signatory countries.
 - III. The ISA's headquarters is in Ahmedabad.
- (A) Only one
 - (B) Only two
 - (C) Only three
 - (D) None of the above

Q7.

Launched jointly by India and which country in 2015 during COP21?

- (A) Germany
- (B) United Kingdom
- (C) France
- (D) United States

Q8.

In which year did India first propose the OSOWOG concept during the ISA's Inaugural Assembly?

- (A) 2015
- (B) 2016
- (C) 2017
- (D) 2018

AAY Amendment Recall

The Union Government has proposed an amendment to the National Food Security Act, 2013, that would change how foodgrains are allocated to households under the Antyodaya Anna Yojana. At present, each AAY household receives a fixed quantity of foodgrain each month, no matter how many members it has. The government argues that this household-based system creates inequities within the AAY category, because small households end up receiving more foodgrain per person than larger households. Under the proposal, the entitlement would be worked out for each individual in the household, with an overall ceiling for each household. The government expects this to make distribution more proportional to household size and to align allocation more closely with nutritional requirements. The change would also reduce disparities between AAY households and Priority Households. The amendment, however, does not deal with inclusion errors. The National Food Security Act was enacted to ensure food and nutritional security through subsidised foodgrains delivered by a targeted system. The households concerned belong to the poorest group within the Act. The proposal is still under consideration and is discussed here as a change in the making, so its final shape may differ from what is described above.

Q1.

Which Section of the National Food Security Act 2013 does the proposed amendment seek to modify?

- (A) Section 2(1)
- (B) Section 5(1)
- (C) Section 3(1)
- (D) Section 7(2)

Q2.

Under the proposed amendment, how much foodgrain does each individual in an AAY household receive per month?

- (A) 7 kg
- (B) 5 kg
- (C) 10 kg
- (D) 35 kg

Q3.

What is the maximum foodgrain entitlement cap per AAY household per month under the proposed amendment?

- (A) 25 kg
- (B) 30 kg
- (C) 50 kg
- (D) 35 kg

Q4.

Match List I with List II:

List I	List II
I. Individual entitlement under the proposal (AAY)	A. 5 kg per person per month
II. Household ceiling under the proposal	B. 2020
III. PHH entitlement under NFSA 2013	C. 7 kg per individual per month
IV. Year PMGKAY was launched	D. 35 kg per household per month

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-A, III-D, IV-B
- (B) I-B, II-A, III-C, IV-D
- (C) I-C, II-D, III-A, IV-B
- (D) I-D, II-B, III-A, IV-C

Q5.

How many of the following statements about the proposed NFSA amendment are correct?

- I. It seeks to modify Section 3(1) of the NFSA 2013.
 - II. The proposed AAY ceiling is 50 kg per household per month.
 - III. Per capita inequality is cited as a reason for the change.
 - IV. Priority Household beneficiaries currently receive 5 kg per person per month.
- (A) Only one
 - (B) All four
 - (C) Only two
 - (D) Only three

Q6.

Under the current NFSA 2013 arrangement, how much foodgrain does every AAY household receive per month, irrespective of family size?

- (A) 35 kg
- (B) 7 kg
- (C) 5 kg
- (D) 50 kg

Tariffs, market access and trade deal terms

The India-UK Comprehensive Economic and Trade Agreement, known as CETA, is described as a next-generation free trade agreement. It goes beyond conventional tariff reduction and addresses market access, regulatory transparency and economic partnership. The scope of the deal is wide, covering trade in goods and services along with digital trade and investment. The framework also reaches government procurement, labour, environment, innovation, small and medium enterprises and regulatory cooperation. In this sense the agreement is broader than a simple list of duty cuts, since these areas show it addresses far more than goods moving across borders.

Tariff policy in the deal aims to balance two goals. Domestic industry is protected, while foreign goods gain access to the market in phases rather than all at once. Passenger vehicles show this balance clearly, since imports of these vehicles are handled through a quota arrangement.

The deal is also tied to predictability in trade. Countries are looking for stable and predictable trade relations amid geopolitical tensions and tariff disputes. A bilateral agreement offers a framework that reduces this uncertainty and supports long-term growth for both partners.

Taken together, these features show that the agreement combines tariff reduction with wider economic cooperation between the two countries.

Q1.

Under the India-UK FTA, India plans to cut duties on what percentage of its tariff lines?

- (A) 75%
- (B) 85%
- (C) 90%
- (D) 95%

Q2.

What percentage of Indian exports will receive zero-duty access to the UK market under the FTA?

- (A) 99%
- (B) 90%
- (C) 95%
- (D) 100%

Q3.

Match List I with List II:

List I	List II
I. Auto import tariff under the quota system	A. 100 additional annual visas
II. Whisky and gin tariff in the 10th year	B. 10%
III. Annual visas for Indian professionals	C. USD 56.8 billion
IV. Bilateral trade value	D. 40%

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-B, III-D, IV-A
- (B) I-B, II-D, III-A, IV-C
- (C) I-D, II-C, III-B, IV-A
- (D) I-C, II-D, III-B, IV-A

Q4.

Consider the following statements about the India-UK FTA:

- I. India will cut duties on 90% of tariff lines under the FTA.
- II. Auto import tariffs will be cut to 25% under the quota system.
- III. India rejected data exclusivity in its 2024 FTA with EFTA.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q5.

Consider the following statements about the India-UK FTA:

- I. Zero-duty access is granted for 99% of Indian exports to the UK.
- II. Bilateral trade is currently USD 44.2 billion.
- III. Whisky and gin tariffs fall from 150% to 75% at the start.

How many of the above statements are correct?

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None of the above

Q6.

India-UK bilateral trade is expected to double by which year?

- (A) 2027
- (B) 2028
- (C) 2035
- (D) 2030

Q7.

The UK ranks as which largest export destination for India?

- (A) 4th
- (B) 2nd
- (C) 3rd
- (D) 1st

Polymer Notes: Concept and History

Currency notes in India are usually printed on cotton-based banknote paper, but the Reserve Bank of India is now looking at a different material. The RBI has revived a proposal to introduce durable polymer-based banknotes, which are made from a specialised plastic material instead of paper. The Bharatiya Reserve Bank Note Mudran Private Limited, a printing subsidiary wholly owned by the RBI, has invited global bids for a polymer substrate suitable for making such notes. Australia has already gone further, having introduced a complete series of polymer banknotes. Supporters of the idea point to the durability of plastic notes, which can withstand frequent use in circulation. The challenges, however, include cost, the need for new machines and the handling of plastic waste. The proposal therefore combines an old policy idea with a fresh push from the central bank. Polymer notes are therefore a topic of both economic and policy interest, since they involve printing, cost and environmental questions. The discussion covers the material, the printing arrangements and the financial trade-offs involved. Understanding how polymer notes are made, who prints them and what trade-offs they involve is useful for economic and current affairs preparation.

Q1.

In which year did Australia introduce a complete series of polymer banknotes?

- (A) 1980
- (B) 1984
- (C) 1988
- (D) 1992

Q2.

Consider the following statements about polymer banknotes:

- I. Polymer notes are made from BOPP, which replaces cotton-based banknote paper.
- II. Polymer notes cost less to produce than conventional paper currency.
- III. Polymer substrates allow advanced anti-counterfeiting features that are harder to replicate than on paper.

Which of the above statements is/are correct?

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

Q3.

Whose signature appears on the One Rupee Note in India?

- (A) Finance Secretary
- (B) Governor of RBI
- (C) President of India
- (D) Finance Minister

Q4.

Which of the following is NOT listed as a key characteristic of polymer banknotes?

- (A) More resistant to tearing
- (B) Less vulnerable to water and moisture
- (C) Biodegradable within five years
- (D) Capable of incorporating advanced anti-counterfeiting features

Q5.

Match List I with List II:

List I	List II
I. Reserve Bank of India Act	A. Design, minting and circulation of coins
II. Coinage Act, 2011	B. Domestic manufacture of banknote paper
III. Bank Note Paper Mill India Pvt. Ltd.	C. Acceptable quality of notes and coins for the public
IV. Clean Note Policy	D. Principal legal framework for issuing banknotes

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-D, III-C, IV-A
- (B) I-B, II-A, III-C, IV-D
- (C) I-D, II-A, III-C, IV-B
- (D) I-D, II-A, III-B, IV-C

Q6.

In which year was the Bharatiya Reserve Bank Note Mudran Private Limited established?

- (A) 1985
- (B) 1995
- (C) 1990
- (D) 2000

Summit Outcomes Test

In July 2026, India and Japan held their 16th Annual Summit in New Delhi. The meeting came during the first official visit to India by Japan's Prime Minister, Sanae Takaichi, and it gave both governments a chance to review several areas of partnership at once. On defence, the two sides advanced a project connected with radio antenna technology and reached an agreement in principle on its remaining technical aspects. Leaders also decided to hold another high-level security dialogue later in the year, one that brings together senior ministers from both countries. On the economic front, the summit focused on secure and resilient supply chains. The two governments adopted a joint declaration covering strategic sectors, and they launched a cooperative programme linked to biogas and organic fertiliser, which fits India's wider energy goals. Trade and investment were also central to the talks. The two countries agreed to speed up the review of an existing trade pact, and they signed a memorandum that supports a major investment package. Finally, Japan offered support for India's plans to host a major United Nations conference on disaster risk reduction. This support carries forward the spirit of the Sendai Framework for Disaster Risk Reduction. Taken together, these outcomes show how the partnership now covers several sectors at once.

Q1.

What investment target for Japan in India was mentioned in the summit outcomes?

- (A) ¥10 Trillion
- (B) ¥5 Trillion
- (C) ¥15 Trillion
- (D) ¥20 Trillion

Q2.

The India-Japan Cooperative Biogas for Growth Initiative supports India's objective of establishing how many Biogas and Organic Fertiliser Plants?

- (A) 500
- (B) 750
- (C) 2,000
- (D) 1,000

Q3.

In which year is India to host the 4th UN World Conference on Disaster Risk Reduction, for which Japan extended support?

- (A) 2025
- (B) 2027
- (C) 2030
- (D) 2035

Q4.

Assertion (A): The India-Japan 2+2 Ministerial Meeting will be held at the level of foreign ministers alone.

Reason (R): The India-Japan 2+2 Dialogue is conducted at the level of defence and foreign ministers.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Joint Declaration on Economic Security Cooperation	A. Defence and Security Cooperation
II. Cooperative Biogas for Growth Initiative	B. Artificial Intelligence and Emerging Technologies
III. Joint Statement on Artificial Intelligence Cooperation	C. Energy Security and Clean Energy Partnership
IV. UNICORN project	D. Economic Security and Resilient Supply Chains

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-A, III-D, IV-B
- (B) I-D, II-C, III-B, IV-A
- (C) I-A, II-D, III-B, IV-C
- (D) I-A, II-C, III-B, IV-D

Q6.

How many of the following statements about the summit outcomes are correct?

- I. The Cooperative Biogas for Growth Initiative targets 2,000 plants.
- II. India and Japan adopted a Joint Statement on Artificial Intelligence Cooperation.
- III. The target for Japanese investment in India is ¥5 Trillion.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q7.

Consider the following statements about the Joint Declaration on Economic Security Cooperation:

- I. Pharmaceuticals is one of its priority areas.
- II. Defence manufacturing is one of its priority areas.
- III. Clean energy technologies is one of its priority areas.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

SDG evolution check

Sustainable development began as a defined concept before it became a set of global targets. A commission first defined the idea, and global meetings then built on that definition over the following decades. Early efforts focused on a small group of development goals. Later conferences followed up on these efforts, and they pushed the world to think beyond the original list. The eventual result was a broader framework covering poverty, health, education, gender equality, climate and peace. This framework was built as one agenda, with goals that were meant to be integrated with one another. Each annual review uses a score on a common scale, so that countries can be compared and their results can be read by policymakers and the public. Reviews of this kind are published every year, and they show how far each nation has moved toward the goals. Some regions have improved faster than others, while some targets have moved backwards, which shows that progress has been uneven. Looking back, the path from a concept to a framework took several decades and many meetings. Such a wide agenda made it possible to track progress across many different areas, even though it also made measurement more demanding.

Q1.

In which year was the 2030 Agenda for Sustainable Development adopted?

- (A) 2000
- (B) 2012
- (C) 2015
- (D) 2002

Q2.

How many Specific Targets support the 17 Sustainable Development Goals?

- (A) 17
- (B) 169
- (C) 193
- (D) 18

Q3.

Which 2002 summit is also known as Rio+10?

- (A) Copenhagen Summit
- (B) Johannesburg World Summit
- (C) Paris Conference
- (D) Nairobi Conference

Q4.

Assertion (A): The 2030 Agenda was adopted at the 1992 Earth Summit in Rio de Janeiro.

Reason (R): The UN Conference on Environment and Development was held in Rio de Janeiro, Brazil.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Brundtland Commission	A. Known as Rio+10
II. Johannesburg World Summit	B. 17 SDGs and 169 targets
III. Rio+20 Conference	C. Defined the concept of sustainable development
IV. 2030 Agenda	D. Laid foundation for the SDGs

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-C, II-A, III-D, IV-B
- (B) I-D, II-C, III-A, IV-B
- (C) I-B, II-A, III-C, IV-D
- (D) I-A, II-B, III-C, IV-D

Q6.

Consider the statements:

- I. The Millennium Development Goals were adopted in 2000 with eight goals.
- II. The Johannesburg Summit was held in 1987.
- III. Rio+20 laid the foundation for the SDGs.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and II only
- (C) I and III only
- (D) I, II and III

Q7.

How many of the following statements are correct?

- I. The Brundtland Commission defined sustainable development in 1987.
- II. The Rio+20 Conference was held in 2002.
- III. The Millennium Development Goals were adopted in 2000.
- IV. The 2030 Agenda was adopted in 2012.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None

Q8.

How many UN Member States adopted the 2030 Agenda for Sustainable Development?

- (A) 167
- (B) 169
- (C) 191
- (D) 193

Vikram-1 Mission Check

Skyroot Aerospace, a company based in Hyderabad, has launched Vikram-1, India's first privately built orbital launch vehicle. The rocket flew its maiden mission, called Mission Aagaman, from the Satish Dhawan Space Centre at Sriharikota. The flight placed payloads into Low Earth Orbit and made India the third country to demonstrate private orbital launch capability. Vikram-1 carries a combination of scientific, technological, commercial and symbolic payloads. Vikram-1 was developed by Skyroot Aerospace, a company whose developers include Pawan Kumar Chandana and Naga Bharath Daka. Rockets of two broad kinds help explain the achievement. A sub-orbital rocket travels into space but does not place a satellite into orbit. An orbital rocket places a satellite into orbit around the Earth. The difference matters because it separates rockets that only reach space from rockets that carry satellites into orbit. The mission was authorised and facilitated by IN-SPACe, which works as a single-window regulator for private space activities. The rocket is named after Dr Vikram Sarabhai, who is regarded as the father of India's space programme. Mission Aagaman was the maiden flight of this four-stage orbital launch vehicle. Low Earth Orbit is the region close to the Earth's surface. Skyroot Aerospace is also recognised as India's first unicorn in the space sector.

Q1.

Which engine powers the upper stage of Vikram-1 for precise orbital insertion and manoeuvres?

- (A) Kalam solid engine
- (B) Agnilet engine
- (C) 3D-printed liquid-fuelled Raman Engine
- (D) Advanced solid propellant motor

Q2.

What structural material does Vikram-1 extensively use?

- (A) All-carbon composite structures
- (B) Titanium alloy structures
- (C) Aluminium-lithium alloy structures
- (D) Steel-reinforced composite structures

Q3.

Assertion (A): Vikram-1 is a sub-orbital rocket that never reaches orbit.

Reason (R): Sub-orbital rockets go to space but do not place a satellite into orbit.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q4.

Match List I with List II:

List I	List II
I. Vikram-S	A. India's first privately developed launch pad
II. Agnilet	B. India's first privately developed sub-orbital rocket
III. Dhanush	C. India's first lab-grown diamond jewellery sent into space
IV. Cosmic Bloom	D. World's first single-piece 3D-printed semi-cryogenic engine

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-B, III-C, IV-A
- (B) I-B, II-D, III-A, IV-C
- (C) I-B, II-A, III-D, IV-C
- (D) I-A, II-D, III-C, IV-B

Q5.

Consider the following statements:

- I. The first three stages of Vikram-1, called Kalam Engines, use advanced solid propellants.
- II. The upper stage uses a 3D-printed liquid-fuelled Raman Engine for orbital insertion and manoeuvres.
- III. Vikram-1 is named after A.P.J. Abdul Kalam.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q6.

How many of the following statements are correct?

- I. Falcon-9 is the world's first reusable two-stage rocket, designed and manufactured by SpaceX.
- II. The Indian Space Policy 2023 kept the complete space value chain closed to non-government entities.
- III. The IN-SPACe Seed Fund Scheme provides grants up to Rs 1 crore to startups and MSMEs.

- (A) Only two
- (B) Only one
- (C) Only three
- (D) None

Q7.

Low Earth Orbit, the region where Vikram-1 placed its payloads, lies between which altitudes above Earth's surface?

- (A) Between 100 km and 1,000 km
- (B) Between 200 km and 3,000 km
- (C) Between 500 km and 5,000 km
- (D) Between 160 km and 2,000 km

Q8.

The 18K gold rocket model carried as a payload on Vikram-1 contains micro-sculptures of which three persons?

- (A) Dr Homi J. Bhabha, Dr Vikram Sarabhai and Dr A.P.J. Abdul Kalam
- (B) Sir C.V. Raman, Dr Vikram Sarabhai and Dr A.P.J. Abdul Kalam
- (C) Sir C.V. Raman, Dr Homi J. Bhabha and Dr Satish Dhawan
- (D) Dr Vikram Sarabhai, Dr Homi J. Bhabha and Sir C.V. Raman

How the hydrogen train works

India has inaugurated its first indigenously built hydrogen-powered train, which will run on a route connecting Jind and Sonipat in Haryana. The train is configured as a trainset of several coaches, and its power comes from a fuel cell propulsion system. Inside the train, fuel cells generate electricity through a reaction between hydrogen and oxygen. This electricity is not always used at once, so the surplus is stored in batteries for later use. The hydrogen itself is carried in cylinders that keep the gas compressed until the propulsion system needs it. Electric traction motors then convert electrical energy into mechanical energy, and this mechanical energy drives the train forward. The train's approved operating speed is set below its design speed, so it is allowed to run more slowly than it is built to run. Hydrogen is the lightest chemical element and is the most abundant element in the normal matter of the universe. Indian Railways has also introduced other technologies in recent years, including the KAVACH safety system and the Namo Bharat Rapid Rail. In short, the fuel cells are the source of power, the batteries store surplus power, the cylinders store the fuel, and the motors drive the train.

Q1.

What is the approved operational speed of India's first indigenous Hydrogen-powered Train (in km/h)?

- (A) 75 km/h
- (B) 110 km/h
- (C) 90 km/h
- (D) 100 km/h

Q2.

What is the rating of the Hydrogen Fuel Cell Propulsion System that powers the train (in kW)?

- (A) 800 kW
- (B) 1,000 kW
- (C) 1,200 kW
- (D) 1,500 kW

Q3.

Which organisation developed India's first indigenous Hydrogen-powered Train?

- (A) Research Design and Standards Organisation
- (B) National Capital Regional Transport Corporation
- (C) Indian Railways Finance Corporation
- (D) Integral Coach Factory, Chennai

Q4.

Assertion (A): KAVACH can apply brakes automatically to stop a train from over-speeding.

Reason (R): KAVACH was developed by the Research Design and Standards Organisation.

Select the correct option.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Match List I with List II:

List I	List II
I. Length of the Jind-Sonipat route	A. 1,200 kW
II. Number of coaches in the trainset	B. 110 km/h
III. Power of the propulsion system	C. 10 coaches
IV. Design speed of the train	D. 89 km

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-B, III-C, IV-A
- (B) I-D, II-C, III-A, IV-B
- (C) I-B, II-A, III-D, IV-C
- (D) I-B, II-D, III-C, IV-A

Q6.

Consider the following statements about India's first indigenous Hydrogen-powered Train:

- I. It is configured as a 10-coach Hydrogen Fuel Cell Trainset.
- II. Its hydrogen is stored as liquid in cryogenic tanks.
- III. Hydrogen is the lightest chemical element, with atomic number 1.

Which of the above statements is/are correct?

- (A) I and II only
- (B) II and III only
- (C) I and III only
- (D) I, II and III

Q7.

How many of the following statements about the Hydrogen-powered Train are correct?

- I. The train was developed by Integral Coach Factory, Chennai.
- II. The approved operational speed of the train is 110 km/h.
- III. The train runs on the Jind-Sonipat route in Haryana.

- (A) Only two
- (B) Only one
- (C) Only three
- (D) None of the above

Q8.

Habibganj, near which city, will become India's first private railway station?

- (A) Bhopal
- (B) Indore
- (C) Jabalpur
- (D) Gwalior

2026 Edition Check

The FIFA World Cup is held every four years, and the 2026 edition was the 23rd men's tournament in the competition's history. It was staged from 11 June to 19 July across three nations: the United States, Canada and Mexico. This made it only the second World Cup to be jointly hosted by several countries, following the 2002 edition in South Korea and Japan. The tournament was therefore a major event for all three host countries. The first tournament was held in 1930 with thirteen teams, and the 2026 field expanded to 48 teams. These teams were divided into twelve groups of four. Spain went on to win the final against Argentina by a single goal, and the match was played in New Jersey. Argentina, the defending champion, lost the final. Over the decades, the competition has grown in size and reach, and each edition has brought its own storylines. The 2026 tournament drew wide attention for its scale and for the number of cities that staged matches. The knockout

rounds that followed the group stage decided the eventual champion, and the records, awards and trophy history of the event continue to be followed by fans around the world. Many fans discussed the tournament's size and its historic firsts in the months that followed.

Q1.

Match List I with List II:

List I	List II
I. Maple the Moose	A. Shakira and Burna Boy
II. Zayu the Jaguar	B. Canada
III. Clutch the Bald Eagle	C. Mexico
IV. Official 2026 song 'Dai Dai'	D. United States

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-D, II-A, III-B, IV-C
- (B) I-B, II-C, III-D, IV-A
- (C) I-D, II-C, III-B, IV-A
- (D) I-B, II-C, III-A, IV-D

Q2.

Assertion (A): Canada hosted a World Cup for the first time in 2026.

Reason (R): Canada had two host cities, Toronto and Vancouver.

Choose the correct option.

- (A) A is true but R is false
- (B) Both A and R are true and R explains A
- (C) Both A and R are true but R does not explain A
- (D) A is false but R is true

Q3.

Who was the oldest player at the 2026 FIFA World Cup?

- (A) Craig Gordon
- (B) Gilberto Mora
- (C) Vozinha
- (D) Unai Simón

Q4.

Consider the following statements:

I. Iran moved its base camp to Mexico for the 2026 tournament.

II. Pau Cubarsi won the Golden Glove.

III. Brazil is the only team to have played in every World Cup tournament.

How many of the above statements are correct?

- (A) Only two
- (B) Only one
- (C) Only three
- (D) None

Q5.

Consider the following statements about the 2026 FIFA World Cup:

- I. The tournament had 104 matches in total.
- II. Mexico had three host cities.
- III. Canada had three host cities.

Which of the above statements is/are correct?

- (A) II and III only
- (B) I and III only
- (C) I and II only
- (D) I, II and III

Q6.

Which country was the first African nation to host the FIFA World Cup?

- (A) Egypt
- (B) Nigeria
- (C) Cameroon
- (D) South Africa

Q7.

Which team is nicknamed the 'Blue Sharks'?

- (A) Jordan
- (B) Uzbekistan
- (C) Curaçao
- (D) Cape Verde

Q8.

Which city hosted the opening match of the 2026 FIFA World Cup?

- (A) Toronto
- (B) Monterrey
- (C) Mexico City
- (D) Vancouver

Polity, law and minorities: MCQ practice

India's proposed higher education law would create a single apex body called Viksit Bharat Shiksha Adhishtan. It is designed to take over functions now spread across several existing bodies that oversee colleges and universities. A commission would sit at the top and be headed by a chairperson appointed by the Central Government. Beneath it, three specialised councils would each handle a separate function. A Joint Parliamentary Committee has flagged concerns that the model concentrates too much power in one authority. Critics note that appeals would be handled by the government itself rather than by an independent body, and that the grounds for removing members are vague. The Delhi High Court has laid down a structured framework for the Right to be Forgotten, in a case titled Laksh Vir Singh Yadav vs Union of India in 2026. Under it, individuals may seek removal, masking or de-indexing of personal information when its continued availability becomes unnecessary, disproportionate or harmful. The framework seeks to protect privacy and dignity while ensuring that legitimate public interest is not compromised. Another statutory body, the National Commission for Minorities, safeguards the interests and rights of notified minority communities. The Central Government nominates its members, and the Constitution itself protects the cultural and educational rights of minorities through several articles.

Q1.

Which council of the proposed Viksit Bharat Shiksha Adhishthan prescribes minimum standards for establishing higher education institutions?

- (A) Regulatory Council
- (B) Standards Council
- (C) Accreditation Council
- (D) Commission

Q2.

How many members does each council of the proposed Viksit Bharat Shiksha Adhishthan have?

- (A) 10
- (B) 12
- (C) 14
- (D) 16

Q3.

To whom does the Special Officer for Linguistic Minorities, under Article 350B, report directly?

- (A) Prime Minister
- (B) President
- (C) Chief Justice of India
- (D) Speaker of the Lok Sabha

Q4.

Assertion (A): Medical and legal education would fall under the regulatory reach of the proposed apex regulator.

Reason (R): Professional disciplines such as Medicine and Law remain outside its jurisdiction.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q5.

Consider the following statements about the proposed higher education regulator and the Right to be Forgotten:

- I. The Standards Council frames learning outcomes for higher education programmes.
- II. Degrees may be awarded by any university set up by a private trust.
- III. The Right to Erasure under Article 17 of the GDPR was codified after the Google Spain judgment.

Which of the above statements is/are correct?

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

Q6.

How many of the following statements about the National Commission for Minorities are correct?

- I. It was constituted on 17 May 1993.
- II. Its members are nominated by the Central Government.
- III. Jains were notified as a minority community in 1993.
- IV. Its members serve a tenure of five years.

- (A) Only one
- (B) Only two
- (C) Only three
- (D) None of the above

Q7.

In which year did the Supreme Court recognise the Right to Privacy as a Fundamental Right under Article 21 in the Puttaswamy case?

- (A) 2009
- (B) 2014
- (C) 2016
- (D) 2017

Monsoon Mechanism Check

The monsoon is a seasonal reversal of winds that brings significant changes in rainfall, and the word itself comes from an Arabic term meaning season. For India it is a major source of rain, because it supports agriculture, fills rivers, reservoirs, lakes and groundwater, and drives the national economy. A good monsoon usually means high crop yields and rising rural incomes, while a weak one can bring water shortages and crop failure. The southwest monsoon advances gradually across the country after its arrival in the south. It has two branches, which travel over different seas and reach different parts of the country. Mountains shape where rain falls: when moist air meets a barrier, it rises, cools and condenses. Ocean conditions far away can also change how strong the rains are. Monsoon behaviour is therefore not fixed, and in recent years experts have observed growing variability in its patterns, which makes planning for floods and droughts more important.

Q1.

During which months does the Northeast Monsoon occur?

- (A) June to September
- (B) March to May
- (C) October to December
- (D) January to February

Q2.

Which mountain barrier blocks cold Central Asian winds and forces monsoon winds to shed moisture over India?

- (A) Himalayas
- (B) Western Ghats
- (C) Aravalli Range
- (D) Vindhya Range

Q3.

Which phenomenon, marked by warming of Pacific Ocean waters, can weaken the Indian monsoon?

- (A) Jet streams
- (B) Monsoon trough
- (C) Retreating monsoon
- (D) El Nino

Q4.

According to the booklet, India receives about what share of its annual rainfall during the monsoon?

- (A) 25 per cent
- (B) 75 per cent
- (C) 50 per cent
- (D) 90 per cent

Q5.

Assertion (A): The Arabian Sea branch of the southwest monsoon brings heavy rainfall to the west coast of India.

Reason (R): The Arabian Sea branch strikes the Western Ghats.

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is not the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

Q6.

Match List I with List II:

List I	List II
I. Monsoon Trough	A. Rain caused when moist winds rise over mountains
II. Retreating Monsoon	B. Low rainfall due to mountain barriers
III. Rain Shadow Region	C. Withdrawal of monsoon winds in October-November
IV. Orographic Rainfall	D. Low-pressure zone across northern India

Rows are two lists side by side, not matched pairs; work out the correct pairing.

- (A) I-B, II-A, III-D, IV-C
- (B) I-D, II-B, III-C, IV-A
- (C) I-D, II-C, III-B, IV-A
- (D) I-A, II-D, III-B, IV-C

Q7.

Consider the following statements about the Indian monsoon:

- I. The Himalayas block cold Central Asian winds and force monsoon winds to shed moisture over India.
- II. El Nino is a cooling of Pacific Ocean waters that strengthens the monsoon.
- III. Jet streams influence the onset, strength and withdrawal of the monsoon.

Which of the above statements is/are correct?

- (A) I and II only
- (B) I and III only
- (C) II and III only
- (D) I, II and III

Type-in-the-answer passages

Nuclear treaties and tests: TITA check

The nuclear age began during the Second World War, when a secret research effort led by the United States produced the first atomic bombs. The United Kingdom and Canada also took part in that effort. The first explosion took place in the New Mexico desert, and bombs were then dropped on two Japanese cities, after which Japan surrendered. Nuclear research in these years was kept highly secret. Other nuclear powers soon followed, and one later explosion set a record for size that still stands. Governments then responded with a set of agreements. One early treaty banned tests in the atmosphere, outer space and underwater, but not underground. Another treaty aimed to stop the spread of weapons, while a later UN treaty sought to ban all nuclear explosions, though it has not entered into force. In the late twentieth century, several countries outside the main treaties conducted tests. North Korea withdrew from one treaty and carried out its own tests. A treaty banning nuclear weapons completely became legally binding after a few years, though major nuclear powers have not joined it. A UN agency was also created to promote peaceful uses of atomic energy and to oversee safeguards. Today these agreements shape debates over which countries may acquire nuclear technology.

Q1.

In which year was the Partial Test Ban Treaty (PTBT) adopted?

Answer: _____

Q2.

In which year was the Nuclear Non-Proliferation Treaty (NPT) signed?

Answer: _____

Q3.

In which year did the UN adopt the Comprehensive Nuclear-Test-Ban Treaty (CTBT)?

Answer: _____

Q4.

In which year did the Treaty on the Prohibition of Nuclear Weapons (TPNW) enter into force?

Answer: _____

Q5.

Which country became the sixth nation to test a nuclear device, in 1974?

Answer: _____

Q6.

Which country detonated the Tsar Bomba, the largest nuclear explosion ever detonated?

Answer: _____

Q7.

Who was the scientific lead of the Manhattan Project?

Answer: _____

Strategic Partnership: Short Answer

India and Indonesia describe their relationship as a comprehensive strategic partnership, and their cooperation now reaches into defence, digital systems and maritime awareness. Indonesia occupies a pivotal position in India's wider engagement with the region. Its place in India's Act East Policy and Indo-Pacific strategy gives the partnership strategic weight, and Indonesia's location matters because one of the world's busiest maritime chokepoints lies close by.

On defence, the two countries take part in several joint military exercises, and a further security dialogue has been proposed to strengthen defence consultations. Indonesia's role also extends to maritime surveillance. It will place a liaison officer at a regional maritime information centre hosted by India to improve maritime domain awareness.

Digital cooperation is another area. Indonesia has launched a digital commerce network modelled on an Indian system. In space, a tracking facility in Indonesia is jointly run by an Indian space agency and an Indonesian research body to support satellite and launch vehicle missions.

Trade and economic ties are significant as well. Indonesia is among India's leading partners within ASEAN, and its large economy gives it weight in the grouping. Together, these areas show how a bilateral relationship can combine strategy, technology and commerce.

Q1.

What rank does Indonesia hold among India's trading partners within ASEAN? (answer as a number)

Answer: _____

Q2.

Which Indian agency jointly operates the Biak Telemetry, Tracking and Command Facility with Indonesia's BRIN? (abbreviation)

Answer: _____

Q3.

Indonesia Open Network was inspired by which Indian model? (abbreviation)

Answer: _____

Q4.

How many major military exercises between India and Indonesia are listed in the booklet? (in number)

Answer: _____

Q5.

Indonesia will post a Liaison Officer at which facility to improve Maritime Domain Awareness? (abbreviation)

Answer: _____

Q6.

Sabang Port, which India and Indonesia agreed to develop jointly, is situated near the entrance to which strait? (name the strait)

Answer: _____

Q7.

Indonesia's pivotal position in India's Act East Policy and Indo-Pacific Strategy is also linked to which Indian vision? (abbreviation)

Answer: _____

RPA and Court Rulings Check

Section 8 of the Representation of the People Act, 1951, sets out when a legislator is disqualified because of a criminal conviction. The provision does not treat all offences alike. For some offences, a conviction alone is enough for disqualification, while for others the sentence imposed decides the matter. The Act also protects sitting members who challenge a conviction. Such a member can continue in the House for a limited period if an appeal is filed quickly, until the appeal is decided or the term ends, whichever is earlier. The Supreme Court has examined this area several times. In one ruling, it held that no constitutional bar prevents the appointment of a minister with a criminal background. In another, it held that only Parliament can legislate new grounds of disqualification, and that courts cannot add them. A later case from 2025 involved a minister who was reappointed after getting bail and who was asked to choose between freedom and office. He stepped down while his bail continued. The Bill under discussion differs from these rules because it links removal to arrest and detention rather than to a conviction. This difference explains why the Bill is read alongside the existing disqualification scheme in the Act.

Q1.

Under Section 8(1) of the Representation of the People Act, 1951, a person convicted for promoting enmity between groups is disqualified on mere conviction for how many years? (in years)

Answer: _____

Q2.

Under Section 8(2), a conviction for hoarding or dowry offences leads to disqualification only if the sentence is at least how many months? (in months)

Answer: _____

Q3.

Under Section 8(3), disqualification for other offences requires a sentence of not less than how many years? (in years)

Answer: _____

Q4.

Under Section 8(4), a sitting MP or MLA who files an appeal within how many months can continue as a member? (in months)

Answer: _____

Q5.

In which year did the Supreme Court decide *Manoj Narula v. Union of India*, holding that no constitutional bar exists on appointing ministers with a criminal background?

Answer: _____

Q6.

In the 2025 V Senthil Balaji case, a minister had to choose between freedom and office after reappointment post-bail. Which state's minister was he? (name of the state)

Answer: _____

Powers and finances of AHDCs

The Autonomous Hill Development Councils are created through legislation and apply only in Ladakh. Their powers are mainly administrative and developmental. The Ladakh Autonomous Hill Development Council Act gives the government the power to create councils in every district. The Act is therefore the legal basis for the councils and their functions. Every district of Ladakh is to have one such council, and each council works within the powers described above. The councils can exercise authority over land allotment, and they also have authority over district cadre recruitment and promotions. They prepare district development plans for sectors such as health, education, tourism, infrastructure and social welfare. Each council also has financial powers, and it can levy taxes, fees and other lawful charges. The councils do not have judicial authority. This is an important difference from the Sixth Schedule Autonomous District Councils, which can establish village courts under customary tribal laws. The Sixth Schedule councils also have legislative, executive, financial and judicial powers. The Sixth Schedule councils apply to tribal areas in certain northeastern States, while the AHDCs apply only in Ladakh. Ladakh has been administered as a Union Territory since 2019, and it has no Legislative Assembly. Decentralised local institutions are therefore central to how the region is governed.

Q1.

Which fund does each AHDC maintain? (Give the name in two words.)

Answer: _____

Q2.

Which section of the Ladakh Autonomous Hill Development Council Act empowers the Government to establish a Council in every district? (Give the section number with sub-section.)

Answer: _____

Q3.

Besides Article 244(2), which other Article number gives 6th Schedule Autonomous District Councils their constitutional status? (Give the number with sub-clause.)

Answer: _____

Q4.

Which district of Ladakh is the largest? (Name the district.)

Answer: _____

Q5.

For what purpose may AHDCs levy taxes, fees and other lawful charges? (Two words.)

Answer: _____

Q6.

Articles 371 and 371A to 371J fall under which Part of the Indian Constitution? (Give the Roman numeral.)

Answer: _____

Q7.

Which town is the winter capital of Ladakh? (Name the town.)

Answer: _____

Registration Rules Recall

Delhi's electric vehicle policy changes which new vehicles can be registered in the city, and it does so in stages rather than all at once. The first categories affected are electric three-wheelers and light commercial trucks, while two-wheelers come later in the schedule. Schools are also covered by the transition. Their bus fleets must include a growing share of electric buses, and the policy sets a longer-term goal for the whole school bus fleet. School buses are one of several priority segments, which also include commercial goods carriers, app-based aggregator fleets and government-owned transport fleets. The policy's wider objective is to reduce urban air pollution and greenhouse gas emissions. It also aims to encourage sustainable public and commercial transport across the city. Together, the registration rules and school bus targets show how the policy moves Delhi towards electric mobility over the period up to 2030. The policy is notified by the Government of the National Capital Territory of Delhi and comes into force from 1 July 2026. Demand for petrol and diesel is expected to reduce, and new jobs are expected to be created in the automobile sector. Reduction in pollution-induced health problems is also listed as a benefit. The booklet lists these as expected benefits of the shift towards electric vehicles.

Q1.

From which year will only electric 3-wheelers and electric N1 category light commercial trucks be newly registered in Delhi?

Answer: _____

Q2.

From which year will new 2-wheeler registration in Delhi be restricted exclusively to electric models?

Answer: _____

Q3.

What minimum percentage (in per cent) of their bus fleet must schools convert to electric buses within 2 years of the policy's implementation?

Answer: _____

Q4.

What is the long-term target (in per cent) for electrification of school bus fleets by 2030?

Answer: _____

Q5.

Which body is responsible for infrastructure development under the policy?

Answer: _____

Q6.

Until the end of what is existing petrol and diesel vehicles registered in Delhi permitted to operate?

Answer: _____

Q7.

What is the total planned investment under the policy (in crore rupees)?

Answer: _____

Scheme numbers check

Many families spend a steady share of their income on electricity, and a rooftop solar programme offers one way to reduce that cost. The PM Surya Ghar: Muft Bijli Yojana is built around this idea. It encourages households to install solar panels on their rooftops so that the home can draw power from the sun. The scheme is described as the largest programme of its kind in the world, which reflects how many homes it is meant to reach. Because panels can be costly for ordinary families, the government offers financial support in the form of a subsidy that lowers the share of cost paid by each household. The basic goal is to give households free electricity up to a set number of units. The programme has also drawn outside finance. An international development bank has approved funds to support India's rooftop solar programme, which shows that the effort has attracted attention beyond the country. Alongside the household scheme, the government promotes a model solar village idea. Under this idea, villages are encouraged to become self-reliant in energy. Eligibility depends on population size, and special category states follow a lower threshold. Taken together, these measures link clean energy with everyday household life and with village-level independence. Such schemes also show how energy policy can reach households directly.

Q1.

How many Model Solar Villages are to be established in each district? (number)

Answer: _____

Q2.

What is the maximum subsidy on rooftop solar panel installation under the scheme? (in per cent)

Answer: _____

Q3.

How many crore households are targeted for rooftop solar systems by 2027?

Answer: _____

Q4.

How many units of free electricity per household does the scheme aim to provide? (in units)

Answer: _____

Q5.

How much did the World Bank approve to support India's rooftop solar programme under this scheme? (in USD million)

Answer: _____

Q6.

Above what population is a village eligible for a Model Solar Village in general states? (in persons)

Answer: _____

Rationale and Limits Check

Foodgrain entitlements under the National Food Security Act are linked to categories of beneficiaries. Within the Antyodaya Anna Yojana, the present design gives a single fixed amount to each household, so the amount a person gets depends on how many people share the household. The Union Government has argued that this design produces inequities inside the category. A

revised design would calculate the entitlement for each individual, while keeping a ceiling for each household so that large families do not receive unlimited grain. The government expects this to link allocation more closely with what people need to eat, and to make treatment across categories more uniform. The proposal does not, however, tackle one important concern in the system. Readers should remember that the amendment is still a proposal under discussion, and that its aims and limits are described in the booklet. The discussion covers the logic of the change and its effect on different households. The rules discussed here are a useful base for answering questions on this theme. Each part of the revised design is linked to a clear purpose, and the passage is meant to help a reader connect the purpose with the mechanism that the government has described for achieving it.

Q1.

What is the maximum foodgrain cap per AAY household per month under the proposed design? (in kg)

Answer: _____

Q2.

Under the current NFSA design, how many kg per person per month does a Priority Household receive? (in kg)

Answer: _____

Q3.

How many crore people were covered by the extra 5 kg of free foodgrains given to NFSA beneficiaries? (in crore)

Answer: _____

Q4.

What term describes small households receiving more foodgrain per person than larger households? (three words)

Answer: _____

Q5.

How many kg per month would each individual in an AAY household receive under the proposal? (in kg)

Answer: _____

Q6.

Which Section of the NFSA 2013 does the amendment modify? (in the form 3(x))

Answer: _____

Brexit and the UK's exit from the EU

The European Union is an economic and political union, and it allows free trade among member countries without checks or extra charges. Membership was not permanent, however. A national vote in the UK led to a decision to leave, and the process that followed involved long political debate.

Once the decision was made, the UK had to plan a different future. Leaving the bloc meant losing the market access that membership gave, so London began looking for new trade partnerships to support growth. The arrangement that governed the exit also allowed a phase in which Britain continued to follow EU laws and rules for a set period. The change marked a major shift in Britain's trade position.

Other countries were changing their trade choices too. Many western nations wanted to reduce their dependence on China, and several saw India as a China-plus-one alternative. At the same

time, geopolitical tensions and tariff disputes encouraged governments to seek stable and predictable trade relations. This reflected a wider shift in how governments viewed their trade relationships.

India also reshaped its approach. Rather than remaining in larger regional groupings, it moved its focus toward bilateral agreements that protect its interests. Such agreements are seen as a way to reduce uncertainty for business and long-term trade.

Q1.

In which year did the UK join the European Economic Community, the body that later became the EU?

Answer: _____

Q2.

For how many years was the UK an EU member before it ceased membership? (in years)

Answer: _____

Q3.

Approximately how many million people opted for Brexit in the June 2016 referendum? (in million, one decimal place)

Answer: _____

Q4.

On which date did the UK formally leave the EU?

Answer: _____

Q5.

Until the end of which year did the transition period under the withdrawal agreement run?

Answer: _____

Q6.

In which month of 2016 was the Brexit referendum held?

Answer: _____

Q7.

For more than how many years did the UK face political turmoil before formally leaving the EU? (in years)

Answer: _____

Currency Management Basics

Currency management in India is shared between the government and the Reserve Bank of India. Currency and coinage fall within the legislative domain of the Union government, and the central bank handles much of the day-to-day work. The RBI issues banknotes, estimates how much currency the country requires and tries to maintain an adequate supply of notes. It also ensures that the notes in circulation are of good quality. Banknote designs and materials are approved by the government, based on recommendations from the RBI Central Board. Coins follow a different path. The government designs and mints them, and once minted they are supplied to the RBI. The RBI then distributes coins to banks and the public through its currency management network. Banknotes themselves are printed at facilities run by two different kinds of organisation, one a government enterprise and the other a company owned by the RBI. Together they print notes in many denominations for the whole country. Each body has a clearly defined role in the system. Banknote printing and coin production are handled through different channels, so the roles are easy to confuse. This division of work is a useful theme for economics and current affairs, because it shows how government and central bank responsibilities are separated.

Q1.

In which year did the RBI introduce the Clean Note Policy?

Answer: _____

Q2.

In which year was the Reserve Bank of India Act enacted as the principal legal framework for issuing banknotes?

Answer: _____

Q3.

How many currency printing presses does SPMCIL operate in India? (in number)

Answer: _____

Q4.

In which Indian city is the SPMCIL currency printing press in western India located?

Answer: _____

Q5.

In which Indian state is the BRBNMPL currency printing press at Mysuru located?

Answer: _____

Q6.

How many government-owned mints manufacture coins in India? (in number)

Answer: _____

Rail Corridor Facts

The Mumbai-Ahmedabad High-Speed Rail Corridor is a project between India and Japan. It links a city in Maharashtra with a city in Gujarat. The project draws on Shinkansen technology, and it forms part of India's National Rail Plan. The route passes through Gujarat, Maharashtra and Dadra and Nagar Haveli. Japan will supply train sets for the line, and one model, the E10, reflects a design partnership with a UK-based firm. Financing has come largely from Japan through a JICA loan that carries a very low interest rate. The implementing body is the National High-Speed Rail Corporation Limited. One stretch, between Surat and Bilimora, is scheduled to be completed before the rest of the corridor. India is expected to be the first country outside Japan to adopt one of the Shinkansen models that Japan will supply. The stations are located in both Gujarat and Maharashtra. The project is described as a flagship in the partnership between India and Japan. The completion of the entire corridor is scheduled for a later date than the Surat-Bilimora stretch. Taken together, the route, funding and train details show how the project combines Japanese technology with Indian infrastructure goals. The booklet gives several figures for distances, funding and timelines. Each of these points is drawn directly from the booklet's account of the project.

Q1.

What is the total length of the Mumbai-Ahmedabad High-Speed Rail Corridor? (in km)

Answer: _____

Q2.

How many stations does the corridor have in Gujarat? (number)

Answer: _____

Q3.

Which Japanese company designed the E10 Shinkansen train that India is to adopt? (name)

Answer: _____

Q4.

Japan's JICA loan finances more than what percentage of the project? (number, in per cent)

Answer: _____

Q5.

For how many years is the JICA loan repayable? (number)

Answer: _____

Q6.

How many Shinkansen train sets will Japan provide to India? (number)

Answer: _____

Q7.

By which year is the full Mumbai-Ahmedabad corridor to be completed? (year)

Answer: _____

Earth Summit recall

The United Nations Conference on Environment and Development was a major meeting held in Brazil, and it is widely remembered as the Earth Summit. Its central aim was to make the world see that environmental protection and sustainable development had to be pursued together. The conference adopted several documents. The first was a short statement of guiding principles, which stressed the precautionary approach, the polluter pays principle and common but differentiated responsibilities. The second was an action plan that was not legally binding, but it addressed poverty, sustainable consumption and the protection of fragile environments. This plan gave a stronger role to major groups such as women and indigenous people, and it offered a framework for action at local, national and global levels. The third document dealt with forests, and its principles were also not legally binding. These principles covered the conservation of forests and the sustainable management of all types of forests. Taken together, the outcomes of the conference laid part of the groundwork for later international agreements, including several that followed in the years after the summit. Many of these ideas were later revisited at summits held over the following decades, which kept the discussion active. Its outcomes were framed as guidance and action plans rather than as binding treaties.

Q1.

How many Guiding Principles does the Rio Declaration set out? (answer in number)

Answer: _____

Q2.

Which Brazilian city hosted the 1992 UN Conference on Environment and Development? (name the city)

Answer: _____

Q3.

Which non-binding action plan for sustainable development came out of the Earth Summit? (name it, two words)

Answer: _____

Q4.

In which year was the Rio+20 Conference held? (year)

Answer: _____

Q5.

Which city hosted the 2002 World Summit on Sustainable Development, also known as Rio+10?
(one word)

Answer: _____

Q6.

Which agreement, whose foundation was partly laid by the Earth Summit, is listed with the year 2015? (name it in two words)

Answer: _____

Policy and Institutions Check

A government policy framed in recent years changed the rules for India's space sector. It allowed non-government entities to take part across the complete space value chain. Several institutions now shape the sector, each with a distinct role. NewSpace India Limited is one of these bodies. Antrix Corporation is another body in this group, and it promotes space products, services and technologies. IN-SPACe acts as a single-window regulator for private space activities. It also runs a seed fund scheme that supports startups and MSMEs with grants. Foreign investment is governed separately by the FDI Policy, and the limits differ across segments. Satellite manufacturing and operations, launch vehicles and spaceports, and satellite components and subsystems are listed as separate segments. The limits therefore depend on the segment in which a company works. The segment rules guide foreign investment in each area. Private firms are now active in building launch vehicles and satellites. Recent examples of private work include Skyroot Aerospace, CosmoServe Space and Cosmos Diamonds. Both government and private entities now operate within the same framework. Each institution has its own objectives and an office location. The sector now has a regulator, a commercial body and a marketing body. Together with the policy, these bodies shape how private firms enter India's space sector.

Q1.

In which year was the space policy that opened the complete space value chain to non-government entities framed?

Answer: _____

Q2.

In which year was NewSpace India Limited established?

Answer: _____

Q3.

Up to how much grant, in crore rupees, does the IN-SPACe Seed Fund Scheme provide to startups and MSMEs?

Answer: _____

Q4.

What is the automatic-route FDI limit (in per cent) for launch vehicles and spaceports?

Answer: _____

Q5.

In which city is the headquarters of IN-SPACe located?

Answer: _____

Q6.

In which year was Antrix Corporation established?

Answer: _____

Q7.

NewSpace India Limited is the commercial arm of which organisation?

Answer: _____

Indian Railways: facts and figures

Railways came to India in the mid nineteenth century, when the first line was opened between two cities during the tenure of a Governor General. The network is now organised into administrative zones, and its tracks are of different widths. The country classifies these tracks into three groups based on the distance between the rails. Each zone manages a part of the national network. Some lines run through hilly terrain, and a few of them are known as mountain railways. In recent years, the government has focused on upgrading stations, raising speeds and adding safety systems. New high-speed trains have been introduced on several routes, including services with names such as Tejas and Humsafar. One long project links Maharashtra, Goa and Karnataka. A financial arm supports the investment that such projects need. Several new schemes also aim at redeveloping stations and cutting energy use, which shows that the network is being modernised in many areas at once. Track width is one of the ways the network's lines are described and compared. Several of these changes were announced in the same period, which shows the scale of the planned upgrades.

Q1.

In which year was the first railway line in India introduced, connecting Bombay to Thane?

Answer: _____

Q2.

Under which Governor General was the first railway line in India introduced? (name only)

Answer: _____

Q3.

How many Railway Zones does India have? (number)

Answer: _____

Q4.

What is the length of the Konkan Railway route, from Roha to Mangalore? (in km)

Answer: _____

Q5.

What is the width of the Broad Gauge track in India? (in metres)

Answer: _____

Q6.

Which station near Bhopal will become India's first private railway station? (name of station)

Answer: _____

Q7.

Which railway zone is the largest in India? (name of zone)

Answer: _____

Final and Awards Recall

The final of the 2026 FIFA World Cup was decided by a single goal, as Spain defeated Argentina in New Jersey. The result came at the end of a tournament that produced several record-setting performances. The tournament recognised outstanding individuals as well as teams, and several awards were presented at its close. The Golden Ball is given to the best player of the tournament, the Golden Boot goes to the leading goalscorer, and the Golden Glove honours the best goalkeeper. A separate award goes to the best young player, and a Fair Play Trophy was also presented. Each individual award carries its own title, so a player can win one without winning the others. Prize

money for teams is performance-based, so the amount a team receives rises with the stage it reaches. The champion receives the largest share, followed by the runner-up, the third-place team and the fourth-place team. Teams eliminated in the group stage still receive a payment, and the total amount distributed among all 48 teams runs into hundreds of millions of dollars. Taken together, the individual awards and the performance-based payments show how the tournament rewards both excellence and progress through the competition. The difference between individual awards and team prize money is an important distinction to keep in mind.

Q1.

How many goals did the Golden Boot winner score in the 2026 tournament? (number)

Answer: _____

Q2.

Who won the Golden Glove as the tournament's best goalkeeper?

Answer: _____

Q3.

Who won the Golden Ball as the best player of the 2026 tournament?

Answer: _____

Q4.

In which minute of the final did Ferran Torres score the winning goal? (number)

Answer: _____

Q5.

What was the prize money paid to the champion team, in millions of dollars? (number)

Answer: _____

Q6.

What was the total performance-based prize money for all 48 teams, in millions of dollars? (number)

Answer: _____

Q7.

Which team secured third place at the 2026 FIFA World Cup?

Answer: _____

Economy and statistics: typed answer recall

The World Bank sorts economies into four income groups using Atlas gross national income per capita, and it revises the cut-off values every year to account for global inflation. Thresholds are stated in current US dollars, and classifications remain in force for the financial year that begins on July 1. Because of this annual cycle, a country can move between groups as its economy grows or its figures are revised. The Atlas method averages exchange rates over several years, which softens the impact of short-term currency swings. The statistics ministry has launched a new monthly index that measures the real output of the formal services sector against a base year. It is the services counterpart of the index of industrial production, and it uses a fixed-weight method based on gross value added to remove the effect of price changes. The index covers formal service sub-sectors that account for a large share of the services economy. Data for April 2026 showed that most of these sub-sectors grew at double-digit rates. Investment flows also moved sharply. A UN agency report said that India's foreign direct investment inflows rose markedly in 2025, lifting India up the global rankings, even as worldwide flows stayed uneven. Indian companies also increased their overseas investment during the same year.

Q1.

How many formal service sub-sectors does India's new monthly services index cover? (give a number)

Answer: _____

Q2.

In how many of the covered sub-sectors did growth reach double digits in April 2026? (give a number)

Answer: _____

Q3.

What is the base year of the new services production index? (give the financial year)

Answer: _____

Q4.

India's GNI per capita in 2025 was how many US dollars? (give the number, in US dollars)

Answer: _____

Q5.

By how many per cent did India's FDI inflows rise in 2025? (in per cent)

Answer: _____

Q6.

After the 2025 rise, what was India's rank among global FDI recipients? (give the ordinal number)

Answer: _____

Q7.

Since which year has India been classified as a Lower-Middle-Income economy by the World Bank? (give the year)

Answer: _____

Tibet River and Fault Check

Scientists have raised safety concerns about a large hydropower project planned on a major river in Tibet. The concern arises from the local geology. The project's reservoir area is crossed by an active tectonic fault, which lies in the eastern Himalayan region of south-eastern Tibet. Such a fault is part of a larger fault system, and in this region that system is created by an ongoing collision between large tectonic plates. The river itself is a major waterway that carries water from Tibet into South Asia. As it flows onward, it takes different names in different regions, passing through Indian states before it reaches the plains and crosses into the neighbouring country. Local residents and officials would need reliable information before any such decision is taken.

Q1.

After it enters India, what is the river called on its first Indian course? (one word)

Answer: _____

Q2.

Through which Indian state does the river flow as the Brahmaputra? (one word)

Answer: _____

Q3.

What is the name of the river when it enters Bangladesh? (one word)

Answer: _____

Q4.

Through which Indian state does the river first enter India? (two words)

Answer: _____

Q5.

What is the name of the hydropower project in Tibet that faces safety concerns? (one word)

Answer: _____

Q6.

Between which two tectonic plates is the ongoing collision that creates the fault system? (give both names)

Answer: _____

Q7.

What is the name of the active tectonic fault in south-eastern Tibet? (two words)

Answer: _____
